We learned from those qualified [illegible] almost fatal to jump [illegible] water in an emergency wearing [illegible]. Leather ones can be worked or kicked off but rubber [illegible] who has to maintain [illegible]. The tug boat captain was [illegible] age, lean and wiry, an[illegible] fellow to carry on a conversation with. He looked [illegible] square in the face yet was pleasant enough when conversation was general. The talk drifted to boats [illegible] (we believe) who really knew quite a number, but [illegible] a boat as being a "little" boat. "Little boat, what do you mean, ship?" snapped the captain. And the conversation assumed a more natural tone. The young ship mate who spoke with a slight but pleasant lisp, told of his experience in a China typhoon. "Pretty nearly everything on deck went" he said, "and I was in the chart house feeling pretty scared. But we worked our way out of it." The ex-soldier who worked at Esquimalt told of the tough weather they had experienced that day. Soon after starting the men were drenched, but work went on uninterrupted all day. We saw him come in after his eight-hour shift and he surely was wet and half frozen. The captain left and as he was going out the door somebody said "you'll need your overcoat" and as the door was closing, he answered back "I never wear one."

Willie Was the Bus Driver's Name

There was no doubt about it. Everybody knew Willie, greeted him and hailed him. Saturday afternoon we went out to Sidney, driving through some very nice country of pastoral kind. Sidney is a small town situated on a peninsula. It formerly had a large lumber mill but this was abandoned and as if to make up for it, Sidney now has a sea-plane base, with the activity, commercial and otherwise, that goes with it. Around Victoria people are quite cordial. People cheerfully say hello and good-bye to bus drivers, yet carry on no conversation while in the bus. This is forbidden. Everybody apparently knew this bus driver as he was continually being greeted with "Hello Willie" and "Good-bye Willie." In addition, pedestrians on the country road waved and Willie waved back. This little touch of courtesy perhaps does not mean much in a busy world but we thought it fitted in well with the pastoral surroundings and made life more pleasant for those living there.

Coming back to Victoria we registered at the Strathcona hotel and as soon as we wrote the word "Tofield" the clerk said, "Tofield, well, well. Is Bob Logan still alive?" Then ensued quite a conversation regarding Tofield of 1907, in which Mr. Bower, the clerk, had an advantage over us. He asked about several people, including Frank Pruden.

The next morning we left for Nanaimo and enroute met the Welshman who married the Norwegian lady.

NEXT WEEK—JOHN BARLEYCORN SCORES A KNOCKOUT.

POPULARITY

Ever increasing public preference for Alberta Beers is conclusive evidence of their popularity—a POPULARITY merited by the downright goodness of products produced by efficient well-conducted institutions. Make your next order ALBERTA BEER. The taste test will tell you why "Alberta Beers" are so popular.

the BREWING INDUSTRY of ALBERTA

"BEERS THAT ARE BEST"

Dated at Tofield this 5th day of May, 1938.

J. W. CHAPMAN,
Secretary-Treasurer.

Auctioneer Pays As Sale In N.H. Goes in Reverse

WESTMORELAND, N.H., May 6—(AP)—"Who'll give me 10 cents for these?" rang out the clear voice of Auctioneer James A. Hall, holding up a half-dozen brooms and mops.

Profound silence prevailed.

"Who'll give me a nickel?"

Not a peep from the prospective buyers.

"Who'll take them away if I give them to you?"

There was a titter among the fairer sex but no one spoke.

"Who'll take them away if I give you a nickel?"

A meek and doubting voice in the front said "I will."

Mr. Hall handed over the articles and offered the man a nickel. The latter took it.

The auction moved on again.

Too Much of a Good Thing?

"I've asked Mr. and Mrs. Smith to dinner at seven, Mary, but I think we'll give them a quarter of an hour's grace," said Mrs. Biggs.

"Well, ma'am" replied the maid, "I'm religious myself, but I think that's rather overdoin' it!"—Life, Australia.

'THE TOFIELD MERCURY

Vol. XVIII, No. 13 Thursday, May 19th, 1938 $2.00 Per Year. To U.S.A. $2.50

BELIEVE IT OR NOT

The other day a gentleman walked into the Rural Municipal Office to pay his taxes. In that rather consoling tone of voice used for such occasions, he was told the amount.

"You know," he said, "The Municipal taxes are not high enough. There is much road work to be done and it cannot be done without money and to get the money the taxes should be raised."

There has been 999,999 times when it has been claimed taxes were too high. But only once has a ratepayer said they were too low.

Therefore, if upon your next visit to the Municipal office you should see a red mark on the wall you will know what it is there for.

UNITED CHURCH NEWS

Miss Lillian Carscadden, Secretary of the Girls' Work Board, will visit Tofield on Friday evening, 20th of May at 8:15 p.m. Miss Carscadden will address the Mothers of C.G.I.T. Girls and all women interested in girl's life. The co-operation of parents is most essential in getting the most out of an organization like the C.G.I.T. and all women interested are cordially welcome.

On Saturday beginning at 10 a.m. Miss Carscadden and the C.G.I.T. leaders will hold a conference with the C.G.I.T. groups. It is expected there will be groups from Ryley, Lakeshore, Ardrossan and Cooking Lake.

This will be an interesting gathering and with such an outstanding leader to guide and take part in their discussions, should help the girls a great deal.

In the afternoon there will be recreation in various forms. Refreshments will be served at the close of the sessions.

On Sunday evening, May 22nd, the service in the United Church at 7:30 p.m. will be in charge of the C.G.I.T. groups. The girls will conduct the whole service.

The Junior Choir will assist in the music.

Miss Carscadden will be guest speaker.

All are cordially invited to this service.

LOCAL & PERSONAL

Mr. and Mrs. H. E. Rogers visited the city on Friday last where they attended the University of Alberta Convocation exercises. Max Rogers graduated this year.

Mr. Stewart Harrison graduated this year from the University of Alberta. He is now connected with a drug store at Waskatenau.

Week end visitors to Edmonton included Alvin Schultz, T. Nomeland, Jean Baptist, Malissa Kalall, Loretta Ross, Murray McIleffey and Mr. O. P. Thomas.

Miss Lucille Stevenson returned to Clive after spending some time at her home here.

Mrs. O. P. Thomas is a patient in the Royal Alex hospital in Edmonton.

The pupils of Woodlawn school entertained their parents, neighbors and a few town ladies last Tuesday afternoon to a program of solos, duets, choruses, etc. After chatting and viewing some of the school work an enjoyable lunch was served to guests and pupils by the teacher and scholars of Division three. Thanks are due all who accepted the invitation at such a busy time of the year and their interest in the children was appreciated.

Rev. and Mrs. Wallis, Mr. and Mrs. J. W. Robinson, Isabel and Edith were Sunday dinner guests at the home of Mr. and Mrs. Jacques of Ardrossan. All attended the afternoon farewell service at Ardrossan. The church was packed and at the conclusion of the service, a lovely auto rug was presented to Rev. and Mrs. Wallis from the congregation and friends of the district.

Holy Trinity Junior W.A. presented Rev. and Mrs. Wallis with a lovely jardeniere at a farewell party held last Wednesday after school at the J. W. Robinson home.

Our report of the Tofield district's part in the Camrose festival is being held over until next week when we will publish a complete list of prize winners.

Mr. and Mrs. J. W. Gray and two sons left for Summerland, B.C. where they will make their home in the future.

The Ketchamoot Youth's Training Club will meet at the home of Miss Edith Davison on Wednesday, May 25th at 2:30 p.m.

Northern Alberta Amateur Club, Edmonton presents a concert at Variety Theatre, Saturday May 21st. Local talent invited to participate. Admission: Adults 35c, Children 20c.

AMISK CREEK

Our heart felt sympathy is extended to Mr. C. Ward and family in their sad bereavement. The death of Mr. Ward's father of McLaughlin occurred on Tuesday, May 3rd.

The Ladies' Aid met at the home of Mrs. C. Ward on Tuesday, May 3. Mrs. P. Flaaten and Mrs. S. C. Olson were elected as delegates for the W.M.F. convention which they attended in Edmonton last week end. Many members and visitors were present.

A Mothers' Day Program was given in the Church on Sunday evening, May 7. A nice program was rendered and [illegible] were given to the Mothers in their homes.

Sunday School has been organized and commenced last Sunday. Teachers were Arnold Berg and Glenn Olson.

Pupils of Amisk Creek School who took part in the Camrose Festival on Friday acquitted themselves very well.

Mrs. C. Erickson visited in Edmonton at the Misericordia Hospital on Sunday.

U.F.W.A. which was to be held at the home of Mrs. I. C. Olson on Thursday was postponed due to the stormy weather.

Mr. A. Ericson, Mr. and Mrs. C. Ericson and son Donald visited at Lake Demay on Sunday.

Edmonton Luther League will present an exchange program in the church Sunday, May 22, commencing at 8 o'clock. Everyone is cordially invited.

Spring's work is well advanced in this district though not yet completed.

Farewell Party For Rev. & Mrs. Wallis

Last Wednesday evening the members of Holy Trinity Congregation held a Social evening in the Institute Rooms in honor of Rev. and Mrs. Wallis who have been transferred to Camrose. After games, singing and lunch served by the ladies, a purse of money was presented to the popular minister and his wife as a token of friendship and appreciation of their efforts with us. Rev. Wallis has been with us seven years this June and Mrs. Wallis, a bride of nearly three years has spent practically all her life in Tofield. It is with many regrets that parishioners and friends bid them farewell, but our best wishes follow them to Camrose and we trust they will be happy and successful there. We shall be glad to welcome them back at any time they are able to visit here.

Variety Entertainment

On Saturday evening the Northern Alberta Amateur Association are presenting an evening's entertainment of merit. The programme will include vocal and musical numbers, tap dancing, acrobatics, etc. The company comes well recommended and a program pleasing to a large audience will be given.

Programme commences at 9.00 p.m. sharp. Admission: Adults 35c; Children 20c.

A Tithe That Binds

"Look what the Lawd's done fo' you all bredern!" shouted the parson. "Give him a tenth. A tenth belongs to de Lawd."

"Amen!" yelled a perspiring member of the congregation, overcome by emotion. "Glory to de Lawd, give him mo'—give him a twentieth!"

BARDO

The wind storm last Thursday did considerable damage in this district. A. Moen's, I. Moen's, and H. Yoder's barns, M. Hagen's, T. Botem's and F. Hill's granaries, E. Stauffer's windmill, O. Hellberg's machine shed, five Power Line poles and a large number of telephone poles went down.

The Bardo school made a good showing at the Musical Festival in Camrose, winning [illegible] diplomas. The [illegible] Tofield [illegible] About twelve [illegible].

The Bardo Ba[illegible] at the A. Steen home last Monday night and organized for the season. Officers—Mgr. I. Foshaug, Captain L. Stauffer, Sec-Treas. L. Foshaug. League delegates A. Steen and E. Steen. A league may be formed with Tofield (Intermediates) Round Hill and Bardo. It was decided to hold the annual Sports Day on Saturday, June 18th.

Congratulations to Miss Esther Ness who was awarded her B.A. degree at the University Convocation last Friday.

Edmonton visitors over the week end were: Mr. and Mrs. I. Ness and Merton, Alvo and M. B. Ness who attended the Convocation exercises.

Mr. and Mrs. C. Johanson of Clover Bar and Mr. and Mrs. R. Burt of Edmonton spent Sunday at the O. Johanson home here.

KINGMAN

There will be Services at the Lutheran church on Sunday afternoon at 3 o'clock.

Mr. and Mrs. J. K. Dettwiler and daughter spent last Sunday afternoon at the Amos Hostettler home.

Mr. Earl Skalen fell and dislocated his shoulder last Friday, but is getting along fine now. Mr. Norman Wideman is helping him at the [illegible].

The [illegible] Social and Amateur program was well attended last Saturday evening, the Athletic Club clearing forty-nine dollars. Winners in the Amateur program were: 1st, Clifford Currie, $3.00; 2nd, Marie and Nina Lawson, $2.00; 3rd, Harold Overson $1.00. Mr. Albin was chairman of the meeting.

Mrs. Frank Hardin spent last Saturday in Edmonton visiting her daughter Martha, who is attending school there.

Monday was clean up day at the school house. The school children had a weiner roast in the afternoon.

Miss Inga Johnson is at Okotoks to attend the wedding of her niece, Miss Inez Thorson.

All Male Chorus members are urged to attend an important meeting on Monday May 23rd.

Alberta Crop Report No. 1

Issued by Alberta Department of Agriculture—Edmonton

[illegible] in all of the Province [illegible] west of Edmonton and the Peace River District, seeding in [illegible] later than usual [illegible] weather and subse[illegible] retarded its progress. [illegible] large area, only a [illegible] of the wheat crop [illegible] about ten per cent [illegible] The eastern po[illegible] has been most [illegible] Lethbridge, Calgary [illegible] and Athabasca [illegible] seventy-five [illegible] of wheat seeded [illegible] moisture [illegible] generally more favourable than [illegible] have been for many [illegible] The weather has remained [illegible] growth of cereal [illegible] somewhat retarded [illegible] early sown wheat [illegible] warmth to stir [illegible] The districts west of Ed[illegible] and the Peace [illegible] no considerable [illegible] moisture, and [illegible] quite dry. How[illegible] surface moisture for germination [illegible] and warmth to [illegible] growth.

[illegible] Province, the [illegible] and growth [illegible] The windstorm of May 12th, [illegible] drifting damage in [illegible] However, [illegible] drifting has been [illegible] date no widespread damage has been reported.

[illegible] south-eastern part of the [illegible] has been unusually [illegible] precipitation, [illegible] reserve in [illegible] safe to [illegible] assured with[illegible] June and [illegible] in July.

[illegible] through in ex[illegible] Alfalfa, Clovers, Fall Rye are progressing favourably [illegible] and pastures are in pros[illegible] There is a marked evidence of [illegible] seeding down to [illegible] this year in Central and [illegible]

[illegible] are made for adequate [illegible] in districts where [illegible] observed last Fall. The hatch has been delayed by [illegible] cool weather.

From a live stock point of view the winter in a large portion of the Province was much more acceptable than has been the case for the past [illegible] three years. In most areas the [illegible] came through the winter in fair condition with but small losses. In a portion of the central part of the south-east corner of the Province, local winter conditions created an unusually hard stock season, and in this area the stock appears to be in rather thin condition.

Lambing appears to have been accompanied by smaller losses than usual, with the major loss of the period being due to one or two unusually severe blizzards during lambing time. Sheepmen suffered some losses in their own flocks due to these same blizzards.

In spite of cool weather, [illegible] moisture over the range lands of the South [illegible] the grass [illegible] fairly well, and the range stock which were generally in low condition in the spring, are now improving and thriving on the new grass.

The brighter prospect [illegible] of the Province for a [illegible] year is leading to a slight [illegible] interest being shown in [illegible] Live stock markets can only be termed as fair, with about normal run of stock at present time.

Some relief feed continues to move to last year's drought districts for work horses through the spring work period. Seed grain has been supplied to drought area farmers under the usual regulations.

Speed Work On Alberta Roads

Alberta's road improvement program for this year, under which $1,[illegible] will be expended on main highways construction, is getting well under way.

In all sections of the province advantage is being taken of spring weather conditions to advance the work as rapidly as possible, according to information given to officials of the Alberta Motor Association.

Work is under way on the main highway between MacLeod and Okotoks, while the public works department also is preparing to lay bituminous surfacing on the main road section between Ponoka and Wetaskiwin, on the Edmonton-Calgary highway.

Just what the province will do on the Jasper highway this year has not been definitely determined as this will depend upon the federal estimates.

It is anticipated by the provincial authorities that the dominion estimates will include financial aid for highways leading into the national parks. In such case, this would have a bearing upon the provincial expenditures on these roads.

The province also proposes to do some work this year in the Grande Prairie district, where gravelling of the main road will be undertaken. Last year over 100 miles of the northern highway were gravelled.

Gay Hues Gaining In Drivers' Favor

"Color-consciousness" among Canadian motorists is rapidly increasing, and the conventional dark blue automobile may soon become conspicuous by its rarity. It is revealed by a [illegible] survey of auto body hues.

Indicative of the trend toward lighter shades is the fact that whereas 63 per cent of all cars built by General Motors of Canada in 1930 were dark blue, only 30 per cent of the [illegible] this year have been of that color. During that same eight-year period, according to C. E. McTavish, General Sales Manager, green and brown have made slight gains in popularity; grey has risen from two per cent to second place at almost nineteen per cent, and light blue—a shade not listed for "stock" eight years ago—this year being placed on ten per cent of all models.

In addition, according to Mr. McTavish, where special colors are ordered by the retail purchaser [illegible] the trend on smaller models is all toward the gay and lively hues.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

The [illegible] Royal Grain Inquiry Commission has now reported after [illegible] investigation and [illegible] witnesses. The [illegible]

[illegible] Futures Market [illegible] of selling Canadian wheat [illegible] the highest [illegible] the producer.

That [illegible] should be ap[illegible] investi[illegible] required.

[illegible] the farmer [illegible] expense, and [illegible] grain.

[illegible] Wheat Board [illegible]

[illegible] Marketing So[illegible] that [illegible] Australian [illegible] and not necessarily of large size.

That there has been in the past too [illegible] talking in con[illegible] of co-opera[illegible] that this has [illegible]

That the stabilization operations of the McFarland Board, while they provided the producers with higher prices, were injurious to the sale of Canadian wheat.

That the Murray Board did not pro[illegible] interests.

[illegible] Wheat Board should not be dissolved immediately.

Now that the questions which have been bothering many people for some time have finally been answered by a most competent and disinterested authority, I suggest the time has come to let bygones be bygones, to forget past differences of opinion, and for us all to work harmoniously together to deal with the three serious wheat problems which still must be solved. To reduce the cost of wheat production—To improve the quality of our wheat—To win and retain the goodwill of the World's buyers.

Let us all pull together with a friendly spirit then I am sure will these objects be attained, and the farmers' welfare be improved.

Following factors have tended to raise prices: France still further de[illegible] the France—Crop conditions [illegible] some European countries—[illegible] decrease indicated in Canadian spring grains acreage—Algeria and France reported purchasing [illegible] Report of increased rust damage in Oklahoma—Netherlands to accumulate emergency grain stocks.

Following factors have tended to lower prices: U.S. winter wheat crop officially estimated at 754 million—Western Canadian seeding makes favorable progress—Beneficial rains in the U.S. spring wheat belt—Netherlands increase import-tax on wheat, oats, barley and corn.

Shocking Thought

"You hammer those nails like lightening."

"I'm fast, you mean?"

"No, you never strike twice in the same place."

Fighting Game Fish Across Canada

HOLIDAY opportunities in the thousands of lakes, rivers and streams of [illegible] fishing opportu[illegible] unexcelled an[illegible] The wide stret[illegible] sion are literally [illegible] forest and lake [illegible] with game fish and [illegible] where lovers of the great outdoors can find a [illegible] to suit their every whim.

Fishing conditions [illegible] in Canada and the species of game fish so numerous that a [illegible] booklet is required [illegible] all the fish and regulations of the different sections. Deep-sea fishing is found on both ocean coasts [illegible] tuna off Nova Scotia and equally large sharks near [illegible] five pound [illegible] bass of the [illegible] lake of the [illegible] bring joy to the hearts of anglers in the Maritimes.

These few highlights of Canada's many fishing opportunities illustrate why Canadian sportsmen [illegible] every year to [illegible] from the United States and overseas. Canadian [illegible] and regulations vary so widely in different [illegible] that anglers planning to visit certain districts would do well to find out all about them in advance from A. O. Seymour, general tourist agent Canadian Pacific Railway, Montreal, or from fishing booklets obtainable at all Canadian Pacific offices.

THE TOFIELD MERCURY

A Weekly Newspaper Published At
Tofield, Alberta
W. Worton, Publisher

THE EAST AROUSED—

DURING THE EARLY months of the present Alberta Government's term of office, a number of eastern papers wrote articles concerning Alberta politics in which there was a degree of levity. But if they ever felt like joking they have now changed their minds, for judging by the present tone of their articles, they are in deadly earnest.

The present outburst has to do with three acts passed at the last session of the Alberta Legislature, namely, The Securities Tax Act; The Home Owners Security Act; The Limitation of Actions Act 1935 Amendment Act 1938. In addition to much adverse criticism on the part of Eastern newspapers, many western newspapers also criticize such wholesale cancellation of debt. And to make the thing almost unanimous, the Edmonton Chamber of Commerce, the Winnipeg Board of Trade and the Toronto Board of Trade have petitioned the Dominion Government urging the disallowance of five Alberta Acts, the other two being The Debt Adjustment Act 1937 Amendment Act 1938; and the Tax Recovery Act 1938.

To give Mercury readers some idea how serious eastern papers view this legislation, we give one or two quotations. "The Globe and Mail," heads an editorial of over a column in length with "Theft is still a Crime." "The Toronto Telegram" says: "Dominion Must Act to Check Alberta's Insanity," and goes on to say:

> "National unity is a fine thing and it is the desire of all patriotic Canadians, but if Alberta is to continue to play the mad dog, it would be better for the rest of Canada if that province were left to sink or swim by its own endeavors."

The Acts with the exception of the Securities Tax Act are designed to help the Alberta debtor. The exception is a two per cent tax on the principal sum owing on mortgages, this amount to be paid by the lender. This tax, if paid, should net the government a tidy sum. Penalties for non-payment are drastic and the time limit is June 1. The other acts which are more or less inter-related, will, if they become law, relieve many people of debt.

As a country editor, who everyday sees farmers pass our window and who, when looking toward the horizon can see fields change in color as the seasons roll round, our sympathies are with the agriculturalist. We like to see this district, and other districts too, blessed with good crops and fair prices. For those farmers who are harrassed with debt we would like to see relief afforded, but as we have stated before, we are skeptical of blanket legislation covering all cases. We are absolutely opposed to unnecessary evictions and do not believe in the sanctity of the dollar being more important then the sanctity of the home. But we do believe that a contract should be honored if possible and if not possible should be adjusted by the mutual consent of both parties with a possible third as mediator. It is possible in times past some creditors have been too harsh and demanded their pound of flesh. It is possible that some creditors have taken advantage of every semi-legal loop hole to side-step their obligations. But the fact remains that where credit is, confidence must be also. Destroy confidence and credit ceases to be. We are reminded of a sign we saw hanging in a bakeshop many years ago. It read: "Trust is dead. bad pay killed him."

In parliament at Ottawa, May 12th, Hon. J. Earl Lawson asked:

> "Does the government contemplate any action to deal with the situation?" asked Mr. Lawson.
>
> Hon. Ernest Lapointe, minister of justice replied that he had received many letters and telegrams on the subject and that Alberta legislation has been under review of his department since April 30. Formal petition for disallowance was expected Monday, Mr. Lapointe said.

Generally speaking, the Dominion authorities are loath to interfere with provincial legislation. They have of course, the power of disallowance and have used this power recently in respect to Alberta and previously in respect to other provinces. What they will do in response to the requests from both east and west regarding the five Acts mentioned, cannot be foretold.

The Truth Wanted!

A certain J. P. who was not over-alert, recalled a witness.

"My man," he said sternly, "you may yet find yourself committed for perjury. Only a few moments ago you told the Court that you had only one brother, but your sister has sworn that she has two. Now, then, out with the truth."—Kentish Mercury.

Canadian Pacific Railway Staff Foundation Library

Something new in group education for adults is to be found in the newly published Staff Foundation Library of the Canadian Pacific Railway. The ten books comprising this library cover all phases of the company's operations in addition to encouraging study designed to make Canadian Pacific employes better citizens. The volumes were arranged and edited by John Murray Gibbon, general publicity agent of the Company.

Publication of the books followed the requests of many employes for a reading guide and source of information on matters affecting good citizenship, such as Canadian history, geography and economics. The name "Foundation Library" has been aptly chosen because it is hoped that reading of the books will encourage company employes to further study, for which a list of other books on similar subjects has been printed in the back of each volume.

In dealing with the distribution problem the Company's Educational Committee wisely decided that in addition to presenting information on a wide variety of serious subjects, the cost must be low to appeal to the greatest number of employes possible. Sir Edward Beatty, G.B.E., K.C., LL.D. chairman and president made the cheapness possible by ruling that the company should absorb more than half the cost of the books.

Only two of the books deal specifically with the railway, its problems and its history. These books are "Canadian Pacific Facts and Figures" and "Factors in Railway and Steamship Operation." They contain a brief history of the Canadian Pacific as well as facts and figures illustrating the many activities and accomplishments of the various services of the company on land and sea. These are supplemented by interesting features such as an analysis of the organization of the company into its various departments, with a breakdown of personnel, showing the astonishing variety of work done by Canadian Pacific employes. Biographies are given of Canadian Pacific directors. Diagrams show how the Canadian Pacific dollar is earned and spent. There are numerous articles dealing with such subjects as Atlantic and Pacific fleets, cruises, coastal and inland lake services, docks, terminals and yards, shops, semi-streamlined trains as well as special chapters on different departments.

Other books are:

"Speaking in Public" revised and enlarged for use of study groups and debating clubs, by Frank Home Kirkpatrick, special lecturer in public reading and speaking in McMaster University; the University of Toronto Extension Courses, etc. Included in the book are specimen addresses by great Canadians.

"Correspondence and Salesmanship" in three parts. Part 1 is "Better Letters" by A. M Kennedy, Sir Isaac Pitman and Sons; Part 2 "The Personality of the Salesman" by William F. Gregory, B.A., [illegible] in salesmanship and vocational adviser, Western High School of Commerce, Toronto; Part 3 "Salesmanship as Applied to Railway Traffic" by Charles E. Parks.

"A Dictionary of Correct English" by M. Alderton Pink, M.A., Sir Isaac Pitman and Sons. This is a manual of information and advice concerning grammar, idiom, use of words, points of style, punctuation, pronunciation and other practical matters.

"French Self-Taught" the [illegible] System by J. Laffitte, B. [illegible] principal French master, City of London School. Of interest to Canadian Pacific people is a list of conversational phrases adapted to requirements of rail passenger traffic, telegraph business and steamship business.

"The Dominion of Canada" an economic geography, economic history and the political institutions of Canada, in three parts by N. [illegible] M[illegible]son, M.A., Herbert Heaton, professor of economic history, University of Minnesota and political institutions of Canada, adapted from a survey made by a committee of the Montreal Junior Board of Trade.

"An Introduction to Economics" for Canadian readers, by Duncan Alexander MacGibbon, professor of political economy in the University of Alberta.

"The History of Canada Through Biography" by W. J. Karr, director of English Instruction, Department of Education, Ontario. In addition to short biographies of most famous Canadians is a special section concerning the four presidents of the Canadian Pacific Railway.

"Canada Sings" containing 188 familiar songs arranged for four voices and suitable for the piano. It is ideal for home use or for those interested in forming choral societies and glee clubs.

PASTURE FOR RENT—Plenty of water. Well fenced. Apply to Geo. Yager, RR 2 Tofield, Alberta.

The Wheat Situation

Declining trade and the estimate of the United States department of agriculture of a huge winter wheat crop [illegible] at [illegible] present there are [illegible] of such a calamity but a [illegible] period of propitious weather [illegible] bring it about.

[illegible] million acres will be seeded [illegible] spring wheat in the U.S.A. and if conditions are anyways favorable a [illegible] 200 million bushels [illegible] be produced. The [illegible] has alarmed the United States [illegible] and Henry Wallace, [illegible] of agriculture [illegible]

[illegible] 24,105,000 acres is indicated [illegible] conditions very much better than have been experienced for several years. There are high hopes of a fairly substantial crop in this country, the realization of which will depend upon the rainfall in June and early July. The present probability is that Western Canada will produce a fairly large crop.

Indications of considerably larger [illegible] North America [illegible] Western Canada [illegible]

[illegible] Richardson and Sons [illegible] May 3rd and [illegible] that much of the [illegible] Canada [illegible] The letter states that [illegible] Germany and Italy [illegible] cent years.

Judge Turgeon evidently thought that some assistance from the government [illegible] of the present Wheat Board [illegible] has the power [illegible] fixing and payment of [illegible] wheat. He said [illegible] the marketing [illegible] coming crop and I do not know how long these conditions may continue after the final chapter of this report is written. In the meantime I can think of nothing better than to suggest that the Board be maintained to meet any situation which may arise."

For [illegible] crops have shown some little improvement over last week. There are [illegible] that the crop will be [illegible] though [illegible] in the northern sections of Italy. Importers do not seem the least alarmed about wheat in Canada [illegible] a bushel and the substantial decline [illegible] the scarcity [illegible] April [illegible] being buyers [illegible] large scale.—Wheat Pool Budget.

DON'T OVER-RATE YOUR BANKER

He cannot perform Miracles

★ ★

There would be more banks than grocery stores all over Canada if banks could perform the miracle of "creating" the means of payment out of nothing.

It is easy to confuse these two things:

(a) The business of commercial banking, and

(b) Control of a nation's monetary system.

Commercial banking has to do with the safe-keeping and lending of money and credit.

Control of a monetary system is a matter of national, governmental policy.

Chartered banks finance production and commerce.

Monetary policy in any country is a matter for the national government, either directly, or through a central bank.

The Dominion [illegible] established Canada's central bank in 193[illegible] Its purpose was declared by Parliament [illegible] of the Act of [illegible]

[illegible] in the best interests of [illegible] and protect the [illegible] the general [illegible] so far [illegible] monetary action, [illegible] and financial

It is for [illegible] to determine [illegible] tary policy [illegible] of deta[illegible] what is [illegible] unwise [illegible]

[illegible] with products [illegible] everything [illegible]

[illegible] them "savings" and [illegible] farmer [illegible] want to spend [illegible] deposit [illegible] account.

That is a [illegible]

[illegible] the current [illegible] are a merchant. You [illegible] penses to meet day by day [illegible] therefore always [illegible] balance in an account [illegible] which you issue cheques for your business needs.

That is a current account.

Let us say you have $1,000 in that account and you need $1,000 to meet some bills. You borrow it from the bank.

You give the manager your note and he places $1,000 to your credit as a deposit in your current account. Immediately your balance goes up to $1,000 [illegible] a loan [illegible] derived [illegible]

It is not [illegible] savings deposit [illegible] You intend to spend it [illegible] You [illegible] against it [illegible] the money for business purposes, prepared to pay interest [illegible]

[illegible] Canadian bank deposits are [illegible] current.

When its loans are increased, [illegible] lower in proportion [illegible]

A bank [illegible] for them [illegible] the proportions [illegible] has shown to be necessary to meet the day [illegible] depositors [illegible] as an automatic check against excessive lending.

Your bank cannot know just when you will walk in to withdraw your deposit, but it must be ready to pay you in full in cash, when you do turn up.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

The Mercury Visits The British Columbia Coast

SIXTH ARTICLE

"Is this the bus for Denman Island?" asked a man dark man. We did not know but passed the query along to a bus driver and found out that it was. Thus began a three hour acquaintance with an interesting traveling companion. Previous to the [illegible] Denman Island might have [illegible] a jewel of the [illegible] seas, as far as we were concerned, but it was [illegible] up in conversation, [illegible] news, and we [illegible] bathed [illegible] ram.

Boarding the bus we were enroute to Nanaimo [illegible] the famous Malahat drive. This is really a grand scenic route, the road winding up and up until one can see miles of sea surface dotted with islands partly cultivated, partly clothed in virgin forest. There was no sign of [illegible] Victoria when the bus left [illegible] as we travelled up [illegible] of recent [illegible] could be seen. [illegible]

[illegible] of almost any flower. She is a good [illegible] too. I have two children, a boy and a girl. The boy is a real Norwegian, fair and quiet, but the girl, she is dark like me. A good kid you know, but full of life. It is better for them on the farm, they can holler and shout and not annoy neighbors. I hope this thing turns out alright. "What do you think of it?" he asked. He had told us the particulars of the [illegible] and we replied [illegible] too good to be true. "That [illegible]" he replied [illegible] "I've always been lucky [illegible]" [illegible]

Arriving at Nanaimo we walked the principal street with him during his [illegible] minute layover. We really hope the farm proved to be as good as he expected and that both he and his family spend many happy years upon it.

John Barleycorn Scores a Knockout

Nanaimo is a sea port town and has a [illegible] on the southern English coast. It has one long main street which follows the water line. It is an old town as prairie dwellers estimate towns, but is quite modern as regards services, electric light, water etc. Its chief industry is coal mining, quite a lot of coal being mined there, the mines in some cases running out under the sea. There is also some logging. The town is unique in that it has two daily newspapers, formerly published from separate plants, but now published by the same concern. One of these newspapers goes back as far as 1764. We had a pleasant chat with one of the managers of the firm and it was his grandfather, who [illegible] many years ago published the first issue.

We met an old friend in Nanaimo. Among the fraternal organizations [illegible] the Independent Order of Good Templars. It was originally an American organization but is, or was 25 years ago, firmly entrenched in England. It has its ordinary, district and grand lodges, with officers with high sounding names. It has a hard and fast ritual and lodge drills are brought to a high degree of excellence. [illegible]

Nanaimo was little heard of here until a year or so ago when R. W. Pincott one fine summer day, pointed his caravan in that direction. Now there are four former Tofield families located in and near there. Mr. and Mrs. R. W. Pincott and family; Mr. and Mrs. Robert Sherlock; Mr. and Mrs. Frank Sherlock; and Mr. and Mrs. Javoler who formerly operated the tailor shop here. We called on Mr. Javoler and found him operating a well stocked tailoring establishment.

When one is travelling one must be prepared for surprises, but even [illegible] eyes popped a little when [illegible] the street we saw a familiar [illegible] the sidewalk. We had not [illegible] Mr W. Abernethy was away from home.

NEXT WEEK—THE PORTAGE

Kittens Taken From Hen So Won't Starve

MILK RIVER, May 18—A hen on the farm of Mat Thielen, near here, deserted a hatching of eggs to mother three kittens. For a day she battled off the kittens' mother and [illegible]

Council of Municipal District of Beaver Lake

No. 486 met in regular session at Ryley on May 14, 1938 all members attending.

Resolutions were passed dealing with Relief, Mothers' Allowance and Old Age Pensions, as follows:

Application of Mrs. John Koroluk for Mothers Allowance was refused.

Mrs. Mary Hawryluk's request for larger Allowance was refused while Mother's Allowance now being received by Mrs. Annie Rurka was reduced to $10.00 monthly.

Old Age Pension of Mr. Wasyl Yuchem was raised $5.00 monthly and Pension of Mrs. P. Rurka was similarly raised from $15 to $20.

Usual monthly grant was continued to Mr. W. H. Allinson of Mundare and Mr. C. E. Asp of Ryley. Relief issues to Mrs. S. Paschyshyn and Mrs. P. Ogrodnuch were ordered stopped as at April 30, 1938. Jacob Weiss was approved for $10 monthly.

Council was instructed to notify Stauffer Bros. that Council will not hold them responsible for any assistance required by Mr. P. Eggen, who [illegible] their building as his residence. It was decided to obtain necessary information and register caveats against property of indigents [illegible] the M.D. for all advances by way of relief, medical attention and funeral expenses.

Mr. Max Rolnar and also Mrs. K. [illegible] were advised to call and complete their applications for relief, [illegible]

[illegible] was appointed Pound Keeper for [illegible] John Rudy was appointed Weed Inspector for the same Division.

A vote of thanks was tendered to Mr. [illegible] for his painting of [illegible]. The painting was ordered [illegible] hung in the Council Chamber.

Information will be obtained as to the status of [illegible] subdivision with a view to selling portions of this land.

A petition was presented to Council by S. P. Fedechko and other ratepayers asking that quarter sections lying along the West boundary of Division 5, be included in Division 6, with a view to securing a greater amount of work on this North and South boundary road. Councillor for Division 5 stated this road had not been neglected and pointed out that preparations had been made in 1936 to grade the road the following season, but Division 5 had received no allotment for road work in 1937, other than a minimum for maintenance. Council appeared to consider it would be more advisable to move the boundary one mile East, rather than a half mile as suggested in the petition.

Previous appointment of Patriquin and Johnstone as Auditors for 1938 was confirmed. Secretary was instructed to call for applications for the position of Assessor. Mr. A. Finch of Ryley was appointed to assess the Hamlets.

Next meeting will be held June 4, 1938, commencing at 10 o'clock in the forenoon.

Grave Shortage Of Wild Life Results In Drastic Action

Shortage of wild life in the North West Territories which has reached [illegible] where sustenance of the native population [illegible] threatened [illegible] by the Mackenzie King government at Ottawa which will prohibit further hunting and trapping licenses being issued [illegible] that are [illegible]

The new order comes into effect June [illegible] 1938, and after that date [illegible] will only be [illegible] of the North-West Territories who at present hold hunting and trapping [illegible] and who continue to reside in the district for which they were issued [illegible] to children of the [illegible] in the Territories for the last four years, provided such children still continue to reside there.

At the present time the act permits licenses to be issued to any residents of the North-West Territories within the meaning of the act or to non-residents who on June 30, 1932, held such hunting and trapping licenses, regardless of whether they continued to live there or not.

Native-born Indians or half-breeds living the life of an Indian, or native-born Eskimos, or half breeds living the life of an Eskimo, are not affected, being still permitted to hunt or trap game in the North-West Territories without a license.

"What was your plum crop like?"

"A heavy storm blew down fifty per cent of it, and we'd hardly gathered that when another wind blew down the rest."

"That's tough! Could you do anything with them?"

"Sure. My wife ate one and I ate the other."

FOR SALE—A new fully Modern house, six rooms including wood and coal shed. Write John Hewitson, Courtenay, B.C.

OBITUARY

The death occurred at Edmonton on Monday, May 16th of Mrs. Francis Dagneau of North Cooking Lake. The deceased lady was born in Winnipeg 67 years ago. J. E. Stinson had charge of the funeral arrangements.

MR. PETER GATES

Mr. Peter Gates of Tofield, Alberta, passed away in the city Thursday, May 12, aged 58 years. He leaves to mourn his loss besides his loving wife, one sister, Mr. W. Henley in Ontario, Four brothers Mr. John Gates, Vancouver, Mr. George Gates, Dunholm, Sask., Mr. William Gates, Lethbridge, Mr. C. Gates, Park River, N.D. The funeral service was held Saturday at 4:45 p.m. from Andrews Bros.' funeral chapel, corner 112 st. and Jasper. Rev. William Simmons officiated. Interment took place in the Beechmount cemetery. Andrews Bros. funeral directors.

Man Who Saved Train Retires

REGINA, Saskatchewan, May 2 —(CP)— "Salvation Army" Jack Green, railway hero and native of Quebec City, who has completed 37 years as an engineer, brought his last train into Regina and retired.

He served 45 years with the Canadian Pacific Railway starting as a laborer at Chapleau, Ontario, 1892.

"Salvation Army Jack" has 108 merit marks, the highest known, for exceptional performance of duty. Forty of these were awarded for saving his heavily loaded passenger train on the run between Saskatoon and Edmonton in 1912.

Making time despite a heavy blizzard, the sharp-eyed engineer noticed three small sparks blow up through the snow where a long bridge was pictured in his memory.

"That bridge is burning," he yelled to his fireman, as he jammed on the emergency brakes, bringing his engine to a stop six feet from a yawning hole 75 feet deep, where 87 feet of the 300-foot span had burned.

He received more merit marks Dec. 1, 1912 when roaring along near Saskatoon, he spotted a tiny child near the tracks. Setting his brakes he crawled out on the tender and snatched the child.

Bridal Offers Too Thick For One Bachelor

WINDSOR, Ont., May 17—Reginald McLeod of London, Ont., regrets now that he asked Mayor E. S. Wigle of Windsor for assistance in finding a bride. He informed Mayor Wigle Tuesday that he's sorry he started the whole thing and may leave for Vancouver shortly.

The mayor had forwarded 26 applications from girls in various Western Ontario centres on to McLeod in London. McLeod answered Tuesday: "Received your letter with the enclosed letters. Please don't send me any more letters. Return them to their owners."

Another Surprise

"Where the dickens have you been all this time?" demanded the diner of the waiter."

The waiter glared furiously at him. "Do you take me for a blinkin' racehorse?" he retorted indignantly.

"Well, not exactly," the diner replied, "although it surprises me how often you are tipped!"

For The Summer Wardrobe

NEW SUMMERY FROCKS—
A large selection just received for warm weather use. Sheer chiffons, woven crepes, Wanco piques, heavy spuns, Tahitis, featuring many smart jacket and bolero models. Plain colors in summer shades and colorful prints. Sizes 14-20 .... $3.95; $4.95 & $5.95

BARDO

A large crowd turned out to hear the program given by the Edmonton Lutheran Y.P.S. in the Bardo church last Sunday. Supper was served to the visitors after the program.

Rev. [illegible] held services and Communion on Sunday. Two children were christened Hazel Arlene, daughter of Mr. and Mrs. I. Moen, and Serene Christine, daughter of Mr. and Mrs. Art Moen. The sponsors were Mr. and Mrs. Gabrielson, Mr. and Mrs. I. Moen, Mr. and Mrs. M. Forseth and Mr. and Mrs. I. Ness.

The [illegible] Baseball league, organized last Friday night with four teams, Tofield, Round Hill, Dodds and Bardo. President, A. C. Hicks of Dodds; Vice-pres. S. J. Burke of Tofield; Sec-treas. W. R. Butchart of Round Hill. League will start on May 31st with a 12 game schedule. Games will be played on Tuesday and Friday nights, starting at 6:30 p.m. A cup will be given to the League winner. Dodds won the cup in 1937.

Born: To Mr. and Mrs. Roy Roth on May 21st, a son.

A crew of local men are busy repairing the telephone lines 18 and 7.

John Ness who is plastering in Edmonton spent the week end at his home.

Mrs. M. B. Ness and Betsy Ness of Edmonton spent the week end on the farm here.

Mr. and Mrs. Alvin Steen spent Sunday at the Walker home at Lakeview.

Miss Hannah Jetsen of Edmonton spent Sunday with her folks here.

By the end of the week all field work will be completed. Fields are drying fast and rain is needed.

While driving to town on Saturday, Mrs. O. Johanson and her boy Olaf, met with an unfortunate accident. The wagon pole came down and ran into the ground, throwing them out. Mrs. Johanson suffered a fractured rib and Olaf's face was cut, requiring three stitches.

Camrose College choir are giving a program in the Bardo church on Friday, June 3rd at 8:00 p.m.

Bardo Sports Saturday June 18.

C. P. R. Exhibit At Glasgow

Hundreds of thousands of people visiting the great Empire Exhibition at Glasgow, Scotland have been acquainted with some of Canada's greatness [illegible] today and have [illegible] by study of the attractive Canadian Pacific Railway [illegible].

In the exhibit of the Canadian Pacific emphasis is laid on the closeness [illegible] by means of two moving dioramas—one, the [illegible] arriving at Quebec in the year 1822, the other, the magnificent "Empress of Britain" [illegible] a similar [illegible]

[illegible] and wide after [illegible] Transportation [illegible] Far [illegible] a diorama of the Clyde, with one of the famous "Duchess" steamships en route to Canada. This is flanked by another diorama of a deck scene during one of the popular "Mont" Cruises.

Banff, that celebrated resort in the Canadian Rockies, is represented by a giant 14-foot enlargement that features its beautiful scenery, together with illuminated transparent pictures of semi-stream-lined locomotives and modern passenger and freight trains. The Royal York Hotel at Toronto (largest in the British Empire) has been chosen to represent the Company's fifteen hotels at strategic points across Canada.

Canadian Pacific services to the Far East and to New Zealand and Australia also have their place.

The interests of the company in the colonization and development of Canada are shown not only by pictures, but also by a fine exhibit of grain and mineral specimens. Freight ships, express and industrial development are included.

Perhaps the most dramatic example of the world wide service which the Canadian Pacific provides is in the series of 18 electric clocks which tell the time at different points around the world served by the company. These clocks, carefully synchronized, are accompanied by a [illegible]

Flax Facts

The production of Flax in Western Canada has long been an important phase of agriculture with many farmers. Some have grown Flax successfully on a relatively large scale, while others have made it a practice to devote only part of their crop land to the cultivation of this grain.

The fact that a successful flax crop can be seeded either early or late is an important feature. While early seeding is recommended, Western Canada's flax is usually seeded rather late with reasonable success. The chief benefit from late seeding is that some of the difficulties in connection with weed growth can often be removed by measures of cultivation taken before seeding. On the other hand, the Dominion Seed Branch officials state that inasmuch as flax will withstand late spring frosts better than some of the other [illegible], probably more satisfactory [illegible] can be obtained by early seeding.

When heavy grasshopper infestations threaten sections of the country, as is the case to some extent this year, it is as well to recall that a [illegible] plant such as flax is not naturally appetizing to hoppers, and in many cases a flax crop can be harvested when most other grain [illegible] have been completely destroyed.

Some Western farmers still think flax is harder on the land than [illegible]. Contrary to this are the facts submitted by the [illegible] Department of Agriculture which [illegible] that no more plant nutrients are removed from the soil by flax than by wheat or oats.

The following four simple rules will help any farmers contemplating a flax crop this year.

1. Use wilt-resistant seed, particularly if sowing on old land, and see that the seed is clean.

2. Grow flax in regular rotation as far as possible. This provides a favorable place for the flax crop and should result in better yields and a higher return per acre.

3. The following order of cropping is recommended for ordinary lands. 1st—small grains; 2nd—Hay, pasture, clover etc.; 3rd—Corn, potatoes, or summerfallow; 4th—flax. Where summerfallowing is practiced, flax may either follow directly or come the next year on burned stubble.

4. Sow as early as possible on a clean, firm seed bed. It will be better to delay seeding to provide a clean seed bed than to sow on dirty land.

Under average growing conditions and with reasonable care, flax will usually produce a paying crop. Possibly the chief reasons for the poor record that flax has had with some growers have been the use of poor and dirty seed, improper rotation of crop, and general inattention to the subject of scientific flax culture.

Detailed information regarding crop practices for particular areas can always be secured from governmental stations and colleges in each area.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

"My land is badly infested with wild oats. I lose money every year. Can I get rid of them?" A friend asked me.

"Well, many have done it," I replied, "but it takes a lot of work and patience, and these four principles must be observed."

1. Do not sow any wild oats with the grain you sow.

2. Induce the seeds now in the ground to grow, then kill the young plants by cultivation.

3. Do not plow the field for several years.

4. Do not permit wild oat plants growing in the field, to set to seed.

From my own experience I suggest this method.—Summerfallow the field, but permit the wild oat plants to grow to the four leaf stage (when the young plants are easily killed), then cultivate the field and so destroy vast numbers of the plants, then let the wild oats grow up again to the same stage and cultivate again. Do this several times during the season.

Do the same thing early the next year until about the first week in June, then sow oats for green feed, or seed a very early barley. The following year sow a grain crop, and pick by hand, in the field, the few remaining wild oat plants before their heads ripen.

Following factors have tended to raise price: Drought still prevails in Australia—Switzerland buys Turkish wheat—Drought causes crop deterioration in Denmark, Portugal, Greece and Great Britain—Firmer American security markets—Area to wheat and oats in Greece less than a year ago—Wet weather retards rice planting in Louisiana.

Following factors have tended to lower price: Argentine linseed and wheat seeding progresses favorably—Valuable rains in France—Some recuperation of Italian crops following heavy rains—Conditions very favorable in Russia and the Balkans—Required percentage of corn in Italian bread raised from ten to twenty per cent—Harvest begins in U.S.A.

War Veterans' Allowance

The War Veterans' Allowance Act is intended to relieve, from necessity, the Veteran who is incapable of maintaining himself.

Those eligible are veterans of the Canadian Expeditionary Forces or Canadian South African Contingent or Allies, who were domiciled in Canada at the time of their enlistment.

Veteran must have attained the age of sixty years (60) or, because of physical or mental disabilities, combined with economic handicaps, be incapable of maintaining himself. If over sixty (60) years, he must have served in an Actual Theatre of War or be in receipt of Disability Pension. If under sixty (60) must have served in an Actual Theatre of War.

The amounts payable are a maximum of Forty Dollars ($40) to a married man, and twenty dollars ($20) to a single man. In addition, a married man can [illegible] casual earnings of a further Forty Dollars ($40.00) per month and a single man, a maximum of twenty dollars ($20.00) per month.

There is no deduction on property in which a man is living, providing it is not valued at over Two Thousand Dollars ($2000.00).

The Act will not provide for any man who is in need simply by reason of unemployment. He must have sufficient physical disability to prevent him maintaining himself.

If you feel you are entitled, apply through the Canadian Legion, Provincial Command, 311 Leeson-Lineham Block, Calgary.

The Price of Implements

A good deal of discussion is taking place regarding the prices of certain heavy farm implements, and an effort is being made by the Dominion government to have these prices reduced.

As we have consistently pointed out in these columns for the past seven years, in connection with our Searle Index, the reduction in the cost of the "Things farmers buy" is, we believe, one of the most vital and necessary things that must be dealt with if the welfare of the Western Canadian farmer is to be improved.

It is, however, we believe necessary when considering efforts to reduce prices, to keep continually in view an accurate appreciation of just what the reductions in the price of any one group of items, such as farm implements, will really amount to in total cash savings.

The Searle Index informs us that the average farmer, on an average half section of land, in the Prairie Provinces, will expend for the necessary things only he requires for production and living, the sum annually on the average, at present prices of $908.12. This for the 147 items of goods and commodities included in the Searle Index.

We find that average annual expenditures for 12 items of heavy farm machinery at present prices, amount to $119.50 or 13.2 per cent of the total. That Municipal and School taxes (2 items) amount to $69.95 or 7.7 per cent of the total. That household equipment (20 items) amounts to $61.36 or 6.9 per cent of the total. That groceries (16 items) amount to $186.0[illegible] or 20.5 per cent of the total. That clothing (36 items) amount to $224.[illegible] or 24.8 per cent of the total and that farm equipment other than heavy farm machinery—63 items amounts to $244.64 or 26.9 per cent of the total of the average annual expenditure of $908.12.

The index further reveals that since 1913-14 the prices of heavy farm machinery have increased by 62 per cent, taxes by 61 per cent, household equipment by 44 per cent, all farm equipment (other than heavy implements) by 34 per cent, clothing by [illegible] per cent and groceries by 19 per cent.

Other Reductions Needed

In viewing these figures it would seem that while a reduction in the price of farm implements, which represents 13.2 per cent of the farmer's annual expenditures will undoubtedly assist farmers that there is still larger field for help to the [illegible] in the reduction of some of the other items, on which the farmer spends considerably more money than on farm machinery; in particular on small farm equipment which represents 26.9 per cent of his total annual expenditure and on clothing, which represents 24.8 per cent.

It is hoped, therefore that when the question of heavy farm machinery is settled satisfactorily, that the question of price reduction in these other groups, which would save the farmer even more money, may be investigated and similarly dealt with.

With respect to the reduction in the prices of heavy implements, there is one method that might be considered which would be helpful to all concerned, which would be by assisting the implement companies to cut down their own costs of production. By lowering the tariffs for instance, on the materials, raw and processed, which Implement Companies themselves have to buy; by lowering the freight rates (which have increased considerably since the war) on these implements to the West; and also by decreasing the taxes on the Implement Companies have to pay to the governments.

This is not at all, however, to say that the Implement Companies themselves may not also be able to assist in lowering their costs on items other than the ones mentioned.

The important thing, however, as we see it, is that the government should most actively concern itself in ways and means of lowering the costs of all the things that farmers have to buy for living and production—Clothing—Farm Equipment—Household Equipment—Groceries and Taxes, as well as Heavy Farm Implements. This so that our producers can better compete with nations overseas in the sale of Canadian wheat on the markets of the world; for these large wheat sales are of substantial benefit and are essential not only to our farmers themselves, but to all in the West, and indeed in no small measure, and in the long run, also to all in Eastern Canada.

THE SEARLE INDEX

The Searle Index of the price of "Things Western Farmers Buy" (147 items) now stands at 136, 1913-14—100, which means that these things cost farmers in the West at the present time 36 percent more than did before the War. The price of wheat—No. 1 Northern, as of May 17th is 40 percent higher than it was in 1913-14. This means therefore, that a bushel of wheat in Western Canada, owing to the higher price of wheat, has a purchasing power in relation to the "Things Farmers Buy" of 103 percent in comparison with the purchasing power of 100 that it had before the War. Taking note, however, of the October wheat futures price it seems at this moment as though the purchasing power of the new crop wheat may be considerably lower.—Searle Grain Company, Ltd.

FOR SALE—SEED OATS— I have a limited quantity of Victory Oats 2d generation, No. 2. Seed for sale at 65c per bushel in bulk. Germination 96 per cent. Can get same registered if you wish at 90 cents per bushel, but must know in a short time. Germination is low owing to green heavy hulls. Certificate No. 77-3363.—Geo. G. Abernethy.

BORROWING FOR PROFIT
in the Dairy Industry

Profitable operations in the dairy business largely depend upon wise management. Competition is keen and good managers will *borrow* at the Bank, if necessary, to improve and maintain the quality of the herd, provide for scientific feeding and stabling, and keep essential equipment up-to-date and well-conditioned.

The Bank of Montreal is interested in such *constructive* efforts by dairymen. Our branch managers, familiar with conditions and requirements in this important industry, welcome applications for loans, to finance improvements.

The Bank of Montreal is also interested in the organization and operation of Boys' and Girls' Calf and Swine Clubs, and welcomes the opportunity to discuss their requirements.

DICTATORSHIP VS. DEMOCRACY—

THERE IS SO much appearing in current newspaper and periodical literature concerning dictators and dictatorships that the casual reader accepts it all as a matter of course. He or she proceeds about their business with the inward assurance that even if dictatorship is commanding a lot of attention from public speakers and writers, it can't effect them. Mussolini, Hitler, Stalin are a long distance away and what ever the problems confronting the Italians, Germans and Russians may be, Canadian citizens have their living to make and attention must be given to this important task.

Occasionally one meets with an acquaintance, who through repeated reference to dictatorships in his reading, has been aroused. Then one is likely to hear a fervent condemnation of dictatorship, because just as the Anglo Saxon have put a halo around the word democracy, they have put a "nothing doing" sign on dictatorship. Whether this is a really permanent state of mind remains to be seen.

In considering dictatorship in relation to democracy, it is necessary, first of all, to remember that dictatorship is not necessarily a usurpation of constitutional power. It can be, and appears to be in modern dictatorships, THE constitutional power. In other words, in the modern world at least, dictatorship, like democracy, is simply a form of government. Whether it is a good or bad form of government depends upon opinion and that opinion will in most cases be based upon a person's previous political experience and training. We believe that there are millions of Germans and Italians who consider it the best form, just as there are millions of Britishers and Americans who consider democracy the best form. Obviously then, with millions of people supporting dictatorship, it must have, as well as disadvantages, some advantages. Perhaps its greatest advantage lies in its ability to get things done. With supreme power placed in the hands of one man, at the best a small group of men, any great political move can overnight be ordered and the next day be accomplished. In this respect it differs from democracy, as frequently, the inevitable debate democracy incurs, takes much time. This feature of rapid and decisive action is sometimes very valuable, so valuable that at different times in the memory of most of us, the British government and the Canadian government have resorted to a very mild form of dictatorship, only they called it union government. Dictatorship works best in an emergency or crisis, at a time when the nation must move forward as one man. There seems to be little doubt that with all its undesirable frills (not features) in Germany, such as the persecution of the Jews, dictatorship has been the means of getting things done. And while perhaps in some respects the lot of German workers is not to be envied, there is work for them to do and society is not faced with the problem of an ever increasing number of young folk clamoring at the closed gates of industry. In Italy much about the same condition exists. Of course any such thing as freedom of political thought and action is a minus quantity—one must move with the throng or be ground beneath the human steam-roller. This mass regimentation of thought and action permeates the whole of society. The minister by an unwise sentence offends his flock; a tradesman's chance remark is followed by a loss in business; newspapers are told what to say and how to say it.

But while, perhaps, there are certain and definite advantages pertaining to dictatorship in times of crisis or emergency, both these conditions cannot be construed as being normal. It is when the crisis is passed, when the tension of the people has relaxed, that the undesirable features of dictatorship begin to show. Then the minds of the people try to find expression, and if this is denied them openly, groups will endeavor to work in secret. This is pretty much the case in Russia to-day. There is no open organized opposition to the Russian government, but Americans who have lived several years there, tell of secret opposition of which there appears to be plenty. Dictatorship must have, to keep it running, a ruling passion. Either a specific object to be achieved, or defeated, or if nothing else, a passion of pure nationalism. When the object is attained or defeated, or the passion for intense nationalism subsides, there is the inevitable reaction.

If dictatorship is useful in times of national stress, peril or emergency, all abnormal conditions, democracy is best suited for peace and tranquillity as regards national affairs. It is true democracy has many faults. Sometimes it is not as efficient as it might be. The long hours of debate when the outcome is certain may seem a waste of time. The aspirations of many men to office for the glory and sometimes the pecuniary advantages thereof are not pleasant to see, and the trickery connected with elections almost cause for despair. Yet in spite of these things there is a freedom of thought and utterance which in a world of humans is a pearl without price. It should not be necessary for purges; for slayings, for no other cause than political disagreement. The ever surging thought of man should be free to express itself, trusting in the good sense and good will of the majority. Democracy may have many faults but there is always the consoling thought that it could be better if men would make it so.

Often quoted is the sentence "It Can't Happen Here." Yet dictatorship can happen here if the people are willing to allow it to happen. It should always be remembered that democracy places an obligation upon the people to think questions out to a logical conclusion. Voting without thinking is merely gambling with the franchise. Voting at the behest of someone else is side-stepping responsibility.

With national and international affairs, through a variety of reasons, becoming more complicated every day, there is real need for widespread education regarding government. Not necessarily matters pertaining to government, but just government. The different kinds, their advantages and disadvantages. What different kinds have done in the past and are doing now. Education along these lines should have no political bias. It should preferably come from the universities and be true to fact and clothed with authority.

Building Business Management For the Co-Operative

By F. F. Lininger
Professor of Agricultural Economics
Pennsylvania State University

How can we build superior business management in the co-operative movement? Should not the co-operatives and the colleges carefully work out and plan a co-operative training course in co-operation?

Let it be called whatever you like: cadet training; apprenticeship; or a "loop course" as one industrial concern designates its training activities. The purpose and the plan are the important matters.

We know that in Europe the movement itself maintains colleges for the training of employees as well as a general program of education for all classes of co-operators, young and old. The time has come in America I believe, for specialized training in business principles.

Already in some states we have training in co-operation for the rank and file. For instance in 1935 a law was passed in Wisconsin requiring all the common schools, high schools and vocational schools to teach the elements of co-operative marketing and consumer co-operation. The state university, normal schools and teachers colleges also are required to "provide adequate and essential instruction" in these subjects. Last year a similar law was passed in North Dakota.

The farmers' co-operative needs trained men who can assume positions of leadership. First and foremost this training should include the fundamentals of business management, as well as the philosophy of co-operation. I say frankly that it is my opinion the farm co-operatives are influencing the moulding of co-operative philosophy in the country not at all in proportion to the significance of co-operation among farmers. This is an outstanding weakness.

There are different methods of attaining this very essential goal. Certainly more use can be made of extension schools, short courses and the like. At this time, however, I want to confine my suggestion to the specific training of leaders and business managers.

The agricultural colleges with their knowledge factories are perhaps best equipped to give certain phases of this training. Among these are basic knowledges and skills in the fundamental economic principles, the history and philosophy of co-operation, the principles and practices of accounting and statistics, and the technical sciences related to agriculture.

We in the agricultural colleges ought to be able to recommend young men trained in business management and possessing capacity for leadership. You in the co-operatives should have facilities to give them the opportunity for the experience with pay enough to meet personal expenses for at least six months. Some of it may be summer work. The more of this experience before graduation, the better.

Is it desirable and feasible that the agricultural colleges and the farmer co-operatives get together on such a program? Do we not need a more carefully co-ordinated system that has prevailed in the past?—Wheat Pool Budget.

How To Ruin A Radio

The common practice of many motorists of starting their engine while the car radio is operating is fraught with definite danger to the delicate mechanism of the receiving set.

It is not generally known, according to radio engineers, that the sudden diverting of battery current from the radio to the starting motor may cause fusing of the delicate points of the vibrator, with consequent permanent damage to the set. Many mechanics make a practice of warning all their customers against this common and dangerous error of "starting the car to music."

Baby Chick Shipment Present Day Marvel

Shipment of baby chicks in a commercial way is a development of the last 25 or 30 years, being even more recent than the introduction of the automobile. It was made possible by the discovery that the chick, in common with some other birds, takes into its body just before it is hatched a supply of food sufficient to nourish it for a week or more. The scientific world has always stood in awe of the wonderful provision of Nature whereby there is included in an egg all of the elements required to grow and bring into being an organism of so high an order as the baby chick, with the simple addition of appropriate heat.

It required however, the knowledge of the availability of a natural food supply to make possible the present-day baby chick business. Chicks are now shipped as far distant as 1000 miles from the point of hatching without the necessity of feeding or watering. All that is needed is that they be given sufficient ventilation and boxed in such a manner that their own heat can be preserved, and also provision made for supplying the necessary warmth. This shipment of chicks is in reality one of the present day marvels in modern scientific achievement and is one of the many advances that have taken place in agriculture in recent years.

One of the first persons in North America to make commercial shipments of baby chicks was a Canadian—the veteran poultryman, W. H. Fisher of Ayton, Ontario. The original chick box used in the first shipment is prized almost as a museum piece by the people of that town. From small beginnings the trade in chicks has grown until to-day on the continent of North America over 100,000,000 baby chicks are distributed annually. Of this number, Canada accounts for about 12,000,000.

The development of the baby chick industry, in which baby chicks are available in any quantity on any date, provides the medium for the development of quality to meet the needs of market through the fact that, in the selection of breeding stock from which hatching eggs are supplied, the proper market type and requirements are constantly to the fore. This is possible owing to the fact that a comparatively limited number of breeding flocks supply the bulk of the eggs required for incubation in the larger hatcheries. Six out of nine Provinces are co-operating with the Dominion Department of Agriculture in a Flock Approval and Hatchery Approval Policy in which definite grades of chicks have been established to assist the producer-buyer in his purchases. The other provinces operate under voluntary and flock approval policy.

Edmonton Exhibition Jubilee Flashes

Edmonton's Diamond Jubilee Exhibition will be held July 18-23.

Ever since 1879 when the Agricultural Society staged the first fair in Edmonton, this event has been held with annual regularity and Edmonton Exhibition grounds, buildings and equipment are as modern as any in Canada.

$35,000 is being spent to improve the appearance, safety and comfort of, roads, fences, grounds and buildings; new bleachers provide added seating accomodation for grandstand patrons.

Every page of the 1938 Edmonton Exhibition prize list now available free, on request, reminds the reader that this is Jubilee year for Edmonton Exhibition.

FOR SALE—Home made kitchen cupboard and table; couch and mattress; kitchen range; cistern pump; card table; 3 burner coal oil stove; bedsteads and spring; 3 colt halters; gasoline lamp complete; 2 single shot 22 rifles; one repeater—Apply to J. E. Stinson, Tofield.

COMMUNICATION

Sir,

The Imperial Forces Association, in conjunction with other Imperial Associations, are asking that all Imperial Veterans who came to Canada under the Three Thousand Family Scheme, [illegible] Government Settlement [illegible] they have not had a square deal, and who desire [illegible] with the Association [illegible] Board [illegible] requested to send for a form, upon which to make application.

It may not be generally known, but our comrades in Australia who, like our men here, have experienced drought etc there, did, four years ago ask for an investigation by the British Government. Claims for compensation were met by the British Government, in some cases as high as $2000.00, being due of course, to the extent of the loss sustained by the settler.

Write for an application form in this connection to

Yours very truly
W. G. Bide, Capt R. A.
President Imperial Forces Association in Calgary
1103—13th St. W.
Calgary, Alta.

How Do "Little Savings" Finance Mortgage Loans?

Answer.—Every mortgage loan made by a Life Insurance company is made up of the savings of several policyholders.

Question.—What do these savings represent?

Answer.—They represent the money which thrifty men and women have invested in Life Insurance for the protection of themselves and their dependants.

Q.—What is the average policyholder's share in Life Insurance assets?

A.—Approximately $571.

Q.—Then it would require most of the accumulated savings of six policyholders to make a mortgage loan of $3,000?

A.—That is a fact.

Q.—How much Life Insurance money is invested in mortgages?

A.—More than $582,000,000, in first mortgages on farm, town and city properties in Canada.

Q.—In whose interests are these investments made?

A.—In the interests of more than 3,500,000 Canadian policyholders, most of whom are in modest financial circumstances.

This is the seventh of a series of messages sponsored by Life Insurance Companies operating in Canada. The eighth, to appear in two weeks' time, will deal with Life Insurance as Canada's greatest co-operative business.

The Mercury Visits The British Columbia Coast

SEVENTH ARTICLE

It's a funny thing about "the Portage." It could be described as a point of land jutting out into the sea. And you would have a fairly accurate and complete description of it. Yet one could write a chapter, perhaps a book and still leave some of its charms to be described.

We were fortunate in arriving at the Portage just at the time Mr and Mrs. F. Sherlock and Mr. W. Sherlock were waiting to call on Mr and Mrs. Pimott and rode out with them. The distance from town to the Portage by road is about twelve miles. The first part of the road is [illegible] but when the point itself is reached the road assumes a primeval aspect. It is either a tortuous [illegible] or a picturesque trail according to [illegible] mood. Then of course to the [illegible] To those using it frequently it becomes a familiar and [illegible] Mr. and Mrs. Pimott [illegible] known here [illegible] a certain amount of personal [illegible] to be included in this article. We found them well, also Betty [illegible] who are growing up [illegible] youngsters. Clifford finished [illegible] and will [illegible] Betty has a year of high school [illegible]. We saw little difference in [illegible] Mr. Pimott [illegible] and Mrs. [illegible] taking part [illegible] which few [illegible] when she was [illegible] the current [illegible] "Pa" [illegible] Retreat with the world in [illegible] the city of Nanaimo [illegible] out before you. The point of [illegible] Mrs. Jar[illegible] [illegible] to describe the Portage is difficult. I appreciate its charms as [illegible] flanked by tall cedars and other trees with [illegible] and fern, with [illegible] hollows, these two houses [illegible] by side are as close to nature [illegible] could rarely get. Yet a short distance across the bay lies Nanaimo, whose lights in the evening are reflected on the glistening water. The [illegible] variety. Small sandy beaches and rocky headlands [illegible] were feeding on the sea grass and were so close that one could see the grass in their bills before they swallowed it. In the relatively small patches of bottom land, fruits and vegetables grow in profusion and a little way down the road is an apple orchard. The following lines were written some time ago by Mr. Jarrot who is a poetical writer of ability having written quite a number of poems of a philosophical nature.

LISTEN FOLKS

Were you ever on the beach, with the glory of the dawn,
Watching the sloe-eyed, stately [illegible], spearing perch and prawn
And see the chubby kingfisher, waiting for his breakfast nip
Hit the water with a smack, like the crack of a whip?

Did you ever shoot the rapids, with the tide a-swirling out?
Or comb the beach for clams and crab, or troll for cod and trout?
Did you ever roam the islands, or picnic in a cave?
Forgetting for the moment you were a business slave.

Did [illegible] go a hunting thru the [illegible] winding trail?
With eyes alert for startled deer, or grouse or whirling quail?
And moseying home along the ridge, a gay but tired man—
Catch the whiff of bacon a-frying in the pan?

Did you ever go a-rowing 'neath the [illegible]
Leave a shimmering stretch of silver in the old Lagoon?
And [illegible] near the shad [illegible] you lift your voice in song,
And pause between each line to hear [illegible] and song?

[illegible] ever seen Nanaimo Bay [illegible]
Or [illegible]
[illegible]
I ask you, do you know these things? Have you sampled nature's list?
If not, then let me tell you—You [illegible] what you've missed.

Mr. P[illegible] called on Mr. and Mrs. Bob Sherlock. They [illegible] four miles north of Nanaimo [illegible] highway. They have an acreage and Mr. and Mrs. Frank Sherlock reside on the same property, having recently erected a house there. Both were in good health when we were there and seemed quite happy in their new surroundings. The butcher, the baker, the mail man call each day and their needs in this respect are well filled.

The next day Mr. Pimott took us over to Ladysmith, a nice little town. [illegible] we visited the oyster beds. We have heard people say "as dumb as an oyster" and now we know [illegible] the flat and scraggy rocks [illegible] millions of them, just lying [illegible] be picked up to be sold [illegible] more a quart. They are property, but the beauty [illegible] nothing to look at. At least this is what the man [illegible] guard to see that we did not carry any away. However, for one [illegible] had not seen oyster beds, it was a sight. We went on to visit Mr. [illegible] Mrs. Chambers, who will be [illegible] formerly of [illegible] and later as a clerk in the [illegible] Farmers Supply Co. store [illegible] Mrs. Chambers looked much [illegible] same. Mr. Chambers' hair was [illegible] immaculately parted as when we last saw him thirteen years previous. In fact we doubt if it has ever been ruffled in the intervening time. He speaks with the same clipped English and when we met him thirteen years seemed a very short span of time. The day we were there they had just received word of a stroke of luck and congratulations were in order. They are on an acreage with fruit trees, garden etc. There are some nice open patches around Ladysmith and considerable fruit is raised there. This is very noticeable because one sees so much forest and stump land.

NEXT WEEK:— A BRIGHT TOWN.

U.F.W.A. NOTES

Owing to the famous wind storm of May 18, the U.F.W.A. meeting was postponed for one week and was held at the home of Mrs. Burchard.

In spite of the busy season, a school festival and other events, a fairly good turnout was present, including two visitors.

The program follows:
Roll Call—Current Events.
A Circular Letter on the Proposed 7 per cent Production Tax.
Book Return—"I Visit the Soviet." Life story of Mrs. George Black, M.P. for Yukon (prepared by Mrs. England.)

The postponed demonstration on "Bee Keeping" will be given by Mr. Chalmers of Edmonton at the home of Mrs. J. C. Olson during the first week in June. Watch for the actual date.

Anyone interested is welcome to this demonstration.

Field And Track Meet At Tofield Friday

On Friday of this week the final track meet for this school division will be held at Tofield. During the past month elimination meets have been held at Viking, Holden, Bruce, Ryley and Tofield. The winners of these preliminary events, strong and [illegible] uphold the athletic honor of their particular schools and district, will meet here on Saturday. [illegible] start in the morning and [illegible] throughout the day.

The Philanthropist

(Extract from Turgeon Commission Report—"A lessening of the spread between producer and consumer is brought about in the main by the speculator and at his expense—Speculative loss helps to make business easier.")

Who knows that gambling does not pay?
The speculator!
Who [illegible] to throw his cash away?
The speculator.
Who never listens to advice
But robs himself to raise our price
Because he's very, very nice?
The speculator.
Who finances the farmers' grain?
The speculator.
Who loses so the rest may gain?
The speculator.
Who gives the baker cheaper dough?
Whose ventures make the grain men crow?
Whose brain ticks very, very slow?
The speculator
Who cannot bet with coin he's lost?
The speculator
Who stays away when needed most?
The speculator.
And who will laugh with dear-bought glee
At many bigger fools than he
When the whole system "Gangs agley"?
The speculator?

—Ulham Al[illegible]

NOTICE

Carnival To Be Held Here June 3rd and 4th

A carnival sponsored by the Northern Alberta Amateur Association in co-operation with the Tofield Baseball Club will be held at the Variety Theatre Friday and Saturday, June 3rd and 4th. The event will comprise variety concerts, games etc. A dance will be held both Friday and Saturday nights. The admission to show and dance will be [illegible]

Tomorrow Holds No Doubt For Me

I've shut the door on yesterday, its sorrows and mistakes,
I've locked within its gloomy walls past failures and mistakes.
And now I've thrown the key away to seek another room,
And furnish it with hope and smiles and every spring-like bloom.

No thought shall enter this abode that has a hint of pain,
And neither malice nor distrust shall therein reign.
I've shut the door on yesterday and thrown away the key.
Tomorrow holds no doubt for me, since I have found today.

—Author Unknown.

Concert Well Attended

The concert staged by the Northern Alberta Amateur Association at the Variety Theatre on Saturday last was well attended. [illegible] here were well pleased with the performance, applause being hearty and frequent. Included in the [illegible] were many amateur [illegible] which are proving so popular [illegible] days. An adult tap dance act was very good as also was a gymnastic display by a man and young girl. There were many other numbers, singing, musical etc., all of which received hearty applause from the audience. After the show a dance was held.

Tofield Loses Out at Ryley Sports

The Tofield senior baseball team, after having a commanding lead over their opponents, Ryley, at the Ryley Sports on the 24th, finally lost the game by the odd run. The score was 8-7.

Immediately prior to the game S. Burke met with a painful accident when he was struck in the face by a pitched ball. He pluckily played through the game but now is caring for a fractured nose which is well bandaged.

The Tofield Soft ball girls also played at Ryley, winning their first game with Ryley. They lost out however, in their second game, playing against Holden.

School Back To Normal

After being scattered around taking classes, the senior grades and high school, together with the junior grades, again took up their studies in the school on Wednesday. The roof is now all repaired and the mills of learning will continue to grind out the seeds of knowledge to universal application.

O. P. Thomas B.A., B.Sc., Leaving

Mr. O. P. Thomas, B.A., B.Sc., who has been principle of the Tofield school for the past three years, sent in his resignation to the School Board this week. The resignation was accepted. Mr. Thomas has been appointed to a position with the meteorological service at Lethbridge, in connection with the new aeroplane service across Canada. He leaves almost immediately, having to report for work on Monday, May 30.

Wednesday evening the School Board held a meeting at which Mr. Ralph E. Zuar M.A. of Edmonton was appointed substitute teacher for the remainder of the term. Mr. Zuar has been lecturing at the University of Alberta during the winter and comes well recommended as to qualifications.

MARCH OF TIME

Early century monks in their monasteries fostered the Brewing art. Commercial Brewers learned the lore ... and in the "MARCH OF TIME" Alberta Brewers have inherited this rich legacy of skill. Today Alberta Beers are made as the finest Beer used to be made . . . following the same formulas . . . depending on "TIME" alone to assure that rich, full-bodied goodness so prevalent in every bottle of Alberta-made Beer

the BREWING INDUSTRY of ALBERTA
"BEERS THAT ARE BEST"

THE TOFIELD MERCURY

Vol. XVIII, No. 15 Thursday, June 2, 1938 $2.00 Per Year. To U.S.A. $2.50

And if it Were Eskimos! Blubber! Blubber ! !

Under the new educational system, the Enterprise system, we understand it is called, the idea being to put the pupils on their own initiative instead of memorizing so much: a funny kind of party was held at the school. The subject was Japan, and to impress on the young minds how the Japanese live, a Japanese tea party was held. The children squatted on the floor in approved Japanese style and endeavored to eat rice with chopsticks. The result was ludicrous. They had rice smeared all over their "honorable" faces, also all over the "honorable" floor. Still we guess the lesson stuck, anyway the rice did.

Well here we are again! Sorry at not being able to "keep up with the column" lately, owing to various circumstances, so a lot of this will be rather stale.

The school children went on a hike a week or so back which finished with a wiener roast at Mr. Jenson's farm. Whilst there the "big wind" came up and the storm, but Mrs. Jenson dug up some extra clothes for all to go home in.

Beyond blowing down a few trees we hear of no damage by the storm here.

The first Lutheran Service was held here last Sunday week in the Hastings Lake School. It was very well attended. The Rev. Mr. Hennig, being the pastor.

The people of Lindbrook wish the Rev. and Mrs. A. Wallis the best of luck in their new parish at Camrose.

The weather so far is ideal, showers and sunshine, good for the crops, tho' the cutworms are rather bad; some feared the season too late but remember the old saying "Sowing in May keeps the bailiff away."

The road north of Lindbrook is closed during operations by the Diesel outfit which is building the remainder to connect with the one running west to Deville and the one east to Tofield, or rather Lakeshore.

I SAW
BY A.B.C.

Norm Glover and Jack Bowick playing a little House of David.

Stan Burke showing the effect of the Ryley Baseball Game.

Doc Law receiving several inquiries while walking down the Main Stem as to where was the Auto.

Reg. McCarthy, Fritz Machtaner, Jack Bowick, Jack White, Jim Moan Taking the Air in front of Norm Glover's Tonsorial Parlors and listening to the Grads Game

"Trigger" Worton PAGING the girls' Basketball Team. Spectators building smudges and handing out information?

Mayor Chas. Swift demonstrating the 1938 Ford.

Inspector "Bill" Glover sporting a new Fargo Truck.

Larry McLeay Hightailing around on School Field day. Balance of teachers trying to keep track of kids

Chris Hammond trailing a few oil Barrels.

Shick and Stan entering a well known beanery for a "Spot of coffee."

Gordon Jobb shifting things around.

Ern Rogers putting them back again.

Artie Beirnes hitting for the city.

We hear that Mr. A. Rogers is building some cottages for Mr. Geo. Wealake at Hastings Lake, and it is said some boats as well, as the fishing is said to be good again.

AMISK CREEK

We all enjoyed the very nice program the Edmonton Young People rendered here in the church on Sunday evening May 22nd. After the program they were invited to the E. A. Moen home where the Amisk Creek Young People served lunch.

Doris Watt, who graduated as a nurse at the Royal Alexander Hospital, is now staying with her mother, grandmother and uncle for a three week's holiday.

We don't know how many students took part in the musical festival in Camrose, but the school received 6 excellent awards and 3 very good.

Miss Lily Berg spent a few days in the city last week.

Mrs. H. Brenneman spent last week at an Edmonton hospital. While there she underwent a slight operation. She returned home last Friday and is now feeling much better

Misses Ruby Berg and Ellen Sand from Edmonton spent May 24th at the R. O. Berg home.

Edna Moen spent last Sunday visiting at the A. Haugen home.

Arnold Berg left last week for Vancouver where he is going to take examinations for Aeroplane engineering.

About thirty friends and neighbors helped Paul Flaaten celebrate his 78 birthday last Sunday.

Mr. and Mrs. C. Erickson and small son Donald and Mr. A. Erickson visited at the Holt home at De May last Saturday evening.

Hilmar Moen left last week for Ponoka where he is to attend to an elevator for a couple of weeks.

Mr. and Mrs. J. Jacobson, Mavis and Mrs. Rose called at the R. O. Berg home last Sunday evening.

Spring work is now coming to a close and many fields are now showing green.

Council Meeting

A regular meeting of the Town Council was held on Monday May 30. Present were Mayor Swift, and Councillors Law, Hammond, Brace, Taylor and Lovell. Correspondence was read from the Department of municipal affairs advising of new procedure in selling lands which had forfeited to the town. Council was also advised of the annual convention of the Union of Urban Municipalities to be held in Calgary on June 16th and 17th next. No delegate was appointed this year. It is usual to send a delegate when the convention is held in Northern Alberta. A number of accounts were ordered paid. In view of the reports that a number of branch banks were likely to be closed in the Province and realizing the value of a bank in communities such as Tofield, council expressed its alarm at legislation which would appear to be making it difficult for branch banks to operate.

Notice

The reorganization meeting of the Tofield Annual Sports Day Committee will be held at the Town Hall on Friday, June 3rd at 8:00 p.m. This is an open meeting and it is particularly requested that as many citizens of Tofield and district as possible be present.

New Anglican Minister

Mr. Guardham of Westlock has taken over the pastorate recently vacated by Rev. Wallis and will be here for the summer months.

Mr. Guardham is a student at Trinity College, Toronto, but is a western young man, his home being at Westlock, where his parents reside.

LOCAL & PERSONAL

The third meeting of the Ketchamoot [illegible] Training Club was held at the home of Miss Edith Davison with [illegible] present. Miss Kat[illegible] gave a interesting paper [illegible] "How to Win Friends and Influence People." The meeting broke up [illegible] had been served by the [illegible]

M[illegible] Marie Robertson of Holden [illegible] Muriel Malcolm over the week end.

Miss Rysnack of Edmonton visited Miss Joan Baptist for a few days.

Bill Wi[illegible] from Camrose spent Friday at his home here.

Miss Annie Chopka returned after spending a two week's holiday.

Mrs. Thomas sr. and Mrs. Carter of Edmonton spent Saturday in Tofield.

M[illegible] McCauley, nurse at the Pon[illegible], spent Sunday and Mon[illegible] home here.

B[illegible] McCauley spent a few days at [illegible] this week. B[illegible] for Banff where he will play [illegible] orchestra at the Banff Springs Hotel.

The Misses Edna Campbell and Phyl[illegible] Thompson spent the week end visiting at the McCauley home.

M[illegible] Stan, Les and Norman Glover, Reg McCarthy and Bill Lancaster spent the week end fishing at Lac La Nonne.

Miss Myrtle Bethel of Sedgewick is home recuperating from an appendix operation.

Thos. G. Dark, Eyesight Specialist and Licensed Optometrist, will be at the Tofield Hotel on Friday June 10th from 6 to 7:30 p.m.

Miss Jeanne McCrae spent the week end at her home in Vegreville.

Miss M. Stewart and Miss Wingrove spent the week end at their homes in Edmonton.

Miss Aileen Allen returned home from Edmonton where she has spent the past couple of months.

Mrs. Beirnes, Mrs. Law, Mrs. Hammond, Mrs. Malcolm and Mrs. McCauley visited Mrs. J. D. Hannan of Camrose on Tuesday.

BASEBALL

The first league game of the [illegible] Lake Baseball League was held at Dodds on Tuesday night. The game resulted in a win for Tofield [illegible] 6-4.

The Tofield team was as follows: Bailey, Burke, Davison, Newman, [illegible], Swift, Swift, Swain

League Schedule

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Exercise And Rest

It appears to be necessary to remind many persons of the need for daily exercise of the body. Exercise tends to strengthen the muscles of the body, including the heart which is a muscular organ. Exercise deepens and [illegible], produces heat, [illegible] and develops the [illegible] and sensory nerve centres of [illegible]

If the food which we eat is to be [illegible] need for the [illegible] we must exercise [illegible] a good working [illegible] normal individual [illegible] the point of [illegible] day. We should [illegible] place of riding [illegible] and spread them [illegible] the week, not concentrating [illegible] Saturday.

On the other hand, we should not forget the need of rest. Perhaps [illegible] are more [illegible] in need of rest [illegible]. Children require a great deal of rest, freedom from [illegible] and long hours of sleep in order that they may grow and develop [illegible] healthy bodies. The adult needs rest in order to repair the [illegible] of daily life, and [illegible] the days ahead. [illegible] of our activities are without [illegible] interest to us. They are largely a matter of doing [illegible] enjoy ourselves quietly and restfully in relaxation.

We must realize that the possibilities of health depend in large measure [illegible]. If we would have health we must be prepared to make the [illegible] to secure the exercise we need and to establish habits of living which permit of sufficient rest and sleep. Neglect means less health if not actual disease; it means living [illegible] below the standard which we are capable of attaining. It means more worry and [illegible]. Health is worth the [illegible] effort.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Cariboo take Moss Diet On Rail Trip

[illegible]

When in Winnipeg, the car [illegible] subjected to the usual examination of all livestock entering the United States. The "medica" was conducted by Dr. Roy Gaskell, veterinary surgeon of Pembina, N.D. The A[illegible] that accompanied them is the chief form of sustenance of [illegible] land caribou.

War Threat And Wheat

Many well-informed people believe that a major war in Europe is likely to occur at any time and that such a catastrophe is inevitable within the next year or two. Such an event would, of course, drastically change the wheat price trend as food is the first requirement of any nation conducting a major war. The threat of a rupture between Czechoslovakia and Germany towards the end of last week immediately strengthened prices and gave an indication of what would develop if war actually occurred.

Some people believe that it is only the lack of food reserves which is keeping continental European nations out of war. Germany with 75 million people and Italy with 43 million cannot raise enough food supplies to support their populations and it would be a dangerous course for them to [illegible] armed conflict with [illegible]

[illegible]

While Germany and Italy, with great armies, powerful fleets of aircraft and augmented navies have been uttering threats and seemingly dominating Europe for [illegible] past, there are [illegible] that France and Great Britain, aided by Russia will [illegible]

It is [illegible] of the world engaged in the production of surplus food [illegible] upon to [illegible] event of an [illegible] Canada, one of the greatest food producing countries would be [illegible] supplies for Great Britain. So if a war occurs there will be an abundant market for much greater farm production in the Dominion. Of course, the ultimate effect of such a war would be general ruination, far offsetting any immediate advantage. No sensible country wants war.—Wheat Pool Budget.

Nineteen Hours From Montreal To Vancouver

Moncton, N.B., May 30—"We anticipate that when the Trans-Canada Air Lines Services are extended to the Maritimes, flying time between Moncton, the eastern terminus, and Montreal will be in the vicinity of two and one half hours with nineteen hour service between Montreal and Vancouver," stated Phillip G. Johnson, Vice-President of the Company when passing through Moncton on the Ocean Limited of the Canadian National Railways en route to Montreal after delivering addresses before the Canadian and United Services clubs in Halifax.

"As a preliminary to the inauguration of our air services in the Maritimes, a radio beam and communication service is to be installed," he said.

"Work is progressing on building up the personnel," he continued, "a training school being established at Winnipeg, main base of operations, where forty pilots are now undergoing training."

Charge Of Profits Refuted By Banker

Alberta government criticisms and allegations against banks finally [illegible] Monday when A. T. Lowe of Calgary, supervisor of the Royal Bank of Canada, [illegible] as entirely inaccurate and misleading" the claim made publicly a few [illegible] ago by G. L. McLachlan, chairman of the Alberta Social Credit board, that banks in Alberta collect an income of $30,000,000 annually.

Mr. Lowe's reply was a statement which [illegible] under his name.

The statement follows:

"When [illegible] McLachlan in a speech at Tofield, Alta., and Birch Hills, Sask. [illegible] made a statement to the effect that the banks in Alberta [illegible] annual income [illegible] $30,000,000 [illegible] that statement was entirely inaccurate and misleading.

[illegible] Mr. MacLachlan. Let me emphasize the word 'gross.'

After deducting $2,000,000 for [illegible]

[illegible] banking services have been [illegible] at a substantial loss in Alberta [illegible] the last 10 years.

I make this statement because I feel that assertions so unfounded and extravagant as those referred to, when made by men whose position [illegible] responsibility, should be met with the facts so that the [illegible] fair-minded citizens of Alberta may not be misled."

Mystery Shot Fatal To Youth

COLEMAN, May 30.—Mystery marksman was sought by police of the Crowsnest Pass Monday following the death of Robert J. Glendenning, 21, shot to death while working on his automobile Saturday night. He was struck by a small calibre rifle bullet which entered his chest under the left arm and pierced his lungs.

Police investigated the possibility that youths hunting crows may have been responsible for firing the shot and were reported to have confiscated a large number of firearms, including rifles in search for the death weapon. Many boys and youths were questioned during the day.

Young Glendenning was on his knees fixing the rear light of his automobile when shot. Nearby his father and a friend, Joe Jenkins, were standing talking to him. Suddenly he [illegible] against the car. Ten [illegible] in his father's [illegible] the arrival of Dr. McLean.

[illegible] Glendenning was [illegible] at the International mine [illegible]. Neighbors said he used to take out a lot of girls but they "never heard of any enemies" of the youth.

A NATIONAL BANK—

DURING THE 1935 Dominion election campaign one of the main planks in the Liberal party's platform was the nationalization of the Bank of Canada. At the time we were very doubtful if the promise would be made good. It was not so much a case of disbelieving the Liberals' statements, as it was an appreciation or recognition of the difficulties forming a truly national bank would bring to light. We believed at that time that the people of Canada were faced with two choices. Either a privately owned Bank of Canada, run strictly for profit or a government owned Bank of Canada with the danger of political intrigue. We preferred a government owned bank but favored a privately owned one. Ever since the Bank of England, in company with some other national banks, instituted the gold standard by which an ounce of gold could do the work of several ounces, trying to keep track of public finance is a tough problem—about all the average man gets out of it is a headache. But one thing is clear, if credit there must be, it should have just one test—worthiness. Certainly there should be no trace of political influence in the giving or withholding of credit. Perhaps we have been unduly apprehensive, we hope so.

Now that a Canadian National Bank is assured it will be interesting to note the improvement it makes in general business. Already there is an announcement to the effect that public bodies will be able to obtain loans at two per cent. An illustration of the advantages of this can be found right here at Tofield. The Town of Tofield has a fairly large debenture debt upon which it is required to pay six per cent. If it were only required to pay two per cent it would save well over $2,500 a year. Consider what this amount spent in improvements in Tofield would mean to people living here. As far as private business is concerned, we anticipate little change, except in such cases as when the national bank stands behind the private banks, such as a large appropriation for building loans. Banks, like any other business, need to show a profit and information concerning prairie country banks in recent years is that they have been rather short on profit.

Anticipation in regard to "cheaper" money and greater freedom in spending, opens up another subject. In the United States where they seem to have statistics on every conceivable thing, they have made an "Index of Confidence." It has been pointed out oftimes before, that velocity of money turnover has much to do with prosperity and depression. Thus, if a dollar bill passes through ten pairs of hands a year, it does twice as much business as if it only passed through five pairs of hands. Now placing the 1919-1925 period as 100 per cent in the turn over of money, April 1938 records only 61.1. This is even worse than April of 1933 which was 70.4. The same month of 1929 is recorded as 120.4, but this is regarded as "unhealthy" as considerable of this money went into the stock market. Apparently prosperity is a tripod, the three legs being easy credit, free spending and confidence. Apparently confidence is at low ebb right now, but then confidence as regards economic matters, like the tides rarely stand still. Even now confidence may not have reached its lowest point, but when it does it is absolutely safe to say it will not stay there. On the contrary, it will hesitate and then make the upward climb to prosperity.

Perhaps the announcement of a national bank is opportune, as with the turn in the tide of confidence combined with easy credit and free spending, prosperity should result.

Home Canning in Tin Cans

The tin can as a container for home canned fruits, vegetables, meats and fish is becoming increasingly popular every year and the reason for this is that canning in tin cans is quicker, easier and cheaper than canning in glass, states R. W. Arengo-Jones, Horticultural Division, Central Experimental Farm, Ottawa.

Successful canning in tin cans requires a reliable can closing machine and a pressure sterilizer for vegetables, meats and fish. Both these pieces of equipment can be purchased quite cheaply and they will last for many years if properly cared for. The pressure sterilizer may be used for cooking every day meals as well as for canning and for this reason will be found very useful.

Both the can sealer and the sterilizer are sold in a wide range of sizes to suit every need. In country sections where a lot of canning may be done, it is a good plan for several families to purchase the equipment co-operatively, selecting the larger models, and then, by helping each other during the canning season a remarkably large quantity of foodstuffs may be preserved for winter use.

The only difference between canning in tin cans and canning in glass is that the tin cans must be sealed while the contents are hot. This is necessary in order to exclude air from the can as it is only in the presence of air that the acids in fruits and vegetables can attack the metal of the can. Furthermore, since the filled cans are cooked following sealing, hot filling will reduce the internal pressure developed by the sterilizing treatment.

Plain tin cans are used for most vegetables and for all but the coloured fruits. Red coloured fruits fade in plain cans, so cans finished on the inside with a protective enamel are used. Certain kinds of vegetables, such as Lima beans and corn, will darken in plain cans and a special can finish, known as "C" Enamel, is provided for them.

Using present day equipment and reliable canning instructions, home canners may have as much confidence in their own products as they have in commercially canned fruits and vegetables.

Crowds Observe Empire Air Day

LONDON, May 30.—Great Britain today displayed its strength in the air before thousands that flocked despite heavy downpours to observe Empire Air Day at more than 100 airfields in the United Kingdom.

They saw the latest models of what Prime Minister Neville Chamberlain has called Britain's "formidable war machine" in spectacular mass displays of all phases of aerial warfare.

Geologists Will Survey, Map Northern Mineral Districts

Traveling north to make surveys for the department of mines and resources, four young geologists arrived in Edmonton Monday forenoon to head parties on journeys into areas in the North West Territories.

Under the direction of Dr. A. W. Jolliffe, Dr. C. S. Lord, Dr. J. T. Wilson and Dr. J. F. Henderson, all of Ottawa, the parties are made up of young graduates and students from universities of western provinces.

Dr. Jolliffe's party, composed of Fraser Buckham of Edmonton, Robert Folinsbee of Edmonton, Bert Cor[illegible] of Calgary, J. D. McGregor of Calgary and [illegible] Rolland of Vancouver will make detailed maps of the [illegible] area. A sub-party under Fraser Buckham will survey the Mc[illegible] lake [illegible] north of Yellowknife.

Purpose of the trip, explained Dr. Jolliffe on his arrival here, is to make a geological survey of the district so [illegible] problems of the prospector [illegible]. It is believed that there are vast quantities of minerals [illegible] there hitherto unexplored and unknown, he said.

Party under Dr. Wilson is made up of [illegible] of Edmonton, A. [illegible] of Edmonton, J. D. Thur[illegible] Vancouver, A. T. Fawley of University of Saskatchewan and B. Graham of University of Manitoba.

This party will map 1000 square miles [illegible] and mountain [illegible] at the northeast corner of the Alberta boundary.

"We will also try to locate areas favorable for prospecting," Dr. Wilson said.

Detailed mapping of 300 square miles in the Gordon lake area will be made by Dr. Henderson and his group of six. They include W. T. Love of Edmonton, H. Kunst of Lethbridge, P. F. Pelzer of Winnipeg, W. [illegible] of Saskatoon and H. P. Bro[illegible] formerly of Edmonton.

Sub-party under Mr. Love will make [illegible] mapping of the [illegible] area which extends north of Great Slave lake to Gordon lake, [illegible]

[illegible] rocks in the Fort Rae district have been found to be similar to those at Yellowknife, party under Dr. Lord will map 1000 square miles in that area [illegible]

[illegible]

Parties left Edmonton Tuesday for Waterways where they will fly into their respective districts. They will return in the fall.

Payments Arrive On New Tax—Low

[illegible]

The report circulated here Monday was to the effect that some firms intend to file returns showing the amount of their mortgages but that they would not make payment of the tax or pay it under protest, in view of the applications made to the Ottawa government to disallow the legislation.

Asked about this report, Provincial Treasurer Low said that the act was specific in regard to when the returns were to be made and the tax paid, while those who failed to comply made themselves liable to the penalties.

The act provides for a two per cent tax on the principal sum of first, second or third mortgages upon land.

$125,000 Cash Is Paid For Claims Yellowknife Area

Believed to be the second largest deal in the history of gold mining [illegible] announced [illegible] Saturday [illegible] Stewart, former [illegible] who has been [illegible] north for the past [illegible] H. M. M. "Max" [illegible] Yellowknife [illegible]

[illegible] H. A. Friedman, K.C., well known Edmonton lawyer of the firm of Friedman, Lederman and [illegible]

[illegible]

Mr. Phillip [illegible] believed that Mr. F[illegible] the claims on behalf of a [illegible] syndicate. He could not [illegible]

[illegible]

"Edmonton will [illegible] from these [illegible] Edmonton is the [illegible] north. But Edmonton business [illegible] are passing up chances to [illegible] the country. Each new find [illegible] properties more important [illegible] valuable [illegible] late interest," said Stewart.

Three-Legged Chick

WALTON, N.S., May 29.—[illegible] honours in the Hants County [illegible] go to an unusual chicken. Equipped with three legs, arranged [illegible] fashion, the young chicken uses all three and can run, walk or [illegible] equally as well as her normal [illegible]

Cheques Issued In Stork Derby

TORONTO, May 30.—Fortunes of $100,000 were deposited Monday to the bank accounts of four Toronto [illegible] who finished the fantastic Charles Vance Millar stork derby [illegible]

[illegible] Millar estate, bequeathed to the Toronto mother registering the most [illegible] following Millar's death, had [illegible]

[illegible] have made a settlement with Mrs. Lillian Kenny and Mrs. Pauline Mae Clarke, whereby pending appeals by [illegible]

[illegible] Mrs. Lillian Kenny and [illegible]

Canada Is Second Best Customer United States

The United States imported Canadian goods last year to the value of $390,530,000 an increase of 8.7 per cent over 1936. In return, Canada bought goods from the United States to the value of $509,500,000, an increase of 32.5 per cent over the previous year. Canada is the second best customer of the United States, Great Britain ranking first, according to the Industrial Department of the Canadian National Railways.

[illegible] abandon and forego all claims to [illegible] of the residuary estate of the deceased."

The announcement [illegible] weeks [illegible] that $75,000 [illegible] were made to the four [illegible] each of whom registered nine [illegible] the specified period which ended Oct. 31, 1936.

Mrs. Kenny and Mrs. Clarke whose [illegible] legal shares in the $500,000 estate were disallowed in the Ontario supreme court by Mr. Justice Middleton, each received $12,500 Monday. It was understood the winning mothers agreed to make the payments on condition that Mrs. Kenny and Mrs. Clarke dropped their court appeals.

When liquidation of the estate is completed a further $75,000 will be [illegible] among the four winners.

A FEW CANDID WORDS ABOUT BANK EARNINGS

* *

Half of one per cent. a year on total assets is not much of a profit margin for any business, corporate or individual.

Yet that is all the "velvet" there is in the business of Canada's chartered banks.

Banks pay interest on personal savings deposits. They charge interest on loans.

The difference is not all "velvet" by any means—for these reasons:

(a) It costs money to operate a bank.
(b) The cash reserves held by the bank earn nothing.
(c) A bank must provide for losses.
(d) Earnings on a great deal of a bank's assets are very low.

More than 21,000 people are employed in Canada's banks. In the last ten fiscal years Canada's chartered banks have paid in wages and salaries, some $276,000,000 — purchasing power distributed over the Dominion.

In the same ten years banks paid in taxes to municipalities $10,831,930, to provinces $14,129,320, and to the Dominion $24,027,323, a total of $79,[illegible]

Banks have other costs, too. Rent on premises, stationery and printing; light, water and fuel; contributions to pensions and group insurance for employees. Depreciation on buildings takes a large amount each year.

Any money a bank pays in taxes, wages or other costs can come only from the bank's resources, and must be paid in cash. No magic can produce it.

Banking is not all sunshine. It has its cloudy aspects too. Banks must stand ready to pay their creditors, the depositors and note holders, a hundred cents on the dollar, but banks unfortunately cannot always collect a hundred cents on the dollar. [illegible]

A bank must keep [illegible] able to pay you [illegible] whenever you want to withdraw it.

Chartered banks are required by law to lodge with the Bank of Canada, or hold in Bank of Canada notes, five per cent. of their depositors' funds, but, in practice, they always carry about twice that percentage. Deposits with and notes of the Bank of Canada earn no interest for the chartered banks.

It is necessary also to keep a further amount in short term investments readily convertible into cash. The yield on such investments is low, firstly, because Treasury Bills and other short term securities mature at short date; secondly, because banks having no monopoly of money or credit, [illegible] of many industrial concerns compete for this type of investment.

Bank earnings depend very largely upon loans, but a bank can lend only when the customer wants to borrow.

Ordinary bank loans in 1929 averaged $1,342,000,000, in 1937 only $7[illegible],000,000.

When business falls off or prices slump, businessmen borrow less money. A given volume of business is [illegible] less money, too. It would take $150,000 to handle 100,000 bushels when wheat is at $1.50 per bushel, but only $100,000 to handle the same volume when the price is $1.00 a bushel.

When ordinary loans are not in demand, money, instead of lying idle in the tills, [illegible] investment in Government [illegible]. These earn substantially less than ordinary loans.

Very obviously bankers prefer commercial loans.

Money invested in Government bonds is, however, just as much a loan [illegible] Government's purposes as a loan to a farmer [illegible]. In 1937 the average of bank loans and investments [illegible] 1929, $1,311 [illegible]

Thus bank credit [illegible] $117 [illegible] period of 1929 [illegible]

[illegible] As at October, [illegible] $17,000,000 more in bank notes were in the hands of the public than in October of the boom year 1929.

A word with you about dividends.

The Bank Act fixes the par value of bank shares at $100. The average [illegible] banks by the shareholders [illegible] shares were issued [illegible] $1[illegible] per share. Of this [illegible] to Capital Account, and [illegible] has been placed in Reserve.

Over many years [illegible] profits, now amounting to $[illegible] per share, have been left in the business by shareholders and added to reserve, for the greater security of depositors and noteholders.

The average shareholder's investment in Canada's chartered banks now, therefore, amounts to $190 per share. A dividend of say 8 per cent on the $100 par value is, in fact, only slightly over four per cent. on the money actually invested, or left with the bank by the shareholder.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

The Mercury Visits The British Columbia Coast

EIGHTH ARTICLE

The ride from Nanaimo to Courtenay was uneventful, except of course passing through much scenic country. When we were in Victoria, someone said "You should see Courtenay and the Comox Valley [illegible] better land out-doors." We [illegible] seen plenty of good land [illegible] doors around Tofield [illegible] the land along the north [illegible] pretty fair stuff. That [illegible] west and [illegible] regards [illegible] Creek Bardo settlements [illegible] Anyway we decided to [illegible]

[illegible]

[illegible] decorated. The [illegible] A feature that added much to the attractiveness of Courtenay on Saturday nights was the colored street lighting. Criss-cross from pole to pole, colored lights are strung, and these in addition to the regular street lighting added a cheerfulness to the jostling crowds.

Courtenay is essentially a logging town. Saturday nights hundreds of fellows from the neighboring logging camps come into town. Fit and full of energy they are ready for a [illegible]

[illegible] the good land being extremely fertile. As regards dairying, the feed problem is an important one, most everything being shipped in. We were in the office and a man came in and went out again and the man [illegible] $1,500 for feed for dairy cows [illegible] Association. In [illegible] to the butter making department they have an [illegible] plant. They also have a feed [illegible] department. The annual report [illegible] that there were 112 [illegible]

NEXT WEEK — A BERRY PROBLEM

UNITED CHURCH NEWS

The addresses of the Rev. Dr. R. A. McKinnon of Trinity Church, Calgary, were forceful, interesting and searching.

We were fortunate in having such an outstanding preacher on Conference Sunday.

Dr. McKinnon was guest at the manse and on Monday morning he and the Rev. D. K. Allan returned to the meetings of Conference in Edmonton.

On Sunday evening, 5th of June, Rev. Dr. Stanley Scott will preach in Tofield.

The Junior Choir will assist in the music.

L.C.C. NEWS

The May meeting of the L.C.C. was held at the home of Mrs. R. A. [illegible] Wednesday May 25th. The meeting was called to order at 2 p.m. with the singing of the theme song. The roll call was answered with [illegible] Day verses. There were [illegible] members present and four [illegible] Mrs. McKenzie, Miss Kortz, [illegible] Mrs. Lancaster and Mrs. Lust.

After a lengthy discussion it was [illegible] that because the children attending Lindbergh School this year were a bit young to compete in an essay contest, the prize money would [illegible] towards the school picnic. The next meeting will be at Mrs. [illegible] Mrs. Bracegirdle assisting [illegible] roll call to be answered [illegible] Visitors welcome. The meeting was closed by repeating the Lord's Prayer. A few chapters of "Mrs. Rankin's Book" was read by Mrs. Evans.

Lunch was served by Mrs. Smith and Mrs. Herndon.

Two Day Carnival Friday And Saturday

A two-day carnival is being staged at the Variety Theatre on Friday and Saturday of this week. The event is being put on by the Northern Alberta Amateur Association in cooperation with the Tofield Baseball Club. There will be concerts, dances and other forms of entertainment. The carnival opens Friday at 6:00 p.m. There will be a public dance both Friday and Saturday nights.

Track And Field Day Last Friday

Last Friday a great many young stars centred in Tofield for the annual field and track meet for the school division. There were games in progress "all over the place." At time of writing the official records are not available. They should appear next week.

Mr. and Mrs. A. R. McEwen and their daughter Betty of Hythe, were visitors at the manse on Monday.

The Rev. D. K. Allan returned Wednesday afternoon after attending the sessions of the Alberta Conference in Edmonton.

Relative of Walter Bellamy Passes at Advanced Age

To have lived 105 years, enjoying good health is the rare good fortune of only a few people. Walter Bellamy received word this week of the passing of an aunt who reached this advanced age. The following taken from an English newspaper is an interesting account of her passing. In the official announcement of her death there is the quotation: "She Ate Not the Bread of Idleness."

"Herefordshire has lost a remarkable personality by the death of Miss Harriet Bellamy of the Vennings, Much Marcle, which occurred at her residence on Tuesday, at the age of 105.

She had been ill only since Saturday and retained her faculties to the end.

Born at Westerbury-on-Severn on December 15, 1833, when Queen Victoria was a girl of 14, Miss Bellamy was in all respects a modern centenarian. She kept abreast of the times and led an active life, reading the newspapers daily, sewing, listening to the wireless and when weather permitted she enjoyed motoring.

She used to relate how she attended fancy dress dances at Hereford Shire Hall over 80 years ago, and how she and the girls of her generation wore crinoline. She never talked about her age and abhorred fuss about it.

On the occasion of her 105th birthday she acknowledged in writing the good wishes of her many friends. She was very partial to a glass of Herefordshire cider with her supper, a practice she adopted for many years and to which she partially attributed her wonderful health.

MARCH OF TIME

Early century monks in their monasteries fostered the Brewing art. Commercial Brewers learned the lore . . . and in the "MARCH OF TIME" Alberta Brewers have inherited this rich legacy of skill. Today Alberta Beers are made as the finest Beer used to be made . . . following the same formulas . . . depending on "TIME" alone to assure that rich, full-bodied goodness so prevalent in every bottle of Alberta-made Beer.

Motor Patrol Is Put In Service

Again this year the Edmonton branch of the Alberta Motor Association will operate a motor cycle patrol on main highways leading into the city.

Announcement of this decision was made recently by Secretary J. A. McNeil.

The patrol will cover roads within the district, striving not to get convictions against motorists for infractions but rather to popularize the work of motor clubs.

First aid equipment is carried by the patrol so that help can be given in case of accident.

The practice followed so successful last year and which will be repeated this season, is to draw the motorist's attention to any defective equipment, for example, and thus win his appreciation instead of his condemnation.

Work last year is believed to have aided materially in reducing the number of highway accidents in the Edmonton district.

Those in need of help or assistance after breaking down on their motor trips were given prompt aid or direction by the patrol.

As an evidence of the interest in the service, its adoption is now being considered by the Calgary branch of the A.M.A.

This Perplexes Court Officials

Eyes of court officials at Evansburg popped with amazement Saturday when John Kaczur stepped up to pay a $10 fine imposed upon Fred Holenko for being an alien in possession of a firearm.

Holenko a few minutes previously had been acquitted on a charge of setting fire to Kaczur's farm house in the Tomahawk district.

The latter burst into sobs when he gave evidence against Holenko in the arson hearing.

Spectator Killed At Race Track

INDIANAPOLIS, May 30 —Everett Spence, 33, Terre Haute, Ind., a spectator was killed Monday when a wheel from a crashing race car flew off the track in the 500 mile automobile race at Indianapolis motor speedway.

The wheel flew off the car driven by Emil Andres, Chicago, whose mount crashed into the lower retaining wall on the southeast turn as he was speeding on his 112th mile. Andres, rushed to hospital suffered a broken nose and a possible brain concussion.

CALGARY, May 29 —Alberta oil production for the first four months of 1938 hit a new high it was reported in an official government statement issued here Saturday.

Waters-McFadzean Retain Bay Trophy At Garneau Opening

Roger Waters and George McFadzean were again successful in retaining the Hudson's Bay net trophy Sunday afternoon when they turned back the challenge of Thomas and Hoyle at the Garneau Tennis Club, Edmonton.

The competition was the feature attraction at the official opening of the club.

Waters turned back Thomas 6-1, 6-0 and Hoyle took the measure of McFadzean 6-1, 6-2 in the singles play the Waters-McFadzean combination then took the series by winning the doubles 6-2, 6-4.

Malting Barley

The National Barley Committee has recommended that only O.A.C. 21 or Mensury Ottawa 60 should be eligible this year for the malting grades. O.A.C. 21 is probably the most suitable for Western Canada.

There is still time for any farmer to secure excellent Registered O.A.C. 21 Barley, all cleaned and sealed in the sack, at moderate prices.

Saskatchewan Re-elect Liberal Government

SOCIAL CREDIT INVASION OF NEIGHBORING PROVINCE REPELLED

REGINA, June 9—Complete returns and concessions Thursday gave the Liberal government of Premier Patterson a majority of 22 in the ninth legislative assembly of Saskatchewan, with voting still to take place in two far northern ridings—Cumberland and Athabasca—on July 28.

The Liberals captured 36 of the 50 seats at stake. The C.C.F. electing 10 were assured of being the dominant opposition in the next legislature.

In an emphatic voice, the province rejected the bid of Social Credit-ers under the active leadership of Premier Aberhart of Alberta.

Social Credit party, which ran 39 candidates, elected only two.

Conservatives for the second election in a row, failed to win a single riding.

Feature of late return Thursday in addition to the repulse of the Social Credit bid for power for the first time in Saskatchewan, was the victory of Hon. W. F. Kerr, minister of natural resources in the northwestern riding of Turtleford.

Mr. Kerr and James Proctor, Social Credit, alternated in the lead as the votes were counted but when all polls had reported Thursday Mr. Kerr held a plurality of 109 in a four-cornered fight. Walter Hicks, Conservative, with 420 and John Stegvhuis C.C.F. with 449, lost their deposits.

Baseball Tuesday

Tuesday evening the local senior Baseball Team will play its first home game in the Power Line league. The opponents will be furnished by Dodds who are rated as strong contenders for first honors. The teams play best when there is a good crowd.

Farm Women's Week Vermilion School of Agriculture

Farm Women of the Northern districts of Alberta will be interested to hear that the Farm Women's Week which has been held at the Vermilion School of Agriculture for the last several years, is being repeated this summer from July 4th to 9th.

This is a course specially designed for the benefit of farm mothers. The Schools of Agriculture realize that many farm women have little opportunity for a holiday from their numerous and exacting home duties and it was with this idea in mind that the first Farm Women's Week was put on in 1930. The course has grown in popularity each year, and according to advance inquiries received at the School, a large registration is expected again this year.

The programme provides instruction in certain topics of Home Economics, which will be of assistance to rural women. The work taken is essentially practical, being confined largely to helpful hints in cooking and sewing, with some attention being given also to such topics as poultry raising, horticulture, meat cutting, etc.

An important feature of the course is the opportunity it affords for a pleasant, profitable holiday for a few days on the beautiful School Campus at Vermilion. Living accomodation is provided in the School Dormitory at a nominal charge. Arrangements are made for the care of small children in case some mothers are obliged to take the baby with them. The entire week is planned with the object of providing as pleasant a holiday as possible as well as a certain amount of useful information. Literature with further details of Farm Women's Week is provided by the School upon application.

FOR SALE—Shed at rear of Variety Theatre. Apply Jim Campbell, Tofield.

BARDO

The Camrose College Choir gave us a splendid concert on Friday evening June 3rd. The Church was filled and the programme was much enjoyed by everyone. We wish to express our appreciation for the good music that the College Choir presents to us every year under the leadership of Mr. C. Ronning. The two opening numbers were dedicated to Mr. P. B. Anderson, an old-timer here. Mr. Anderson organized the first choir out here in 1894 and has done much to foster the musical life of the community all these years. Lunch and ice cream was sold after the programme and a tidy sum was realized for the benefit of the college.

Betty Kauffman, three-year-old daughter of Mr. and Mrs. L. Kauffman, was attacked by a dog. Her face was badly torn, requiring twelve stitches to close the wound. Betty is getting along fine now.

Mr. and Mrs. Helvig and family of Silverton, Ore., are visiting at the home of Mrs. Helvig's parents, Mr. and Mrs. T. Rorem. They expect to spend part of the summer here.

Rev. and Mrs. Palmer Anderson and three children left for Minneapolis last Thursday. Mr. and Mrs. Anderson will attend the annual meeting of the Nor. Luth. of America and also annual meeting of the Womens' Missionary Federation.

Mr. and Mrs. Olaf Johnson and family of La Glace, Alberta are visiting relatives and friends here.

Mrs. Alma Foshaug and family, Mr. and Mrs. Ivan Foshaug and Mr. and Mrs. T. Rorem attended the wedding reception of Mr. and Mrs. O. Stokke, at the home of Mr. and Mrs. A. Haugen of Shonts. Mrs. Stokke is the eldest daughter of Mr. and Mrs. A. Haugen.

Bardo Ball team lost two league games last week, losing to Round Hill 7-2 and Tofield 11-8. At the time of writing Tofield leads the league.

Mrs. M. Erickson and Mrs. J. Ness entertained the Bardo Ladies' Aid last week.

May 25th was clean up day at the cemetery. The Cemetery Society will meet again on June 15th.

Mr. Pete Bjornson, B. Bjornson, Ivar Moen and Geo. Hendrickson motored to Banff last week end, spending a few days. Pete Bjornson remained as he secured a job as guide at a Mountain Resort.

Bardo Sports Day, Saturday, June 18th.

Two names were omitted in last week's issue in the report of the Festival results:

Solo—Grade XI—Malcolm Finseth, Very Good.

Solo— Grade IV— Leroy Finseth, Very Good.

Mrs. Geo. Hendrickson trained the singers.

Reunion After 16 Years

Mr. and Mrs. John A. Lee were visited Monday and Tuesday by a brother of Mrs. Lee, Charles Nivier of Friendship, N.Y. Party of visitors included four other boys, Odell Martin of Lodge, S. Carolina, Ryland Woodson of Newport, Tenn.; Eugene Bayard of Omaha, Georgia; and Charles McDermott of Harriman, Tenn. All five boys are members of Civilian Conservation Corps, of the United States, serving in camps in the state of Washington.

LOCAL & PERSONAL

Mr. Paul Thomas spent Monday in Tofield. He was accompanied by Mrs. W. Haynes, nee Marian Carter, and small son of Innisfail.

****

Miss Loree Ross spent Saturday in Edmonton.

****

Mr. and Mrs. Stanley Jack and daughter of Edmonton spent the week end with Mrs. McConnell.

****

Mrs. Bertha Seale and Miriam spent the week end visiting in Edmonton.

****

Mrs. Tory and daughter returned home from the Lamont hospital.

******

Miss Bernice Severud of Kingman spent the week end with her sister Inga.

******

Mrs. Wm. McIntyre from Barons is spending a few days visiting at the [illegible]

******

The Misses Lois Taylor, Anne [illegible] Margaret Wright, nurses in Edmonton spent Tuesday at their homes [illegible]

****

Miss Pat Barrett is visiting Anne Lind [illegible] her home at Innisfree for a few days.

******

Two land sales have occurred in the district within recent weeks. [illegible] purchased the South half of [illegible]-50-20, W4; and Messrs. S. C. and A. W. Cinnamon purchased the N.W. quarter of 6-50-19 W4th. Both sales were put through at the office of A. J. H. McCauley.

******

The W. A. will hold a Strawberry Social and Sale of Home Cooking on Saturday afternoon, June 11th, at the home of Mrs. McCarthy.

******

The Junior W.A. will meet in the Church after school on Thursday, June 9th.

Carnival Evening Performances Well Attended

The evening performances of the Carnival sponsored by the Northern Alberta Amateur Club of Edmonton, held at Tofield on Friday and Saturday last, were well attended. The afternoon performance and patronage at the games was not so good.

The programme included some good numbers of the Amateur standard. The tap dancing by J. Badra and the singing by Miss Conklin were outstanding. An athletic act by a youngster was quite good. The dance orchestra was very good also.

TENDERS WANTED

Tenders will be received up to 6 p.m. Friday, June 24th, for the big booth concession at the Tofield Sports, July 1st. Lowest or any tender not necessarily accepted. Address your tender to J. W. Chapman, Tofield, Alta.

Local Secretary Gives Paper At Edmonton Meet

J.O.A. Letourneau, secretary-treasurer of Cornhill Municipal District is attending the annual convention of the Alberta Municipal Districts Secretary-Treasurer's Association, being held at Edmonton this week. He will give a paper on Municipal budgeting.

Sports Day To Be Held On July 1st

On Friday last the re-organization meeting of the Tofield Sports Day Committee was held. The attendance was small but the usual business of setting the date, appointing committees was done.

The day [illegible] was July 1st, the same as in the past few years. The day will be devoted to sport of different kinds, baseball, soft ball, foot races, etc. The great appreciation of horse racing last year was taken note of and this popular feature will again be included in the day's attractions. From the morning of July 1st until the early hours of the second, there will be something of interest going on all the time. Given fine weather and a good crowd, a really enjoyable day should result. The following are the officers and committees.

President, W. Worton
Secretary-Treasurer, J. W. Chapman.

COMMITTEES

Baseball—S. Burke, T. Schultz.
Softball—W. Bailey.
Races —J. Bailey
Basketball— P. Dunn, Geo. Aber [illegible]

Boy of 9 Gives Life For Brother

The [illegible] award of the [illegible] Scouting's highest [illegible] for bravery, to nine-[illegible] Wolf Cub John Bunting, [illegible]

[illegible] usual story of self-sacrifice. With his seven-year-old brother Leslie and other small boys John was playing near a deep pool, when Leslie slipped in. Although unable to swim, John jumped after, managed to splash his way to his brother's side, and pushed him to the pool steps. As Leslie scrambled out, John slipped back into deeper water and was drowned. The coroner declared it a clear case of the older brother giving his life to save the younger. The boys were sons of an unemployed miner.

Well-Conditioned Barns— As Well As Farm Houses

Farm owners take justifiable pride in keeping their buildings in good condition. If you do not have the ready cash to make needed repairs and improvements, you can borrow at the Bank, under the Home Improvement Plan. You can get the money at any one of our 500 branches and repay by easy instalments.

BANK OF MONTREAL

ESTABLISHED 1817

"a bank where small accounts are welcome"

Circus Is Thrill To Northern Boy

Monday brought the biggest thrill [illegible] for [illegible] Edward McGarran, of Fort Simpson, "out" for the first time and busily seeing the sights of Edmonton.

He went to his first circus—and was so astounded by the wonders that surrounded him that he completely lost his voice for whole minutes at a time.

The bright-eyed boy, who arrived in Edmonton last Thursday in a Mackenzie Air Service aeroplane for a few days visit, went as a guest of [illegible] the Al G. Barnes and Sells-Floto Combined Circus which is putting on two performances in Edmonton Monday.

It was an experience he'll never forget [illegible] if he reaches the [illegible] year mark of Edmonton's patriarchal Joseph Haire who was to have attended the same circus as a [illegible] but had to stay home with a severe chill.

And [illegible] amazement of newspaper performers, trainers and Press Agent Sam Stratton the eager child recognized and named without one mistake every animal he saw, despite the fact each of them was a thrilling debut as far as Edward was concerned.

"I like animal books—I know a lot about animals. Lions and elephants are especially swell," the [illegible] questioners, unaware of their astonishment.

[illegible] one of the biggest elephants under the big top, pick up the shouting and laughing youngster and hold him on her trunk while cameras clicked.

"Oh-h-h, they're BIG!" That's all Edward had to say when given his first [illegible] of elephant herd, 17 [illegible] Veteran attendants hid their grins and nodded [illegible]

Killam Branch Bank Montreal Will Be Closed

CALGARY, June [illegible] — Killam branch of the Bank of Montreal will be closed June 30 because conditions there [illegible] to curtail expenses as far as possible by concentrating business, the bank superintendent here announced Tuesday.

This is the fourth bank shut-down announced for Alberta points recently. Bruderheim and [illegible] branches closed within the last few weeks and a recent announcement was made that Cereal would close its branch. Several other towns have heard rumors of bank withdrawals and have held public meetings to protest anti-bank legislation in Alberta.

The Killam branch of the bank has operated since 1900. Killam is 100 miles south-east of Edmonton.

Questioned early Tuesday as to the situation with regard to other branches throughout the province, W. McIlwraith, superintendent, [illegible] had not been reached [illegible] He said he felt fairly certain [illegible] other branches would be closed.

He said there were many of the branches which had not made money in recent years but which had been kept open to serve the localities so times should improve. Now the costs of operation had become too burdensome and it was out of the question to ignore the situation.

Monday a delegation from Fort Saskatchewan visited A. T. Lowe, Royal bank supervisor here, in connection with the closing of their branch. Mr. Lowe declined to make any announcement Tuesday regarding the visit.

Residents of the Morrin district are signing a petition requesting that, for the good of the district, the government change its attitude towards the banks. The view is expressed that recent legislation has made it almost prohibitive for the Morrin bank to operate and it is claimed that a number of bank branches are reported closing throughout Alberta.

The Morrin petition goes on to state that its bank has rendered efficient service to the people of the district for many years and that it contributes substantial revenues to the village by way of taxes and money spent by the staff. Further, it states should the bank close a great portion of the present turnover of business houses will be lost to points where banks are located.

Copies of the petition are to be mailed to Premier Aberhart and to the bank head office.

Eskimoes Dub Bertha As "Moving Igloos"

Montreal— After travelling more than 1950 miles by dog train and [illegible] three eskimoes from the Oblate Mission at Chesterfield Inlet have arrived at Quebec.

Delegates to the Eucharistic Congress, they were accompanied by the Rev. Father L. Ducharme, O.M.I. The oldest of the group was Alphonse Kolitsierk, 35, who belies his name, "The Fat One". John Ayaruar, "strong-pusher" is 27. He supplies the missionaries with caribou, seals, white whales and fish when he is at home in the Arctic, and on the [illegible] mile journey on the ice along the [illegible] of Hudson Bay he hunted seals to feed the 19 dogs who carried the party on the first stage of its first trip to civilization. The third member is Simon, John's little seven-year-old son.

Speaking neither English nor French, the Eskimoes gave their impressions of the rail journey and this [illegible] of the world through Father Ducharme, who speaks their tongue [illegible] What surprised them most, he said, was the size of the buildings and the trees and their journey [illegible] train. Never having seen anything bigger than an outboard motor, they were overawed by the great locomotive and appreciated the opportunity given them by the train crew to visit the engineer's cab.

They described their berths as "moving igloos". Given his first [illegible] ice cream in the diner, Simon asked "Why is it cold? You can have things hot here, can't you?" When hot tea followed the ice cream, the Eskimoes laughed merrily at the weird logic of the white man.

On their arrival in Montreal, the [illegible] were welcomed at the Canadian National station by Mgr. Turquetil, "Bishop of the Arctic" by [illegible] members of the clergy and by [illegible] Trudeau of the C.N.R. Passenger Department.

[illegible] attended mass in the Bishop's private chapel and were not at all [illegible] to hear chants in the Eskimo language on [illegible] phonograph record. The memorable journey began [illegible] The train was boarded at [illegible] The Eskimoes will return to the Arctic by boat in July.

Huge Housing Plan Coming Up This Week

OTTAWA, June 6. An expanded home building program for Canada is expected to come before parliament this week.

Hon. Charles Dunning, minister of finance, gave notice Saturday of the government's intention of making some $47,000,000 available for home building. The loans would be entirely apart from those to municipalities for self liquidating works, announced last week.

The whole program would make almost $150,000,000 available in new business in the building industry.

Mr. Dunning's resolution indicated the amount available for loans of this type will be increased to $20,000,000, less the amount already loaned under the 1935 act. The figure will be $17,000,000 making it possible for about $40,000,000 to be spent under the program.

The second phase of the government's program, involving $30,000,000 is described as authorizing the making of loans at low interest rates to local housing authorities to assist in the construction of houses to be leased to families of low income at rentals "less than the economic rentals therefore."

Forecasting the legislation last week, Hon. J. G. Gardiner, minister of agriculture said the interest rate would be 2½ per cent.

Nippon Peer Has Eyes On British Centre In Orient

TOKYO, June 6—A demand for Japanese control of the British crown colony of Hong Kong voiced by Motojiro Sugiyama, member of Japan's house of peers, Sunday was reported in Domei (Japanese news agency) despatches from Nagasaki.

Sugiyama's declaration "Japan must control Hong Kong," was made as he ended a month's visit to the colony, centre of Great Britain's extensive China trade.

He told newspapermen he would urge Premier Fumimaro Konoye's cabinet to take measures toward "controlling Hong Kong as quickly as possible, both militarily and diplomatically," the news agency said.

Sugiyama described huge piles of armaments and railway repair machinery he said he saw on the docks of Hong Kong, one of South China's greatest ports.

"Japan's diplomatic negotiations with Britain regarding China have been a long list of successive failures," he declared.

PASTURE FOR RENT—Plenty of water. Well fenced. Apply to Geo. Yager, RR 2 Tofield, Alberta.

Bank Of Montreal Crop Report

GENERAL— The favourable crop conditions with which the season began throughout the Dominion have continued, such setbacks as have occurred being local and limited in their nature. In the Prairie Provinces wheat seeding is now practically completed and the planting of coarse grains [illegible] advanced. Crops are making satisfactory progress. Showers have fallen over most districts with precipitation heaviest in southern Saskatchewan and southern Alberta. In scattered districts there has been some soil drifting, but it has not been of a serious nature. In Saskatchewan some damage to crops by wireworms has been reported, grasshoppers are prevalent in some parts of the Province but have caused no damage yet. The total acreage seeded in the Prairie Provinces this year, it is indicated, will be somewhat less than in 1937. In Quebec Province seeding and planting are well [illegible] in most sections, and in others nearing completion. Conditions [illegible] satisfactory, with some [illegible] In Ontario [illegible] healthy [illegible] there has been damage by frost to fruits, tobacco and garden plants. In the Maritime Provinces pastures, hay lands and orchards are in good condition [illegible] and planting are well [illegible] In British Columbia seeding [illegible] completed earlier than [illegible] and all crops are making rapid growth.

ALBERTA— Wheat seeding is practically completed and that of [illegible] well advanced. Late seeding has been partially compensated for by good growing weather, and early sown wheat is well above ground. Rain is required in the Peace River district, in the Edmonton area and in the north. Other areas have [illegible] but the northern half of the Province requires rain. There has been no damage except slight soil drifting in the Peace River district. Pasturage is good. Sugar beets are satisfactory.

600 Tiny Chicks Flown To North

Believed the largest number of passengers yet carried north by air, 600 tiny peeping chicks in crates were flown to Mrs. R. J. Sharpe at Goldfields on Sunday by Pilot Gil McLaren of Mackenzie Air Service.

And travelling with the chicks was a wire-haired terrier, making his first trip by air, bound for the home of F. R. Thompson, who is stationed at Fort Chipewyan with the Royal Canadian Corps of Signals.

There were four human passengers.

Dog Hikes 600 Miles To Find Lost Master

HOUSTON, June 6 - Snowball, a Spitz dog, found his master here Sunday after a 600-mile trek from Odessa, Texas. The dog, foot-sore, lean and weary, crawled into the yard of Walter Clark. Clark said the dog strayed away at Odessa, March [illegible]

SPORTS DAY COMING UP—

IT WAS HOPED that the attendance at the re-organization meeting of the Tofield Sports Day Committee would have been larger. There were six present. The committee is not by any means a closed corporation, the meetings are open to all interested citizens of town and district, and there are plenty of opportunities for service by interested committee men.

It is seven or eight years since the present group undertook to sponsor a Tofield Sports Day. The original move came from those interested in baseball, but at the original meeting these interests quickly and voluntarily became subsidiary to the main objective, namely a general sports day for the town and district. The committee took its work seriously. There were two fundamental principles laid down. One that the day should finance itself. Two, that the day should not be taken as an opportunity for making money. To as far as possible make sure that the first objective would be attained, the whole organization agreed to pay the regular admittance fee. This meant that men working on committees paid their way in the same as anyone else—something unusual. The first year it rained, but on a re-dating the day netted some forty-odd dollars surplus. This money was turned over to the Boy Scouts to assist in their camping expenses. However, realizing that future days might not be so successful financially, and bearing in mind the first objective that the day should finance itself, the committee decided that all future surpluses should be banked so as to have a reserve in case any future day showed a loss. This was done and over a period of seven or eight years there is now a surplus of approximately $225. In no particular year was the surplus large, but with one exception, the day showed a surplus every year. Last year to make it easier for people to come, the admission price was drastically cut. It had previously been 35c and 20c with children under twelve free. Last year it was cut to 25c for all over 15 and all under 15, free. The increased attendance was gratifying.

The basic idea of the Sports Day Committee's work is to provide entertainment at a minimum of cost on one day of the year for the town and district population. It is recognized that a town is wholly dependent upon the business and good will of the surrounding district. And for this one day at least, the committee would like the country people to feel that the day is being sponsored for their entertainment.

z

The same reduced prices will be in effect this year and given good weather it is to be hoped the attendance will be even larger than previous years.

BANKS TO CLOSE?—

IT IS TO BE hoped that the resolution of the Tofield Town Council, recently passed, and the petitions at present being circulated around town will be duly noted by the general public. We do not for one moment believe the powers that be in banking circles desire to close the branches. Neither do we believe that, as heard quite frequently, that the banks are running a bluff. The very simple fact is, that branch banks, like every other form of business, to keep running must show a profit. Occasionally large businesses with many branches will continue to operate a few at a loss, the loss being offset by profits from others. But when there are too many showing a loss in proportion to those showing a gain, something has to be done. And cutting off the dead wood is the usual procedure. It would be a distinct loss to Tofield and district if the bank ceased to do business here. The public has become so accustomed to the bank performing its numerous functions, that to be without a bank is a condition difficult to realize.

A cursory glance at our own "small" bank will probably give a new slant to the bank as an institution. We have asked for no figures, we have heard no figures quoted, but we are inclined to believe the overhead of our "small" bank is one of the largest among businesses in town. Before it made any profit at all, earnings would have to reach five or six thousand dollars. This is exclusive of government taxes. Add excessive government taxation to the above and you have the reason why head banking officials are seriously considering closing branches. However we hope that there will be enough public interest shown by the signing of the petition to prevent the bank closing here. Closing would be especially unfortunate at Tofield as the bank has nicely got their new premises fixed up. What with the shale on the ground, the fence and stucco exterior of the building, the premises present a really smart appearance.

Only Sold Whole Pianos

George Gershwin said one day:

"Music criticism is excellent as a rule, but when a boxing expert takes to criticizing Strauss or Ravel in a condescending way the outcome is apt to be funny. It is like the steamfitter who got a job in a music store.

"A lady came into the store one day and said to him:

" 'I want to buy some piano pieces, please.'

"The man couldn't help laughing.

" 'Sorry, lady,' he said, 'but we sell only whole pianos here.' "—Philadelphia Bulletin.

Dog Saves Farmer From Enraged Bull

LACOMBE, June 6— Seriously injured when he was knocked down and gored by an enraged bull on his farm Saturday W. L. Ingraham, [illegible] farmer of this district, was in Lacombe hospital suffering from rib fractures Monday and lacerated neck and face.

His dog is credited by Mrs. Ingraham and Frank Crowely, hired man, who witnessed the accident, as saving the life of its master. When Mr. Ingraham was charged for the first time the dog responded to his shouts and held the bull at bay until the injured man was removed from the pen.

Until about three weeks ago, the bull, a four-year-old Holstein, had been considered a pet but at that time it had chased Mr. Ingraham and was placed in a corral.

Saturday the bull charged again and flesh on the side of Mr. Ingraham's face extending from the neck to the ear was torn out by one of the bull's horns.

Dr. F. Locke was called. He rushed Mr. Ingraham to the hospital where a tube was inserted into the windpipe which was badly swollen and inflamed. He was reported in a serious condition Monday.

Little Town Famous For Unique Move

STAVELY, Alta. June 6— The tinkle of a tiny bell and the birds of Stavely know "the cat is coming, scram." The cat population of the little southern Alberta town must wear bells. And they do.

Fred G. Flemming now known as the "cat man" had the belling by-law adopted by the council two years ago in his campaign to "give the birds a chance."

[illegible] so much so that High River and Vulcan and other Alberta towns plan to enact such a law or enforce those that were adopted but never made operative.

Stavely's campaign to protect the birds has received international attention. Bird lovers in the United States, throughout Canada and in the United Kingdom have sent letters of commendation. Many sought information, planning to seek similar laws for their cities or districts.

Since 1936, the town's bird population has shown marked increase while the cat families have decreased greatly.

Under the law "every owner of a cat in the town of Stavely shall cause the cat to wear around the neck a collar to which shall be fastened a bell and that all cats not wearing a collar to which a bell is attached will be destroyed."

The cat bells are tiny and feather-weight, some are silver and others gold colored and they bring added revenue to the ancient trade of the town harness-maker. He sells the bells and collars.

By appointment of the council there is an official feline exterminator in Stavely, which is 50 miles south of Calgary.

A "sure shot" he is armed with a small calibre rifle. He works on a commission basis—so much per cat. Hunting was so good the first year the law was enforced councillors feared for the safety of their treasury.

Woman Telegrapher Boasts Record 2,000,000 Messages

EDMONTON— When Miss Lillian A. Dunwoodie wrote "30" to 27 years of service as a telegrapher, her record showed she had handled a total of more than two million telegrams. Twenty-seven years ago she entered the service of the Grand Trunk Pacific; this month she retired as operator at the Canadian National Telegraph Company's commercial office in Edmonton after an enviable record of uninterrupted service.

[illegible] Seed Grain, Feed and [illegible] under the provisions of The Agricultural Relief Advances Act for 1938 total $5674.19

[illegible] meeting will be held at [illegible] in the forenoon on Saturday [illegible] day of July.

WHY DOES ANYBODY BORROW FROM A BANK?

★ ★

WHY does anybody borrow money?

Here is the answer: Usually to make a profit or to use the money for his advantage.

Be the borrower a farmer, marketing organization, lumberman, miner, fisherman, rancher, manufacturer—none ever borrows from a bank and pays interest except to gain a benefit outweighing the interest charges.

Every Canadian dollar represents tangible wealth already produced, or wages paid for services rendered.

Every Canadian dollar issued can be described accurately as to purpose, as a wealth-producing, wage-paying, profit-seeking dollar.

Occasionally some borrowed dollars become temporarily dead weight debt—perhaps you suffer a loss for a season through drought or other natural calamity. But with a better season, better prices and brighter business, the loser has a chance to recover his losses.

"I borrow $1,000 from the bank, paying interest because the bank is rendering me a service," one man instances. He goes on thus:

"Why do I borrow the $1,000? "To use in a business deal and make a profit.

"My deal concluded successfully, I repay the bank and have a profit of say $100, which I put to my credit in the bank.

"The bank has back its $1,000 and interest, and I have $100 I didn't have before.

"Multiply that borrowing of mine, my use of the money, my repayment and my profit, by many borrowers, day after day, and you see what is happening as a continuous revolving process throughout the year in the business world."

A farmer borrows for seed, cultivation or harvesting; a fisherman borrows for bait, boat or wages; a manufacturer borrows against raw materials being fabricated, to pay wages to finish and market his goods—but none of these borrows except in the hope of profit to himself, in supplying the needs of others.

Banking is not mysterious.

A farmer's co-operative marketing organization uses bank credit so that the farmer may get cash for his crop at the elevator without waiting for it to reach Liverpool.

A merchant borrows from the bank and is enabled to pay his bills early, take advantage of discounts, and pass part of his saving on to his customers.

A small farmer with 20 hogs borrowed $50 for feed, paid $1.75 interest and was enabled to sell his hogs for $100 more than he would have got on an earlier market. His net profit was $48.25. That is an authentic case. Here is another.

A hog-raiser on a large scale paid $100 interest on a loan for feed. He writes us that he made a net profit of nearly $2,000.

These are instances of the kind of services bank credit, exchanged for individual credit, performs as an everyday routine, in Canada. Any community can supply scores of similar examples.

What is money?

Coinage, Bank of Canada notes, bank notes, deposits.

Chartered banks now issue their notes up to a legal limit of 85 per cent of their paid-up capital. Yearly this is being reduced and the right of note-issue as steadily vested in the Bank of Canada.

A chartered bank's notes are the first charge on its assets. In case of trouble they must be paid off before a single cent can be paid on deposits or on any other debts owed by the bank. To make doubly sure that notes will be redeemed, each bank pays into a fund held by the Minister of Finance, an amount of cash equal to five per cent. of the average of its bank notes outstanding. This is called the "Bank Circulation Redemption Fund." The total of this fund is available for the purpose of redeeming the outstanding notes of any bank.

Notes of the Bank of Canada are money—legal tender—cash—that Bank's notes and deposits are backed (April 30 1938) by 53.37 per cent. of gold and silver bullion and foreign exchange.

Notes of the chartered banks, too, are money—their promises to pay; every dollar backed by more than twenty dollars of assets. They are redeemable, on demand, in cash.

Your deposit in a chartered bank also is money—you can buy things with it. It arose from your labour, production and thrift. It is redeemable in cash. It is the measure of your real wealth. You may make payments by cheque upon it. When your cheque goes through the Clearing House system, it must be met by the bank on which it is drawn. Any balances as between banks have to be settled in cash daily.

Your Canadian dollars are useful factors in a system that produces wealth for all of Canada.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

The Mercury Visits The British Columbia Coast

Held over until next week.

Flat Bottom Rowboat To Cruise World

MONTREAL, June 8— Heading first for Prince Edward Island, Hons A. Leclerc and Joseph Lawrence Perry coasted down the St. Lawrence river today in the 18-foot flatbottom [illegible] they hope will carry them around most of the world.

Leclerc and his Acadian-born companion told reporters they had mapped out a route that would take them first to Prince Edward Island where Perry hopes to see his parents for the first time in 20 years; down the Atlantic to the Panama canal, up the Pacific coast to Alaska, across the Bering Strait to Siberia, down the coast of Asia to the Indian ocean.

From there they hope to continue up the Suez canal to the Mediterranean and then on to Paris—within five or six years.

Much Marrying Pastor Offers Marriage Code

PITTSBURGH, June 8— Dr. Bernard C. Clausen, who married 1000 couples as pastor of the First Baptist church here, has drawn up "Ten Commandments for Marriage" as follows, for this year's crop of June brides:

1. Simplify your life. Get along with as little money as possible. Spend less than you earn.

2. Set aside time for quiet together. Do not let life tire you out. Manage your hours.

3. Never let a lie last an hour between you.

4. Quickly forgive.

5. Share all joys and disappointments. Do not protect each other from bad news.

6. Cultivate complete candor and frankness.

7. Know everything you can learn about life together. Read books, consult experts. Ignorance is not innocence.

Audit the books together. Marriage is a financial partnership and allows no fiscal secrets.

6. Never think of marriage as tentative. It is your career. Make it a lifetime project.

10. Base it on religious fellowship. Mixed marriages fail only because they lack unity of religious life. I have never seen a couple come to grief who were consistently and unitedly busy in a single church.

"I Hope, I Hope, I Hope!"

A film star met a producer on a Hollywood boulevard.

"How's business?" asked the star.

"Why," cried the producer "it's stupendous, it's colossal, it's dynamic, it's unprecedented . . . it'll be better next week." —Tit-Bits.

Hooray!

"The Government certainly plans to spend a lot of money!"

"Yes, so much money that even the taxpayers may get hold of some of it."

Tree Planting Car Gives Advice On Shelter Belts

Reducing loss of moisture from evaporation, damage from soil drifting, conservation of natural trees and planting shelter belts; beautifying the farm home and grounds are objects of the Canadian Forestry Association's Travelling Tree Planting Car. This railway coach equipped with motion pictures and lantern [illegible] machines is touring the prairie provinces for the thirteenth year. This year the car is being financed by the member line elevator companies of the North-West Grain Dealers' Association. Local line elevator agents are sponsors of the car where it makes a stop. The car was donated to the Canadian Forestry Association by the Canadian Pacific Railway and both railways move it from town to town free of charge.

According to A. R. Beaven of the Association, who is travelling with the car for his twelfth year, there is greater interest and enthusiasm shown by rural people than ever before. The Car has been out since early March. At the end of May 48 towns had been visited, 128 meetings held, with a total attendance of 17,-[illegible]52 people.

Every afternoon a special program is shown for the school children, and [illegible] evening for adults. A well rounded out program for the school [illegible] includes several short educational talking movies, with a couple of short comedies. Mr. Beaven's talk on tree planting and planning the farm home grounds is accompanied [illegible] movies and lantern slides. The evening program includes many of the same pictures shown in the afternoon but more time is spent on the main subject. Those attending are invited to remain after the show to ask any questions concerning tree planting or other related subjects.

It is naturally impossible for the car to visit all prairie towns in one season. However all those interested may obtain advice from any line elevator agent concerning the car.

Women Turn Hose On Policeman in Big Fight

DETROIT, June 8—A score of women armed with garden hose, sticks, stones and even a wash tub, routed a dozen policemen Tuesday in a battle over location of a cemetery fence.

The aroused women were pulling up fence posts faster than three workmen could set them, determined to prevent extension of the cemetery to the rear of their lots, when police arrived.

Inspector Henry R. Traub ordered one woman to stop drenching a workman with a stream of water from a hose. She turned the water on the inspector, then took refuge in her home and threw a wash tub at a patrolman.

Father Simon Kiler, of an adjoining parish, effected a compromise under which location of the fence will be argued at a city council hearing Thursday.

Trees To Shoo Toronto Flies

TORONTO, May 30 —An attempt to keep flies away from areas of Toronto will be made by the city's branch of the Men of the Trees by planting seeds of the yerba de la pulga tree. The organization is to receive a shipment of seeds from Gulfport, Miss. Originally found in the Amazon district, the tree is said to be repugnant to flies.

A WIDOW would like to get a position keeping house for a bachelor or widower. Have a boy 5 years old. Canada born. —Mrs. Laura Todd, Ferintosh, Alta.

Moon Off Course Earth's Fault

LONDON, June 6 —The moon, Astronomer Harold Spencer Jones said Monday, has jumped its track. "And it's all the earth's fault," the astronomer told a meeting of the Royal Observatory of Greenwich.

Moon's course is plotted by the earth's time and the earth's time is reckoned by its rotation, Mr. Jones explained. Somewhere an unknown gigantic brake has suddenly been clamped on the spinning world, slowing it down, he said.

Dr. Martin Davidson, president of the British Astronomical association estimated this slowing down process was going on at the rate of about 1-1000th second every century.

Quitters

Two men were talking during a concert by Sousa's band.

"That fellow Sousa has no control over his gang at all," said one.

"How do you figure that out?" asked the second man.

"Well," was the reply, "the very minute he quits threatening them with that little black club and turns his back on them, the quitters stop working. Just watch them!"

TOFIELD SPORTS DAY JULY 1st

WEEKLY RAIN REPORT

Supplied by Searle Grain Co. Ltd.
Week Ending Wednesday, June 8

Thursday	
Friday	[illegible]
Saturday	[illegible]

LINDBROOK

The spring and early summer rush is over and now we see more of each other. Sheep shearing will soon be on the go amongst the sheep population here and clearing and breaking will provide a pastime for the grain farmers.

We hear that a week ago Sunday, a visiting Kingman ball player, playing at Hastings Lake against that team, had the misfortune to collide with a base man, the impact breaking an arm.

Mrs. Martha Franklin of Saskatchewan is visiting her brother Mr. Asa Rogers of Lindbrook and members of his family who are living hereabouts.

Mr. Reuben Rogers, former resident of this district, now of Didsbury, Alta, is here on a visit to relatives.

Miss Thelma Gordon of Strome, Alta, is here on a visit to her friend Miss Y. Phipps, our school teacher.

Mr. Oscar Kortzman of the Barrhead district is here on a visit to his brother, Mr. F. Kortzman and family of this district.

Divine Service was held at the School last Sunday (Anglican). The preacher being Mr. Gardam of Westlock, who will be serving Tofield parish until the end of September.

The grader has been busy around this district, several roads being fixed up and has now gone south. As one fellow puts it, "fix them up for the collectors, etc., if the crop is good," also all kinds of high pressure salesmen, etc.

Miss Eileen Best of Athabasca is visiting relatives here, the Bracegirdle family and Mr. and Mrs. F. Evans.

KINGMAN

Quite a number of ladies from around town surprised Mrs. McIntosh on Saturday afternoon, the occasion being her birthday.

Mr. Alex Asp and sons Herbert and Douglas went to Calgary Tuesday to bring home Mrs. Asp who has been visiting there for the past month.

Mrs. Simon Simonson is home from the Camrose hospital with a new baby daughter, born June 3rd.

Mr. Farmer and his sister called on several Kingman friends Saturday afternoon.

Mr. and Mrs. Geo. Welsh and Mr. Albin Anderson visited at the McIntosh home last Sunday afternoon.

Mr. Ma Him was an Edmonton visitor last Friday.

Mr. A. Regstad took a load of Kingman people in his truck to a picnic held at third Miquelon Lake last Sunday afternoon.

There will be a Social Credit picnic at Miquelon Lake on June 18th. Several M.L.A. speakers will be present.

Miss Nora Simonson visited with Miss Bernice Asp on Sunday afternoon.

Miss Alice Simonson came home from Edmonton last Friday where she has been attending school.

DON'T FORGET TOFIELD SPORTS DAY— JULY 1st

KETCHAMOOT

Ketchamoot Picnic will be held on Wednesday, July 6th. More particulars later on.

Mrs. Henderson entertained the Ladies' Aid at her home Wednesday of last week. A splendid crowd was present. Preparations for the picnic were made.

Mr. and Mrs. Donald McCowan and son Jimmie were guests of Mr. and Mrs. C. A. Ingram for supper Sunday evening.

Mrs. Dick Thomas and four children of Edgerton are visiting their mother, Mrs. Annie Lee and other friends and relatives.

Miss Kay Cardien, Messrs. Chris and Jimmie Christen, Verne Anderson and Jimmie Martin, all of Edmonton were guests of Mr. and Mrs. Joe Sutton Sunday. Miss Cardien is Mrs. Sutton's sister.

Mr. and Mrs. C. Coombes, Miss Gladys and Ronald and mother, Mrs. E. McMullen, visited their sister and daughter, Mrs. Mabel Brown and family of Bawlf on Sunday.

Mr. and Mrs. W. A. Mitchell were Sunday evening guests of Mr. and Mrs. A. F. Schultz.

Miss Ethel Brown visited her friend Miss Margaret Mitchell Sunday evening.

Mrs. J. H. Ingram returned home Tuesday after a ten day's stay in Tofield caring for her new granddaughter, Esther Yvonne Wiley.

Messrs. Russel Schultz and Lyle Coombes motored from Drayton Valley Sunday, where they have been for several weeks. Russel returned the same evening.

Mrs. Thomas and children, Mrs. Annie Lee, Mr. and Mrs. Martin Lawson and Mrs. Geo. Lawson were Sunday evening guests of Mr. and Mrs. Roy Lee.

Mrs. C. A. Ingram, Mrs. G. W. Sears, Miss Norah Kennedy, Kathleen Ingram and Albert Sears were Edmonton visitors Friday. Miss Mary Ingram accompanied them home, returning to the city on Sunday.

Miss Iris Martin of Drayton Valley is assisting Mrs. F. Sutton with her house work.

Mr. Frank Ratigan and Bill Cinders motored from Nelson, B.C. to the home of Mr. Ratigan's sister, Mrs. J. H. Ingram, Sunday.

Miss Marie Bochek, Laura Corbin, Messrs. Ivan and Sammie Mitchell and Charlie Ray motored to the city Monday.

Mr. and Mrs. D. H. Mitchell, Mr. and Mrs. Stanley Jack and daughter and Miss Maude Wildman of Edmonton visited friends and relatives in our midst Sunday of last week.

Mrs. Les Ovelson is recuperating at the home of her parents after a recent operation.

Social Credit Zone Meeting Held Thursday

A meeting of the Social Creditors in Zone No. 7 was held in the Women's Institute Building on Thursday evening, June 9th, 1938.

There was a good crowd present, and Mr. Dodds was chairman.

Election of officers was finally settled by Mr. R. Murray, acting as president until the end of the League year in October and the Zone will continue with the present secretary until that date.

A picnic was planned to be held July 13th, 1938, the place to be announced later.

There was discussion about various topics of the day. The attitude of the banks was deplored and strong resentment expressed against those signing petitions etc.

I SAW

LAKESHORE PICNIC

A good crowd turned out to the picnic sponsored by the Lakeshore basketball club on Wednesday. Baseball, softball, races etc., were the chief attractions.

In baseball a close game between Tofield and Lakeshore resulted in a win for Lakeshore by a score of 6-5. Ross Creek and Bardo then met and Ross Creek won by a good score. The final game between Ross Creek and Lakeshore resulted in a win for Ross Creek by a score of 12-5.

Lakeshore and McKenzie schools played softball the result of which will no doubt appear in country correspondence next week. Friendly games of horse shoe were played, and while the day was not a record breaker as a money-maker it was a complete success as a picnic. And what more can you ask?

On Tuesday evening last the Tofield senior baseball team met the Dodds team at Tofield in a regular league game. The score was 6-5 in favor of Tofield.

LOCAL & PERSONAL

The C.W.L. cold chicken supper in the basement of St. Francis Church on Saturday, June 18, at 5:30 p.m. Bingo after supper.

Mr. Cameron visited with his sister, Mrs. R. Coutts, for a few days this week.

Mrs. Malcolm and Muriel, Mrs. Hammond, Mrs. Abbott and Mrs. Taylor motored to Edmonton Friday.

Mr. Geo. McFadzean spent the week end in Edmonton.

Rev. and Mrs. Wallis from Camrose visited Tofield on Monday last.

A large number of Tofielders spent last Sunday at Elk Island Park.

Mr. and Mrs. A. R. Thompson and Betty of Leduc spent Sunday visiting their daughter Lois.

Miss M. Archer of Lamont is visiting Margaret McConkey.

Misses Betty McCarthy and Margaret Whyte spent Tuesday at their home shore.

THEATRE INSTALLING NEW SEATS

You can leave your cushion at home now. This week the Variety Theatre installed regular theatre seats, upholstered, hinged—and everything. The building is also being re-wired and other improvements made.

Searle Precipitation Report

Taking into account the precipitation that occurred last autumn during the months of August, September and October and the rains which have fallen this year from April 1st to June 4th inclusively and weighting for wheat acreage, the moisture condition of Alberta on June 4th was 90 per cent of the normal as compared with 100 per cent for the previous week, and 104 per cent for the week before that.

For Saskatchewan, on June 4th, the condition was 84 per cent as compared with 96 per cent for the previous week and 86 per cent for the week before that.

For Manitoba, on June 4th, the condition was 86 per cent as compared with 88 per cent for the previous week and 91 per cent for the week before that.

Taking the three Prairie Provinces as a unit, the weighted average on June 4th was 89 per cent of the normal, as compared with 96 per cent at the same time last week, 92 per cent for the week before that and 72 per cent on June 4th last year.

The recent moisture deficiency as compared with normal, revealed by these figures, is not serious enough at this time to harm the growth of the wheat plant. It really means that the moisture reserves that the plants will begin to call upon about the end of June are somewhat less than normal. However, the existing deficiency can easily be made up in the next few weeks provided generous rains occur.

New Treatment For Pneumonia

SAN FRANCISCO, June 14 —Human bone marrow, which grows in bottles in a medical laboratory at the University of Oregon, has been catching pneumonia.

Pneumonia was caused by infecting the living marrow with human pneumococcus germs, and out of the strange experiment, the American Medical association was informed Monday, has come a new idea about a treatment that promises to cut the pneumonia death rate.

Bottled marrow experiments were shown in the scientific exhibits by Dr. Edwin E. Osgood of University of Oregon Medical school, Portland. He invented the method of growing human bone marrow artificially. He used a new and simplified type of the "tissue culture" for which Col. Charles A. Lindberg invented the artificial heart used at the Rockefeller institute in New York.

Col. Lindbergh's "heart" keeps whole organs alive. Dr. Osgood's "bottle culture" goes back nearer the origin of health by growing the cells of which tissues are made and which sustain the direct attacks of disease.

He takes marrow from the breastbone of living persons with a needle. It is as simple and comparatively painless as taking a drop of blood. This bit of bone marrow he puts in a small bottle with salts, serum, and air on which the marrow cells can live.

When it is time to feed the marrow he whirls the bottle in a centrifuge. This temporarily separates the marrow from the waste matter formed from its consumption of food. The waste is drawn off with a hypodermic needle and fresh food and air injected. In this way bone marrow lives and increases indefinitely.

Inasmuch as bone marrow forms human blood cells, it is an ideal "guinea pig." It catches pneumonia when pneumococcus germs are introduced and reacts to the disease apparently the same as the tissues of a human victim.

With these artificial guinea pigs Dr. Osgood has been testing effects of sulfanilamide. This is the new drug made from red dye, which has astonished the medical profession in the last three years by its beneficial effects on many types of germ infections.

In pneumonia, Dr. Osgood found sulfanilamide does not kill the pneumococcus germs. But if it is used along with type specific pneumonia serum it tremendously enhances the curative power of the serum.

Vermilion School Of Agriculture Forage Crop Field Day

The second annual Forage Crop Field Day will be held at the School of Agriculture, Vermilion, on Monday, July 25th, 1938.

Since this date is also the beginning of Farm Women's Week, it is hoped that farmers who bring their wives to the Short Course may themselves spend a profitable day about the school.

An address of welcome will be given by the Principal, S. H. Gandier, at 1.30. At 2.00 p.m. the topic of Forage Seed Production will be discussed by A. M. Wilson. N. N. Bentley and D. A. Andrew will consider briefly "Soil Conservation" and "The Management of Hay Crops." At 3:30 the party will be conducted through the demonstration plots and farm meadows.

A welcome is extended to everyone interested in permanent agriculture. We trust that those who attend will find the day's programme both instructive and entertaining.

Last year over 150 farmers from Northern and Central Alberta attended this meeting. It is hoped that even a greater number will be present this year.

CANADIAN NATIONAL RAILWAYS

Eastern Canada

LOW SUMMER FARES

are now on sale to all points. See Ontario, Old World Quebec, the Maritime provinces. There are scenes rich in beauty and historical interest. The Great Lakes Special leaves Winnipeg every Tuesday and Friday throughout the summer months, connecting with steamer at Port Arthur.

Any Agent will gladly assist you in your plans.

TESTED RECIPES

POULTRY AS YOU LIKE IT

By Betty Barclay

Chicken when company comes? Of course! But do not stick to fried, broiled or roasted chicken. Serve unusual chicken dishes that will both please and surprise. Season well.

Chicken Morango

1 young chicken
½ cup butter
1 finely chopped onion
1 small carrot cut in cubes
1 turnip cut in cubes
1 cup canned tomatoes
1 teaspoon sugar
Salt and pepper

Cut up a young chicken in quarters. Sprinkle with salt and pepper, dredge with flour and brown in salt pork fat. Put in a baking dish with the other ingredients and cook slowly until the chicken is tender. Serve in the dish in which it was cooked.

Mexican Chicken

4 to 6 pound fowl
4 or 5 potatoes
1 cup seedless raisins
2 cups canned tomatoes
Butter
1 tablespoon sugar
2 tablespoons chopped onion
2 tablespoons parsley

Simmer the fowl in a small quantity of salted water until tender. Remove from the broth. Set the fowl aside for stuffing. To the chicken broth add the canned tomatoes, sugar and the finely chopped mild onion. Let this sauce cook down. In the meantime prepare the stuffing by cooking and mashing the potatoes and adding to them the raisins and enough milk to make the mixture the stiffness of ordinary mashed potatoes. Stuff this, while still hot, into the body cavity and neck of the fowl. Crowd in all the stuffing possible. Pour a little melted butter over the chicken. Put it in the oven to brown. Thicken the tomato sauce to the consistency of a gravy and add 2 or 3 tablespoons of finely chopped parsley and green pepper if desired. When the chicken and the surface of the potato stuffing have become delicately brown, place on a large hot platter. Pour part of the sauce around the chicken and serve at once.

Outdoor Picnic Stew

1 cup dried Limas
2 pounds of lamb cut in cubes
2 small potatoes sliced
1 small onion, sliced
1 cup canned corn
1 cup strained cooked tomatoes

Sear the meat cubes in bacon fat. Put cubes, onion and potatoes into a covered saucepan, cover with boiling water and simmer gently for 1½ hours. Add Limas, corn and tomatoes. Bring to the boiling point and cook slowly for about 3 hours.

Orange Date Nut Salad
(Serves 1)

On lettuce-covered salad plate, arrange circle of 5 or more Navel orange slices. Within this circle make a second circle or cup with 4 or 5 orange segments. Fill cup with mayonnaise. Stuff 4 or 5 stoned dates with walnut halves. Arrange on orange slices. Top mayonnaise with a walnut half.

Strawberry Chiffon Pie

1½ cups dry bread crumbs or crushed zwieback
1-3 cup sugar
½ cup melted butter
2 pints of strawberries
¾ cup sugar
Juice of 1 lemon
1 tablespoon gelatine
¼ cup cold water
½ pint heavy cream

Mix crumbs with the third cup sugar and blend in the melted butter. Turn into a 9 or 10-inch pie tin or spring-form pan and pat down so bottom and sides are covered with a uniform layer. Place in refrigerator.

Wash, hull and crush the strawberries, reserving 4 choice ones whole for garnish. Pour sugar over crushed berries and allow to stand 10-15 minutes. Soften gelatine in cold water. Drain juice from berries, heat to boiling, remove from fire and stir in gelatine. Cool and add berries and lemon juice. Chill in refrigerator until mixture begins to congeal. Whip cream until stiff. Reserving ¼ cup for garnish, fold remainder into strawberry mixture. Turn into the crust and chill 2-3 hours in refrigerator. Just before serving, spread or pipe remaining cream over surface. Garnish with halved strawberries. Yield: 8 servings.

Maple Delight

1 rennet tablet
1 tablespoon cold water
1 pint milk
½ cup maple syrup

Make a rennet-custard according to directions in package, using 3 tablespoons maple syrup in place of sugar and vanilla. Chill in refrigerator. Before serving, top each dish of ice cold rennet-custard with the rest of the maple syrup.

THE WORLD OF WHEAT

By R. G. L. Strange, Director Research Department, Searle Grain Co.

"Undoubtedly the Western producer works under a disadvantage in Canada's fiscal policy— —. The custom of other countries, including Canada, played some part in the adoption of policies that led to a shrinkage of wheat imports into the following countries: Switzerland, Italy, Belgium, Holland and in a less degree Germany and France.

These are the significant and important words used by Justice Turgeon in the Royal Grain Inquiry Commission Report just issued.

The Hon. Mr. W. D. Euler, Minister of the Department of trade and Commerce has recently reminded us that "Practically every person in Canada is affected by the trend of Canada's trade . . . Our problem is to find markets for our surplus production. On our success in doing so depends the livelihood of one half or more of our population."

Not only do high tariffs lose markets for our wheat, as Justice Turgeon reports, but in addition they increase the cost of all the things that prairie farmers have to buy for living and production.

The lowering of high tariffs and the removal of other restrictions against international trade would therefore, considerably benefit our prairie farmers. Such action in addition would bring about increased world prosperity, and would remove a serious cause of war.

Following factors have tended to raise prices: Frost and rust attack U.S. winter wheat—Argentine corn crop officially reported poor; some green or rotted. Greece buying securities wheat reserves. France authorizes additional [illegible] importations. Yugoslavia sanctions importation of [illegible] bushels of wheat—Black Sea shipments continue very small.

Following factors have tended to lower prices: U.S. private estimates predict record wheat crop—Good reports of Argentine wheat seeding—Prairie crop conditions almost normal—U.S. [illegible] exports set record for winter season. European crop prospects improve. Czechoslovakia negotiating for purchases of Polish rye on barter basis.

Main Alberta Highway Will Be Completed

Present plans of the provincial public works department call for completion of hard-surfacing of the No. 1 highway from Edmonton to the international boundary by 1939, Hon. W. A. Fallow, minister of public works, announced on Monday.

By July 15 of this year it is expected that hard-surfacing will be completed from the boundary to Banff so that the tourist trade for this season will be taken care of.

Mr. Fallow left on Monday for a five days inspectional trip of new highways work. He was accompanied by G. H. N. Monkman, deputy minister and Norman Macpherson, highways and bridges commissioner.

Eight outfits are at work between Edmonton and Calgary, mainly on the 65 miles of new road between Red Deer and Crossfield, while seven outfits are working south of Calgary.

In all there are between 600 and 700 men engaged in the various projects. New equipment, including Diesel tractors, new scrapers and new oilers will be inspected in action. Three eight-hour shifts are being used on the crews, so that work will be pushed ahead with all possible speed.

The minister said that of the 400 miles from Edmonton to the international boundary there was a total of 110 miles yet to apply oil hard-surfacing to. This work is being pushed ahead at the rate of four miles a day. The hard surfacing is done in three stages, the blotter, seal and armor coatings.

Mr. Monkman and Mr. Macpherson will later inspect the Crow's Nest Pass and Trans-Canada highways.

Chakar Partridge Introduced Here

Alberta hunters will have a new type of partridge for a target within a few years as a result of pioneering efforts of sportsmen's organizations in Edmonton and Calgary, W. H. Wallace, provincial game commissioner, said Monday.

The new species is the famed Chakar partridge, slightly heavier and slower on the wing than the Hungarian variety long familiar in this province. Eggs and adult birds have been brought into Alberta by the Northern Alberta Fish and Game Protective league and the Calgary Fish and Game association.

PERSONAL LOANS

THIS BANK is regularly making personal loans to salaried men and women, to wage-earners, to business and professional people and executives.

The terms are simple, the interest rate moderate, and there is no service charge.

The Manager at any office of the Bank of Montreal will be glad to have you call and discuss your financial requirements with him.

TEN THOUSAND PRESIDENTS—

THERE PROBABLY has never been a provincial election that caused so much comment as the recent Saskatchewan election. Newspapers all over Canada and other parts of the world as well, have freely commented upon the outcome. Reading quite a number of the comments one finds a variety of reasons given for the result, even though prior to the election few definite unbiased predictions were forthcoming. But while the reasons given for the well known result are numerous and varied, we have yet to see mention made of what we consider one of the real reasons for social credit success here in Alberta and failure in Saskatchewan.

If one was permitted to fly over Alberta on any night of the week except Sunday, during the off-season months, and it were possible to drop into many school houses and in many instances, private homes, one would find a social credit meeting in progress. There would be the president, the secretary, and perhaps other officers, together with the rank and file, earnestly discussing matters pertaining to social credit government, as well as matters pertaining to their own small group. The group of people probably would not be very large, but what it lacked in numbers, it would make up in directness of purpose. And while most likely the group would be small it would only be one of very many spread over the entire area of the province. There must be a very large number of presidents in Alberta. Perhaps ten thousand is too high an estimate but it is safe to say that the number of presidents run well into the thousands. Each president is a man of standing in his community and has a number of personal friends, who due to the fact that he is a president, he endeavors to win over to his way of thinking. Coupled with the business part of such gatherings is the social part. Farmers and their wives, often their entire family, periodically meet socially and with an objective. It does not make so much difference whether the objective is attained, it is there to strive for, and in the striving there is friendly intercourse with the neighbors. Added to the main objective there is the "uplift" feature. Small groups look up to district groups: district groups look up to constituency groups; and constituency groups look up to parliament itself. The idea is not new. It is to be found in all fraternal societies. Who has not heard of the "Supreme Lodge" or seen mention made of the "Exalted Ruler?" That there is a joker in the pack does not really lessen the usefulness of the plan. The joker is that while the lower groups are looking up to the higher groups, they are also contributing towards them. In fraternal organizations there is the per capita dues. In political groups there is the vote. We do not approach the phrase "Ten Thousand Presidents" in a spirit of levity. We think it splendid for country, and for that matter town people, to get together with an objective in view. The routine of farm life is an arduous one and the phrase "All work and no play, makes Jack a dull boy," is as true to-day as when it was first penned. We do, however, believe it would be better if the objective was cultural rather than political, and that this kind of gathering were not used to the ultimate benefit of someone far away. Here is an opportunity for university men, professors, senior students, etc., to speak on subjects, apart from farm subjects, but of general interest.

However, whatever Canadian, American and English newspapers have to say about the results of the Saskatchewan and Alberta elections, we feel that the numerous groups here and the lack of them in Saskatchewan had much to do with the result. It is hard to beat ten thousand presidents.

UNEMPLOYMENT A FEDERAL PROBLEM—

Anyone who has lived in any of the numerous prairie small towns will remember the large number of transient unemployed who were drifting around the country a year or so ago. Some of them drifted so much that it would be hard even for them to say which part of Canada they called home. Due to climatic conditions British Columbia, particularly Vancouver, had its full share of unemployed, men flocking to the coast to escape the rigors of the prairie winter.

Vancouver authorities have decided that they have done enough and are now offering unemployed free transportation to prairie points. The idea is to return them to their homes. Prairie cities are up in arms against any such procedure and have notified coast authorities that relief would be denied any coast jobless arriving here. As many of the men have moved from place to place since they first came to the country, home is rather a vague term to them. In fact in many instances home is where they hang their hat. It does not seem quite fair that Vancouver should be saddled with more than its fair proportion of unemployed even if the climate is mild. Yet who is to say just to what city or province these men do actually belong.

It would seem to be a straight case of federal responsibility. At least they are in Canada and in most cases came here through dominion immigration laws. In a country as large as Canada, it is quite a problem, but like all difficult problems, the sooner it is tackled and dealt with, the better it will be for all concerned.

U.S. Artillery Develops Speedy Railway Gun

Watertown, Mass., June 13. —Death will ride a flat car from coast to coast if U.S. shores ever are threatened by foreign invasion from the sea.

A new type, eight-inch railway mount, in which has been developed all artillery improvements made by the U.S. since the Great War, is practically completed at Watertown arsenal.

Gun and mount weigh 118 tons and can be sped rapidly from the Atlantic to the Pacific coastlines with mechanism to send a 200-pound projectile whistling 20 miles across the water toward challenging warships. The gun will fire four shots a minute and its projectiles, travelling 2,600 feet a second are capable of smashing eight-inch armor plate.

The gun barrel itself is little changed in principle from the first breech-loaders, but years of experimentation since the Great War have eliminated, in theory at least, the old bugaboos of mobile artillery—unsteadiness and inaccuracy.

Outriggers imbedded in the earth, will limit after-shock motions to inches instead of feet. Massive jacks, suspended from beneath the gun's turn-table mount, manoeuvre the mount to its track firing positions.

Watchful of its man-power, the army also has improved the loading mechanism, substituting a fixed loading-tray for the old moveable table which was slow and dangerous to the gun crew.

The army engineers speak only in general terms of the improvement—the details are the army's secret. Closest guarded secret of all is the recoil mechanism, which stops the gun after it thunders out its discharge. Heavy coats of alloy steel conceal it from prying eyes and then the gun workers understand its effect not its cause.

Cadet Left Note Continue Dance

KINGSTON, Ont., June 14. —Note asking that the college go on with the graduation ball was found beside the body of Cadet H. G. Campbell, 20, of Port Arthur, who died in hospital Monday from what authorities said was a self-inflicted gun-shot wound. Said to have been brooding over the recent death of a fellow cadet, with whom he had been wrestling, Campbell was found dying in his dormitory at Royal Military college. The ball was held Monday night.

Hon. Ian Mackenzie, minister of national defence, cut short his address at the presentation ceremony in Sir Arthur Currie hall. He had been informed earlier of the tragedy.

College authorities said there had been concern over Campbell's health since the death of Cadet R. D. Smith, of Toronto, April 30, after a wrestling match in which Campbell participated. Inquest into Smith's death revealed Campbell struck him an accidental, glancing blow beneath one ear. Coroner's jury absolved Campbell of blame.

College officials said they had hoped Campbell would rally from his mood of depression and pull himself together. He had failed in his year's work, it was stated.

"I do not know how he came to have live ammunition in his possession, as the orders are against such a practice," said Brig. H. H. Matthews, commandant of the college. "We knew of the tragedy before we went into Sir Arthur Currie Hall. I did my best to carry on and run off the program as arranged. Mr. Mackenzie went through with his part of the program but cut his remarks short."

By telephone from Port Arthur, Campbell's father said the boy's letters had given no hint of unhappiness. The parents will come here to take the body back to Port Arthur for burial.

Campbell in his second year at the institution was a member of the first hockey team and the second rugby football team.

An inquest was to be held Tuesday.

Disaster In Creston District

The Creston district in Southeastern British Columbia has gone in for wheat production during the past few years, last year's harvest being around half a million bushels. Wheat was planted on land reclaimed where the Kootenay River joins Kootenay Lake. High water prevailed this spring and the dykes were over-run flooding something like 14000 acres of land, and utterly destroying the crops thereon. Creston is one of the heaviest wheat producing districts in the west although the area was limited. Since wheat growing was started on the reclaimed project, 80 bushels to the acre has been a commonplace yield. It was most unfortunate that this disaster overtook this district.

Five More Banks Will Shut Doors

Announcement of the closing of five more branch banks in Alberta were made on Tuesday morning, when officials from the offices of the superintendents of the Bank of Montreal and the Canadian Bank of Commerce notified head offices of the banks in Edmonton of the decision reached. Branch banks affected are the Bank of Montreal branches in Islay and Mannville and the Canadian Bank of Commerce branches in Vegreville, Bawlf and Delia.

The official announcement from the Bank of Montreal came from Superintendent William McDonnell and read that the "branches of the bank will be withdrawn on July 16 because conditions make it necessary to curtail expenses as far as possible by concentrating business.

Customers of these offices will be notified by letter and informed which banking points will be available to receive transfer of accounts at close of business on July 16."

The announcement from the Canadian Bank of Commerce, made by Superintendent James Moreton said, "these branches are being closed because they are unable to operate at a reasonable profit owing to the necessity of curtailment of business due to local conditions and operating expenses."

The Bank of Commerce branches at Vegreville and Bawlf will be closed from July 16 and the branch at Delia from June 30.

To-day's announcements bring the number of branch banks closed recently to [illegible], and it is stated in banking circles that further announcements of additional closures will likely be made shortly.

The Bank of Montreal has operated its Mannville branch since 1909 and its Islay branch since 1910.

The Bank of Commerce branch at Vegreville has been operating since 1904 and the Bawlf branch since 1906. The Delia branch was opened in 1913.

While bank officials refused to elaborate on their written statements it was said that the closing followed the increased taxes levied on branch banks by recent provincial legislation.

Closing of the bank branches at Islay, Mannville, Bawlf and Delia will leave these towns without banking facilities, but Vegreville, where the Canadian Bank of Commerce will close its branch still has a branch of the Bank of Montreal operating there.

Killam, where the Bank of Montreal closes its branch on June 30, will also be left without banking facilities, that bank being the only one operating in Killam.

Power

Power is a word which we frequently use. Mechanical or electrical power is now constantly in use, so much so, in fact, that we do not give much thought to the conveniences and comforts brought to us by the application of power. Certain individuals are admired, envied, or feared because of their power, and among them, are those who properly use such power and, unfortunately, those who abuse it. In many ways, personal power represents success, because the individual who has gone ahead and reached the peak in his particular line of work has generally attained to power in that field.

In any and every type of work, we are helped to success if we possess physical and mental health. No individual is able to do his best work unless he has health. He may do good work, his achievements may be well above the average, he may even excel, but unless he has health, he cannot attain his full measure of success. If he has not health, he has not developed his capacities to the full, and, unless these capacities are fully developed, he has not reached his peak of efficiency.

Work, play, rest and sleep in moderation are all necessary. Overwork to the point of fatigue, over-play, resulting in undue strain, lack of rest and sleep which the body requires in order to regain and store up energy—any one or all of these may result in stress and strain which lower physical and mental efficiency and so decrease personal power. The individual who is apparently defying the law of moderation with impunity suffers in loss of personal power, although this may not be immediately apparent, and the day will come when he must pay the penalty in an obvious way.

In order to do our best work, in order to enjoy our play, in order to live happy lives, we should not lose sight of the fact that work, play and rest all have their time and place, and that they should all be taken in moderation. The long grind is a mistake. Better work results if its progress is broken by periods of relaxation either at play or at rest.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally

Five Additions To The Provisional Unity Council

Five additions to the Provisional Unity Council, first meeting of which body has been called for June 23-24 in Edmonton, are announced by John I. McFarland, Calgary, chairman:

Charles P. Hayes, [illegible], [illegible] Hanna, municipal district reeve and for many years an active participant in provincial farm movement.

Alfred E. Hosner, Lisburn, farmer, rancher, served overseas with 50th Battalion; formerly secretary-treasurer of his municipal district. Mr. Hosner was elected to the provisional Council by the directors of the Cypress Constituency Association, the first body to take such action.

Carl Antonson, Pibrock, farmer, president Pibrock Board of Trade, president Pibrock district Co-operative Association; municipal district councillor and long identified with farmer organization in the province.

William Redd, Raymond, farmer, sugar beet grower and cattle [illegible], an active participant in farm co-operative activities in the southern part of the province.

Torgier Johnson, Loyalist, farmer, for many years actively indentified with the co-operative marketing movement.

"MEN AT WORK!"

The most cheerful sign on the road

★ ★

"MEN AT WORK" is an encouraging, cheerful sign upon the highway.

It is the happiest sign on the business highway too.

Business enterprise, making wise use of banking service, is the mainspring of employment.

The contractor responsible for that "Men at Work" sign gets the job of building that stretch of highway by being the lowest responsible tenderer.

Not always does he have the ready money to buy all the materials, pay wages and build it out of his own resources. He goes to the bank and, having assets and a good reputation, he negotiates such advances as he may need.

He orders materials, sets men to work. As the job proceeds, engineers' certificates enable him to collect from those with whom he contracted, and the work goes on.

The highway finished, the bank is repaid. Such repayments enable the bank to supply credit to other responsible borrowers.

A manufacturer gets a large order, with an early time limit for delivery. With only a hundred men, his factory cannot turn out the articles within the time required. With more men he can do it but he lacks sufficient cash.

Operating his factory, as a going concern, with a profitable order and having a reputation for integrity, he asks the bank to lend him what he needs to pay wages.

The bank makes him a loan. He takes on more men. They get wages. The goods are turned out, delivered and paid for. The manufacturer repays the bank with the agreed interest.

He has his profit and can spend some money developing new business to keep his men employed.

How does a bank make these advances . . . where does the money come from?

Banks, having branches throughout Canada, mobilize the surplus funds of millions of depositors, large and small, and, based upon them, make credit available throughout the country as may be required.

Millions of little sums represent the toil, production and lifetime savings of Canadians—your fellow-citizens.

Safeguarding these deposits is the bank's first care.

Deposits of $1,000 or less—most of them much less—are owned by 3,770,000 out of Canada's 4,033,000 savings depositors. The total of all bank savings deposits in Canada is nearly $1,581,000,000; the average savings deposit in a bank is only $387.

Wisely safeguarded by Canada's chartered banks these deposits furnish credit that keeps "men at work" when used by Canadian business and industry—producing new realizable wealth from Canada's great resources. The country and all its people benefit.

In the field of business deposits, out of an average of 660,000 "current" accounts, 596,000 amount to $1,000 or less.

Savings deposits are, primarily, the base on which banks can make loans.

Only the confidence of the people and their willingness to leave their money on deposit, enable a bank to lend money and—at small profit-margin to itself—serve the community.

We have mentioned the contractor and the manufacturer. The same process stimulates employment throughout the whole fabric of production, industry and commerce.

Loans to agriculture and for marketing agricultural products totalled in 1937, $88,291,000—9.0 per cent. of all ordinary bank loans shown on the return to the Minister of Finance, October 31st, 1937.

Of this sum $57,490,000 went to farmers, cattlemen and fruit raisers and $30,801,000 to grain dealers, seed merchants and grain exporters.

Other bank loans went to municipalities and school districts; wholesalers, retailers, manufacturers of and dealers in lumber, pulp and other forest products; fishermen; fish packers and curers; public utilities including transportation companies; stockbrokers and bond dealers; provincial governments; mining men; churches, parishes; hospitals, and to charitable and religious institutions.

Canada's chartered banks defend and protect the safety of the funds of depositors—the millions of thrifty souls we have described, whose life-savings they entrust to their banks.

No Canadian depositor, even through the world-shaking events of recent years, has had to fear for the safety of a single dollar lodged with Canada's chartered banks.

The funds of depositors are their own—not a reservoir from which everybody may draw at will for any and every new financial experiment.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

The Mercury Visits The British Columbia Coast

FINAL ARTICLE

About the time of freeze-up, when the ground is bare and hard with frost. And the first chill winds carrying light snow come, many Albertans, particularly those well advanced in years, think longingly of the summer that has passed. Remembering lush grass and full foliage trees they look forward to barren [illegible] and snow covered landscape for six or seven months. And if they are but human, they wish it otherwise. They would like the summers longer and the winters [illegible]. Some winter has its advantages, many of them. But somehow or other, as the clock of life's time ticks away the years, the pull of a more temperate climate becomes [illegible]. Fortune favors the few and [illegible] the pull becomes [illegible] the local column reports Mr. and Mrs. have left for the coast.

Recognizing [illegible] ful advantages of Alberta hard wheat and sunny skies [illegible] dry crop [illegible], yet [illegible] recognize that [illegible] lies a land fair to the eye and beautiful to behold. And [illegible] Mercury's trip was a holiday [illegible] to observe with understanding [illegible] that we could say something [illegible] people who had not seen [illegible] heard.

Perhaps the [illegible] things in coastal British Columbia are rocks, trees [illegible] and stumps [illegible] where Agriculture [illegible] and where [illegible]. We [illegible] a [illegible] Fraser Valley as far as Abbotsford. This is a [illegible] and fruit growing district. We passed some nice homes and good farms, but there is still quite a lot of [illegible] land. Most of [illegible] some of it quite rocky. There are some very nice places around Cloverdale and Langley prairie. There were farms that had the appearance of being prosperous. Good buildings, well kept up, fairly large open areas. Others were not so prosperous looking, and gave the impression that the people living there were just getting by. The value of virgin land varies tremendously, there are many factors which enter into its value. But what ever kind of land it is, it almost surely has to be cleared. This clearing business is a heart breaker, back breaker, and a pocket book breaker. A fair estimate is $500 per acre for clearing. If one wished to buy a cleared acreage of good quality upon which the owner was doing well, the price asked would be fairly high.

At the present time the established berry growing areas are faced with a peculiar problem. It appears that a steady growing of berries have depleted the soil of the right kind of berry nourishment. And to make it [illegible], this drain on the land has been going on for a number of years and it will take approximately the same number of years to get the land back in shape again. Unlike ordinary fertilizer, it cannot be done [illegible] two years. Many people living here appear to have other incomes apart from that received from the acreage which they work and in this way get along quite nicely.

Money In Plum Trees

It was here that we met the Drumheller miner returning after a winter's work in Alberta. He explained berries were alright but involved much labor. Plums, he said always found a ready market, the buyers giving a straight price for all the fruit on the tree and doing their own picking. As a place to retire to for a man with reserves it looked alright to us. But for a place to earn money, in the same sense that farmers think of earning money here, we could not see much to it. Lulu Island is an entirely different proposition. Here there are [illegible] hills, no rock and no stumps, probably the only place in British Columbia of which this can be said. Lulu Island is more like prairie. There are many different kinds of soil on the island and land values for choice land run to $300 to $350 per acre. Peat land which requires much water and several years to get into shape can be purchased for as low as $10 per acre. There are quite a number of [illegible] rentals on the island [illegible] type of [illegible], lending itself to individual intensive cultivation. Land values here at one time soared as high as $1000 per acre.

On Vancouver Island there are [illegible] agricultural areas in the [illegible] District near Victoria, also in the [illegible] district. Both are chiefly [illegible] districts. Farther north about the centre of the island there are [illegible] good agricultural districts, particularly around Ladysmith and farther north again the Comox valley [illegible] a dairy and fruit growing centre.

Where the climate is milder it has [illegible], and we met more than one person who preferred the dry, even though cold Alberta winters.

But there are the mountains, the trees, and the flowers, the streams and the ever changing tides. As one man we spoke to at Courtenay said: "People come here from as far away as Hawaii, Southern California, and even the Eastern United States. And for theid holiday they spend anything from $500 to $1500. They do the same things, go to the same streams that we can go to for ten cents. And that about explains the situation. Living is very nice there if you have the means to live or can find a way of obtaining them.

Edmonton Exhibition Jubilee Flashes

Edmonton's Sixtieth Exhibition opens when sixty boys and girls will spend an enjoyable educational week as guests in the Edmonton Exhibition Camp. Only new members are accepted annually; some will have applied unsuccessfully before. The prize list, contains full information.

The prize list also gives details of the popular One-Farm Exhibits class with $120 in prizes for display of products of the average home—grains, vegetables, cured or canned meats, etc. No farm grows everything but exhibits winning 100 of the total of 400 points allowed, will qualify. Entries close July 2nd.

Battling Armies Flee Before Rising Waters; War Operations Halt

SHANGHAI, June 15 — Both Chinese and Japanese armies were fleeing Wednesday before a Yellow river flood that could not be stopped either by guns or bombs.

Spilling through immense breaches in the river dykes between Chengchow and Kaifeng, the flood waters rolled for miles across the flat plains of Honan province, recognizing no man-made barriers, and carrying disaster to millions of Chinese peasants as well as to armies.

Japanese war dispatches said fully 300,000 Chinese civilians had been made homeless and estimated 150,000 civilians had drowned.

Hundreds of floating corpses were declared visible. Japanese troops were turning from war to life-saving participating feverishly in building rafts in an effort to save Chinese peasants stranded on high ground and house-tops.

An estimated 30,000,000 refugees were fleeing to the west to escape invading Japanese armies. Millions more were imperilled by flood waters.

Flowing over the east-west Lunghai railway, in some places at a depth of five feet, the waters interposed a complete barrier to a Japanese advance upon Chengchow and to their push farther south toward the north-south Peiping-Hankow line.

For the moment Kaifeng, to which Japanese troops had been forced to retreat was declared to be safe, though surrounded by high water. Kaifeng is 45 miles east of Chengchow and is headquarters for a Canadian Anglican mission. The missionaries were making efforts to organize Chinese farmers and civilians in combatting the waters.

Alberta Crop Report No. 3

Issued By the Department of Agriculture, Edmonton

The general crop condition for the Province at this date continues satisfactory, according to advice from Honourable D. B. Mullen, Minister of Agriculture, and crops have a healthy appearance. A large area in the southern portion of the Province received a good rain, which in some districts, measured one and a quarter inches. Although north of Edmonton moisture is lacking, particularly in the Peace River Block, crops are maintaining their growth due to sufficient subsoil moisture. Coarse grains have not germinated evenly through lack of surface moisture. Most all seeding is complete, with the exception of greenfeed or late sown barley.

The rain in the dry belt has appreciably reduced soil drifting, however, some damage occurred in the Peace River country. These fields are making rapid recovery. Good general rain would brighten prospects.

Cutworms are taking a heavy toll of the late sown coarse grains in the drier parts of the Province, with some reseeding having already been done. The heaviest infestation of grasshoppers is in the Vulcan, Blackie, Champion and Claresholm area, but showers and the application of poisoned bait is effectively checking this pest and damaged crops are making a recovery.

The irrigated districts report a good stand of alfalfa, and forage crops in general indicate a heavy crop of hay. Fall grains are heading out with spring wheat five to ten inches high in certain districts.

Ranges and pastures in the southern half of the Province are reported as having a good stand of native grasses. The drier parts of the Province report pastures drying to the extent of reducing milk production. Ranchers report slightly higher lamb and calf crops since pastures have maintained good growth. Cattle are making rapid gains, but few are marketable yet and demands for grass fed cattle are not strong enough to induce sales.

The province is divided into agricultural divisions numbering 1 to 16. The district in which Tofield is located is No. 11. Of this district the report says:

In some districts late sown crops not germinating due to lack of moisture. Showers reported on June 9th, which will help, but more rain needed soon. Practically all seeding completed, a few acres to be sown for greenfeed but expect that most of this will be seeded this week. Some forage crops to be sown, farmers have been holding off until rain comes, cutworm damage increasing, some farmers reported to be reseeding.

No Worry Is Felt On Wheat Surplus

It gets pretty hot in the summer at Goldfields, Lake Athabaska mining centre, and husky mine employees are not above eating ice cream to secure a cooler outlook on life. So for the past month thrice each week five gallons of the frozen cream have been flown to the Goldfields storekeeper in Canadian Airways aeroplanes.

Pilot Con Farrell left the city Tuesday northbound with an ice cream shipment packed in dry ice—frozen carbon dioxide—in addition to fresh meat for Fort Smith and fresh vegetables for Yellowknife. Packing the ice cream in dry ice cuts down the weight and makes possible substantial air shipments. Five gallons stored thus weigh about 33 pounds.

Dentist Visits May Become New Pleasure

SWAMPSCOTT, Mass., June 14—Dentists gathered for the annual convention of the Northeastern Dental Society Monday heard of anesthesia which might permit removal of a patient's teeth and replacement with false teeth in 30 minutes and analgesia which one dentist said would make visits to the dentist "a pleasure."

Quads Born At Liverpool

Quadruplets were born today to Mrs. Esther Taylor, 29, wife of a teamster. The babies — three boys and a girl — were healthy. Mrs. Taylor, frail and fair haired is one of a family of 13. Her own previous children, three boys and a girl, range in age from four to 11.

Minnow Rain Leaves Fish In Fields, Trees

QUEENSTON, Ont. June 13 — Residents are talking excitedly about the rainfall of fishes the other night. The minnows thousands of them, were found on Col. Sheppard's farm, north of here. Several hundred were found alive. Others were found in the trees in the orchards of the district.

It Takes An Expert

A Wisconsin man was arrested for spearing fish through the ice. One of the witnesses was in sympathy with the prisoner, being a fisherman himself.

"Mr. Smith" said the attorney, "did you see the holes in the ice?"

"I did," answered the witness.

"Did they appear to be fresh holes?"

"Well now, I don't know. I couldn't tell if they were this winter's holes or last winter's."

FOR SALE—Home made kitchen cupboard and table; couch and mattress; kitchen range; cistern pump; card table; 3 burner coal oil stove; bedsteads and spring; 3 colt halters; gasoline lamp complete; 2 single shot 22 rifles; one repeater—Apply to J. E. Stinson, Tofield.

Ice Cream Goes North By Plane

Wheat crop in the U.S. this year is expected to be well above those of recent years but grain men in Edmonton Wednesday felt no great concern over probable effects of large U.S. exportable surpluses on the Canadian wheat price structure. They said reserve supplies were low in Canada and in Europe with the possible exception of Britain. Dry weather was hitting European crops and rust was causing serious and unusually-early damage in the U.S. It was early yet for predictions, they said.

Nevertheless Edmonton grain authorities said a decline in Canadian wheat prices sufficient to necessitate the federal government protecting farmers with a fair minimum was likely by the fall. The October future now was practically at the minimum previously established and futures prices were low generally, it was stated.

The Sunburst Line's new bus came gliding into town for the first time this week. Modern, roomy and comfortable, it will no doubt find favor with bus travellers on this line.

Vol. XVIII, No. 18 Thursday, June 23, 1938 [illegible] Per Year. To U.S.A. [illegible]

Cornhill Municipal District Council Held Meeting

The fourth regular meeting of Municipal District of Cornhill, No. 487 was held at the District's office Tofield, on Friday, June 3rd. There were present: Reeve Glenn (in the chair), Councillors Anderson, Holmberg, Morden, Swabey, Walker.

The meeting was called to order at 10:30 p.m.

Secretary reported results of April 30th, 1938, nomination day, set for the purpose of receiving nominations for Councillor for Division three. Mr. D. R. Swabey's nomination being the only one received by returning officer A. C. Dodds, Mr. Swabey was duly elected by acclamation. Secretary obtained declaration of office from Mr. Swabey.

Minutes and accounts payable for previous meeting were read and upon motion were adopted.

Mr. Werton interviewed council re subscribing to Tofield Mercury at 75c per annum for ratepayers. Subscription to be paid by municipality.

The secretary read correspondence as listed on the agenda, matters pertaining to this correspondence being later dealt with.

Meeting adjourned for lunch.

It was decided to sell to Mr. Eric Anderson, hardware merchant of Kingman, lots 3 and 4, block 6, for $20.00 cash. The offer to be accepted by June 25, 1938, and subject to the Municipality being able to issue registered transfer, also subject to the approval of the Provincial Dept. of Municipal Affairs.

Mr. Elder, representing the Ingot Iron Co., interviewed council re steel culverts.

Mr. A. Gill interviewed Council re providing culvert for entrance on south side of the S.E. quarter of Sec. 18-51-19-W4. After considerable discussion Council agreed to provide culvert and Mr. Gill stated he would install it and make necessary fill. Culvert to be obtained from Reeve Glenn.

It was resolved that Secretary address Mr. Edward Brice to the effect that after due investigation Council finds that witnesses substantiate report of Fire Guardian that ground fire existed on the S.E. ¼ of Sec. 22-51-19-W4, fall of 1937 and that said ground fire was a menace to hay on land nearby and that said ground fire was not under proper control, thereby requiring the attention of the Municipality's Fire Guardian for which a charge of $10.00 was made, said charge being placed against land in question as per authority to be found in Prairie Fires Act.

Mr. Eric V. Erickson, blind, of Hay Lakes was recommended for old age pension at the rate of $15 per month.

To fulfill a request by the Provincial Government the secretary was requested to carry out personal investigation and submit inspector's semi-annual report re widows receiving Mother's Allowance.

Mr. Stewart representing the Alberta Hail Insurance Board, Calgary, Alta., interviewed Council re hail insurance, explained new set up and answered many questions.

Council decided that it was not necessary to make a new search at Land Titles Office re land within the municipality in connection with the present assessment.

Secretary advised Council as to Mr. Deare having reported under date of April 25, 38, that bridge and culvert south of section 29-50-20 W4 was in need of repair. This complaint was submitted to Reeve on same day as reported to Municipal Office.

It was decided that the remuneration for Mr. Grue, third man on Municipality's power road building unit be set at $3.25 per day, straight time including Sundays instead of $3 as mentioned in previous meeting, with 50c per day for use of car, except Sunday. Gas and oil to be supplied to Mr. Grue when using his car on municipal business.

Mr. H. Stephen's request for an allowance for work said to have been done by him on road leading to his property was referred to committee concerned.

The sale of the Toulson grader attachment for $100 was approved.

Councillor Anderson was asked to make temporary arrangements for a suitable location to be used as a nuisance ground for the Hamlet of Kingman. Report to be made at next meeting as to location, purchase price, etc.

J. E. Stinson was appointed 1938 municipal assessor.

The following municipal officers were authorised to sign, endorse, etc., all documents as set out in the Bank of Montreal form L.F. 22: W. Glenn, reeve; or G. O. Walker, acting reeve; and J. O. A. Letourneau, Sec-Treas.

Council approved and directed present relief committee to continue in their efforts in solving a satisfactory method of handling relief cases.

Hay permit for 1938 was issued to Mr. J. Gladue covering the N.W. 5-51-20-W4.

Messrs. John Swabey and W. R. Davison be appointed 1938 municipal weed inspector. Remuneration when on duty to be on basis of $5 per day each. This amount to include conveyance.

It was agreed that the remuneration of J. E. Stinson, municipal assessor for 1938 be $1250 for completed municipal assessment.

It was decided to divide up the business for fuel for the power unit. To July 31, 1938 it goes to the Imperial Oil. August 1st to end of season to be decided later.

Councillors for divisions 2, 3, 4 and 6 promised to provide list of land that in their opinion is subject to wild land tax.

A committee composed of the Secretary and Reeve were appointed to interview the Editor of the Tofield Mercury re publishing of minutes. Total expenditure for 1938 not to exceed $25.

The date of the next regular meeting was left at the discretion of the Reeve.

SERVICE WITH A SMILE
WE AIM TO PLEASE

TOFIELD SPORTS JULY 1

Preparations Going Forward

Here we are within a comparitively few days of July 1st, the day Tofield has set aside for several years as its celebration and sports day. The birthday of the nation, a day when we should be proud to belong to a young, vigorous, growing, free country like Canada. A day of general celebration from coast to coast, a day of particular celebration here.

Sports Events Varied

While baseball, it is expected, will not have to concede any of its importance or popularity on the annual celebration day, there will be plenty of other sport events provided to entertain the crowd.

Tom Schultz and S. Burke, the baseball committee, have already lined up good talent for the day. And teams that carry with them the good wishes of the home folk, Bardo, Dodds, Holden, Ross Creek, Round Hill and Tofield will all go to bat with their particular bunch of rooters to make the game interesting. All these teams are playing league ball and are in good shape to take the field and give a good exhibition of the game.

Bill Bailey is getting Soft Ball teams lined up. While there will probably be some alterations from the original list of teams, there is no doubt that soft ball talent will be on hand. The snappy Edmonton Girls team that played here last year will be on hand. And local teams will have to step their best to keep up with this aggregation. At that this territory has, in the past, fielded some pretty fair teams, Shonts, Holden, Ryley. Anyway there will be plenty of action on the soft ball diamond.

A revival of the "sport of kings" in Tofield will again be made. John Morton and Tom Schultz are in charge of this department and they know their stuff. There will be a free for all, a pony race 14 hands and under, and a new attraction, a Roman race. This last race is a thriller.

Jack Bailey is getting his list of foot races lined up. There will be plenty and the fleet of foot are going to carry away a lot of loose change.

Frank Dunn and Geo. Abernethy are arranging for good basketball. Lakeshore will be on hand and other good teams invited so as to give the Lakeshore starry bunch stiff opposition.

And for those who like to test their skill at throwing at what have you, provision is being made. Stan Burke and Les Glover are looking into this. It may be one thing, it may be another, but it will sure to be fun.

And of course the dance. No sports day is complete without one. A. E. Allen and Geo. Bruce, have engaged an orchestra and are just waiting for the hour to roll around. Altogether, given fine weather, it should be a punch of a day.

And did we forget the eats! Well, we better not. There will be Walter with his succulent hot dogs and the big booth will be all set to serve all and sundry with whatever the gustatory system craves.

To Run Double Shift On Road Power Unit

The Council of Municipal District of Cornhill is pleased to announce that they have received a road construction contract within the Municipality from the Provincial government. The road in question runs from the N.W. corner of section 7-51-21-W4, south for a distance of one and a quarter miles. The amount of money involved will be from $500 to $650. In order to do this work and also to carry out the road program as set out in the 1938 budget, council finds it necessary to engage an extra crew for the power unit. Weather permitting, work go on at eighteen hours a day. The Council is watching the road situation closely and fully expect to be able to complete the program set out in the 1938 budget during the 1938 season.

LOCAL & PERSONAL

Mr. and Mrs. E. Wuetherick and small daughter are holidaying at Sylvan Lake.

KETCHAMOOT

The Ketchamoot picnic under the auspices of the Ladies' Aid will be held on Wednesday July 6th.

Mrs. A. F. Schultz's sister and brother-in-law, Mr. and Mrs. W. A. Hayes of Minnesota arrived by automobile on Tuesday to visit at the A. F. Schultz home.

Two young ladies and two men from Three Hills bible school put on a song service and lantern slides of bible pictures at the school house on Wednesday night of last week. They will finish the pictures Wednesday night of this week. The ladies are planning on putting on a vacation school in the summer holidays.

Mrs. Boise, resident on the John McGinitie farm was taken to an Edmonton hospital Tuesday where she will undergo an operation on Wednesday. We hope she will get along nicely and soon be able to return home.

The Social Credit club held a meeting at the school house Friday evening. Dr. McPherson of Ryley was guest speaker. After the meeting refreshments were served and a social hour was spent.

Miss Hazel Sears returned home Monday after spending the week end visiting friends and relatives in the city.

Mr. and Mrs. Les Ovelson, Miss Kathleen and Jimmie Ingram were

Tar Sand Research Is Strongly Urged

OTTAWA, June 21— Dr. G. S. Whitby, director of the division of chemistry, National Research council, told the Canadian Chemical association convention here there should be a systematic and sustained research on the bituminous tar sands of Alberta.

These deposits were so extensive they contained a quantity of bitumen variously estimated to be four to 10 times the present known oil reserves in the world, he said.

"The production from them of various petroleum oils, although perhaps of only limited commercial importance at the moment, with crude oil prices at their present level, is likely to be important in the future," said Dr. Whitby.

It is doubtful whether it would be really feasible economically for the oil producers in Alberta's Turner Valley to attempt to take care of national requirements, even assuming the area developed into a major field. B. Coulson, chief chemist, Imperial Oil Company, Sarnia, said in another paper written for delivery to the mineral water power symposium of the association.

Parachute Stolen After Air Stunt

REGINA, June 21 —Professional parachute jumper from Winnipeg, Nick Szun counted up a loss of around $185 on his last jump before a crowd at the Regina airport Sunday night while city police were looking for Regina's first parachute thieves.

The theft happened after Szun made a double parachute jump cutting one 'chute loose and landing with the other. The first parachute floated to a field west of the airport where a group of men in a car gathered up the big silk umbrella stowed it in their car and drove away.

When airport attendants came to get the parachute they were told by bystanders the men in the car had said they were taking it to the airport.

A reward was being offered Monday for return of the parachute, valued at $185. Szun realized a silver collection of about $15 for the jump.

The paper said the long distance of Alberta from the major markets presented an obstacle to the marketing of the by-products of petroleum

ELECTRIC ORGAN TO ASSIST FIRST NATIONAL EUCHARISTIC CONGRESS

1. Avignon where Congress originated.
2. Mlle. Tamisier.
3. A view of the 100,000 seats at Quebec.
4. Northern-Hammond Organ.
5. Sketch of the parts which originate the electrical impulses to make the organ tones.

The Eucharistic Congress dates back to 1874 when Mlle. Tamisier of Tourine, France, felt called to inaugurate a movement for a greater public devotion to the Holy Eucharist. She succeeded in arranging the first Congress in Avignon in June of that year. The movement soon became world-wide. In 1910 Montreal was host to over 100,000 visitors from all parts of the Globe.

This year history will be made at Quebec during Canada's first National Eucharistic Congress, where for the first time the services will be led by organ music through the medium of a Northern-Hammond Organ, manufactured in Montreal by Northern Electric — the very latest development of the science of sound. It is actuated by electrical impulses and cannot get out of tune. There are over 1800 now in use in Churches of all denominations throughout the world.

Growth Of Juvenile Crime Greatest Worry of Chiefs

Grim spectre of juvenile crime is casting a shadow across Canada. Its seriousness as a new menace is threatened only by mushroom growth of traffic problems.

Almost to a man, a score of law-enforcing officials attending the 34th annual convention of the Chief Constables' association of Canada gave the answer of this answer Tuesday when reporters asked each of them "What crime problem in your community is causing you the most worry?"

From coast to coast police officials have come to Edmonton for three days to discuss mutual problems, become acquainted with new developments in law enforcement and renew the links in a strong chain that binds the dominion's guardians of the law in a fraternity founded on justice, law and order.

Out of uniform, most of the visiting officials have the appearance of successful professional and business men. The majority of them are middle-aged and have had at least a quarter century of police experience.

At least two of them exert command over forces of more than 1000 men—the deputy chiefs of Toronto and Montreal. Staffs directed by others range from 10 to two (including themselves).

Few of the visitors are above average height or exceptionally muscular. Most of them are busy executives—and their appearance as such is not misleading.

Chief Ernest Goodman, Hamilton, a champion golfer, explained that the standards demanded of all Canadian policemen are "a certain amount of education, sound moral principles and a genuine enthusiasm to protect the best interests of normal citizens.

"We believe, in all sincerity, that life offers no nobler profession than whose followers devote themselves to fighting for right with steady but impartial favor. We realize to be successful we must conduct ourselves in a manner that will win the respect of all citizens," he said.

G. S. Guthrie, deputy chief of the 1,000-strong Toronto force, believes in dressing comfortably—when off duty at least. He was wearing white flannels and a natty blue blazer.

His analysis of Canada's crime problems keynoted views of his colleagues.

"Juvenile crime has swept into Canada without warning. We are able to cope with traffic problems to some extent by safety devices and stern punishment for offenders. But to eliminate law breaking among young men that flourished as a result of unemployment we must have more co-operation from schools, churches and all public-spirited organizations," Deputy Chief Guthrie said.

"Juvenile deliquency is a serious problem in Saskatchewan but discouraging drouth conditions have not made it worse," believes Chief Alex Calder, of Moose Jaw.

Chief F. Lesley, Prince Albert, who will address the convention on "Boys and Crime" at a Wednesday evening session, said he preferred to reserve comment until then.

Friendly and merry of mien, Chief J. M. Coghill of The Pas, Man. laughed when a reporter asked about law breaking "in a frontier settlement."

"That wild west stuff has gone out completely. There aren't any heroic bad men any more and gun play is practically unheard of," he declared.

John A. Grant, staff inspector of Ontario provincial police, believes the traffic problem is a major one in Canada. "Although we have the best drivers in the world right here in Canada, the trouble with them is they think they are good drivers," he said.

Another major problem is "our children," the inspector went on. "Children nowadays seem to drift away from their homes. The home is the key. Our children seemed to have drifted away from the thing that made anchors for our children."

Solutions to problems of children are a good home and the church, Inspector Grant thought.

Charles Maciver, assistant chief constable at Winnipeg said that safe-cracking is increasing in Canada. He showed newspapermen a satchel filled with the latest safe-cracking tools, which he had taken from a safe-cracker "only a few weeks ago." The tools clamp on to the front of a safe and when a certain amount of air pressure is applied, the door pulls off.

"Sometimes, they can do it in five seconds" he said. And it is noiseless.

Constable Maciver, asked about auto-stealing, declared 1,700 automobiles were stolen in Winnipeg in 1937 "But we have controlled it to a considerable extent now."

Many Hurt When Jobless Evicted With Clubs, Gas

VANCOUVER, June 20— Fifty thousand dollars worth of plateglass windows were broken in downtown business houses as the unemployed fled from the post office which they occupied for a month. Others left the Art Gallery peaceably.

A stone-throwing crowd early today smashed six windows in the Federal Building, where yesterday several hundred unemployed jobless were routed by police using tear gas and riot sticks.

The stone-throwers were among an estimated 10,000 persons who jammed the Canadian Pacific Railway docks in sympathetic demonstration for 200 jobless who left for Victoria at midnight. The delegation will meet Labor Minister George Pearson today in Victoria to seek a works program.

No action was taken by city police who were patrolling near the building and the crowd gradually broke up after Harold Winch, Co-operative Commonwealth Federation member of the legislature for Vancouver East, and R. W. Campbell, publicity head for the Relief Project Workers Union, pleaded for orderly conduct.

Orders to evict the unemployed came suddenly after a month of quiet. Premier T. D. Pattullo said in Victoria he had told Dominion and Vancouver city officials Saturday the situation in Vancouver could "not be tolerated any longer."

The post office group, most of them members of the Relief Projet Workers' Union, were driven from the building by Royal Canadian Mounted and city police after they had refused to leave voluntarily.

As they streamed from the building city police outside tried to arrest men they believed responsible for breaking post office windows and glass wickets when the disturbance first started.

A fight began on the street. Police were kept so busy they could not follow scores who ran down Hastings and Cordova streets toward the east end of the downtown district.

The premier will meet Mayor G. C. Miller here today to discuss the unemployment situation. The mayor said in a prepared statement to the press Sunday that as far as he was concerned there would be no more "sit-down strikes" by jobless in Vancouver.

"We will not allow any further demonstrations in public buildings," the mayor said. "Any such move by the unemployed will bring immediate police action."

The C.C.F. in a statement issued over the signature of Winch, who said he was qualified to speak for the whole party organization, urged all members of the legislature to resign and give the electors a chance to elect a government which would deal constructively with the unemployment problem in British Columbia.

"Peace and good government has ceased to exist," the Winch statement said. "To be a member of a legislative assembly that permits such conduct as the authorities have been guilty of is a grave reflection upon the intelligence and integrity of every member of the house."

Shortly after 4:00 a.m. Sunday, virtually the entire city police force piled into squad cars and sped to the buildings. Simultaneously G. H. Clarke, district director of postal services, and Arthur S. Grigsby, secretary of the Art Gallery board of trustees requested the men to leave the building within 20 minutes.

At the expiration of the 20 minutes at the post office Clarke told the men their refusal to leave had created an unlawful assembly and gave them another 10 minutes.

Then a Royal Canadian Mounted Police officer told them if they did not leave tear gas would be used. After a further 20 minutes four tear gas bombs were thrown in by R.C.M.P. officers. The jobless, heads wrapped in water-soaked cloths, stood the fumes for five minutes and then started to break out the windows. Several more gas bombs were thrown and when the men still failed to leave a squad of R.C.M.P. quartered in the building moved into the lobby and cleared the building with riot sticks.

In the human melee, rolled bundles of bedding came flying through the broken windows and finally the men themselves through the doors where city police awaited. Men and police struggled about the building before the jobless started their glass breaking flight along Cordova and Hastings streets.

Meantime at the art gallery similar warnings had been given Chief of Police W. W. Foster telling the men they were in unlawful occupation of a public building. After a second warning city police tossed in tear gas bombs. The men stood it for nearly 20 minutes before they left without damaging the building.

Teething

During the years when the baby teeth are coming through the gums and the child is said to be teething, it is a common belief that any one of the numerous ills from which the young child may suffer can be fairly put down as being due to teething. If a rash develops it is called a teething rash. The young mother is told that the cold in the head, the crying, the restlessness, the upset stomach are all due to teething, and that there is no reason for her thinking anything else. In some cases, this simple explanation has led to serious results. We try to prevent diarrhoea in children by proper feedings, but, if the condition does occur, it is known by those who have the responsibility of caring for such cases, that prompt treatment right at the start, is needed, and that delay in securing proper treatment early exposes the child's life to danger. The delay which occurs in seeking treatment is very often explained by the mother on the grounds that she thought, as she had been told by friends, that attacks of diarrhoea were to be expected as a result of teething, and that the condition would clear up, of itself, when the tooth was cut.

Teething is a normal event, and most babies go through the period in an easy manner and with so little evidence of what is happening that the parent is surprised on seeing the white point which is baby's first tooth. Some children do suffer evident pain, and such children are apt to be fretful and to suffer from broken sleep with the result that they are not up to their usual standard of fitness.

The point which we wish to make is simply this—it is not safe to assume that teething is responsible for whatever happens to a child during the teething period. Conditions that arise during the teething period are to be dealt with properly, and are not to be considered as being of no particular importance. A realization of this will save many infants from neglect through misunderstanding of the actual facts.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Here's a real buy!
THAT MEANS A BIG SAVING IN MONEY FOR YOU

Think what this wonderful offer will mean in enjoyment throughout the whole year for yourself and your family. Magazines of your own choice and this newspaper, packed with stories, timely articles, helpful departments and colorful illustrations. Now is your chance.

MUNICIPAL MATTERS—

THIS ISSUE of the Mercury goes to all the resident ratepayers of Cornhill Municipal District, whose addresses are known. There may be, and probably will be, some alterations and revisions to be made before the mailing list is absolutely correct.

For some years past, at each annual meeting held in February, there has been an expressed desire for a wider circulation of the minutes of the council meetings. At different times, discussion concerning the matter was lengthy and wandering. However last February, a number of resolutions were passed, which among other things, asked for the publication of 1937 minutes as well as the 1938 minutes of meetings as they were held. The matter has been discussed in council on two or three occasions and at the last meeting a committee composed of the Reeve and Secretary were appointed to come to some arrangement with the Mercury.

The Mercury made its position clear. It said it would publish the minutes free, providing they could be obtained within a reasonable time and as far as its circulation went.

But it suggested that the council subscribe for the Mercury for all its ratepayers at a reduced rate. It cited one other municipality which had been doing this for a period of years. The committee agreed to send out this issue and await further action at a council meeting. This, briefly explains. why, if you are not a subscriber to the Mercury, you have received this copy.

EXAMINATION TIME—

WE SUPPOSE there must be some good reason for the school year to end in the latter part of June. And to have the departmental examinations immediately prior to the school closing for the summer holidays. But we have often thought that the school year ending with the Easter recess would have some advantages too. No matter when held, examinations bring extra study, and anyone who had to study through Sunday's heat, will know how much nicer it would have been if they could have been out enjoying the comparitively few warm days we do get. Moreover, examinations are often written in exceptionally hot class rooms, when atmospheric conditions are the opposite to intensive writing about anything. And when all nature is calling children, and adults too, to be outdoors enjoying its charms. As we said, there must be some good reason for the school year to end when it does. It gives a good opportunity for teachers to move around from school to school, and have all students start new grades in September. There is ample time for the marking of papers and a second chance for those who slipped a subject or two. And then of course there is the fact that it has always been that way.

SUMMER COLDS—

WRITING THIS week goes by fits and starts. Just why we should pick the hottest day of the year to catch cold is something we can't explain. Between snuffles and nose wiping we manage to get a few words down but the head feels as if it is full of pea soup and thinking takes more effort than usual.

This would not be of much interest if it were not for the fact that quite a number of other people are now or have recently been in the same predicament. Summer colds are, we suppose, no worse than winter colds. But one does not expect to catch cold when there is a broiling sun and near record high temperatures are being made.

Quite a number of people have colds at the present time and consequently this should be as good a time as any to write about things we know little about. Doctors for years have been talking about the common cold. Specialists have been tracking down the germ so that they can get the thing cornered into a laboratory where they can tear it apart and see what it is made of. In their zeal they would cure you of a cold before you had one. Well, nobody should find fault with that, because while it is frequently expressed that a person "catches cold" this is all wrong. What actually happens is that the cold catches the person, who, if he were aware of being chased would do some fancy dodging. Anyway, a cold is rarely welcomed and if its inconviences are made light of, as most often happens, it is more, as the Chinese say, to save face, than because the victim is not feeling uncomfortable.

But while a certain amount of levity is associated with a cold, they are not always funny. Moreover apart from the deep wells of scientific learning which the doctor's plumb to find the whys and wherefores of the cold germ, there is an easier understood viewpoint. In a sense the common cold can be regarded as a protection. As an affliction a cold may be bad enough, but it really protects the physical system against those things which are much worse. It is a fairly common thing for people to wake up in the morning with a cold. Think how much worse it would be if pneumonia, bronchitis, etc., were as easily contracted. The common cold is nature's warning, or to express it differently, nature's first line of defence. So when we read loss figures running into millions of dollars due to the common cold. And we read that eminent learned men are devoting their time and talent in an endeavor to isolate the cold germ, and so we presume to endeavor to stop this loss, we wonder if they are on the right track. They probably are, but it would be a funny world if there were no colds.

Alberta Crop Report

Issued By the Alberta Department Of Agriculture, Edmonton

Very favorable crop conditions are contained in the crop report issued from the Alberta Department of Agriculture for the period ending May 31st, by the Honourable D. B. Mullen Minister of Agriculture. The greater part of the province has sufficient moisture to carry the crop along for some time. There has been a lack of the usual moisture in the districts north and west of Edmonton. The Peace River country is particularly dry for this time of the season. The weather has been warmer, promoting an even germination and a rapid growth of all grain crops. Wheat seeding is practically completed except in districts where farmers are delaying seeding owing to cutworm menace. Coarse grain seeding is delayed by some farmers who are making an effort to destroy a growth of wild oats and other weeds before seeding these crops.

Little damage is reported from soil drifting as that part of the province usually affected has been favoured with rains to counteract winds which have not been as frequent as usual.

Grasshoppers are hatching rapidly over a wide area. It is difficult at this time to estimate the probable damage from this insect. Every precaution is being taken to have supplies of poison bait available, where needed. At this date the grasshopper campaign does not promise to be as extensive as for several years past. Cutworm and wire worm damage have been reported from many sections of the province and some reseeding will be necessary.

Forage crop seed has been sown in districts where there is sufficient surface moisture. North and West of Edmonton seeding of grasses and clovers are held up on account of surface soil being too dry to promote an even germination.

Ranges and pastures over most of the Province, which were approximately two weeks later in growth than a year ago, have improved rapidly since the last report and can be said to be in a satisfactory condition from the stockman's point of view.

Rains have been ample over most of the Province, for fairly rapid growth, and the only exception being in the Peace River and far north regions.

All stock are showing satisfactory improvement in condition as a result of these improved pasture conditions. Range stock, generally, came through the winter in better condition than one year ago, and this has helped to increase the rate of spring gain.

Late lambing and calving conditions have been ideal over practically all the Province.

Very little stock with any marked degree of finish, remains to be marketed at the present time and prices are such that there is little incentive to force other grades on to the market.

Territorial division No. 11 in which the Tofield district is situated is reported upon as follows:

Moisture conditions fair; district could do with some rain; heavy rains occurred last week in some sections. Very little soil drifting. Spring work well under way. Dry weather has helped to speed up operations during past two weeks. Wheat seeding practically completed. Oats 80 to 90 per cent sown; barley some sown, most farmers holding off seeding for a couple of weeks. Some forage crops sown, pastures coming along fine, some cutworm damage reported.

Musical Shepherd Crook Re-unites Uncle, Nephew

MONTREAL, June 20—Shepherd's crooks, it seems, have vastly greater possibilities in these modern days than when ensnaring the legs of errant sheep was their sole function in the rustic scene.

Nowadays the crooks can even produce music—and bring a missing relative back into the family fold.

Inventor of the "musical crooks" at his native Henfield, Sussex, England home, Alfred Jennings wondered about the nephew who emigrated to Canada in 1907 and whom he had not seen nor heard from since.

Out in Upper-Lynn, B.C., Murray Marshall often thought of the uncle back in England who had given him the money to get back to Canada.

But then news of Jennings' curious invention — the crooks that when hung in a certain manner and struck with a particular instrument, emitted musical sounds—leaked out to the papers and Marshall heard about it. A speedy exchange of letters followed and the inventor was soon on his way to visit Marshall.

Jennings, rotund and ruddy, arrived here Sunday aboard the liner Aurania, but had nothing to say about himself or his invention. He refused to divulge whether he had brought the crooks along to show the interested nephew.

Fire Situation Grave In North

Hot, dry winds and soaring temperatures Sunday and Monday have created the worst forest fire situation in northern Alberta since 1934, according to an announcement by the provincial department of forestry Monday. As Edmonton sweltered under a temperature of 87 degrees above on Sunday, the hottest mark to be reached this year, forest fires continued to sweep through the north country. J. A. Hutchison assistant director of forestry, left here Monday to make an aerial survey of the fire situation.

No signs of abatement were seen Monday and the forecast was "continued warm." Government forestry force was being rushed north as officials said equipment for fighting quickly as possible and efforts are being made to keep the fires under control. Pall of smoke hung over the city and district, limiting visibility and hampering aviation activities.

Fires reported and distances from Edmonton are:

Rochester, 50 miles north— Fires seven miles north. Location, west of Elbow lake. No good timber affected as yet.

Chisholm, 110 miles north —Outbreaks of old fires burning south and north of here. All under control.

Green Court, 75 miles northwest—Three small fires near river. Extinguished.

Wabiscaw, 190 miles north— Fires raging here. Between Slave Lake and Athabasca Landing.

Slave Lake, 130 miles north—Fires both north and south of here.

Athabasca Landing, 100 miles north—Fires 25 miles north of here.

Faust, 190 miles north—Fires raging here. Also in nearby Peace River district. Location, west of Clear Hills.

Grand Prairie, 340 miles northwest—Fires general throughout the district. Some centred around Sexsmith.

Bound for the fire areas northwest of Keg River in the Peace River district, Mr. Hutchison left Monday in a Canadian Airways aeroplane piloted by North Sawle, Mr. Hutchison picked up several firefighters in the Peace River district.

Upon his arrival in the fire area, Mr. Hutchison wired back to Edmonton "that conditions were bad." Smoke from the north and northwest of Grande Prairie was heavy. Some of it, according to government officials, was coming from heavily-wooded areas in B.C., near the Alberta border.

Aeroplane flights out of Edmonton were delayed Monday by the heavy smoke that hung over the city, reducing visibility. Officials at the Cooking Lake seaplane base estimated visibility to be quarter of a mile and at the airport it was estimated at half a mile.

Most of the smoke was coming from due north early Monday, but at noon the wind started swinging toward the west, officials at the airport said. Velocity was 12 miles an hour.

Reports from the north indicate intensive attempts are being made to combat the fires and keep them under control. Valuable timber land is endangered if the fires spread. At the Chisholm Saw Mills, 110 miles north of Edmonton, a crew of fighters under Timber Inspector F. E. Smith is working against the flames in an effort to keep them away from the company's spruce lands.

South of Slave lake, near Faust, Inspector Donald Buck has called out men to assist in beating down fires that are sweeping through the bush country. In all other areas affected by fires, similar steps are being taken to keep the fires from spreading and destroying property.

While northern Alberta suffered from sweeping forest fires, other points southern and central, reported lack of rain was hindering proper growth of crops. With prospects of the best crop since 1929, farmers in southern Alberta were eagerly scanning the skies Monday for indications of rain.

North of Calgary, from Drumheller to Red Deer, crops are now in good shape, but reports said the week-end had dried them out considerably and rain would soon be needed. Grasshoppers continue to plague many districts in the south, especially Vulcan and Blackie, where they have taken their toll of the best crops in their paths.

While Edmonton and district suffers neither grasshoppers or forest fires, it nevertheless has a miniature heat wave with which to contend. Rain in the district is needed to restore crops to their natural state of growth for this time of year.

FOR SALE—Home made kitchen cupboard and table; couch and mattress; kitchen range; cistern pump; card table; 2 burner coal oil stove; bedsteads and spring; 2 colt halters; gasoline lamp complete; 2 single shot 22 rifles; one repeater—Apply to J. E. Stinson, Tofield.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

Now the farmers with their teams, tractors, ploughs, discs and cultivators, are busy summerfallowing the land.

Summerfallowing in order to rest the land, or to clean it from weeds, or to conserve extra moisture for the following crop, is as old as agriculture itself. In ancient China, and in ancient Britain, thousands of years ago, laws were sometimes made setting out the proportion of the land that had to be summerfallowed or rested each year.

Summerfallowing has always been regarded as a kind of insurance premium that the farmer pays with his time, and with the loss of one year's crop, in order to ensure a greater certainty of good yields in the future.

In Western Canada, in districts that enjoy good average rainfall, summerfallowing is usually done solely to destroy weeds. Most weeds, such as wild oats, are best killed when they are in the four leaf stage.

For conserving moisture, however, because even young weed plants use a great deal of precious rainfall, it is best to manage a completely black fallow, that is, not to let the weeds at any time appear above the ground at all.

Summerfallowing should be done as early as possible, of course, so that the rains that fall in June and July may be conserved.

Following factors have tended to raise price.—Increasingly pessimistic reports from U.S. winter wheat belt—Partial suspension of mixing regulations in Italy indicates corn shortage—Reduction in South African corn estimate—British barley prospects favor imports—Frost damage to European fruit crops confirmed— Continued import of foreign wheat into Palestine.

Following factors have tended to lower price:— Timely precipitation over Prairie Provinces— Crop prospects in Germany and the United Kingdom greatly improved —Russia actively chartering cargo space for grain movement— Australian moisture situation somewhat improved—Californian fruit crops make excellent progress — Liverpool wheat stocks nearly double a year ago.

DON'T FORGET TOFIELD SPORTS DAY— JULY 1st

WHERE DOES ALL THE MONEY COME FROM?

★ ★

MORE than four and one-half million depositors in Canada have "money in the bank."

They are satisfied to leave their money on deposit because Canada's chartered banks are ready and able to pay back promptly every cent when the depositor calls for it.

These deposits in the chartered banks total roughly $2,262,000,000—approximately 10 per cent. of which they carry in cash—in other words Bank of Canada money or "legal tender."

Some people do not fully understand banking operations and might ask:

1. What have the banks got to represent our deposits if they do not have it all in cash?
2. How can the banks repay our deposits, over $2,000,000,000, with the amount of cash they hold?

The answer to No. 1 is: Look at any bank balance sheet and you will see for yourself that a bank owns more than it owes. That is to say—if all of its depositors were paid off and all of its other debts paid, a balance would be left belonging to the shareholders.

That should answer your first question satisfactorily. And now for No. 2:

Look again at a bank balance sheet and you will see that in addition to the cash it holds, the bank owns assets quickly convertible into cash, or which can be used to borrow from the Bank of Canada.

Experience has taught banks the amount of cash it is necessary to carry to meet ordinary day to day demands, and also the proportion it is necessary to carry in gilt-edged quick assets which can be liquidated to meet even any extraordinary demand. Banks know that it is absurd to expect all depositors to call for their money at the same time.

That would be like saying that if everybody got sick at the same time there would not be room in the hospitals to take care of them.

Or that if everybody who travels by street car decided to travel at exactly the same hour, there would not be enough cars to carry them.

Or that if every person who carries life insurance died on the same day all the claims could not be met.

Or that if every sea were drained dry there would be no ocean liners.

Such statements are meaningless when you expose them to the cold light of commonsense.

Where, then, does all the money come from? That question can best be answered by asking this one: Who owns it—and how do they get it?

Addressing ourselves to 4,740,000 depositors we answer: "This money is yours. You own it. When you call for it, you get it. When you ask any existing Canadian bank for it, do you ever fail to get it promptly?"

We ask you, too: "Do you regard your deposit as figures in a book?"

If you are a wage-earner, paying your way and depositing a little week by week in a savings account in the bank, can anybody convince you that your deposit came into being by writing figures in a book? Or is it not a fact that you can call at your bank and take it away with you—in cash!

Suppose you are a farmer—let us use one acre and some round figures for illustration. You use 1½ bushels at a dollar a bushel, of wheat, to seed one acre. You reap, say 20 bushels, worth a dollar a bushel. Leaving out your costs to simplify matters, your gain is 18½ bushels equivalent to 18½ dollars, which you deposit in your bank.

Do you regard this as just figures in a book?

It would be hard to convince any wage-earner or any producer of new wealth, that his deposit which arose from his labour and production, is anything but real money.

He knows better, for he can buy things with it.

Where does all the money come from?

Your deposit is the measure of your own real wealth.

That wealth comes from the marketing of your labour for wages; from the application of labour to the soil of the farm, or to the standing timber in the forest; from the catching of fish in the sea; from the wresting of minerals from the ground; from the fabricating of raw materials into manufactured goods; and from marketing at home or abroad this continuous production.

When somebody wants to change all your business and economic methods and by some mysterious magic to bring about overnight a promised millenium of prosperity, ask what success such a theorist has made of handling his own affairs, before you back his theory.

Bank deposits reflect tangible wealth produced. Every dollar we owe to you—our depositors—is backed by many dollars in real assets.

Canada's chartered banks not only serve the individual well, they are a great factor in the building of the nation.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience.

KETCHAMOOT

(Continued from front page)

guests of Mr. and Mrs. T. D. Ferguson of Lakeshore on Sunday.

Mrs. Stanley Brown and son, Mrs. Dick Thomas and children visited at at the home of Mrs. W. A. Mitchell Saturday of last week.

See J. O. A. Letourneau regarding the new Alberta Hail Insurance Plan.

The subscribers of Telephone Line 4 held a meeting at the Sears home Thursday evening. The telephone poles are being moved closer to the fence to make room for the grading of a new road. Joe Sutton has the contract.

Mrs. D. Thomas, nee Marjorie Lee, was taken to an Edmonton hospital on Tuesday where she will undergo treatments to help her eye sight.

Mr. and Mrs. Welsh of South Edmonton, Messrs. Ivan and Sammie Mitchell and James Whilliams left Tuesday by auto for Oklahoma, U.S.A., to visit with friends and relatives at their old home. Sammie will proceed to Pennsylvania where he was born and intends to make his home with an uncle there.

Thanks Mr. Worton, we enjoyed your travelogue very much.

Ryley Couple Held 50th Anniversary

Premier Mackenzie King Sends Telegram of Congratulations to Pair

RYLEY, June 22—Rt. Hon. Mackenzie King, premier of Canada sent a telegram of congratulation to Mr. and Mrs. John Goodall of Ryley, who celebrated their 50th wedding anniversary recently. They were born in Ontario and have resided here for the past 30 years.

Over the week end a number of friends and neighbors called to congratulate the couple. They were presented with an easy chair and end table by Mr. J. L. May on behalf of the guests.

BARDO

Bardo Sports Day held Saturday, June 18th, drew a crowd of about 400 persons, the weather was perfect and all in all the day was a success.

In the first ball game, Dodds lost to Bardo 4-1. Batteries: Dodds—Hjelter and Tredway. Bardo— Bannerman and Foshaug. Second game—Tofield 7, Round Hill 4. Batteries: Tofield—Swinton and Schultz. Round Hill—R. Appleby, J. Appleby and Moore. Final game. Tofield defeated Bardo 8-5. Batteries: Tofield: Smith and Nomeland. Bardo— Stauffer and Foshaug. Umpire: O. Anderson.

Girls' Soft Ball—Kingman defeated Tofield 14-3. Bardo received a bye as Round Hill did not come. Final game —Kingman defeated Bardo 11-3.

The Bardo Ball Club wish to thank everyone for the splendid support they received from their own district and neighboring districts.

Present standing of "Power Line" Ball League:

	W	L	Pts.
Tofield	5	1	10
Round Hill	3	3	6
Dodds	3	3	6
Bardo	1	5	2

The cutworms have done considerable damage to the gardens and late sown oats. Some fields have been resown. Rain is badly needed.

Mr. and Mrs. Bob Berrocloth entertained the Young People Social at their home last week.

See J. O. A. Letourneau regarding the new Alberta Hail Insurance Plan.

Quite a number from here attended the Y.P.S. Convention in Viking on Sunday, June 12th.

The Bardo Young People's Society gave a return program in the Edmonton Lutheran Church last Sunday evening. Sixteen members took part in the program.

M. C. Hammond, John Deere dealer at Tofield, gave a field demonstration with a rubber wheel tractor and tiller on Joe Stauffer's farm last Saturday.

Born: To Mr. and Mrs. Ching Johanson of Clover Bar, former residents of Bardo, on June 17th, a son.

The John B. Anderson estate have presented a piano to the Bardo Church, which will be appreciated by all.

DON'T FORGET TOFIELD SPORTS DAY— JULY 1st

McKENZIE

The following are the results obtained by the pupils of McKenzie School at the Lamont Inspectorate School Festival.

RECITATIONS

Grade 1—Ellen Logsted, Excellent
Grade 2—Vernon Walker, Good.
Grade 3—Mary Martens, Good
Grade 4 Delma Dale, Good.
Grade 5— Arley Anderson, Good
Grade 6—Grethe Logsted, Very good.
Grade 7—Mavis Jacobson, Good
Grade 8—Gladys Dale, Good.

SOLOS

Grade 1—Annie Martens, Good
Grade 2—George Schroeder, Excellent.
Grade 3—Vernon Walker Excellent.
Grade 4—Jack Martens, Good.
Grade 5—John Englesham, Good.
Grade 6—Lylla Bailey, Very good
Grade 7—Lina Anderson, Very Good.
Grade 9—Jean Walker, Very good
CHORUS—Very Good.
ACTION SONG— Very Good.
Duet—Jean Walker, Pauline Walker, Very Good.
Trio—Grethe Logsted, Mavis Jacobson, Margaret Heidebrecht, Very Good.

Teacher—James A. Campbell

Mr. and Mrs. G. Bailey left on Tuesday for Olympia, Washington, and other parts. They expect to be gone about three weeks.

Mr. and Mrs. J. Johnston, Mr. and Mrs. Art Radway and Della Fry, who is visiting with the Johnston family, were picnicing at Elk Island Park on Sunday.

Mrs. G. Walker and children, Mr. Campbell and the Jacobson family spent Sunday afternoon at the Park.

Mr. and Mrs. Johnsrud from south of Tofield visited at the Jacobson, Secord and Munroe Trent homes on Sunday.

Mr. Jacobson attended the horse shoe practice at Shonts on Tuesday evening.

Several young folks from here and Lakeshore went to visit Gordon Ferguson at the Reserve on Tuesday evening.

Searle Precipitation Report

(Compiled from 306 Rain Gauge Reports)

In Alberta the precipitation is somewhat below normal. The percentage of normal has been reduced by rather scant precipitation during the last three weeks. Moisture is still very deficient in the northern part of the province including the Peace River area, and only fair in most of the eastern sections.

In Saskatchewan the precipitation has made a slight improvement recently, and to date almost normal. Precipitation, however, has been generous in some areas which contain a heavy percentage of wheat acreage.

In Manitoba a considerable area is very deficient in moisture excepting particularly in the west central and the north western portions.

The good rains which occurred during the fall months of August, September and October, and which provide a reserve for this growing crop, must again be taken into consideration. When these fall rains are combined with the rains which occurred from April 1st, it is found that the percentage of normal is 97 per cent for Alberta as compared with 81 per cent at this time last year; 80 per cent for Saskatchewan, as compared with 56 per cent at this time last year; and 87 per cent for Manitoba as compared with 117 per cent last year.

Combining the three provinces, again taking into consideration fall moisture, and the growing season moisture from April 1st to June 12, we find that the percentage of normal precipitation now is 90 per cent compared with 71 per cent at this time last year.

Prospects are perhaps somewhat better than the precipitation indicates because a large percentage of the acreage has been sown to rust-resistant wheat.

AMISK CREEK

Mrs. C. Kallal entertained the Ladies' Aid on Tuesday, June 6th. Many members and visitors were present. It was decided that the Aid will hold an Ice Cream Social at the A. Haugen home on July 5th. Lunch and Ice Cream will be served. Mrs. I. C. Olson gave a very interesting report from the W.M.F. held in Edmonton recently. A very delicious lunch was served by the hostess.

Hilmar Moen left Sunday, June 12, for Hazeldeane where he is to attend an elevator. Mr. and Mrs. Moen and Evelyn Hillerud accompanied him to Vermilion.

See J. O. A. Letourneau regarding the new Alberta Hail Insurance Plan.

The Youth Training Girls were practising playing ball at the Berg home last Tuesday.

Alice, Lilly and Lloyd Berg motored to Viking and attended the Young People's Rally Day Services held at the Norwegian Lutheran church there. They were supper guests at their cousin's home, Mr. and Mrs. O. Kjelland.

Pearl Patterson, who is training for a nurse at the Misericordia hospital in Edmonton, is now enjoying a three week's holiday at her parent's home here.

Mrs. P. O. Flaaten visited with friends and relatives near Viking last week, returning by bus Friday morning.

Mr. and Mrs. J. Berild and Gladys took in the Picnic held in Bardo last Saturday.

Mr. and Mrs. H. Hillerud left last week for Grande Prairie where they will visit friends. Their daughter, Merl, who is teaching school there will accompany them home.

Mr. J. Hanson from Grande Prairie visited friends and relatives around here last week.

Mr and Mrs. E. A. Moen, Mr. and Mrs. R. O. Berg, attended Mr. and Mrs. Goodall's Golden Wedding, held at their home near Ryley last Sunday.

Mr. and Mrs. Redlinger and family visited with Mr. and Mrs. J. Berild at the Flaaten home last Sunday.

Gordon Sand and Alta Rutherford from Elk Point were visiting at the Hillerud, Berg and Flaaten home on Sunday and Monday, on their way to the Calgary Stampede.

Little I. Kjelland from Viking is a guest with her great Aunties, Mrs. R. O. Berg and Mrs. P. O. Flaaten.

Mrs. C. Erickson and son Donald, were visitors at the P. O. Flaaten home last Friday.

Quite a number of Tofielders attended the strawberry social held at Lakeshore on Friday night last. There was quite a good attendance and it is needless to add the strawberries and ice cream were delicious.

Saturday evening the C. W. L. had a cold chicken supper which was well attended. After supper bingo was played. The event was a social and financial success.

A WIDOW would like to get a position keeping house for a bachelor or widower. Have a boy 5 years old. Canada born. —Mrs. Laura Todd, Forintosh, Alta.

'THE TOFIELD MERCURY
Vol. XVIII, No. 19 Thursday, June 30th, 1938 $2.00 Per Year. To U.S.A. $2.50

LINDBROOK

Some parts of the district have had some good rains but the hills seemed to have missed them. Still, haying will start soon, nuf said.

Mr. Logan sr. is home from the hospital where he was taken suffering from pleurasy. He is still far from well but we hope his recovery is rapid.

The resident ratepayers all received a copy of the Mercury this last week with the minutes of the Cornhill M.D. council meeting in it. This is a good idea, giving everybody a chance to know what is being done which otherwise they wouldn't know, only by hearsay, and we know what that is, very often contorted so that it is really fantastic.

We have the pleasure to report that a former resident of this district, Mr. Joe Ellis, who now operates a dairy business in North Vancouver, figured prominently in a column in the "Vancouver Daily Province" as a hero in the near drowning of two Japanese girls aged 12 and 6 respectively, in Seymour Creek which runs by his dairy. It seems that last Thursday afternoon about 4 p.m., Joe was whitewashing a barn when he saw some children run down to the creek. Sensing trouble, he found two of them in it, and a woman, Mrs. Ruth McCormick, who had seen it happen from the other side of the creek and had gone in after them, in trouble, the current being so strong. Joe at once went in, grabbed the 6 year old girl, took her to the bank and returned and assisted Mrs. McCormick and the other girl ashore. Joe states it was none too soon, or else they'd all have been over the rapids and into Burrard Inlet. The pulmotor company of the fire brigade worked for half an hour before the girls revived, they were then taken to the hospital. It makes no mention of how the rescuers fared. No doubt many of you remember the genial Joe, his brother Norman Ellis, still lives here with his family on the same farm that Joe had on the east end of Hastings Lake. Well done, Joe! Congratulations from your old friends at Lindbrook. Your a bloomin' 'ero now.

Sorry to hear that Mrs. F. Gould was taken to the hospital last week. We wish her a speedy recovery.

U.F.W.A. NOTES

Owing to various unforeseen circumstances, the June meeting of the U.F.W.A. has been cancelled and the next regular meeting will be held on July 14, at the home of Mrs. A. F. Bigland.

The postponed Demonstration on "Bee Keeping" will be a special meeting held in Tofield, the date and place to be announced later.

Anyone interested in this work is very welcome to attend the meeting.

On Saturday afternoon last at the home of Mrs. Firth, pianoforte pupils of Mrs. Firth gave a recital. Quite a number of interested parents were present, all of whom greatly enjoyed the rendering of different numbers. After the recital, tea was served by the hostess. The pupils taking part included Ila Moen, Doris Hendrickson, Hugh McAllister, Nora Bigland, Minnie McAllister, Miriam Seale, Corinne Haukedahl.

A picnic and sports day sponsored by Social Credit Groups of Zone 7 will be held at McKenzie Ball grounds on Wednesday, July 13th. Softball and the usual run of sports will be held and addresses will be given by Hon. Solon Law, Provincial Treasurer and Dr. J. L. McPherson, M.L.A. At night a dance will be held in the Community Hall.

KETCHAMOOT

All aboard for the Ketchamoot picnic and sports day next Wednesday, July 6th. Baseball, softball, and races will be the order of the day. Chicken dinner will be served at noon and evening. Admission free. Everybody welcome. It will be held on the Sears farm.

Mr. and Mrs. Wm. Lee of Edmonton visited friends and relatives in our midst on Thursday of last week.

Mrs. C. J. Whilliams spent the week end with her mother in Edmonton.

Mrs. Richard Thomas nee Marjorie Lee returned home from the hospital one day last week. Mr. and Mrs. Stanley Brown motored to the city for her.

Mr. Albert Sears is improving his farm by building a new house.

Preparations for the school picnic are being made to be held on Thursday, June 30.

Mrs. Crandell and Mrs. Govet of Duluth, Minnesota, visited three weeks with their relatives the Kleinschroth families. Mrs. Crandell is an Aunt and Mrs. Govet a cousin of Messrs. Alix and Harry Kleinschroth. They left on Saturday evening for Winnipeg where they will visit on their way home.

Seen at Lakeview Cooking Lake from our district were: Mr. and Mrs. John Brown and family and mother, Mrs. Gratz, Mr. and Mrs. Maurice and Mr. and Mrs. Leslie McGinitie, father Mr. J. McGinitie and families, Mr. and Mrs. Schultz and their company, Mr. and Mrs. Hayes, Harold Schultz and Miss Lindsay, Mr. and Mrs. Herman Lawson and family, Mr. and Mrs. Julius Lerbekmo and brother Torvel Nomeland, Mrs. Sears and family and Miss Ruby Anderson and Ethel Brown.

SHOWER

On Wednesday afternoon of last week a shower was held in honor of Miss Helen Hardy, whose marriage will take place shortly. The shower was held at the home of Mrs. S. Yakabuski, the Misses Jessie Munro and Ella Johnson, assisted by the softball girls, acting as hostesses. Games were played and an enjoyable social afternoon was spent. The bride elect received many beautiful and useful gifts and was assisted in opening them by Jessie Munro and Ella Johnson. A tasty lunch was served.

BARDO

Mr. and Mrs. Lauritz Eide, daughters Marguerite and Maude, and Mrs. Eide's sister, Miss Ferrier all of Toronto, Ontario, have spent a week here visiting relatives and friends in this district. Lauritz Eide is the oldest son of Martin Eide of this community and left this district 22 years ago when he went overseas in the 138th battalion of Edmonton. He was in the firing line in France about a year when he was wounded and sent to England. When he recovered he was sent to Northern Russia where he served for a while. While on duty there he was caught in a raging blizzard and had his feet badly frozen. One foot had to be partly amputated and he spent many months in a hospital. When the world war was over he returned to Toronto where he was married and has since made his home there. Needless to say his home folks were pleasantly surprised when he drove into the yard. Mr. and Mrs. Eide and party left on Saturday for Grande Prairie where they will visit Mr. John Eide at La Glace as well as other relatives and friends living there. On their return trip they will stop off here for a short time and then go to Banff and into B.C. before returning east.

About fifty neighbors and friends gathered at the Eide home last Friday afternoon, to honor Mr. and Mrs. Lauritz Eide and family, who are visiting here. The afternoon was spent in recalling old times. A bountiful lunch was served.

Friends and relatives gathered at a miscellaneous shower held in honor of Miss Alice Ness, whose marriage to Mr Ralph Dahl of Camrose takes place early in July. Miss Ness received a number of lovely gifts. A delicious lunch was served by the hostesses, Mesdames Haukedahl, Stauffer, J. Ness and I. Ness.

Edmonton visitors last week were Mrs Haukedahl, Mrs. J. Stauffer, Mrs. Falkeid and Mrs. P. Lerbekmo.

Ivan Foshaug has done some breaking on his own land and will also break some for Arnold Johnson.

The Young People's Society held their meeting in the church last Sunday night.

ROSS CREEK

Mr. and Mrs. J. Shertel and Miss Mae Shertel motored to Clive last Thursday. Mae remained there and intends opening a beauty parlor.

Mr. and Mrs. Ed Bailey were city visitors on Tuesday.

Born: To Mr. and Mrs. L. Rustand on June 11, a daughter.

Miss Grace Law spent the week-end at her home in Chipman.

A large number from Ross Creek took in the picnic at Paribice on Sunday last.

On Wednesday evening the teachers, Miss Law and Miss Steskyn entertained the ladies of the district at the school. Games and fortune telling were enjoyed after which everyone roasted weiners. Cake, pie and coffee also were served. Everyone reported a good time.

A softball game was held at the Ross Creek soft ball diamond on Friday when the Silver Lake Kittens played the Ross Creek Wild Cats. It was quite a close game but Ross Creek won with a score of 10-8.

Mr. and Mrs. Ernie Ferral were Sunday visitors at the Ralph McColman home.

Mr. and Mrs. Frank Banks motored to the city on Monday.

LOCAL & PERSONAL

Born: To Mr. and Mrs. John Thomson on Tuesday, June 28, a son. Congratulations.

Mrs. Rollans, Mrs. Cary, Mrs. Graham and Mrs. Goodwin of Viking, were guests of the Duplicate Club at the home of Mrs. Bruce on Friday afternoon and evening.

A rather painful accident befell Mr. Gardam, the Anglican Church incumbent. Last week he was participating in some of the cub group games and dislocated his shoulder.

Mr. Louis Glenn visited Egremont last week. While there he visited Mr. Bearisto, a former Tofield resident.

Mrs. J. Johnson and grandson Hugh, from Sioux city, Iowa, are spending several months visiting with Mrs. M. McConnell.

Mr. and Mrs Gardham from Westlock visited their son, Mr. Gardham here on Sunday.

Mr. and Mrs. R. Whyte of Wetaskiwin are spending a week visiting at the Jubb and Whyte homes here.

Miss Alice Moen returned home from Wetaskiwin last week after visiting with relatives there.

Mrs. McCauley and Margaret, Miss Marjory Stewart and Jean Innes spent the week end visiting at Wetaskiwin and Ponoka.

Messrs. Bob Evans Les Glover and Glen Wood spent the week end at Athabasca.

"Jezebel" Coming Tuesday

On Tuesday next at the Variety Theatre a romantic story of the South will be shown starring Bette Davis. Jezebel, the story of a woman's wiles at their worst and at their best gives Bette Davis ample scope for superb character acting. Jezebel took all and gave nothing. Men fought for her, died for her. And the man who loved her called her "the wickedest woman who ever lived." Bette Davis is supported by Henry Fonda and George Brent and an outstanding cast.

Miss Victoria Hobson spent the week end visiting at her home in Edmonton.

Miss Jessie Munro spent a few days visiting in Edmonton.

Miss Jean Baptist is spending a few days in Edmonton.

Miss M. Redig returned on Sunday evening after an enjoyable holiday at the coast.

Mr. D. W. Jacobs left for the coast on Friday of last week.

The Ketchamoot Youth's Training Club held their meeting on Wednesday at the home of Eileen Stirett. Ethel Coombes gave a paper on the movie life of Janet Gaynor. A delightful lunch was served by the hostess.

The next meeting will be held on July 27th at the home of Miss Kathleen Ingram.

How Are You?

If the subject of conversation is an indication of interest in the subject, then, without doubt, health came first in the public interest since the question most frequently asked is—How Are You?

What is your answer today and what is it going to be in the future? Are you making things pleasant for yourself and for those with whom you live and work because you are happy with the joy of good health or are you one of those depressing persons who demands sympathy because he looks so miserable?

It is surprising how much of ill-health is due to neglect of those essentials which can easily be secured by most people and which do not cost money. The proper kind of food costs no more than the wrong kind. Fresh air and sunshine are to be had for the asking. Sleep is not for sale. It means a proper bed-time. Exercise, rest and relaxation can usually be secured by making a reasonable effort.

These are the factors upon which personal health [illegible] depends. They are under our own control. Nobody can help us very much in securing them. If we want good health we cannot neglect them.

Too many late dances which take up the time for sleep; too much living in artificial light and not enough sunlight; too many sweets between meals spoiling the appetite for proper food, indoor parties instead of outdoor exercise are some of the common reasons for ill health.

In addition to neglecting themselves many persons are, in other ways, particularly careless as regards the health of others. They cough and sneeze without covering the nose and mouth; they talk right into your face; they kiss the baby on the mouth. In fact they do about everything they can to spread to everyone they chance to meet any disease germs which may be present in their own nose and throat.

Many are also careless of themselves [illegible] regarding the limits within which they may expect their bodies to function normally. The human body can stand up under a great deal of wear and tear, but beyond certain limits it begins to break. It is a matter of common sense to keep within these limits. Success is empty which is gained at the expense of a wrecked body. Health without wealth is preferable to wealth without health.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

DON'T FORGET TOFIELD SPORTS DAY— JULY 1st

Edmonton Exhibition July 18-23

This is the 60th consecutive year for Northern Alberta's Big Annual Fair, and Edmonton is celebrating this historical event by presenting the most interesting and spectacular show in its history, week of July 18 to 23. $35,000 has been expended on grounds, buildings and equipment in preparation for Diamond Jubilee Week at the Edmonton Exhibition and a record breaking attendance is expected.

Long recognized as Western Canada's outstanding Livestock and Agricultural Show, the entries in these departments promise to surpass all former occasions. The space allotted to displays of farm machinery and equipment has been greatly extended in order to accommodate exhibitors, while the display of industrial, domestic and educational exhibits will pack the Manufacturers Building and other show buildings to the limit—exceeding all former Exhibitions both in number and quality.

Special entertainment features have also been arranged for Edmonton Exhibition Jubilee-ers, including a unique Diamond Jubilee Parade in down town Edmonton Tuesday morning—miles of gorgeously decorated floats—Mounties—Police—Old Timers—20 massed bands—Mammoth balloons. An added feature this year is that there will be two nights of FIREWORKS—Tuesday and Friday evenings, instead of but one as on former occasions. There will be six days of running horses with seven races every day. Grand Parade of prize winning live stock—Old Timers Reunion—Dog Show—Poultry Show—Basketball and horse shoe pitching tournaments.

For the evening grandstand show the Edmonton Exhibition will present Ernie Young's "Follies Internationale" featuring world famed stars and the most clever and thrilling vaudeville performers of today, and including also the scintillating, gorgeously colored "Treasure Chest" number. The Royal American Shows, worlds finest, most brilliantly lighted outdoor amusement organization will provide the fun, thrills and rides on the Midway for young and old.

Advance sale of admission tickets for the Edmonton Jubilee Exhibition is now on throughout Northern Alberta by authorized agents at the reduced rate of 5 for $1.00—or you may mail your dollar direct to Advance Ticket Sale Dept. Edmonton Exhibition and your tickets will be mailed to you. You save $1.50 by buying your tickets in advance. Saturday, July 16th, is the last day on which you can buy tickets at the reduced rate.

Single fare passenger rates will be in force on railway and bus lines for the Edmonton Exhibition and you can get full particulars from your local agent. This is Northern Alberta's big annual holiday, and this year its the Diamond Jubilee celebration at the Edmonton Exhibition. This is the year to come and holiday in Edmonton Fair Week, July 18 to 23.

The Management would like to get in touch with persons who attended Edmonton's first Exhibition in 1879. If you know of anyone please send their name and present address at once to Manager Abbott, Edmonton Exhibition.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

"Seed time and harvest . . . shall not cease", the Bible tells us.

In this good Book are found a surprising number of maxims and precepts about agriculture, setting forth the advantages of the use of good seed, of proper cultivation of the soil, of keeping weeds down and so forth. In fact it is not too much to say that if a farmer today were to operate according to the many injunctions given in the Bible, that he would simply be carrying the advice given by the most modern agricultural authorities—and yet these biblical injunctions were written thousands of years ago.

This year, 1938, is the four hundredth anniversary of the first printing of the Great English Bible, which took place in 1538. This was the first complete Bible in the English language that was authorized by ecclesiastical authorities for use in English churches, and it was only displaced [illegible] by that very miracle of English literature, the revised King James or Authorized Version as we have it today.

No doubt when the promise was made to us in Genesis that "Seed time and harvest shall not cease" it was based upon the assumption that farmers would carry out the good agricultural practices as advised in the Great and good Books.

Following factors have tended to raise price: Rust spreading in the United States and injury apparent in threshing returns; frost damage greater than expected—More precipitation needed over Canadian and American spring wheat belts—Bread wheat stage becoming more apparent in Italy—Very dry in important central Volga section—Lack of adequate rain, affects Danubian spring crops.

Following factors have tended to lower price: European crops may be slightly larger than 1937—Russia offering new crop wheat, barley and rye—Argentine weather continues favorable for new crops—India making substantial wheat shipments—Argentine wheat acreage estimates larger than last year—Manchuria plans to increase soybean production.

Britain Ready To Defend Itself

LONDON, June 22—Leslie Hore-Belisha, secretary for war, declared confidently Tuesday that "the country is ready to defend itself."

"We've done wonders in rearmament," he told the council of the National Liberal party.

"We have spent a vast sum of money (on rearmament) to a figure approaching £1,000,000 ($5,000,000) a day" the war secretary said, "and despite the fact we have met that bill we have spent £30,000,000 a year more upon social services.

"That achievement is remarkable—to have redressed the bankruptcy of the nation and to have made it strong.

"I hope that it will be reported throughout the world for it will indicate to potential breakers of peace that this country has inexhaustible resources, financial, material and spiritual, with which to resist any disturbances."

Gasoline Prices Cut In Country

Gasoline prices in Alberta have been reduced from one-half to one and one-half cents per gallon at rural points, S. R. Stevens, manager of Imperial Oil, Ltd., announced Wednesday, he said.

In the suburban area surrounding Edmonton, where prices have been one cent per gallon higher than inside the city limits, reductions will be placed in effect Mr. Stevens stated.

Bank of Montreal Crop Report

General—Crop conditions throughout the Dominion continue the favourable progress which has marked the season to date, prospects in general being satisfactory and over large areas excellent. In the Prairie Provinces moisture conditions are satisfactory over most of the main wheat-growing area and crops on the whole are making good growth. In some regions, however, particularly northern Alberta, northern Saskatchewan and parts of southern Manitoba, where precipitation has been light, crops are suffering from lack of moisture and good rains are urgently needed to halt deterioration. Grasshoppers, cutworms and wireworms have caused some damage in scattered districts of Alberta and Saskatchewan. In Quebec Province field crops and tree fruits are doing well, though additional rainfall is needed over wide areas. In Ontario crop prospects generally are excellent, with grains, canning crops, hay crops, small fruits, apples and tobacco progressing satisfactorily. In the Maritime Provinces warm weather and rains have benefited crops generally, and prospects are good for both field and fruit crops. In British Columbia early hay crops are light, grain crops are making satisfactory growth, and fruit crops generally are in good condition, but rain is needed in all districts.

Alberta—Favourable weather has promoted rapid growth and the condition of the crops generally is satisfactory, although rain is needed badly in the northwest, including the Peace River district, and in the northeast districts also in some areas in the extreme south. In other districts there is sufficient moisture so far, but general rains are required soon. Grasshoppers are active in central and southern areas, but damage has been slight. Pasturage is good. Sugar beets are growing well.

Rally To Defence Of Talking Crow

MONTREAL, June 22—Jacko—the talking, pipe-smoking crow Thomas Jeffery will "fight to the highest courts in the land" to keep—had plenty of character witnesses when his case came up before Recorder Plante Tuesday. More than a score of adults and children were on hand to deny Jacko disturbed the peace of Rosemount citizens by "intermittent or re-iterated cries" as charged in six complaints against Owner Jeffery.

WHO OWNS CANADA'S BANKS?

Who are the owners and what do they do?

* *

JIM BROWN, carpenter—your next-door neighbour—may be one of the supposed "Big Shots" who own the banks in Canada. He may own a couple of shares, or maybe only one.

Women, executors or trustees of estates, and retired people, comprise about 63 per cent. of the shareholders in one of Canada's banks, taken as an example.

Analysis of this particular bank, which may be regarded as typical, shows that women own nearly half of its shares. Farmers, merchants and professional men are the most numerous of the classes listed.

There are 260 occupations represented among the shareholders. They include:

Accountants, actors, barbers, bankers, bee-keepers, boat-builders, bricklayers, carpenters, cheesemakers, clergymen, dairymen, dentists, doctors, drovers, druggists, farmers, fishermen, forest rangers, funeral directors, grocers, insurance agents, jailers, journalists, linotypists, lobster buyers, miners, oil operators, plumbers, policemen, railway employees, ranchers, sailors, scalers, sheriffs, stenographers, stevedores, timber cruisers, tobacco farmers, trappers, and others.

These are among the folk who own the banks and so must be a part of that bogey with which some people seek to scare you—that fabled "international bankers' ring". They are mostly Canadians—your fellow-citizens—decent people like yourselves.

50,185 people hold the 1,145,000 chartered bank shares issued. Seventy out of every hundred shares are owned in Canada.

The average share-holding is 22.8 shares—but all through the lists of bank shareholders you will find hundreds who own from one to five shares.

There is no concentration of ownership and power in the hands of any small group. These shareholders annually elect directors. There are 172 directors of Canada's chartered banks. Their addresses dot the map of Canada from coast to coast. They are men of proven business-ability; their own success has proved their judgment good, that judgment is always alert in safeguarding your money.

Their business experience reinforces the skill and training of the salaried bank executives in conserving the interests of the depositors, note-holders and shareholders.

Loans to bank directors, firms in which they are partners and loans for which they are guarantors, as of February 28th, 1938, did not exceed 1/100th part of the total loans made by the chartered banks. That is about the usual proportion. Monthly returns have to be made to the Government showing these borrowings.

No director may vote, or even be present at a meeting of the board when loans in which he has any interest are under discussion.

The law prevents a bank from doing certain things. A bank is prohibited from lending on mortgages, for loans must be of short term and quickly realizable.

A bank is forbidden to engage in trade. It must not buy, or lend against its own shares or the shares of any other chartered bank. No bank, bank director, or bank employee is allowed to hold shares in the Bank of Canada.

A bank must not let its name appear on certain prospectuses, nor may any of its staff represent insurance companies.

There are heavy penalties laid down for violation of any of these and other provisions of The Bank Act.

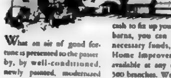
Your bank provides machinery for carrying out adequately the most widely varying, day-to-day transactions—financing farmer or factory, merchant or miner; simplifying business, facilitating the exchange of goods and services.

Canada's chartered banks are owned by your fellow-citizens, directed by men known as competent leaders of business and managed by able men risen from the ranks whose whole business life and experience has been in the bank.

They are at your service.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.



Fortunate Houses and Barns: Modern and Well-Kept

What an air of good fortune is presented to the passer by, by well-conditioned, newly painted, modernized farm buildings. They add financial values to farms.

If you have not the ready cash to fix up your house and barns, you can *borrow* the necessary funds, under the Home Improvement Plan, available at any one of our 500 branches. We are co-operating heartily in home and farm improvement. The terms are convenient. Ask for our booklet on Home Improvement Loans.

BANK OF MONTREAL
ESTABLISHED 1817
"a bank where small accounts are welcome"

Modern, Experienced Banking Service ... *the Outcome of 120 Years' Successful Operation*

What is Canada's Greatest Co-operative Business?

Answer.—Life Insurance—in which more than 3,500,000 Canadians are united for mutual protection.

Question.—Then, about one out of every three Canadians owns Life Insurance?

Answer.—Yes, and more than half the population of our country benefits directly from Life Insurance.

Q.—How?

A.—Because Life Insurance savings not only protect policyholders but also guarantee financial security to the women and children who are their dependants.

Q.—How much money does Life Insurance pay out each year?

A.—Approximately $150,000,000—or, at the average rate of Half-a-Million Dollars every working day.

Q.—How does Life Insurance invest the millions of dollars of policyholders' savings?

A.—In many worth-while enterprises for the benefit of all Canadian people.

Q.—What are the principal investments?

A.—Government bonds—municipal debentures—first mortgages on homes and farms—and other investments authorized by law.

Q.—How do these Life Insurance investments benefit Canada?

A.—They help to build homes, schools and good roads—improve farm property—extend transportation systems—finance industries—and construct local improvements.

This is the eighth of a series of messages sponsored by Life Insurance Companies operating in Canada. The ninth, to appear in two weeks' time, will discuss why Life Insurance is so safe.

Life Insurance

Guardian of Canadian Homes

UNDER SUMMER SKIES—

EACH DAY throughout the summer months and particularly each Monday there appears in the daily press at least one, sometimes many, accounts of accidental deaths. Highway accidents and drowning accidents top the list, but death swift and unexpected comes in many forms. Telegraph editors and city editors of the larger papers know when the Saturday noon whistle blows that before the summons to work comes on Monday it will be their duty to record a number of unfortunate happenings. Moreover they know their work so well, that should a cloudy, cool or rainy week-end come along, they mark this up as an incident in cutting down the number of week-end summer fatalities. As one reads the numerous week-end accident reports, it seems a high, and an unnecessary price to pay for glorious weather. It would even seem to be possible that if full realization came to people about to embark on a summer week-end excursion of the danger to be faced and the risks to be run, some lowering in the number of accidents might take place.

Perfect summer weather is in itself no reason for catastrophe, but rather the exact opposite, which simply goes to prove that when extraordinary fine week-ends produce death tolls, the fault, in the main lies with humanity—individual humanity. Each person behind the driving wheel of an automobile. Each person in a loaded small boat. And each person doing nothing more spectacular than simply swimming or bathing, have their responsibility to themselves and others. Ordinary precautions are too well known to need repetition. What is needed is emphasis placed upon due observance of these precautions.

Tragedy under summer skies when all other things point to laughter, gaiety and happy living, is doubly pathetic. Therefore that little extra precaution which in so many cases would prevent catastrophe, is doubly worth while.

MR. HERRIDGE SPEAKS—

AT A CONSERVATIVE gathering in the city of Halifax quite recently, Mr. Herridge gave what can now be termed one of his famous speeches. He spoke of reform, reform through a reconstituted Conservative party. He referred to high finance and moneyed interests in such a way that surely at least some of his Conservative hearers must have squirmed in their seats. He gave the unmistakable impression that the Liberal party was without hope and the Conservative party as at present constituted a poor bet. He did say, however, that rarely before has such an opportunity come to a major party to take leadership in the affairs of the country.

Candidly speaking, on his public utterances, we like Mr. Herridge. But we do wish that speeches purporting to save true democracy and to bring a high degree of prosperity to the Canadian people were divorced from politics. Perhaps it is not possible to entirely do this, but promising something and asking for something in the same breath is a style of address that is being worn rather thread bare.

Mr. Herridge is not exactly a socialist, yet the tenor of his Halifax speech has a strong socialistic tinge. He speaks of those things that are a natural monopoly being best operated by the government. And goes on to say that the moneyed interests and high finance are reactionary. One cannot find fault with a speech such as Mr. Herridge delivered at Halifax. It is an inspiration to the ordinary reader and must be especially inspiring to bewildered Conservatives looking for a way out. But after all, inspiration is one thing and a clear cut practical policy is another. To say that Canada is a potentially wealthy country is true enough. But what the people are most anxious to hear are details of a sensible plan which will make this wealth available to the people on, say a per capita basis. The man or party that can produce such a workable plan will find it unnecessary to ask for support. Support will be over whelming.

Whatever else shch a plan contains it will have to include a new economy for the west. It matters little whose fault it is, but the fact remains that seventy-five per cent of the farms in the west to-day are mortgaged. In the majority of cases the mortgage is based on a pre-depression price structure. These mortgages are in many cases held by incorporated companies. But such is the construction of these companies that the worth of the mortgage is scattered throughout numerous homes. If it is expected that these mortgages are to be paid by the original mortgagor during his life, some form of adjustment will have to be made. Yet this adjustment will have to be made carefully, because if carelessly made, it is likely to do as much harm as good.

Then there is the unemployment problem. Incidents that have occurred in Vancouver recently is proof enough that some kind of reorganization of the manhood of the nation is necessary. Compared to some European countries, Canadians need not howl about standard of living. Yet it should not be necessary for thousands of men to continually demand work and have none forthcoming. It may be necessary to face the fact that more and more in the future will the man who work have to support the man who for any reason at all does not.

There are many things to be done. Possible things. And the country is awaiting someone to put them into understandable shape. A plan to benefit Canadians that is workable, according to all the vagories of human nature, and one that is easily understood, will not lack supporters. It will be overwhelmed with support.

House Fly Worst Carrier of Disease

A serious menace to health and a nuisance of the first order is the charge rightly made against the common house fly. This is especially true in the warm months, from midsummer to autumn, when it reaches its greatest abundance. It is a menace to health because it breeds in garbage, manure and human faeces, and may pass directly from filth and other infected matter to foodstuffs. Particles of decomposing organic matter, bacteria and other living organisms adhere to its hairy body and legs, and sticky feet and mouth-parts, or may be conveyed to food in its excreta and saliva. One fly may carry as many as 1,000,000 germs.

The house fly, known to scientists as Musca domestica, is world-wide in distribution and notorious for the part it plays in the dissemination of dangerous diseases such as infantile diarrhoea, tuberculosis, typhoid, cholera and dysentry. It also serves as the intermediate host of certain species of roundworms that infest the stomachs of horses, and of tapeworms that occur in poultry. In Canada, the house fly is probably the most important insect species concerned in disease transmission. On this account it is very essential that measures be taken to control it and to prevent it from having access to human foods.

Methods of Control

The most effective method of controlling house flies consists of eliminating or reducing their breeding places by properly treating or disposing of manure and garbage. Fresh horse manure is probably chiefly responsible for the majority of flies in rural sections. It has been estimated that more than a million flies may develop from one ton of manure. In the cities, garbage is an important factor in fly production. To be fully effective, control measures should be organized on a community basis, as one neglected manure heap or garbage dump may infest a whole neighbourhood. Collections of manure should be removed from city stables and disposed of at least twice weekly. In rural sections, where practicable, the manure should be removed daily and spread thinly in fields where the drying effect of sun and wind will prevent breeding. An alternate method consists of taking advantage of heat produced by fermentation when manure is placed in tightly packed piles. The manure pile should be constructed on hard ground or concrete. The sides of the pile should be clean cut and almost vertical, but sloping slightly towards the centre. As fresh manure is added to the pile it should be tightly packed by means of a shovel. The heat produced by fermentation destroys all fly eggs, larvae and pupae, except possibly those close to the surface of the top layer. The application with a watering can or sprayer of a solution of borax consisting of 1 pound of borax in 6 gallons of water will destroy any fly stages in the top layer. Six gallons of the solution is sufficient to treat 30 square feet of surface area.

Measures should also be taken to prevent the accumulation of manure from other domestic livestock such as pigs, cattle and poultry, as flies will breed in these substances, although to a lesser extent.

Cover Garbage Then Burn It

All organic refuse such as household garbage should be wrapped in paper and stored in fly-proof garbage cans until finally disposed of by burning. The accumulating of garbage in municipal dumps during the warm months of the year is undesirable as such dumps produce enormous numbers of flies as well as other vermin, and may constitute a serious public nuisance. The only satisfactory way of disposing of garbage during the fly season is by incineration.

Every effort should be taken to exclude flies from dwellings. The screening of doors and windows is very useful in this regard. Flies that find their way into the house should be promptly destroyed. Fly swatters, sticky fly paper, poisoned fly pads, poisoned bait made by mixing one teaspoonful of formalin in a cupful of sweetened milk or water and exposing it in saucers (out of the reach of children or pets) are included among the various means of doing this. Fly sprays containing pyrethrum extract in mineral oil are a valuable and widely used killing agent. Leaflets concerning the house fly and its control may be secured by writing to the Publicity and Extension Division, Department of Agriculture, Ottawa.

Wheat fed, or to be fed, to live stock and poultry in Canada during the 1937-38 crop season has been estimated preliminarily as 15,938,000 bushels as compared with 15,794,000 bushels in the 1936-37 season.

Supplies of hay and clover on farms in Canada on March 31, 1938, amounted to 2,740,000 tons a moderate decrease of 616000 tons on the amount in hand a year ago.

Effective Ways Treat Poison Ivy

Of all skin-irritant plants, poison ivy and the related but less frequently met poison sumach and the far western poison oak are the most virulent. The active principle of poison ivy is an oil which is present through out root, stem, leaf, flower, and fruit and even to the easily detached hairs. Tearing or bruising of any part of the plant liberates the oil to come in contact with the exposed parts of the person touching it. The first stage of infection is usually a slight itching followed by a faint blush of the skin. The itching sensation increases and from a few hours to some days, numerous minute blisters, or there may be only one blister, appear. In mild infection, there may be no more than shiny dots upon the skin and no further. In other cases, the blisters eventually burst, to become irritating oozing sores from which contagion may spread to other parts. The sores finally dry up, forming scabs. A really severe attack may upset the health completely for a time.

If the poison ivy oil is suspected of having reached the skin, immediate scrubbing with laundry soap, [illegible] in lye in tepid water changed after each lathering or running warm water to carry away the poison, is a sensible precaution. If done before the oil penetrates the skin no other treatment is usually necessary. Washing with alcohol kerosene or gasoline also helps to keep the poison from spreading.

Recommended Treatments

Treatments without number have been proposed and used, often indiscriminately without regard to their exact purpose. The treatment for affected parts most widely recommended in recent years, potassium permanganate, has for its purpose the destruction by oxidation of the poison itself. The parts are swabbed with a three per cent solution, made somewhat weaker if the skin is particularly sensitive. A brown stain left by the permanganate may be removed gradually by soap and water. The commonly used iodine stains [illegible] should be carefully [illegible] (baking soda, [illegible]) [illegible] with a crust and [illegible] aggravate conditions.

Easily Transmitted

[illegible] when perspiring freely perhaps, or having cuts on the skin, one may become a victim and thenceforth obliged [illegible] and by handclasp to others who may [illegible]

A complete [illegible] treatment of poisoning and eradication of the pest may be obtained free on application to the Publicity and Extension Division, Dominion Department of Agriculture, Ottawa.

Clydesdale Field Day At Dominion Experimental Station, Lacombe July 5

The object of the Field Day is to demonstrate good horses and to interest farmers, and particularly farm young people, in the breeding of better horses. For the average farm in Central Alberta horses provide decidedly the cheapest and most satisfactory source of power. Also at [illegible] prices, sales of horses are a sure and profitable source of revenue on many farms.

Clydesdales are the outstanding [illegible] of the draft breeds. One of the three largest studs of purebred Clydesdales in Western Canada is at the Experimental Station at Lacombe. There are now forty-seven [illegible] at the Station including one [illegible] draft stallions ever imported from Scotland.

One of the outstanding features of the programme will be a parade of [illegible] horses led by a six-horse team [illegible] prizes.

The parade and the many other branches of work at the Station including poultry, horticulture, forage and cereal crops, the Shorthorn cattle and the large herd of Yorkshire and Landrace hogs will provide something of interest to everyone.

Forage Crops Field Day On Monday July 4th

"CORRECTION: The School of Agriculture, Vermilion, advises this paper that the correct date of the Forage Crops Field Day at Vermilion is Monday, July 4th, and not July 24th, as published in the rural papers recently. The school of Agriculture regrets the error in information which went out to the papers from the school office and trusts that even at short notice, all farmers who are specially interested in Forage Crops may be able to attend."

The three per cent income tax levied by Mexico on shipments of goods from Canada has now been removed, as from June 2, 1938.

COUNCIL MEETING

A regular meeting of the town council was held on Monday evening, June 27th at 8 o'clock. Present were Mayor W. C. Swift, Councillors Lovell, Hammond, Brace and Taylor. The agenda was very light and business mostly of a routine nature. Among correspondence considered was a letter from Mr. [illegible] suggesting that the Women's Institute building be [illegible] for the use of ladies as a rest room. Council concurred [illegible] the building was [illegible] and after the [illegible] Saturdays. Finance [illegible] for the month of May [illegible] to be placed [illegible] of the meeting. The matter of purchasing another [illegible] for the purpose of mounting the [illegible] was discussed, and a committee requested [illegible] which might be suitable [illegible] and general [illegible] matter. The committee [illegible] purchase of a good used truck in mind.

KINGMAN

Mr. Alex Asp has traded in his car for a new truck. He expects to buy grain this fall.

Miss Gertrude Asp returned to Calgary after spending a few weeks holiday at her home.

The Sports Day at Kingman was well attended. A large crowd turned out even though the day was not very pleasant.

The Teaching staff for the next term will be Mr. [illegible] Simonson for the senior room and Miss Gladys Christensen for the lower grades.

The wedding of Mr. Palmer Boness and Miss Hagen of Bawlf took place recently.

Mrs. Frank Hardin spent last week in Edmonton visiting relatives.

L.C.C. NEWS

The June meeting of the L.C.C. was held at the home of Mrs. Hooper, Mrs. Bracegirdle assisting hostess. Ten members and two guests were present. Guests were Mrs. Swift and Mrs. Letourneau. The meeting was opened by the usual theme song and Roll call was answered by poems and items.

The final picnic will be held on July 24 at the usual place Lakeview. Members of the club are allowed to bring guests if they so wish, providing they provide ample lunch for same. Ladies will be informed as to what to put in their hampers by the [illegible] committee, Mrs. Morden and Mrs. [illegible] plenty of time for [illegible]. After other discussion of [illegible] a song for the month, the meeting was adjourned at 5 o'clock.

Mrs. Hooper and Mrs. Bracegirdle served a tasty lunch and the reporter found a scrumptious appetite for [illegible] to our hostesses [illegible] there will be more [illegible] meeting to be held at the home of Mrs. Smith [illegible] call to be [illegible] Things For Supper.

School's Out

Thursday, June 30 saw the youngsters making their last homeward journey from school for this term. For two whole months school will be but a memory, while picnics, sports, fairs and camping will take its place. Not a bad life after all for a school "taker" at least not through July and August.

Mr. Pat Feaghin was kicked by a horse last Monday and received injuries to his head. He is now able to be up and around.

Mr. and Mrs. Earl Shalen and children were Camrose visitors last Sunday.

BUYING WISELY

The ever increasing popularity and wide acceptance of ALBERTA BEERS is the result of critical consideration of merit preceding the purchase of products . . . in other words — "BUYING WISELY." People know from personal experience that Alberta's five brands are the finest beer that modern methods can produce. They know that in its manufacture only the choicest hops and malt are used. They know the utmost care and skill is exercised in their control. Then, too, ALBERTA BEERS are thoroughly aged. MAKE YOUR NEXT ORDER ALBERTA BEER.

Rhubarb Eaters Society

There was a time when rhubarb was just rhubarb. That is, it was rarely served on Sunday but was reserved for Mondays, wash days. And as a special treat when in the fall the threshers came! It generally had a sea green color with just enough foam to remind one of waves beating on a rocky shore. And if you were a thresherman and was served rhubarb at one place for breakfast and at another for supper, you just remarked it was a coincidence!

But this Cinderella of fruits got tired of being put down in cold water (to save the sugar). It wanted to climb up among the more elite of fruit society. In fact it spread its ambitious wings wide open and landed, well where do you suppose? No place else except right alongside the aristocratic strawberry. It used to be a standing joke—to grow rhubarb that tastes like strawberries, but certainly horticulturalists have gone half the way and grown rhubarb that looks like strawberries. So much so that fresh crushed strawberries and cooked rhubarb look practically the same. And the taste too has lost that puckery quality. Maurice McGinitie brought us in a few sticks of ruby rhubarb and in this day of last words in everything—it is the last word in rhubarb.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

WEDDING

A wedding of wide interest was solemnized in Drayton Valley Anglican Church on Wednesday, June 22, at 2:30 p.m., when Mary Margaret, only daughter of Mr. and Mrs. Wesley Hill of Violet Grove, was united in marriage to Archie Ross, youngest son of Mr. and Mrs. R. H. Tone of New Norway. The bride, who was given in marriage by her father, wore a floor length gown of white satin striped voile.

Mrs. Ernest Forsyth, Matron of Honor, chose a frock of blue and white sheer with matching hat and accessories.

Edward Donelly Hill, brother of the bride, attended the groom.

The marriage lines were read by the Rev. William Elkin of Edmonton, and the wedding march was played by Mrs. Mitchell of Drayton Valley.

After a lunch served at the Manse, Mr. and Mrs. Tone left for a brief honeymoon in Edmonton after which they will be at home to their friends on their farm in the New Norway district.

Rain On The Installment Plan

Even the weather man seems to be affected with the plan so much down and so much per month. Anyway instead of those three day soakers of which little now remains but a memory, we get intermittent downfalls and it is a hit and miss way. As a matter of fact our crops are not suffering yet a good soaker would do the world of good.

Dominion Day Celebration Here Goes Over Big

FINE WEATHER— GOOD CROWD— MANY ATTRACTIONS

With weather which could only be described as perfect, the Dominion Day celebration here at Tofield "went over in a big way." From the time the first ball was thrown in the forenoon until the last note of dance music at night, the holiday spirit was in the air. The usual decorative effect with trees was in evidence and quite a number of flags were flown. The attendance was equal to previous years and started coming in just before noon. By mid-afternoon there were many hundreds of people on the grounds watching baseball, softball, horse races, basketball as well as other attractions. The big booth, under the management of the Anglican Church, the hot dog stand and the games all did a good business. It was quite a gala crowd, some carrying cane dolls, blankets and other prizes won at the games. These games, attended by Les, Stan, and Norman Glover and Reg McCarthy, not only added a touch of gaiety to the occasion, but helped considerably in making a financial success of the day.

BASEBALL

The baseball games had good patronage right through. And all the games were good ones with a good grade of ball being played.

Dodds and Rounthill opened the tournament play and gave a good exhibition. Dodds won by a score of 6-4.

Holden and Ross Creek then met, Holden winning by a score of 6-2.

Tofield and Bardo took the diamond and in the first inning Tofield took a commanding lead. Bardo tightened up after this inning but were unable to regain the ground lost in the first inning.

Dodds got the bye, Tofield and Holden meeting in the fourth game of the day. This was a good game and created much interest. The crowd had assumed its largest proportions at this time and with the play very close spectators were given good value for their money. The score was 2-0 in favor of Tofield.

The final game was played between Tofield and Dodds. It was a good game but Tofield got an early lead of two runs and added another about the middle of the game. Dodds scored two runs and tried hard for the equalizer but could not get another runner across the home plate. Tofield added two more and the game ended with the score 5-2 for Tofield.

Tofield won first money; Dodds second and Holden third.

SOFTBALL

The softball diamond was a busy spot. Early in the day Silver Lake and Ryley girls played an exciting game. Both teams were snappy ball tossers and the game was well advanced before there was any indication as to who would be the winner. Silver Lake finally won out which gave them the right to meet Tofield.

Tofield and Silver Lake met in the afternoon, a good crowd of spectators being on hand to watch the game. Tofield put up gallant opposition but could not stem the tide of victory for the Silver Lake girls. The Silver Lake team deliver an excellent brand of softball and it would have been interesting to have seen them meet the Edmonton team which was prevented at the last moment from attending. Later the Kingman girls played an exhibition game with Silver Lake, the northerners winning the game.

HORSE RACES

Two horse races in heat were run and provided thrills for the crowd. The free for all was a ding dong affair, the horses making excellent time and running a close race. Results were:

Free For all —1, Wealake, 2, Phillips.

Pony Race —1, Wealake; 2 Trent; 3, Wealake.

BASKETBALL

The basketball was not as exciting as the committee had hoped for. Arrangements were made for two Edmonton teams, Kingman and Tofield (Lakeshore) to play. The two Edmonton teams were at the last minute unable to come. Kingman played Tofield, the local team winning easily.

FOOT RACES

The foot races created much interest and the youngsters especially appreciated the pocketful of silver Mr. Chapman handed out to winners.

The married women's race was a thriller. And don't let any one tell you these ladies can't run.

The dance at night was well attended, the hall being packed. It was a jolly, orderly crowd, and the fun lasted until dawn was breaking at 3 a.m.

Financially the day was a success. The surplus will not be large as the committee spent about thirty dollars putting up a fence, providing benches, etc. The secretary is at present on holidays and it was found impossible to have a detailed statement ready before he left. A detailed statement will be prepared and published in the course of a week or so.

The president and secretary would like to thank all committee workers and all others who in any way contributed to the success of the day.

LOCAL & PERSONAL

Mr. Hillerud, Provincial Apiarist, will attend a gathering at the F. McHeffey home on Monday, July 11, at 2 p.m. and will give a talk on the "Care and Handling of Bees." Everybody is welcome to attend this gathering.

Born: To Mr. and Mrs. Lionel Ferguson, Monday July 4, twin girls. Congratulations.

Miss Helen McCauley is holidaying at her home here.

Miss Betty McCarthy from the Royal Alex hospital spent July 1st at her home here.

Mr. F. Imler is on his holidays.

The local cubs accompanied by Mr. Gardam assisted by Scouts Leonard and Charlie Werton are attending a camp held at White Sand beach for a week.

Miss Lena Schmanse of Vegreville visited at the Joe Wiltzen home over July 1st. Miss Schmanse is Mrs. Wiltzen's sister.

Mr. and Mrs. McCulla and small daughter are visiting at the Jobb home.

Miss Audrey Jobb from Drumheller visited a few days at her home here. She is now attending summer school in Edmonton.

Norma Scott left with her grandparents, Mr. and Mrs. Bell of Edmonton, for North Dakota, by motor.

Mrs. R. Currie, Bobbie and Cathie are holidaying at Cold Lake for a month.

Miss M. Wood, Mrs. Majetki and Ardis Wood are motoring to Yellowstone Park.

Mr. A. Mochtmes of the bank staff is on his holidays.

Mr. and Mrs. Stan Burke and Mr. and Mrs. D. Warner are holidaying at Rocky Mountain House.

Miss Ryvnack of Edmonton is visiting with Jean Baptist.

Mr. and Mrs. Frank Wood and small daughter from Owls Eye are visiting with Mrs. Mabel Hannan for a few days.

Mrs. Ed Kallal, Melise, Mary and Ed are holidaying at Sylvan Lake.

Miss Beryl Edwards is spending a week at her home here.

Mrs. R. E. Emery and Mr. and Mrs. J. W. Chapman are holidaying in Ontario and will return at the end of the present month.

Mr. D. W. Jacobs returned from a trip to the coast on Wednesday evening.

See J. O. A. Letourneau regarding the new Alberta Hail Insurance Plan.

WEDDING

A quiet wedding took place on Wednesday, June 22 at the Pleasington Luthern Church Parsonage, when Signe Josephine, second daughter of Mr. and Mrs. G. Hagen of Forestburg became the bride of J. Palmer Boness, Kingman, second son of Mr. and Mrs. J. Boness, Bawlf, (formerly of Kingman).

The bride was daintily dressed in a white crepe afternoon frock with matching white accessories and a corsage of roses. Her sister, Miss Hazel Hagen was her bridesmaid and chose blue and white flowered sheer with white accessories. Mr Art Swaren of Camrose, the groom's brother-in-law supported the groom.

Following the ceremony a reception was held at the home of the bride. Only immediate relatives were present. The table was daintily trimmed in pink and white streamers and centred with a three-tiered wedding cake. During the luncheon a toast was proposed to the bride and groom by Mr George Hagen, brother of the bride wishing them many years of future wealth and happiness, which was responded to by the bride.

After a honeymoon to Grande Prairie the bride and groom will reside at the groom's farm at Kingman and will be at home to their friends after the middle of July.

Barney Marshall and wife, Geo. Home and wife and Blake Clutterham of Edmonton visited at the A.B.C. home over the July 1st holiday.

The local school closed June 30th and will re-open on Thursday, September 1st. Mr. Laurence A. Broughton has been engaged as principal, filling the vacancy caused by the resignation of Mr. Thomas.

It has been decided to close the library for book exchanges during the months of July and August. Commencing with the first Saturday in September the library will again be operated at the usual hours. This will not interfere with the use of the building as a rest room on Saturday afternoon for those caring to make use of same.

Miss Betty McCartney, who has attended school here this term, returned to her home at Cadogan on Sunday.

Mrs. Edith Thompson and daughters May and Dorine are visiting with Mrs. Bertha Seale. They are at South Cooking Lake for a week accompanied by Jessie Munro.

Mrs. Johnston Ferguson and Mrs. Ed Hicks left on Wednesday for a trip to Banff.

Mr. Mark Ferguson returned from Athabasca where he has been holidaying.

Mr. and Mrs. O. P. Thomas and family and Miss Victoria Hobson left for Lethbridge on Saturday where they will make their home.

Mr. and Mrs. Thompson and Betty from Leduc were Tofield visitors on Wednesday, attending the Ketchamoot picnic.

Miss Myrtle Bethel is visiting at her home here.

Mrs. W. Hayne from Innisfail is visiting with Mrs. Mabel Hannan. Tofielders will remember Mrs. Hayne as Marion Carter.

Newspapers get behind the times occasionally. But it does take a fast moving newspaper to keep up with the potato growing speed of Mr. Beirnes sr. Mr. Beirnes beat us to the draw, because we should have announced last week that he had new potatoes on June 20th.

Mr. Art Smith, who attended high school in Tofield the past term, returned to his home at Delbourne on Thursday evening.

Shorthorn Association Picnic Held To-Day At Mine Farm

The Annual Alberta Shorthorn Association picnic was held to-day (Thursday) at the farm of Mr. C. Gallinger. Mr. and Mrs. Gallinger were hosts to quite a number of guests at lunch served by the ladies of the local lodge of the Eastern Star.

After lunch a number of addresses were given by prominent agriculturalists of the province. Keen interest was taken in the judging classes which followed. Numerous groups of stock were shown and the public placed the animals by vote and then an expert would point out the superior qualities of each animal. Much interest was shown in the number of purebred animals both male and female, their superb condition being responsible for many expressions of admiration. Many inspected the large modern barns where the purebred stock is housed when not on pasture.

The house grounds which are quite beautiful attracted many visitors who were loud in their praises of the arrangement.

J. W. Darne was official announcer and at the close three hearty cheers were given for Mr. and Mrs. Gallinger, hosts of the afternoon.

Notice

TOWN OF TOFIELD

Owing to the absence of the Secretary, the town office will be closed from this date until the 1st day of August. Mayor Swift will attend to any business that might need immediate attention.

J. W. CHAPMAN,

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

The Canadian Seed Growers' Association met towards the end of June for what was in effect its 35th Annual Convention.

Thousands of farmers no doubt will have read this announcement in the press, and will think perhaps it is of little or no concern of theirs.

The fact is, however, that if thirty eight years ago the late Dr. James W. Robertson, the late Sir William C. Macdonald and Mr. George H. Clark, who until recently was Seed Commissioner of Canada, had not had a remarkable vision about seed selection, it is quite probable that Canadian wheat would not have the reputation it enjoys today on World's markets, that consequently much less wheat each year would have been exported, therefore much less produced, hence that the population of Western Canada would be considerably smaller than it is.

Members of the Canadian Seed Growers' Association, I suggest, deserve well of every farmer, and of all those who depend upon farmers for a living, in Western Canada, for it has made, through the efforts of its members, vitally important contributions towards the advancement of Canadian agriculture.

Following factors have tended to raise price: Rust increases in the United States—Continental port stocks very small— Norway purchases new crop wheat and rye—1938 wheat crop of China, Manchuria and Japan considerably smaller than 1932-36 average —Heavy rains retard Kansas harvest—Netherlands to create war food reserves.

Following factors have tended to lower price: Much needed rains occur over northern parts of Prairie Provinces—New Russian wheat of excellent quality— Expect Balkan wheat surplus of 80 million—Improvement in Italian prospects —Beneficial rains in Australia—Large rye supplies in prospect in U.S.—European rye prospects much better than 1937.

Let It Rain

England which has given the world the umbrella and the mackintosh, recently added a new weapon to the battle against rain. Discovered in the research laboratories of Imperial Chemical Industries, the new weapon is described by a writer in the current issue of the C-I-L- Oval as the first finishing agent to make all kinds of textiles durably water-repellent and stain-resistant. When Canadian mills started using the agent, says the writer, convincing demonstrations of the valuable qualities it imparts to materials were told at which cups of tea were tossed over flimsy summer dresses, soda syphoned and drinks spilled over shimmering evening gowns, while nearby gold-fish swam around in bowls of gaberdine. Textile and fashion experts who saw the shows predicted the wide spread introduction of water-repellent and stainproof garments.

Seven-Mile Run For Stockings

CARLYLE, Sask. July 4—Jimmie Maxie, Cree Indian of the White Bear Reserve, 36-year-old long distance runner ran seven and one-half miles from the reserve into Carlyle in 30 minutes to buy his wife a pair of stockings.

He said it would take longer to run back with his purchase as it was up hill.

Alberta Crop Report No. 4

Issued by Alberta Department of Agriculture, Edmonton

Crop conditions for the southern parts of the Province are very favourable according to the crop report issued by the Alberta Department of Agriculture for the period ending June 29th under the direction of Hon. D. B. Mullen, Minister of Agriculture. The northern portion of the Province has not so favourable an outlook since there has been a lack of moisture. Some heavy rains of an inch or more have covered large areas in the recognized drought area. These rains have ensured good growing conditions and supported the heavily stooled crops. Such conditions permit rapid recovery from any insect damage, and have minimized soil drifting,. since crops are now tall enough to effect shelter. All grain is seeded except for some reseeding in the north where cutworm damage is evident. The Peace River country and the territory north-east of Edmonton, are particularly dry.

Grasshoppers have completed hatching over a large area. In the most heavily infested areas, good rains have reduced the damage considerably although south-east of Edmonton more damage is reported, not altogether from the infestation, but partially because of lighter crops and less rainfall. It is to be noted that poison bait has given remarkable kills and effective control.

Forage crops in irrigated districts have made splendid growth and haying has started. Some prairie wool and rye for hay is being harvested. The country where most forage crops are grown has not completed seeding, through lack of rain.

Ranges and native pastures in the south have not been so productive for many years, and the parts that have not over-grazed are producing seed. The drier parts of the Province report pastures deteriorating which are normally green at this season. Stockmen report cattle fattening rapidly and calves making rapid growth.

The wheat acreage for the Province has been increased by approximately seven per cent, while barley remains normal. Fall rye has increased in crop districts 1 and II thirty to fifty per cent but the total acreage has not increased over twelve per cent, the principal increase being in the drought area. Coarse grain acreages in the northern part of the Province have decreased slightly because of drought and reluctance to seed before general rains.

Live stock are reported in excellent to good condition in almost all part of the Province. In the Peace River District and in the territory north-east of Edmonton, general rains are required to improve pastures. Improved food conditions and favourable price for fat cattle are creating some demand for replacement stock. The lamb crop is satisfactory and spring calves are in good condition.

Poultry are doing well according to information received.

DAIRY— The production of dairy products is reported strong despite the lower price level. At a number of points considerable increase in production has occurred due to favourable pasture conditions. For the three weeks ending June 18th, the estimated increase for butter-fat over the corresponding period of 1937 is 26.2 per cent. Estimated increases of butter-fat for particular areas are: North—23.4 per cent; Central—18.9 per cent; South 29.2 per cent.

Security Fight Being Won, F.D.R.

GETTYSBURG, Pa., July 4.— President Roosevelt, dedicating a monument to U.S. "peace eternal" where thousands fought and died 75 years ago said Sunday night "we are near to winning" another conflict "as fundamental as Lincoln's."

The struggle, he told a throng estimated at 150,000 is "fought not with glint of steel but with appeals to reason and justice on a thousand fronts—seeking to save for our common country opportunity and security for citizens of a free society."

Before him the crowd stretched out for miles across the rolling civil war battleground. The civilian army came to join 2000 surviving veterans of the blue and the gray, meeting here in a "last reunion" among the green hills of Gettysburg.

The address was the signal to touch off a light, designed to burn forever as a symbol of the friendship that followed the war between north and south. It will glow from a bronze urn atop a limestone monument, towering 40 feet above historic Oak Hill.

A Safe Cure

"How did you make your neighbor keep his hens in his own yard."

"Oh, it was easy. One night I hid a dozen eggs under a bush in my garden, and next day I let him see me gathering them."—Federal Employees Insurance Magazine.

The Wheat Situation

The well-informed United States department of agriculture calculates that wheat supplies in the world this year will be some 320 million bushels larger than last year. That figure does not include statistics of Russia and China. Engaged in a war, China is pretty well out of the wheat picture and so a crop there will not have much influence on world trends in wheat. The Russian crop is important however, particularly if its volume is large, as in that event exports will likely be undertaken.

Of course, an estimate of world production at the present time must be purely tentative, in the nature of things. Yields in the northern hemisphere can be estimated fairly accurately as harvesting is either in progress or close at hand. But it is half a year until another harvest in the southern hemisphere, which is a long way ahead for any estimate of a wheat crop.

A month ago conditions in the United States winter wheat area suggested a crop of 700 million bushels and in the spring wheat area of that country an outturn of 200 million, making a total crop of 1,020 million bushels. Since then it has been obvious that the crop was over-estimated and intervening damage has brought down the total. The early spring frosts did more damage than was thought possible and rust and insect pests have taken a substantial toll. It will be another week and a half before the new estimate is issued but it is possible that the outturn may be below 900 million bushels. Adding 200 million bushels for carryover still leaves the United States with 1,100 million bushels or 350 million bushels of surplus. That country undoubtedly will make a strenuous effort to export 150 million bushels at least during the 1938-39 crop year.

Western Canada's wheat prospects are only fair. Alberta conditions have been improved by a series of heavy showers which covered a large part of the wheat area over the last week-end. Saskatchewan is deficient in rainfall over very large areas and that province is the main wheat producing one in all Canada. Conditions in Manitoba are fairly good, but that province is not a large producer compared with Saskatchewan and Alberta.

There has been no startling change in conditions in Europe. Some authorities think the wheat outturn there will be slightly larger than last year and others think it will be somewhat less. France and Germany look like they will harvest quite large crops, and Italy, Spain and Portugal small crops. The chances are that Europe will import a larger quantity of wheat in 1938-39 than she did during the present crop year. The increase may not be large, say from 25 to 50 million bushels.

Within the next thirty days wheat price prospects for the ensuing crop year should be more clarified. By August 1st the probable outturn of the crops in the United States and Canada should be fairly well established and the policies of the governments of both countries towards wheat marketing more clearly defined. Then Europe's crop will be pretty well harvested and the probable outturn of the Russian wheat crop in a position to be more accurately gauged.—Wheat Pool Budget.

Girl Marries Aged Preacher She Worships

LOS ANGELES, July 4— Mary Alice Shaw, 26, Saturday was married to "my hero since I was a child" Gypsy Smith, 78, an evangelist preacher.

The ceremony was performed in the Hollywoodland home of the Romany gypsy's boyhood days in rural England.

Tears glistened in the eyes of Miss Shaw, a musician and theological student, as she said "I do." She had met the bridegroom in England when she was 12.

"I look upon him as I would a god," she had said before the marriage.

The Better Course

Etiquette Expert: "It is wrong for a man to walk between the woman he is escorting and shop windows."

Practical Husband: "It may be wrong. But, oh boy, it's smart!"

Boat Aground 363 Rescued

QUEBEC, July 4.—Three hundred and sixty-three passengers from the stranded liner Ascania were brought to Quebec Sunday and most of them re-embarked immediately to resume a voyage interrupted when the 14,000-ton Cunard-White Star vessel plowed aground off Bic island Saturday.

Only Edmonton passenger on board was Miss Isobel Secord, daughter of the late Richard L. Secord and Mrs. Secord, en route to London.

And while crew members told of great rents in the port bow of the 13-year-old ship and how her forward holds were filled with water, the only complaints passengers voiced were about the seasickness suffered while they were taken by a pilot tender from the grounded ship to Father Point.

Meanwhile two steam barges and 100 longshoremen were lightening the stricken vessel, carrying an assorted cargo including $1,500,00 in gold.

The gold, apparently in bullion, was said to have been destined for London from the Bank of Canada. All officials and crew members declined to discuss the shipment and it was not known if it remained on the Ascania.

The salvage steamer Lord Strathcona reached the side of the Ascania and stood by while the liner's crew kept pump operating in an effort to clear the flooded holds that left the bow nine feet deeper than the stern.

It was expected four days would be needed to transfer the vessel's cargo and permit her to be towed to Quebec.

The Ascania, which sailed from Montreal Friday before noon, sideswiped a rock ledge off the island just before dawn had broken across the St. Lawrence, 25 miles wide at the point of grounding.

Most passengers were in their bunks at 6:30 when the liner gave a "noticeable shudder."

Man Mistaken For Skunk Gets Bullet From Gun

An employee of the poultry farm at the Ponoka Mental Institute shot and killed a male patient at the institution early Sunday morning, it was reported here by Department of Health officials Monday.

While exact details were not available, a preliminary report received by department officials here indicated that the employee of the poultry farm shot the patient when he mistook him for a skunk.

Apparently skunks have been playing havoc with the poultry at the institution during the past few weeks and attendants of the poultry plant have been on the lookout for the marauders. Early Sunday noticing a movement in the bushes near the poultry plant and thinking it was a skunk the employee fired.

Upon investigating he discovered that what he had shot at had not been a skunk but a patient of the institution who escaped last week. The man died immediately, reports indicated.

Dr. E. A. Braithwaite provincial coroner, left Edmonton for Ponoka Monday morning to conduct a probe into the incident.

The name of the guard and the patient involved in the incident could not be obtained.

Officials at Ponoka stated that it had been impossible up to a late hour today to contact the relatives of the slain patient. They have not been heard from for fifteen years and efforts are now being made to locate them.

"There is no objection to giving the name but we would like to get in touch with the relatives first so that it would not shock them too much to first hear of it in the newspapers," stated a medical officer.

Departmental permission would also have to be obtained before the name of the employee of the poultry farm could be given, it was stated and at Edmonton officials took the stand that a full investigation is being made today after which an official statement of the accident will be issued. Until then it was deemed advisable to keep all details private.

AND THEY BUILT ROADS—

THE EARLY HISTORY of Britain, records how the Romans came in their ships, and after fierce battles with the native Britons, conquered territory —and built roads. Stress is laid upon the road building of the Romans, perhaps for three main reasons. It was something the Britons had not done themselves; it improved and opened up the country in a manner previously unknown; and the roads that were built were good ones. So good were some of these roads that some of them are still in use to-day. There are roads and roads. It is not claimed that the roads the Romans built in Britain would stand the strain of modern traffic. Traffic in the days of Julius Caesar and traffic to-day have little in common. What is emphasized in the early history of Britain is the importance and economic advantage of good roads to a country and its people.

If good roads were important in the development of Briton in those far off early days, they are immensely more so in the development of the Province of Alberta to-day. Within the last few days beneficient rains have fallen over the West and while the amount of good done to the crops have been incalcuable, the rain combined with the heavy traffic of modern motor vehicles have played havoc with the highways. On the Edmonton-Calgary highway there are certain sections which have become practically impassable for ordinary traffic. One report states that one thousand cars and motor vehicles had to be pulled through with tractors. Greater catastrophes than this could happen, and have happened; there is no desire to howl about this government or that government because rain benefited the fields and bogged the roads; and even if the delay to cars was inconvenient and vexacious, the rain really did more good than harm.

But taking a charitable view does not dismiss the subject. There are such things as good all weather hard surfaced roads, and here in Alberta we have the material to make them. At Fort McMurray there are millions of tons of tar sands suitable, so it is claimed, for road making. If it is not suitable, government engineers should say so. Here at Tofield there is a small patch on the C.N.R. property which has been there for quite a number of years, and we understand a larger area was laid in Edmonton about the same time. There is a railroad over which trains run to the source of supply and there are literally thousands of men eager to work and for whom there is no work to do. The set-up appears to be perfect. Yet while it is many years since the small patches of tar sands were laid in Tofield and in Edmonton, during which both federal and provincial governments have paid out millions and millions of dollars in relief, we still have, as far as modern motor traffic is concerned, obsolete highways. Highways that are choked with dust in dry weather and subject to bogging in wet weather. What is the answer? Is it financial or is it lack of co-operation between federal and provincial governments? Or is it a combination of both?

We doubt whether on a strictly dollar and cent basis Alberta can afford to have a large proportion of its highways asphalted. With the hundreds of miles of highways that Alberta has, and the relatively small population, the cost of asphalting any large proportion would make taxation even more burdensome than it is at present. But this does not tell the whole story. For quite a number of years both federal and provincial governments have been paying out in the form of relief, millions of dollars for which in exchange they received nothing. If they had, say, doubled their appropriation and put into effect a road works program, the country would have received something back for the money expended.

There is another angle to the financing of a public works program which many people overlook. A month or so ago, Mr. Henry Ford and President Roosevelt met at the White House. Their topic of conversation was a subject of conjecture for several days afterwards. It afterwards was reported, that among other things said and discussed, Mr. Ford read to the President, two articles, one by an author whose name for the moment we cannot recall and one by Macauley, an English author and economist. The article purported to show that there is a difference between private financing and national financing. When a private person spends a dollar it goes from him to another member of society and the spender has no further claim or interest in the dollar. When a government spends a dollar it is akin to taking a dollar out of one pocket and putting it in another. In theory at least, the people are the government, and any amount of money spent on public works is circulating money within the government's own orbit. Conversely, a debt by a government to its own people is a debt unto itself. Without attempting to argue the pros and cons of the above, it would appear that there is a field for a clever economist to work in. With sections of good highway urgently needed; with tar sands, a railroad and trains ready to use; with surplus labor clamoring for something to do, some bright boy in Edmonton or Ottawa should be able to hit on a financial method of creating harmony out of chaos. It is more important than figuring out a way to win an election.

Mrs. Swinton, Tofield Wins $30 Slogan Prize

Local Woman Is Successful in General Motors Contest

OSHAWA, Ont. June 30th (Special) Mrs. W. F. H. Swinton of Tofield, Alta., has been awarded Fourteenth Prize of $30 Cash in the judging of the Western region of the General Motors "Safety Slogan Contest," the results of which were announced today.

The full list of prizes for the Western area, including two new motor cars and a motor truck, and seventeen cash awards, is announced officially as follows:

Jelinski, 2073 Atkinson St., Regina, Sask; Third Prize, a new 1938 GMC ½ Ton Truck, Paul Bergstrom, Newton, B.C.; Fourth Prize, $300 Cash, Mrs. S. G. Andrews, Ste. 25 College Court, Regina, Sask; Fifth Prize $200 Cash, O. W. Dunsmore, 436 Wascana St., Regina, Sask; Sixth Prize, $100 Cash, R. T. Hall of the Staff of the Mental Hospital, Essondale, B.C.; Seventh Prize $75 Cash, F. J. Ferguson, 2119 Lorne St., Regina, Sask; Eighth Prize $60 Cash, Harold McCannan, 423 Hamilton St., Vancouver, B.C.; Ninth Prize, $55 Cash, Mrs. J. A. Inch, 1123 Second Ave. N.W. Moose Jaw, Sask; Tenth Prize, $50 Cash, W. M. Elliott, 217 Sixth Ave., Medicine Hat, Alta; Eleventh Prize $45 Cash, J.R.A. Pollard, 1945 Cameron St. Regina, Sask; Twelfth Prize $40 Cash, Cecile Detwiler, 720 Jervis St., Ste. 9, Vancouver, B.C.; Thirteenth Prize $35 Cash Mrs. Margaret Robinson, Box 321, Lacombe, Alta; Fourteenth Prize, $30 Cash, Mrs. W. F. H. Swinton, Tofield Alta; Fifteenth Prize $25 Cash, A. R. Willis, General Delivery, Duncan, B.C.; Sixteenth Prize $20 Cash, Thomas L. Clark, 401 Kensington Bldg., Winnipeg, Man; Seventeenth Prize, $17 Cash, Mrs. Mina L. Thomson, 82, 5th Ave. Yorkton, Sask; Eighteenth Prize $15 Cash, Mrs. A. Hetherington, Claresholm, Alta.; Nineteenth Prize $10 Cash Bert Prior, 574 Brandon Ave., Winnipeg, Man.; Twentieth Prize $5 Cash, C. Adams, 3224 Clinton St. New Westminster, B.C.

The Judges in the Western District were: Hon. W. M. Martin, Judge of the Appeal Court, Saskatchewan; Judge W. O. Smythe, Past President, Saskatchewan Motor League; Col. Dennis Ryan, Assistant Commissioner Royal Canadian Mounted Police; John R. Macdonald, Chairman, Highway Traffic Board, Province of Saskatchewan and C. M. Brewster, President, C. M. Brewster and Company, Insurance Adjusters.

The winners in the Ontario and Maritime sections of the contest were announced recently and the results in the remaining zone—Quebec Province —will be revealed shortly.

Searle Precipitation Report

The precipitation which has occurred from April 1st to June 27th, inclusive, combined with that which occurred last Autumn during the months of August, September and October, and weighted for wheat acreage, shows the moisture condition for the three Prairie Provinces as a unit to be 86 per cent of normal, as compared with 86 per cent last week and 90 per cent for the week before that.

The moisture condition in Alberta on June 27th was 90 per cent of normal as compared with 92 per cent last week and 97 per cent for the week before that.

For Saskatchewan, on June 27th, the condition was 84 per cent as compared with 86 per cent last week and 89 per cent for the week before that.

For Manitoba, on June 27th, the condition was 86 per cent as compared with 84 per cent for the previous week and 87 per cent for the week before that.

As this report is being compiled precipitation is still occurring over various parts of the Prairie Provinces some portions of northern Saskatchewan and Alberta being the recipients of much needed moisture.

George Broomhall Passes

Probably no name was as well known in the international grain trade as that of George J. S. Broomhall, who died in Liverpool, England, on Thursday of last week at the age of 82 years. For fifty years the late Mr. Broomhall has been supplying information and statistics on the grain trade until his name became a household word in the great wheat exporting and importing countries.

The United Kingdom is the center of the grain trade of the world and the buying and selling of wheat on an international scale has been big business in Britain for generations. Hence, it was natural that an institution for the supplying of accurate news of what is transpiring in grain trade circles should find ready favor in that country. The man was well equipped for the job, having a practical knowledge of grain trading in one of the large offices in London, eight years experience as a successful broker on the Liverpool Corn Exchange and a penchant for economics.

The late Mr. Broomhall had a broad vision and an understanding of the problems of wheat producers in exporting countries as well as those of wheat consumers in importing countries. Many times during the depression he deplored the disastrously low level of international wheat prices and commented from time to time on the economic folly of producing huge quantities of grain for which there was no available market. While his experience and education naturally led him into that group known as classical economists, Mr. Broomhall was by no means intolerant and his [illegible] would lead to the belief that he [illegible] the new developments [illegible] the free [illegible] supply and demand [illegible] the changes brought [illegible] narrow nationalism.

There will be general regret throughout the world at the passing of George Broomhall. He lived a long life and a useful one.—Wheat Pool Budget.

Hospital Interne Is Hero In Saving Life When Patient Insane

Cool thinking and quick action on the part of Brian "Barney" Ringwood, 24-year-old medical student, were credited with saving the life of a demented man who attempted to leap from the third storey balcony of an Edmonton hospital Sunday afternoon.

Grasping the heavily built man by one wrist as he leaped over the balustrade, 35 feet above the concrete steps which led into the front door of the institution, Ringwood held him swinging at arm's length for five full minutes until onlookers had constructed a makeshift safety net out of blankets.

Only when the safety net was in place and the men holding it braced to take the shock of the falling man did Ringwood let go his hold, dropping the man into the blanket, 35 feet below. Except for a slight bruise on one knee the crazed man was uninjured.

The incident occurred about 2.45 p.m. Sunday when one patient in a ward on the third floor of the hospital suddenly went berserk. Other patients in the ward called for help and Ringwood and hospital orderlies answered the call. When they arrived in the ward the crazed man had broken through the door leading onto the balcony and was poised to leap.

As he jumped Ringwood grabbed his wrist. The orderly, Fred Collins, and a 15-year-old patient Jack Scutten, held Ringwood's feet while Barney grimly held the wrist of the man in his right hand.

Executive Members Of Provisional Unity Council

CALGARY, July 6—Setting up of an executive of five members from the personnel of the Provisional Unity Council was announced today by John I. McFarland.

Executive members are: Francis P. Austin, farmer, Ranfurly; Paul A. Parnalls, farmer, Halkirk; S. A. Fox, Merchant, Innisfail; F. S. Grisdale, farmer, Olds; and George G. Ross, rancher, St. Kilda.

At the first meeting of the Provisional Council in Edmonton, July 23-24, the members favored the creating of a five person executive, and asked their chairman to make the necessary appointments.

Not Fast Enough!

"Isn't it wonderful? Man can now travel swiftly on land, air, and water."

"The only drawback is that his creditors can too."

Appreciation

Oh, I have never watched a drill
  Sow seeds upon a barren field
Whose fertile soil is hungry for
  The harvest it will some day yield.

And I have never garnered wheat
  That glistens like a golden sea
And seems to stretch forever on
  Into a bright eternity.

My hands have never made a sheaf;
  My ears have never heard the sound
A thresher makes, nor have I seen
  How wheat is ultimately ground.

The farm folk who get up at dawn
  And work until the sun has set
Who rests not till the harvest's in,
  Are people I have never met.

And yet I know, who have not walked
  The rolling acres which are fed
By sun and rain, that God's own gift
  To all humanity is bread

—Gates Hubbard in
The Northwestern Miller

The Secret Is Out

"I wonder why Scotsmen are so good at golf?"

"They realize that the fewer times they strike the ball the longer it will last."—Edinburgh Dispatch.

Fall Rye Doing Well

A bumper crop of fall rye, probably running 40 bushels per acre, will be harvested on the farm of H. Collinge, 18 miles southeast of Cooking Lake road barring damage such as hail or frost. The grain is headed out. Seeding was done last September 15 and the grain is now five feet in length.

How To Vote

Mrs. Wigglesworth — "Have you decided how you are going to vote?"

Mrs. Guppy—"I think I'll wear my new three-piece sheer beige rayon with jacket over a pink shadow-proof panel slip with those new black net stockings and that close-fitting little hat you saw me wear Sunday." —Pasadena Post.

Preparedness

Old Gentleman: "You're an honest lad, but it was a $10 bill I lost, not ten ones."

Small Boy: "I know, mister, it was a $10 bill I picked up. But last time I found one, the man didn't have any change."—Federal Employees Insurance Magazine.

How Does Life Insurance Benefit The Farmer's Wife and Children?

Answer.—If the farmer has Life Insurance, the wife and children know that they will not be in want in case of his death.

Question.—How would insurance help?

Answer.—It would provide money for living expenses, to pay debts, meet mortgage payments, hire help, avoid sale of the farm at a sacrifice.

Q.—Couldn't this be done through ordinary savings?

A.—Usually a farmer leaves only a small amount of cash. Nor can he be sure to live long enough to save an adequate sum. Only through Life Insurance can he, with a minimum of saving each year, have the necessary money available in case of death.

Q.—How do the children benefit?

A.—The father who has Life Insurance is sure that the children will have the home, care and education that he intended.

Q.—How does Life Insurance benefit the farmer himself?

—If he lives to a retiring age, his insurance will provide a cash income to care for him.

No Celebration

By Mary Zirkle in The Christian Science Monitor

WE HAD never attended a Fourth of July celebration. Indeed, outside of picnics held by the townspeople, who were so far away from us that they scarcely counted, the day went largely unobserved in our wheat country, except for an extra supply of lemonade for the harvest hands, and heaping platters of fried chicken on the dinner table.

Out of all the places we might have lived, we children thought rebelliously, we must be located in a section where the great holiday fell squarely in the midst of harvest. The day for planting potatoes, or cultivating row crops, was variable and subject to postponement, but once harvest had started, nothing [illegible] and darkness was allowed to interfere with it. We would as soon have tried to stand in the path of the mysterious Procession of the Equinoxes as to suggest any change in this order of affairs.

But we did mention it, with some bitterness, to our Aunt Judy, who had arrived on one of her rare visits soon before the holiday. She looked at us gravely and with, I think now, more sympathy than we realized at the time.

"It is a good thing," she agreed, "to observe that day in some way. I suppose you know what it is that we celebrate?"

Aunt Judy taught history, and we hoped to impress her. Some one of us spoke promptly.

"The Declaration of Independence was signed."

Aunt Judy was above quibbling. She did not belong to the class of historians who would rather [illegible] that arrive at a true interpretation of the temper of an era. But she did say, mildly:

"And what did that signify?"

"Why, it gave us liberty, didn't it?" we hazarded after some hesitation.

"It gave us a chance to achieve liberty, possibly," she said. "I've listened to a good many Fourth of July orations, and the speaker usually says just what you said, only in more words. As if liberty were something that could be conferred like a loving cup and set on a shelf as a permanent possession."

This was a little beyond us. Grown-up people were always making things difficult, whereas we wanted them to be simple and glorious. Like Patrick Henry, when he cried "Give me liberty, or give me death," with no [illegible] fine shades of meaning that must be deliberated and no tiresome questions as to what constituted liberty and no necessity for drawing a line between liberty for one and imposition upon another.

We wouldn't have expressed our feelings to Aunt Judy, but she smiled exactly as if she had read our thoughts.

"A great many grown people feel just as you do about it," she [illegible], embarrassing us somewhat because we were not used to having our unspoken words answered. "[illegible] want to believe the pleasant things that [illegible] say to them without going through the painful process of searching for the truth. That is one of the greatest dangers to liberty; that and too great a sense of security. The man who goes to sleep with the precious jewel beside him is quite likely to wake and find it gone."

"If you have to [illegible] for a thing all the time," said my sister, who felt rather strongly on the subject of [illegible], "I can't see that it's worth so much to you. Why not let it go?" This was heresy, but my sister [illegible] daring.

"I dare say we will eventually," Aunt Judy prophesied unexpectedly. "The struggle to define and hold freedom will appear too troublesome, and we will seem to see green fields of ease in some other direction . . . The thorns in those fields are cleverly concealed. Then the road back to liberty will be rough and rocky, but of course we'll come back, because there is something in mankind that cries out for it and will not be denied. But don't trouble your heads about it now when you're only eight and ten. If when you're older you still won't trouble—" she smiled a little sadly and shook her head. And we went to bed and dreamed of nothing but the splendid fireworks we were not likely to see. Still, because a child's memory is longer than his understanding, her words, or at least the spirit of them, have long outlived our love of Fourth of July celebrations.

EAST OR WEST

Sometimes better prices can be obtained for your grain by shipping it to Vancouver, sometimes by shipping it to Port Arthur. This farmers' Company has a terminal elevator at each of these Ports. That is one of the many reasons why it is able to give you the best possible service in handling your grain.

KINGMAN

Mr. Alpha Works is back again after spending a month with relatives in North Dakota.

Mr. and Mrs. MacIntosh are spending a two week's holiday at the coast.

The School picnic was held at the school house last Thursday afternoon.

Mr. and Mrs. Skalen and children left last Saturday for Westlock for a two week's holiday.

Mr. and Mrs. W. Grahn and children, Grace and Raymond, are at Peace River for a few days holiday.

Mrs. Lily Arntzen spent the week end at her parent's home here, Mr. Ira Erickson's.

Mr. Marvel Asp came home on Tuesday after attending school in Calgary for the past year.

See J. O. A. Letourneau regarding the new Alberta Hail Insurance Plan.

AMISK CREEK

We have now had the most beneficial rain that we have had for a long time and the crops are showing improvement already. The roads are very muddy in places but the sun will soon dry them up.

Mr. [illegible] Erickson is a patient in a city hospital but is getting along very well and expects to be home soon.

The Youth Training Girl's Club party, to be held on Wednesday last, is postponed until Friday evening, July 8th.

The Amisk Creek and Ingram schools held a combined picnic at the Ingram school ground last Thursday.

Mr. A. Erickson left to visit his sister and other relatives and friends at Grand Forks and many other places in Minnesota and Dakota. He accompanied J. Jacobson and family who motored to the States for a month's vacation.

Gladys Olson, who attended the Camrose Lutheran College the past winter arrived home last Thursday.

Pearl Patterson, who has been home here for a three week's vacation, left last Thursday to return to her duties at the Misericordia hospital.

Our deepest sympathy is extended to Mr. and Mrs. C. Erickson and Donald in their sad bereavement of the recent loss of their baby boy.

Mr. and Mrs. E. A. Moen and daughter Myrtle and Mrs. P. O. Flaaten motored to the city Tuesday of last week, where Myrtle wrote a music exam. They returned the same evening.

C. Erickson visited with his wife at the Royal Alex hospital on Friday and Sunday.

Several from here attended the sports at Tofield on July 1st.

Mrs. C. Kjereng from Ryley is assisting with the work at the Erickson home.

Mr. and Mrs. Moen and family, Mr. R. O. Berg, Alice, Lily and Lloyd, Mr. and Mrs. J. Berald and daughter Gladys, Mrs. P. O. Flaaten and little Iona Kjelland, Mr. and Mrs. Valen and son all spent Sunday, June 26th at Elk Island Park.

Mrs. P. O. Flaaten called at the R. Olson home Wednesday of last week.

See J. O. A. Letourneau regarding the new Alberta Hail Insurance Plan.

Real Sport

During the Ryley-Silver Lake softball game a Silver Lake runner ran hed first base but in reaching her the 1st baseman dropped the ball. The base umpire did not see the ball dropped and called the runner out. The first baseman generously said "She's not out, I dropped the ball."

"Dead End" Coming To Variety On Tuesday

Dead End, a picture of absorbing interest will be shown at the Variety next Tuesday. It is a story of people—everyday people. There is Drina the ardent, the brave, wondering whether to go on battling for her brother's future or to give in. There is Dave, Ray, Baby Face, the killer, Francis and Tommy. All have their heart throbbing problems. Problems that you will want to help decide. It is a story of the seething, turbulent life in the world's most exciting city. Starring Sylvia Sidney and Joel McCrea.

Social Credit Picnic Draws Good Crowd

At a picnic sponsored by the Social Credit groups of zone 7, near Tofield on Wednesday, Hon. Solon Low, provincial treasurer and Dr. McPherson, M.P. member of the Social credit board, gave addresses. There were about three hundred people present.

Dr. McPherson spoke chiefly of taxation, saying that the government was elected on a platform of lower taxes and reduced cost of living. But under the present system the government had to have money and raised the mill rate for social service one mill. The government had taken action in regard to health. The constituency of Vegreville had the highest percentage of T. B. patients and the government was paying particular attention to this malady. It had been proven that if the disease was caught in its early stages the patient could be cured. The government has made arrangements to investigate early cases and arrange for proper treatment. Infantile paralysis is also a scourge. The government has taken full charge of this and will not only give immediate treatment but will take care of and train for useful occupations, patients left with a permanent affliction from this disease. They have increased taxation because they did not want to borrow money. He had yet to hear of anyone borrowing themselves rich. If they did not borrow they had to tax. They have put on a mineral tax from which they expect to derive thirty-five thousand dollars; also income tax increases in the higher brackets. From the liquor control act they expect to get one hundred thousand dollars. From the wild lands tax, taken off and put on again, they expect to get forty-five thousand dollars. From the pipe line tax one hundred thousand dollars. With regard to the Security Tax Act, they thought where the money was, was a good place to collect taxes. As soon as you place a tax on people who have the money, the hand of Ottawa says, no, you can't do that. There is not one of these taxes that can be passed on to the public. The production tax at present has two purposes. Is it legally possible? Do the people want it? If the production tax goes into effect there will be no more arrears of taxes.

Hon. Solon Low gave a lengthy address chiefly supporting Social Credit as an economic feasibility. He said the present government had to withstand the most vicious propaganda in the history of Canadian politics. He claimed on the authority of a newspaper clipping that two eastern financiers, one a liberal, the other a conservative, decided to put money into Alberta. Sounded to him like the unity league. At a dinner in the east some financial barons promised to contribute twenty thousand dollars a month to finance the peoples league. This is where the propaganda comes from. He believed in constructive things. He is trying to build a new house before pulling down the old one. They do not say to the other provinces, come in and help us, they only say, leave us alone. The people who criticize the most, generally know the least. If people erect a wall of prejudice they can't see straight. Let us reason the thing out. Let us try and find out what great men think of social credit. The speaker quoted Prof. Irvine of Australia, who after careful thought, said "that the principles put forward by Major Douglas are sound and that they provide the only practical way to avoid the fate that awaits western civilization."

The greatest economic trouble today can be summed up in the words, lack of money. In the United States in 1929 eight billion out of twenty-three billion dollars was taken out of circulation. Here in Canada, the Bank of Canada has the sole right to create money. The problem then, is how to get the money out to the people. At present the only way to get the money out to the people is by debt. Every dollar has to be borrowed. And when money is borrowed on security only a portion of the value of the security is loaned. This makes for a shortage of purchasing power. Never can there be prosperity for the people unless they take this tremendous power from the banks. This is what the government is out to do. The banks to-day have assumed control of the people's production. They control the people's lives and this power has got to be taken away from them. The problem of getting money into circulation without debt is the problem they are about to solve.

The prosperity of a province is at present rated by its bank clearings and he was pleased to say that during the recent business recession in the United States and some parts of Canada, the province of Alberta had suffered least of all. Having failed in some ways they intended to keep the bank clearings up. Their determination was to put credit houses where the banks pull out. Then attempt to increase purchasing power. All the details regarding this were not at present available but would be announced later.

He appealed for loyalty and cohesion of social credit groups and thanked the people for their courteous reception.

Mr. T. R. Murray presided over the meeting and introduced the speakers.

In addition to speechmaking, there was plenty of fun for all. Softball games, baseball games and the old milk bottle game. A booth served ice cream, soft drinks, etc. In the evening a dance was held in the community hall.

LOCAL & PERSONAL

The Misses Margaret and Helen McCauley are holidaying at Banff

Mrs. Malcolm and Muriel and Wes Taylor left on Wednesday on a motor trip to the Coast.

Miss Jean Napery and Miss Lucy Wilson visited with Mrs. M. C. Hammond and Mrs. Bert Splisted.

Mrs. Giffen and Kareen are holidaying in Washington, D.C.

Mr. and Mrs. Bob Whyte, Mrs. J. Whyte and Margaret and girl friend returned on Saturday from a motor trip to Spokane.

Blake Clutterham and Miss Challeboeu of Edmonton were guests at the Clutterham home here.

Mr. and Mrs. Burke and Mr. and Mrs. D. Warner returned home after holidaying at Rocky Mountain House.

Mr. R. C. Phillips returned from the hospital.

Miss Helen Cookson spent the week end at her home here.

Miss Mayme Craig from Edmonton is spending a few days visiting her friend Mattie Bowick.

Mr. Jack Bowick spent the week end at Barrhead.

Visitors to Edmonton on Monday were Mrs. Malcolm and Muriel, Mrs. Hammond, Loret Ross, Joyce Ingus and Muriel Rogers.

Mr. and Mrs. Wm. McIntyre and son are visiting at the Booth home.

Miss Edythe Barden returned to her duties at the General hospital after a three weeks holiday.

Miss Myrth Bethel is holidaying at High River.

Mrs. Johnston Ferguson and Mrs. Ed Hicks are spending a few weeks at Banff.

Miss Beryl Edwards returned to Ryley after spending a week at her home here.

Mr. Everett and Ross spent the week end at Athabasca.

Rev. and Mrs. Allen left on Wednesday of this week for their holidays. Services at the United church will be resumed on the first Sunday in August.

Word has been received that Corrine Hackedahl has passed grade four Toronto Conservatory of Music exams for the piano. Corrine is a pupil of Mrs. Firth.

The Tofield Firemen are holding (by request) another of their popular dances. The event will be held at A. C. Dodds' barn, a cafeteria lunch will be served, the music will be furnished by the popular Swing Sisters of Edmonton.

Born: To Mr. and Mrs. J. Black, nee Rita Burnett, of Montreal, on Sunday, July 10th, a son. Congratulations.

Prominent C.C.F. Executive To Speak At Holden Sat.

Mr. David Lewis, L.L.D. of Toronto, National C.C.F. secretary will speak at Holden on Saturday at 2:30 p.m. Mr. Lewis is a Rhodes scholar from McGill University and is considered one of the most brilliant young speakers in Canada today. It is rarely that Albertans living in rural districts have an opportunity to hear speakers such as Mr. Lewis and a hearty invitation is extended to all Tofielders who are interested to go and hear him. His subject will be: The C.C.F. Solution for Canada's problem.

Minister Visits Tofield After 35 Years Absence

Vividly remembering trails almost of endless distance, the sloughs and the bluffs and above all the pioneer comradeship of 35 years ago, Dr. Rothney of Bishops College, Lennoxville, Que., visited with Mr. and Mrs. J. W. Cookson this week. Thirty-five years ago Dr. Rothney was a student minister, making his headquarters here and boarding with Mr. and Mrs. Cookson. His territory was large, extending as far as Vegreville and a long way east and west of town.

On Monday, accompanied by the Cooksons he attended the Old Timers picnic at Lakeview and met many of his former parishioners. Calling at the Mercury office, Dr. Rothney said he had not been thrilled so much for years. It was a delightful experience, he said, to come back after such a lapse of time and renew former acquaintances.

He was amazed at the progress of this section of Alberta and delighted to find excellent farms where thirty-five years ago there was nothing but virgin prairie and bush. On Tuesday he visited Vegreville and later in the week left for the Pacific Coast. He will also continue his journey on to California. Dr. Rothney is accompanied by Mrs. Rothney and family and is traveling by auto.

Hail Does Some Damage

On Monday about 6:00 p.m. the Ketchamoot district suffered hail loss of varying degrees. The hail was soft but an exceptionally high wind drove it into the fields smashing down considerable grain. It was not one of those devastating storms that clean out a whole countryside but considerable damage was done. Losses ranged from 80 per cent down.

Tofield Wins Ball Tourney At Round Hill

The Tofield senior baseball team, piloted by Mr. T. Schultz, played and won three games at the Roundhill sports on Tuesday and Wednesday of this week.

The first game was between Tofield and Dinant, the score being 6-3. Battery for Tofield was Swinton and McLenan.

The second game between Tofield and Bardo resulted in the close score of 9-8 for Tofield. The Tofield battery for this game was Swinton and H. Schultz.

The third game between Tofield and Round Hill resulted in a score of 6-3 for Tofield. The Tofield battery for this game was Lindberg and McLenan.

All the games were good exhibitions of the national summer pastime. And the last one especially was a thriller. At one time in this game all bases were loaded with none out. Lindberg stepped into high gear and fanned three batters.

A Superb Color Spectacle Coming Next Tuesday

On Tuesday of next week at the Variety will be shown "Vogues of 1938." This picture is one of the greatest color spectacles yet produced. Photographed in technicolor it is a musical extravaganza of the most modern type. It is a Walter Wanger production and includes those Walter Wanger models "the most photographed girls in the world." There is a brilliant cast headed by Helen Vinson and Mischa Auer.

Sir Edward Beatty On Boy Scouts' Contribution to World Neighborliness

"It is particularly pleasing to note that every year the Boy Scout Movement becomes increasingly effective as an instrument for producing better understanding between nations. It is unnecessary for a Canadian to point out to an American audience the importance of the fact that our nations have set an example to the world in good-neighborship and goodwill. No other nations can be as fully aware of the benefits which come from a thorough understanding of each other, and it is my very sincere hope that the Boy Scout Movement in the United States and Canada will be blessed with good fortune in their efforts to bring the youth of many countries to understand each other, and substitute the goodwill which always arises from such understandings for the useless rivalries of nations," Sir Edward Beatty in a message to the Annual Meeting of the Boy Scouts of America.

Standard QUALITY AT NEW LOW PRICES

FROM the day it was introduced, the Firestone Standard Tire has more than lived up to its name by setting a new high standard of tire value. Thousands of car owners in all parts of Canada enthusiastically endorse it as the greatest tire Firestone ever [illegible] to sell at low prices.

Firestone Standard Tires give you everything you need—long mileage, extra safety, carefree, dependable service and economy. See the nearest Firestone Dealer today. Take advantage of Firestone's new low prices and equip your car NOW.

Feeding and Care Of The Market Pig

(Experimental Farms Note)

In order to bring the pig to market weight in the shortest possible time with a minimum feed cost, it must receive a balanced ration and be kept in a thrifty growing condition from birth to finish. The Dominion Experimental Farm, Indian Head, states W. W. Crow, offers the following suggestions on the care and feeding of the market pig.

Young pigs will begin to eat when two or three weeks of age and it is a good practice to provide a small trough in a "Creep" away from the sow in which equal parts of finely ground, sifted oats and oat middlings are supplied in the dry state. Sweet skim-milk should be provided in a second trough, care being taken to keep the milk sweet and troughs clean. If the litter has not access to the soil fresh sods, provided daily will help to guard against anaemia and other mineral deficiency troubles. It is advisable to castrate male pigs before weaning as the operation is then easily performed and has little effect on the pigs.

Litters should generally be weaned at six to eight weeks of age. If the creep method of supplementary feeding is used previous to this time and an ample supply of skim-milk or buttermilk is available to balance the grain ration, the young pigs will not receive any setback. All changes of feed must be made gradually to avoid digestive troubles. A suitable meal mixture for weaning pigs consists of 200 pounds oat chop and 100 pounds barley chop. Hand-feed three or four times daily at first, supplying only as much meal as the pigs will clean up with 2 1-2 to 3 pounds of skim milk per pound of grain. In the absence of skim-milk or buttermilk ten per cent of tankage should be included in the grain mixture. All grains should be finely ground. Soaking the meal mixture between feedings makes it more palatable and improves digestion. One per cent of common salt added to the ration will increase daily gains and decrease production costs.

A cheap home made mineral mixture containing 76 pounds of slack coal, 20 pounds salt, 3 pounds air slacked lime or ground limestone and 1 pound of sulphur, self-fed in boxes to pigs of all ages will promote rapid and economical gains.

If the presence of roundworms is suspected, treat the pigs for these soon after weaning. A small half-teaspoonful per pig of Oil of Chenopodium in a little milk after starving 12 hours, followed by a second treatment in 10 days has given good results.

The growing pig thrives best in clean, dry comfortable quarters with shelter from wind and sun. Allow moderate exercise which may be provided by giving access to a small yard or pasture for short daily periods when weather permits. Less exercise is necessary as growing and finishing periods progress. Some green feed in the form of pasture, cut green feed or cured legume hay is beneficial. Supply clean drinking water to pigs of all ages.

As the feeding period advances the proportion of barley in the ration should be gradually increased so that at 80 pounds live weight the pigs will be receiving equal parts of oat and barley chop, by weight with 1 1-2 to 2 pounds of skim-milk per pound of meal fed or eight per cent of tankage. From 150 pounds live weight until the market weight of 200 to 215 pounds is reached a finishing ration one part of oat chop and two parts of barley chop by weight with 1-2 to 1 pound of skim-milk or 5 per cent of tankage will give good results.

Trio Of Aged Farmer Brothers All Go Crazy

Three brothers, living alone at Jarrow, keeping house and working their farm, have been tried at Viking found insane and dangerous to be at large.

Taken from the house, that has been their home for upwards of 25 years, the three men, now around 70 years of age were committed to the Ponoka Mental Hospital, after investigation by A. J. Millar, police magistrate of Sedgewick. Information as to their actions was given to police by the reeve of the municipality of Lakeview and they were examined by Mr. C. C. Haworth.

The three men came to Jarrow with their mother about a quarter of a century ago, and took up homesteads seven miles northwest of town. When the mother died six years ago at the age of 92 years one of the sons took over the housekeeping duties while the other two looked after the several quarters of land as well as the stock.

An older brother, coming to visit them from Nebraska recently, found all three acting strangely. Following an examination it was decided that they were incapable of looking after themselves and their committal to the mental hospital followed.

Canadian And United States Wheat Prices

A Nebraska farmer asked a question last April that nearly stumped congress, the department of agriculture and farm belt newspapers.

He got an answer from Secretary of Agriculture Henry A. Wallace—four closely typewritten pages replete with statistics—but may have to forego harvesting to figure it out.

The question, which he originally asked the editor of the Omaha World-Herald was:

"Mister, can you tell me why May wheat No. 2 hard is quoted on the Chicago market at 84½ cents while No. 1 northern spring at Winnipeg is $1.28¾?"

The editor couldn't. He offered to advise for an answer. The farmer suggested that while he was about it the editor might also answer why foreign buyers took more Canadian than American wheat despite the 41 cents a bushel price difference.

The editor did some research. He found that in four of the past six years the Chicago quotations were higher than Winnipeg. The editor of the Lincoln (Neb.) Star came to his aid with the suggestion that drouths in the United States and Canada were responsible.

The farmer declared that the Star's explanation was "nonsense." Drouths have occurred all over the world and still "United States wheat is the cheapest in the world," he said.

He suggested that Secretary Wallace has "a pretty powerful hand on the Chicago board of trade," but that he didn't want to even suggest "there is an effort to frighten us farmers into co-operating with the control program."

The whole thing began to get on the nerves of the World-Herald editor. He said that he couldn't bring himself to suspect that "Wallace is deliberately a bear in the wheat market."

Finally, he passed the question on to Sen. Edward R. Burke, D., Nebraska, who asked several of his colleagues, but they didn't know. "The heck with it," Burke finally decided. "Let Wallace answer it."

After his long explanation, Wallace summarized his answer this way:

"The reason that the price of good milling wheat in Canada this year is higher than usual relative to other wheat is because there is a shortage of good milling wheat in that country."

Wallace didn't know why Canada sold more wheat abroad, but insisted that American wheat brought just as much on the world market as anybody else's.

The above rather facetious story is from the United Press, the United States News Agency, and is possibly calculated to make ridiculous the efforts of Secretary of Agriculture, Henry Wallace, to aid the wheat farmers of that country. The simple answer to the question as to why Canadian wheat prices are higher than those of the United States last April is that Western Canada produced only 164 million bushels of wheat last year against a long-term annual average of about 400 million bushels. As Canada is the only large exporter of strong spring wheat, the world's supply of that commodity was reduced and there was keen bidding for the available surplus.
—Wheat Pool Budget.

Urge Federal Aid For Alberta Roads

Increased federal expenditures on Alberta highways are being urged upon Ottawa by provincial government authorities.

While it is believed that the dominion appropriations will be increased, nothing definite has been announced yet.

Hon. W. A. Fallow, Minister of Public Works, is now in the east and is reported to be hopeful of obtaining substantial dominion aid for first course hard surfacing of highways leading to the national parks.

When this year's program is completed it appears that there will be a hard-surfaced highway all the way from the international boundary at Waterton park north by way of Macleod and Calgary to Banff national park.

Provincial government authorities are hopeful of obtaining some federal aid for hard-surfacing of possibly 50 miles of the Jasper highway west of Edmonton.

While federal plans have not been disclosed in detail, it appears that the dominion has decided to spend $500000 this year in completing the Jasper-Banff scenic highway. About 25 miles remain to be completed.

Need of completing work as rapidly as possible this season is being urged by the Alberta Motor Association.

Recently officials of the Alberta public works department announced that gravelling of the new Red Deer-Crossfield highway will be completed this season.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

We all note with sadness that Mr. George Broomhall, admittedly the greatest expert in the world on international grain, is dead.

Mr. Broomhall was connected with the great wheat industry in England even before the first shipment of wheat left Western Canada 61 years ago.

He was ever a most sympathetic friend to producers of all countries, and he was never tired of drawing attention to the difficulties farmers had to contend with.

He ranks, in my humble opinion, in his service to agriculture, with the greatest plant breeders and agricultural scientists.

Perhaps no one word has been generally so grotesquely and inanely misapplied as the word "service" but judged by the very highest and most ethical standards Mr. Broomhall rendered to society a decided and most valuable service, for his material reward in life was but a microscopic fraction of the value of the contribution he made to the welfare of the people of all nations.

Mr. Broomhall's chief claim to fame, I think, is that the information which he accumulated so painstakingly from the far ends of the earth, and which he made available so freely to all, assisted materially in the efficient distribution of foodstuffs from areas of abundance, where they could be spared, to areas where there was a deficiency and so where hungry people needed food.

Following factors have tended to raise price: U.S. threshing returns show greater damage from frosts and rust than expected—Italy agrees to purchase Hungarian wheat—Balkan corn crop needs rain. Crop deteriorating in some sections—Hungary sanctions Roumanian corn imports—Poor outlook for ground nuts in Tanganyika—Canadian apple crop below normal.

Following factors have tended to lower price: Italian wheat yields exceed expectations—Wheat yields in Greece and Portugal exceeding expectations—India expected to export wheat freely—European crop prospects better than expected—Argentine potato crop shows sharp increase—Large Italian fruit crop—Generous rains in Western Canada improve wheat prospects.

History Made When Third Set Of Twins Are Born

VANCOUVER, July 11 —Vancouver physicians described as a "record in Canadian medical history" the birth of a third consecutive set of twins to Mrs. Jack Dye, 36-year-old wife of an unemployed chauffeur.

The latest additions to the Dye family a girl and a boy—were born here Saturday. There were already five other children—two sets of twins and another child born singly.

Doctors said the latest twins—like their brothers and sisters, Marion, 8, Dorothy and Donald 4, and Joan and John 18 months—were "normal and doing fine."

"I think I've read somewhere about three consecutive sets of twins," Dr. C. W. Whittaker, attending physician said, "but I've certainly never experienced it before."

Professor J. E. Hill-Tout of Vancouver, an expert on the Mendelian theory of heredity, said he had never heard of such an occurrence before.

TESTED RECIPES

Strawberry Honey Cake

- 2 cups cake flour
- 2 1-2 teaspoons baking powder
- 1-2 teaspoon salt
- 1-2 cup butter
- 3-4 cup sugar
- 2 eggs, separated
- 1-4 teaspoon almond extract
- 3-4 cup honey
- 2-3 cup milk

Frosting

- 4 tablespoons butter
- 2 3-4 cup confectioners' sugar
- 6 to 8 ripe strawberries crushed

Sift flour, measure and resift 3 times with baking powder and salt. Cream butter until soft; then gradually beat in sugar. Beat in egg yolks and almond extract. Beat egg whites until stiff; then gradually beat in honey. Add dry ingredients and milk to butter mixture alternately beginning and ending with flour and beating until smooth after each addition. Thoroughly fold in the egg whites and pour into 2 buttered 8-inch cake tins. Bake in a moderate oven 350 degrees for 30 minutes. Remove from tins and allow to cool on cake racks.

Cream butter and gradually beat in sugar alternately with berries until of spreading consistency. Frost cake and decorate with cut strawberries. Yield: 12 servings.

Cheese Custard in Tomato Cups

- 1-4 pound sharp cheese
- 1-2 cup milk
- 2 eggs
- Salt and pepper to taste
- 4 medium tomatoes
- 3 tablespoons butter
- 1 onion sliced
- 1 bay leaf

Grate cheese add a little milk and blend to a smooth paste. Beat eggs add rest of milk cheese and seasonings and beat until well mixed. Cut cores from tomatoes and scoop out all soft pulp. Set in casserole and pour cheese mixture into tomato cups. Melt butter in saucepan, add tomato pulp, sliced onion and bay leaf, and simmer until slightly reduced. Pour around tomato cups and bake in a slow oven (325 degrees F) for one hour or until custard is set. Serve hot. Yield: 4 servings.

English Lemon Cheese

- 6 eggs, well beaten
- 2 cups sugar
- 1-2 cup Sunkist lemon juice
- 1-4 cup butter

Cook over hot water until thick. Pour into sterilized glasses. Use for filling for tarts or cakes or as a spread for toast and hot biscuits. Also known as lemon curd or lemon butter. (Makes 2-3 glasses.)

Judge Frees Man But Cop Reprimanded

CALGARY, July 12.— David Walker, wounded in the arm by a police bullet early in June, when it was alleged he had attempted to flee from a stolen automobile, was acquitted of car theft by Magistrate D. C. Sinclair here today. A similar charge against a companion, William Johnstone, was also dismissed.

Magistrate Sinclair declared Constable J. H. Woodworth was not justified in firing at Walker.

"It is not my place to reprimand Woodworth, but I trust that will be done by his superior officer" said the magistrate.

REGULAR MEETING OF BEAVER LAKE M.D. NO. 488

Held July 9th 1938

The meeting was called to order at 11:00 A.M. with all members of council present.

Recommendations for raising O. A. Pensions of Mrs. Julia Ogrodnick and Mr. Anton Prehrowski, were made, and approval for Pension for Mr. John Lukian of Haight was given. An application from Mrs. Amanda Coates of Holden for Mothers Allowance was given approval.

The Hospitals Committee reported progress in securing completion of Hospitals Agreement.

The Village of Holden was requested to remove garbage from road allowance adjacent to nuisance grounds.

Secretary was instructed to obtain information as to regulations covering sand and gravel pits situated on Crown Lands.

Sam Hamilton was granted $15.00 relief monthly and Mrs. A. Losiuk $8.00.

Date of holding Court of Revision on annual assessment was fixed as at 11 A.M. Saturday, August 13, 1938.

Council decided to hold a tax sale on Nov. 1, 1938 of all lands within the Municipal District liable to sale under the provisions of the Tax Recovery Act.

Secretary was instructed to enquire when bridges promised for Division 1, will be constructed.

Next meeting will be held August 13, 1938 at 10 A.M.

TWO BROTHERS MEET AFTER MANY YEARS

PROVOST, July 13—Two long-separated brothers met in Metiskow recently, to learn that they have lived near one another for many years, each without knowledge of the other's whereabouts.

A. Williams, manager of the creamery here, met Jack Williams, farmer from Czar district. They chatted some time and discovered they were brothers, had lived only a few miles from one another for years. They had not met since A. Williams was four years old.

DOG KILLS HENS CITY PAYS BILLS

VANCOUVER, July 13 — City council paid George C. Smith $16.50 Tuesday because a neighbor's dog killed 13 of his chickens.

The city paid because it collects a dog tax.

Under the B.C. Sheep Protection act, municipalities collecting dog taxes are responsible for damage caused by animals if owners cannot pay. Owner of the dog which killed Smith's chickens is on unemployment relief.

SAYS BAD WATER CAUSE OF GOITRE

SASKATOON, July 13—Use of contaminated water probably is one of the chief causes of goitre in Saskatoon, Dr. Griffith Binning, public school medical officer, reported to the school board Tuesday. He said a large-scale survey indicated most cases of the disease were found among children of families who purchase their water by the barrel.

An examination made in 1934 found 12.1 per cent of the children attending schools had goitre. The examination this year showed a reduction of 6.7 per cent.

AIRWAYS VICTIM OF COSTLY "JOKE"

About $250 in flying expenses and an inestimable amount of mental anguish were caused by hoax telegrams sent to Canadian Airways Ltd. by a "practical joker" July 7, Superintendent W. R. "Wop" May disclosed Wednesday. July 7, C.A.L. offices here received a wire from Elk Point about 120 miles northeast of the city, signed with the name of "Punch" Dickins, superintendent of Canadian Airways at Winnipeg, a former Edmontonian, saying that he was down with six passengers there and asking the office to "send a mechanic and three feet of dural." (Dural is used for mending floats).

C.A.L. offices replied that no aeroplane was available immediately, and they would send a mechanic up by bus or train if that was satisfactory. No reply was received to that wire and another was sent after James Warren, independent northern flier, volunteered to make the trip in his own ship.

Warren, with Mechanic Frank Kelly, flew north after another wire was received telling them to "come immediately." They searched the area for two days with never a sign of an aeroplane to reward them. Meantime, C.A.L. officials had wired Winnipeg and word was received that Dickins had not left that city.

R.C.M.P. tracing the sender of the telegram said a farmer admitted he sent the wires. No reason was given by him, they said, and no charge had been laid to date

EVEN COURTESY HAS ITS LIMITS

Courtesy to prisoners is a feature of management of Edmonton's police headquarters.

That's why attendants were baffled Wednesday when they were asked by a voice on an office telephone to call a prisoner to the instrument.

Finally, it was decided the service was not included in the jail's array of courtesies to inmates.

A constable offered to take a message. There wasn't any. It was to have been "just a friendly conversation."

SKUNKS LEADING IN GAS VS. GAS

HAMILTON, Ont., July 13.—Two parent skunks and five little skunklets fought back, odor for odor, when the Society for Prevention of Cruelty to Animals tried Tuesday to drive them from Mrs. H. R. Waring's garage with carbon monoxide.

Inspector Robert Inglis backed the S.P.A.C. ambulance up to the garage and turned a hose from the exhaust pipe on the spot.

Satisfied finally that the group had died mercifully, Inglis drew out the hose and waited. From the garage came the unmistakable odor of skunk and a slight rustling.

The attack will be resumed.

DICKENS LETTERS EXPRESS LOW VIEW OF PARLIAMENT

LONDON, July 11— More than 1000 letters by Charles Dickens, including an outburst against the morning Chronicle for which he once worked were placed on sale Monday at Sotheby's.

Among the collection taken from the famous library of the Comte de Suzannet of Lausanne is a series of 173 letters written by the author to Thomas Beard, parliamentary editor of the Chronicle when Dickens was a press gallery reporter.

In one he told of his experiences in covering an election campaign in horse-drawn vehicles. He wrote:

"I wish to God that you could have seen me tooling in and out of the banners, drums, Conservative emblems, horsemen and go-carts with which every little green was filled . . . Every time the horse heard a drum he bounded into the hedge on the left side of the road and every time I got him out of that he bounded into the hedge on the right side."

Dickens appears to have formed a low opinion of parliament. In a letter to Dr. Southwood Smith on social reform he wrote:

"I greatly fear that until governments are honest and parliament pure and great men less considered and small men more so, it is almost a cruelty to limit even the dreadful hours and ways of labor that at this time prevail. Want is so general, distress so great and poverty so rampant."

To Sir Joseph Paxton he wrote: "The house of commons seems to me to be getting worse every day. I solemnly declare to you that directly against my will I have come to the conclusion that representative government is a miserable failure among us . . ."

His letter to Beard on the treatment he received when he left the Chronicle in 1836 said:

"I did expect on leaving to receive some slight written acknowledgement from the proprietors of the Morning Chronicle of the sense they entertained of the services I had performed.

"During the whole period of my engagement, wherever there was a difficult and harassing duty to be performed—traveling at a few hours' notice hundreds of miles in the depth of winter—leaving hot and crowded rooms to write the whole night through a close, damp chaise—tearing along and writing the most important speeches under every possible circumstance of disadvantage and difficulty . . . I did not think that my reward at last would be a regret that that I had enjoyed a few weeks' rest and a fear lest at the close of two years I should have received six pounds six shillings too much."

FOR SALE— Milking Cow, Lister, Demo, Westfield Cream separators, Tractor, Cultivator, Mower, Washing Machine, Electric Fence. Apply R. Heichen, Lindbrook, Alberta.

World Wheat Situation

Amid the maze of facts and figures, estimates and guesses, hopes and fears, and adroit manoeuvering for advantages which are entailed in the marketing of wheat on an international scale, the one thing that seems most likely is that the old world is threatened with a good crop this year. Prices on the exchanges, and particularly in Winnipeg, have been reflecting the probability of such an eventuality. It is difficult to be optimistic about the prospects of wheat prices this year.

The most important feature of the 1938 wheat situation to date has been the return of North America to more normal production. The expert crop estimators in the United States have concluded that the winter wheat crop is comparatively free from rust menace and the spring wheat crop is doing pretty well, so they are returning to an average figure of total production of about 975 million bushels.

Rains last week put the crop in large areas of Western Canada on its feet again. Conditions are best in Alberta, and much improved in Saskatchewan and Manitoba.

Wheat farmers dislike optimistic crop reports for they know what they tend to do to prices. But the truth appears to be that the west is likely to harvest a crop of better than 350 million bushels this year, compared with 164 million last. Coarse grain crops will be correspondingly improved. This figure is far from a bumper crop as the west's biggest production was 566 millions in 1928.

With this prospect in view wheat prices have been on the skids to the chagrin of thousands of farmers, the majority of whom haven't had a decent crop in six years.

All of Canada is jubilant over the prospect of a good crop, but the question is how much will the dominion be interested in the matter of price?

As far as Europe is concerned the wheat crop looks pretty good. There has been even a certain amount of recovery in Italy, and Premier Mussolini has been bragging that this year's crop will meet most of the country's needs. He gave the figure at 257 million bushels or about 36 3-4 millions less than last year. In order to insure a small volume of imports Italian people are compelled to eat 10 per cent of corn flour with their wheat loaf.

United States government foreign trade officials have been suggesting that there will be an increase in international trade due to the probability of European nations accumulating reserves to be used in case of war. But if any such move is undertaken it will be consummated as secretly and as adroitly as possible, in witness of which the British government's purchases last spring are offered.

The main hope for a measure of price stability rests with the United States where the government's wheat loan plans are calculated to provide a minimum of at least 60 cents a bushel. That is not a high figure, but Secretary Wallace seems desirous of maintaining a steady flow of exports overseas and to do so the price must be in alignment with world levels.

The Western Canadian Wheat Pools have been in touch with the federal government at Ottawa seeking to have the Wheat Board placed in operation and a minimum price fixed. Support has been forthcoming from western Liberal members of the government, headed by the redoubtable veteran, the Hon. W. R. Motherwell.

The government has announced that the Wheat Board will function and a minimum price will be fixed at as early a date as possible. It is likely that this date will be delayed until the whole situation is clarified.

Bank Of Montreal Crop Report

General—Good growth and absence of any major setbacks continue to characterize the progress of the crops throughout the Dominion. In the Prairie Provinces, where early sown wheat is now heading out over wide areas, well distributed rains have been beneficial and crops on the whole are making good progress under favourable growing conditions. In southern and central Saskatchewan and over a large part of Alberta, stands of wheat are heavy. In southern Manitoba an infection of stem rust has appeared, but is not serious at present, while in parts of Saskatchewan grasshoppers are active and are causing some damage. In Quebec all crops are showing satisfactory growth. A better than average crop of hay is being cut and the crop of canning peas is up to average, while potatoes and other roots, as well as tobacco are doing well. In Ontario crop prospects generally are excellent. The hay crop is a good one, fall wheat is approaching maturity in promising condition, canning crop prospects are satisfactory and tobacco is making excellent progress, while tree fruit yields are expected to be slightly below average. In the Maritime Provinces grains are progressing satisfactorily, hay prospects are good and potatoes and roots well advanced for the season. In British Columbia dry weather has resulted in below average yields of early hay and potatoes, but recent intermittent rains in most districts and four days of heavy rain in the Cariboo and Kamloops districts have been beneficial to all crops. Good yields close to average are indicated.

Alberta— Beneficial rains have been received during the past few days over the entire Province. Crop conditions generally are satisfactory except in the Peace River region, where only light yield is expected as a result of early drought. Wheat is heading out. Coarse grains are making good progress. Pasturage is good. Sugar beets are satisfactory. There has been some hail damage in scattered areas. Damage by grasshoppers wire-worms and cut worms is negligible.

Searle Precipitation Report

(Compiled From 265 Rain Gauge Station Reports)

Taking into account the precipitation that occurred last Autumn during the months of August, September and October and the rains which have fallen this year from April 1st to July 1st, inclusive, and weighting for wheat acreage, the records reveal that the moisture situation for the three Prairie Provinces as a unit on July 1st was 86 per cent of normal as compared with 90 per cent three weeks ago and 65 per cent for July 2nd a year ago.

The moisture condition for Alberta on July 1st was 90 per cent of normal as compared with 74 per cent at the same time last year.

For Saskatchewan on July 1st the condition was 85 per cent of normal as compared with 51 per cent last year.

For Manitoba on July 1st it was 70 per cent as compared with 105 per cent last year.

Since July 1st the date upon which this compilation was made unusually heavy rains have fallen over large areas in the West. The actual condition therefore at this moment over the whole West is probably now nearer to 90 per cent than the 86 per cent indicated in this report.

Advertises For Wife, 2 Applicants Reach Home

MATAWAN, N.J. July 11—Judson Van Arsdale, 50, a widower would like to marry either of two widows.

Both the widows would like to marry Jud.

It can't be done. So the widows working as housekeepers, are living at Jud's home, pending an inspiration.

Jud who started it all with a matrimonial ad, scratched his head and allowed as how the whole thing ought to straighten itself out in "a day or two" but he didn't say how.

He did say, however, that he felt lonely, wanted a wife and inserted the ad. From 80 swift replies he narrowed the field down to one, a 57-year-old brunette from Washington, D.C.

He sent her rail fare and she arrived, but left suddenly one day to attend a sick daughter

Jud said he wasn't sure if and when she'd return so he sent rail fare to another of the original 80—Paris, Ill., blonde of some 40-odd years. She came, saw and conquered Jud's heart. Then prospect number one returned.

Jud couldn't make up his mind, still can't and would like to know when—and how—he might expect a solution.

A Unique Malay Boy Scout Troop

A Boy Scout troop of rubber tree tappers and "pont" coolies is described as one of the most unusual troops in Malaya. Although unable to speak English the boys have become expert Morse signallers. Incidentally Scouting has given the boys a new and wider interest in life. Except for a rare trip few of them had left the rubber plantation but since becoming Scouts they go camping in other parts of Malaya. The estate provides the boys uniforms on condition that these are paid for by instalments out of their monthly wages. The troop is the 11th Ipoh.

Student Surplus Said 'Ma's Fault'

WOLFVILLE, N.S., July 12. — Prof E. W. Robinson, professor of education at Acadia university blames mothers for the fact "there are many boys in our colleges who should have been stopped before they reached high school."

"We are educating a crowd of people to be kept by the rest of us, simply because mother wanted her boy to have a white collar," he told Nova Scotia Federation of Home and School clubs Tuesday.

"Some day we in this province will wake up and find that someone has got to work. People cannot eat bonds and stock certificates."

Dr. Harry Emerson Fosdick tells this story about himself.

"One Saturday morning my father, leaving the house, said to my mother, 'Tell Harry that he can cut the grass today—if he feels like it.' Then, after taking a few steps, he turned and added, 'Tell him that he had better feel like it.'"

Gets $100 Gift, To Fire Employe

MONTREAL, July 12.— Package found Monday on the desk of Hon. William Tremblay, labor minister, may be responsible for dismissal of a provincial government employe.

When newspapermen visited Tremblay at government offices, the package was on his desk. Joking with reporters, the minister unfolded wrappings to reveal a box of cigars and a sealed envelope containing a $100 bill.

"One fellow is going to be out of a job on Wednesday," Tremblay declared. "He may think he's repaying a favor, but if he has $100 bills to give away he certainly has no business holding down his position in these days when thousands are starving."

Sea Scout Service On Nelson's Flagship

A night spent in hammocks aboard the historic old 74-gun ship "Implacable" and a Sunday service on the quarterdeck of Nelson's famous flagship "Victory" at Portsmouth, was the thrilling experience of 250 Sea Scouts from different sections of England. The service was the annual occasion for reaffirming the Scout Promise and was held in connection with the opening of National Scout Week. The Sea Scouts were addressed by Admiral of the Fleet the Earl of Cork and Orrery and Commander in Chief, Portsmouth, who was introduced by Admiral E. S. Thesiger, County Scout Commissioner for Hampshire. In his address the Commander in Chief reminded the Sea Scouts of Nelson's heroic death, and of that great sailor's wish that "Humanity should be the watchword of the British Navy for the world."

Why is Life Insurance So Safe?

Answer.—Because the institution of Life Insurance is built upon a sound actuarial basis, and upon the investment of the accumulated funds of policyholders in loans to governments and municipalities—for building homes and schools—for improving farms—for constructing good roads and transportation systems—for developing industries and public utilities.

Question.—How is the safety of these funds guaranteed?

Answer.—By the security of the governments, municipalities and properties upon which the loans are made—and the financial responsibility of the borrower.

Q.—Are there restrictions as to what type of investments Life Insurance companies may make?

A.—Yes, all investments are subject to strict governmental regulation.

Q.—What is the total amount of Life Insurance funds invested in Canada?

A.—More than Two Billion Dollars.

Q.—Has Life Insurance in Canada fulfilled every guarantee 100 cents on the dollar?

A.—Yes, even through wars, epidemics and world-wide depressions.

This is the ninth of a series of messages sponsored by Life Insurance Companies operating in Canada. The tenth, to appear in two weeks' time, will discuss how women and children benefit from Life Insurance.

KETCHAMOOT

There will be no preaching services the next three Sundays, Rev. Allen being away on his holidays. Mrs. McCowan and Mrs. Appleby will take charge of the Sunday school two Sundays and the other Sunday the children will be taken to a lake for a days outing.

Mr. and Mrs. A. R. Thompson and daughter Betty, Mr and Mrs. Will Bolton and daughter, all of Leduc attended the Ketchamoot picnic on July 6. Mr. and Mrs. Bolton were renewing old acquaintances after a period of 35 years.

Miss Ruby Anderson returned to her home at Hastings Lake after a week's visit with her friend Miss Hazel Sears.

Mrs. J. H. Ingram entertained the Ladies' Aid at her home on Tuesday instead of Wednesday the regular meeting day. The July meeting is to be held at the home of Mrs. C. A. Ingram.

Mrs. McDowell and daughter returned to their home in Edmonton Friday, after a week's visit at the home of their cousin, Mrs. Whillans and family. Mrs. Whillans accompanied them and spent several days with her mother, Mrs. Sheppard.

Seen at Elk Island Park Sunday were Mr and Mrs. Schultz, Mr and Mrs. Hayes and Harold, Mr and Mrs Sears and family, Mr and Mrs Jim Sutton and family, Angus Mitchell, Mr and Mrs. T[illegible] and family.

Amongst the crowd at Cooking Lake on Monday at the Old Timers doings from our district were: Mr and Mrs. Herman Lawson and family, Mr. and Mrs. Coombs, Mr and Mrs. Barnes, Messrs John McGinitie, Henry McGinitie, James Rattigan and James Ingram.

Mr. and Mrs. William Lee of Edmonton are spending a few days at the Lorne Lee home.

Mrs. C. Graves and son Billie of Calgary, Mrs. Jesse McMullen and family of Ryley visited Mrs. E. McMullen at her home Thursday afternoon of last week.

Miss Mabel Younie of Edmonton is a guest of her cousin Miss Margaret Mitchell.

Miss Nellie Lindsay closed a successful term of school on June 30 with a picnic for the children and all the residents of the neighborhood on the Sears farm. Dinner was served cafeteria style at noon. Soft ball and races were run off in the afternoon with lunch and ice cream. A most pleasant time was spent thanks to Miss Lindsay and trustees Roy Lee, John Brown and James Sutton. The writer took down the results of the races and ball games but in some way the paper was lost in the fray. Sorry kiddies.

Another disappointing time took place, for on Monday a width of 3 or 4 miles of hail swept through our district, from John Brown, east down through Amisk Creek. It is thought that there was 25 to 50 per cent of damage done. We are sorry for Mr. and Mrs. Maurice McGinitie to have their fruit and flowers damaged so badly. All the rest for their grain and gardens, writer included.

The Ladies' Aid picnic on July 6 was a decided success. After a refreshing rain a few days previous, the day was all that could be expected with the exception of a "scare" coming up in the afternoon and that was of a short duration. We are sorry tho' that the rain in town kept several away, but a large crowd was present. Baseball, Softball, horse shoes and races were the sport events of the day. Dinner, supper and stand kept the crowd well fed. We wish to thank all who kindly helped in any way to make the picnic a success especially the ladies of the district for their donations towards the table, the boys for looking after the sports, as well as the men for entertaining, etc. Around $100 was cleared for church purposes.

Wedding bells are ringing this week. Full details next week.

Three Meet Death As Aerial Built

WEST SAUGERTIES, N.Y. July 11.— John Schafft decided Sunday his radio needed a new aerial.

Mrs. Ella Simon said she'd help him.

Eleven-year-old Jacqueline Jrable watched.

Schafft coiled the wire, tossed it over the roof of a summer cottage.

Mrs. Simon caught it—and fell dead.

Schafft rushed to her side, stooped to lift her—jerked convulsively and died.

Jacqueline's childish hands tore once at the two bodies—and death took her.

The uncoiling wire had looped over a high tension line, carrying 4,440 volts.

BARDO

WEDDING

A wedding of interest was solemnized on Wednesday noon at the home of Mr and Mrs. M. B. Ness of Bardo, when their daughter Alice Pauline, and Ralph Arnold Dahl were married. Rev. C. Heverstein officiated. To the strains of Mendelssohns wedding march played by Miss Sylvia Ness, the bride entered with her father. Ingvald Ness then sang "Oh Promise Me." During the signing of the register, Mr Arne Dahl sang "Through the Years." The bride looked charming in a floor length dress of peach lace over taffeta. She carried a bouquet of Talisman roses. The bridesmaid, Miss Esther Ness, wore a floor length gown of pale green net, with a corsage of roses. Mr. Arne Dahl attended the groom. Following the ceremony a reception was held. Dinner was served at a table centered with a three-tier wedding cake. After the reception, the bride and groom left on a honeymoon trip to be spent at Banff and Waterton Lakes. The bride's going away costume was a black sheer frock with a bolero worn with a rust top-coat and hat. Other accessories were black. Upon their return the couple will reside in Camrose.

Schools closed last Thursday with a picnic. Soft ball, races and a big lunch with ice cream and lemonade was the order of the day.

S. Ovenberg and Betsy Ness are attending summer school. Teachers for next term: Bardo— Mrs. Ellen Steen and S. Olsenberg. Grand Forks —Mr. Munroe of Edmonton. Esther Ness will teach at Duhamel and Harold Simonson at Poe.

Mr. and Mrs. Palmer Anderson and family returned from Minneapolis last week where they attended a Lutheran Church Conference.

Mr. and Mrs. M. B. Ness and family have moved out on the farm. They have resided in the city for the past two years. McNeils Van and Storage moved their household effects.

Miss Gladys Ness returned home last week after spending 4 months in the General hospital in Edmonton. Gladys is getting along fine now.

Mrs. Olaf Anderson entertained the Ladies' Aid last week.

Tom Rorem and Geo. Hendrickson left last Thursday by car for Vancouver, B.C. and points in the States along the Pacific Coast.

Quite a number from here attended the Church meetings in Camrose last week.

Geo. Foshaug has taken a 4 mile brush from the Cornhill Municipality.

A bridge gang put in two bridges here last week. One south of Heibergs and one west of Grand Forks school. They had their camp in the school grounds.

Mr. and Mrs. Helvig and family who have been visiting at the Rorem home for a month, left for their home at Silverton, Oregon, last Saturday.

Present standing of "Power Line" Ball League:

	W	L	Pts
Tofield	6	4	12
Round Hill	6	5	12
Dodds	5	4	10
Bardo	3	7	6

The rain that fell last week end was a welcome one, over an inch of rain fell. Crops are looking good at present.

Axel Kindley and Raymond Nordhus have installed telephones. They are on line 18.

A party of German Mennonites from here numbering 33 chartered a Sunburst bus from Tofield, travelling to Duchess, Alberta, to a Church conference. They were gone a week.

B.C. Meets Loan Out of Revenue

VICTORIA, July 11.— A $2,000,000 B.C. government loan which was used to finance part of the cost of the Pattullo bridge at New Westminster, has been paid out of current revenue, Finance Minister John Hart, announced Saturday. The $4,000000 structure opened last November, crosses the Fraser river.

The loan a three-year issue, fell due Saturday.

The money was paid without touching sinking funds or making other borrowing and amounts to a direct reduction in the debt by this amount, Mr. Hart said. The improved financial position of the province made this possible, he added. The money was taken from 1938-39 revenues.

The finance minister also said his policy has been laid down to take care of maturities totalling some $12,000,000 coming due in the next two years. Some $9,000,000 of it falls next year and $3,000,000 the following.

Red Cross Campaign

In a recent campaign for funds conducted by the Red Cross, Tofield is listed as contributing $18.04. Of this $8.04 was contributed by the Bank of Montreal collection box and $10.00 by a private contributor.

The Canadian Red Cross Society has contributed much to the welfare of the sick, unfortunate and distressed and especially in respect to their Junior Red Cross hospital work have they done much good. Any desiring to contribute could address contributions to 17 Customs Building, Calgary.

Deville Sports Held Friday July 8

The Deville Annual Picnic got under way about one o'clock Friday afternoon, July 8.

Old man weather started out with an almost perfect day for the picnic. Although the day ended up cooler, everyone had a good time. Baseball and horse races were the main attractions. A large booth supplied the crowd with refreshments.

BASEBALL

Through shouting, cheering and razzing Hastings Lake defeated Ministik in the first game. Ministik in turn defeated Deville. The girls team was badly defeated by the boys.

HORSE RACES

Everything stopped for the horse races. Three races were run in heat and a consolation race for those who won no prizes. Results were:

Horse Race: 1 Pat Westlake; 2 Albania Shank.

Relay Race: D. Donald.

A dance was held in the hall with music supplied by the Lindbrook orchestra.

Is Free Now, Says Bennett

SAINT JOHN, N.B. July 11—"For the first time in my mature life I am free," Rt. Hon. R. B. Bennett, who retired last week from the leadership of the National Conservative party, said in an interview Saturday.

"At the present time it is not my intention to resign my seat in the commons but one's present intentions in this regard may be modified by changing conditions and circumstances.

"I have no plans except that after remaining in Ottawa for a short time I expect to go to western Canada. How long shall I stay or where I shall go from there has not been settled."

More Than He Bargained For

Mr. Miffle was endeavoring one evening to cut up an orange in such a fashion as to represent a pig. After strewing the table with about a dozen peels, he gave up the futile experiment saying "Phooy with the pig! I can't make him at all."

"Nonsense, honey!" said his wife, pointing to the table. "You have done splendidly! Instead of a pig you have made a litter!"

Coast Unemployed Back in Vancouver

VANCOUVER, July 11 — Unemployed men who trekked to Victoria to impress on the B.C. government demands for a relief works program have begun their return trek to the mainland.

Saturday they accepted the provincial government's offer of temporary relief. That night 150 of the 900 in Victoria came back to Vancouver and more are expected.

Spokesmen for the men said all would be in Vancouver "within two or three days."

The B. C. government announced its temporary relief plan of $5.60 every 10 days for B.C. men and 40 cents a day for transients until they were given transportation to their homes in other provinces, would apply to all jobless through the province.

Chinese Seamen Oust Ship Officer

SAN FRANCISCO, July 11—Police and consular officials were called to the waterfront Sunday night to quiet an uproar after Chief Officer Alf Shatten of the Norwegian freighter Hoegh Silver-Star was chased from his ship by 24 yelling, threatening Chinese crew members.

Shatten, treated for a fractured hand at the harbor emergency hospital, said he had struck Quartermaster Tan Luk. The Chinese was treated for lacerations. Shatten said Luk struck him first.

Shatten fled the ship with the full crew of Chinese at his heels. The Chinese were armed with clubs, hammers and chisels.

Customs Guard R. C. Bruer and Special Officer W. F. Desay forced the crew back to the ship at pistol point.

Chinese Consul General C. C. Huang and other consular officers boarded the freighter. It was announced the crew would continue to operate the ship.

New Arrivals Of Interest

PRINTED SHEER FROCKS $2.25—

Municipal District of Cornhill Have Busy Session

On Friday, July 15th a regular meeting of the council of Municipal District of Cornhill was held at the District's office, Tofield.

There were present, Reeve Glenn, Councillors Anderson, Holmberg, Morden, Swabey and Walker.

The minutes of the previous meeting were read and approved and the monthly financial statement was presented to council.

The committee appointed at the previous meeting to interview the Mercury asked Mr. Worton to review the interview for the benefit of council. It was explained that the committee had authorized the mailing to all resident ratepayers the issue of the Mercury containing a report of the last regular meeting. In conversation with the committee the Mercury had made the following offer. It had agreed to send to all resident ratepayers as per the mailing list all issues of the Mercury from present date to end of January 1939. To insert minutes, notices and 1938 financial statement for the sum of $225. Mr. Worton explained that this was a very good offer from the Council's point of view and expressed the wish that the matter be put to a vote.

In discussion among councillors it was mentioned that several other municipal districts had adopted this method of keeping in touch with their ratepayers. Some councillors also stated that they had sounded out a limited number of ratepayers and while some appeared to be indifferent, sentiment appeared to be in favor of such an arrangement.

It was moved by Councillor Walker that the Mercury's proposal be accepted. The resolution carried unanimously.

Five residents of the Kingman district appeared before Council urging a renewal of relief allowance to Andrew Kozack. Mr. Joseph Wanger acted as spokesman and stated that Mrs. Kozack was ill and in consequence Mr. Kozack could not leave the family of small children and go out to work. The council explained that they were very sympathetic with Mr. Kozack and family and had in the past rendered considerable aid. Reeve Glenn explained that a delegation had called upon him and he had issued emergency relief. The council promised the delegation that they would re-consider the case before adjournment.

It was suggested that a temporary transfer of funds from one account to another be made as in former years. It was moved that $2,500 be transferred from school account No. 1 to general fund. The motion carried, Councillor Walker recording a negative vote.

Mr. Norman R. Bine of Edmonton wrote re a road on east half 7-52-18 W4. It was decided to ask Mr. McLean to look into the claim and report to next meeting.

An account for groceries supplied by Mr. Brace on an order from Dr. Law to Mrs. K. Romanisson came up for discussion. It was explained that groceries could only be supplied on an order from the relief officer. That the Medical Health Officer was

LOCAL & PERSONAL

Born: To Mr. and Mrs. Freeman Hill on July 17th, a daughter, at Mrs. Steven's Nursing home.

The Anglican W. A. are holding a garden party at the home of Mrs. J. W. Robinson on Thursday, July 28. Afternoon tea and ice cream will be served and also a cold supper from 5 o'clock on.

Miss Lois Thompson left on Friday last for her holidays. She intends visiting at Lethbridge and Magrath.

Gwen Firth, who is working in Edmonton spent the week end at her home.

Mr. A. Machtmes returned on Sunday after a two week's holiday.

Miss Audrey Jobb and two fellow teachers attending summer school in Edmonton spent the week end at the Jobb home.

Mrs. R. Whyte of Wetaskiwin is visiting at the Jobb home here.

Mr. and Mrs. H. Green are on their holidays.

Mr. and Mrs. Joe Wiltzen are holidaying fishing at Floating Stone Lake.

A large number of residents of Tofield and district are taking in the Edmonton Exhibition this week.

Messrs. Fred Stevenson and Don Hardy attended the Calgary Stampede in Calgary last week.

Mrs. Stark of North Dakota and Mrs. Garbor of Idaho, are visiting with their brother, Mr. Ag Dodds.

Anglican Church News

A delegation consisting of Miss Isabel Robinson, Miss Edith Robinson and Mr. Gardam are attending the Anglican Church Summer School at Kapasawin Beach this week.

****

The Annual Rally for Little Helpers and their mothers was held on July 12th. There was a Special Service at the church conducted by Mr. Gardam and the Supt., followed by an outdoor picnic at the J. W. Robinson home. Games, races and lunch were enjoyed. We missed a few parents and children this year owing to unforseen circumstances. The Juniors were also present, three of whom were enrolled at the first Rally held in Tofield during the year 1932. These were Marjorie and Ralph Bailey and Patricia Carey (now of Viking.)

****

The Annual Lawn Social of the Women's Auxiliary of Holy Trinity Anglican Church will be held on July 28th at the home of J. W. Robinson.

Horses Afflicted With Strange Disease

A number of farmers in this district have horses afflicted with what is suspected to be the brain disease such as have been prevalent in Manitoba and Saskatchewan. In communication with the Department of Agriculture Mr. T. R. Murray learned that there have been 300 cases reported in Alberta. The Department is we understand co-operating in combatting the disease by distributing serum.

CORRECTION

Please note that the C.C.F. meeting advertised in last week's Mercury to be held at Holden on July 16th, should have read July 23. This coming Saturday is the day, 2:30 is the time and Mr. David Lewis of Toronto the principal speaker. This is an outstanding meeting and merits the attendance of all those interested.

The Prisoner Of Zenda A Leading Attraction For Next Tuesday

A screen attraction second to none "The Prisoner of Zenda" will be shown at the Variety Theatre next Tuesday. Depicting a love story that thrilled the world, Madeline Carrol and Douglas Fairbanks jr. are seen at their very best. A stirring, thrilling story of court and king, love and daring in high places, danger and bravery, superbly acted, makes one of the finest film productions to be shown to a Tofield audience for a long time. Supported by Mary Astor, C. Aubrey Smith, Raymond Massey and David Niven, the principals are flanked by a cast scarcely lacking in lustre to themselves. The story, taken from Anthony Hope's famous novel gives ample scope for the superb acting of such an all star cast.

Holiday visitors to the C. Baptist home during the past week include Mr. and Mrs. Alex Baptist and family and Miss Margaret Baptist of Vanscoy, Saskatchewan, Miss Jean Kellner of Grand Prairie, Mr. and Mrs. David Guild and family of Lethbridge, Alberta, Mr. E. Reichert of Edmonton and Mrs. E. A. Smith of Calgary.

Judge (to prisoner who was accused of stealing a watch): "The case against you is dismissed as there is not sufficient evidence of your guilt."

Prisoner: "Does that mean I keep the watch?"

BARDO

Mr. and Mrs. A. Haukedahl and daughters, Hannah Jenson and Carrie Brecken left last Friday for points along the Pacific Coast on their holidays.

Rev. Heverstein christened two children at the Church services last Sunday. John Kenneth son of Mr and Mrs. Ching Johanson and Shirley Doris, daughter of Mr and Mrs. Pete Eggen. Sponsors were Mrs. O. Johanson, Mr. and Mrs. N. Falkerd, Mr. and Mrs. I. Moen and Mr and Mrs. B. Johnson.

Born: To Mr and Mrs Emil Rude on July 14th, a son.

Born: To Mr. and Mrs. Bob Barreclith on July 19th, a son.

Mr and Mrs. Laurie Rude and daughters, who have been visiting here, left for their home in Toronto last week.

Mr and Mrs. John Ness have rented a house in the city. Mr. Ness is working on the Bay store.

Many from here attended the Exhibition and the ball game between the House of David and the Coons on Tuesday.

Bardo ball team took part in the Round Hill tourney, winning from Ohaton 7-4, and losing to Tofield 9-8. The girls soft ball team lost to Kingman.

Pete Bjornson and B. Bjornson are working with an elevator building gang at Vegreville.

Bennie Finseth is having dental work done in Edmonton.

Mrs. Clara Jevning, who has been working at Barrhead spent the week-end at her home here.

Mr. and Mrs. Alvin Steen spent a few days at Lakeview.

Farmers are busy haying.

ROSS CREEK

Mr. and Mrs. Cyril Hobbs and family and the Misses Arlyn and Esther Sampson of Barrhead were week-end visitors of the A. Ford and C. Sampson families.

Born:—To Mr. and Mrs. Irvin Iverson, a son. Congratulations.

Mr. and Mrs. Oliver Wiltsen, Miss Olive Wiltsen and Mr. John Engren motored to Lac St. Anne on a fishing trip last week.

Mr. Martin Kuysten and family returned last week after a holiday spent at Lake Wabamun.

Mr. and Mrs. Hans Jacobson and son Morely are holidaying at Vancouver. While there they will visit Mr and Mrs. Clarence Patterson, who formerly resided at Ross Creek.

The picnic held at Ross Creek on July 10th was largely attended. Baseball, soft ball were the order of the day. A booth sold ice cream, soft drinks, hot dogs and coffee. An open air dance with the Chipman orchestra in attendance ended a very pleasant day.

Mrs. Alex Ford is visiting her sisters, Mrs. Cyril Hobbs, and Mrs. Oscar Sampson of Barrhead.

Master Walter and Larry Victory of Drayton Valley are visiting at the H. Iverson home for the summer holidays.

See J. O. A. Letourneau regarding the new Alberta Hail Insurance Plan.

Alfalfa Increases Production

(Experimental Farms News)

The alfalfa plant is remarkable for its ability to increase production along more lines than one. As a soil building crop it has few rivals. Its deep rooting characteristics enables it to make use of plant food reserves in the subsoil, and being a legume it enriches the soil with nitrogen through the action of nitrifying bacteria of which it is a host. Thus alfalfa in the rotation improves the fertility of the soil, with resulting increases in the production of other crops. The deep-rooting habit also enables this crop to grow vigorously and produce freely in spite of prolonged periods of dry weather.

The nutritive quality of alfalfa hay is recognized and highly prized as a means of increasing production [illegible] all kinds of live stock. In addition it is one of the [illegible] crops. In those parts of the [illegible] which enjoy a [illegible] growing period, the crop can be cut two and three times a season, producing [illegible] tonnages per acre [illegible] production [illegible] that can be cut but once.

Even in the more northerly [illegible] where the season is short and [illegible] one cutting can be made, states E. T. Goring, Dominion Experimental Station, Kapuskasing, large yields are obtained. For instance, in Northern Ontario, where [illegible] considered advisable [illegible] alone, the addition of a few pounds per acre of alfalfa to the usual hay mixture has been found very worth while. In comparative trials, at the [illegible] Experimental Station at Kapuskasing the addition of five pounds of alfalfa to the ordinary hay mixture of timothy, red clover and alsike resulted in the following increases: first year meadow 67 per cent, second year meadow 55 per cent and third year meadow 83 per cent over the ordinary hay mixture.

Here's a real buy!
THAT MEANS A BIG SAVING IN MONEY FOR YOU

Heavy Expenditures Planned In Regina By General Motors

Regina, July 11 (Special)—A program of expansion and development at a cost of between $125,000 and $165,000 is planned for the Regina plant of General Motors of Canada.

Indicative of the General Motors' faith in the future of the West, and of the increasing importance of the Regina unit in the affairs of the company, are the plans announced here recently by J. B. Highfield of Oshawa, General plant manager for Canada. Reopened only last December, the local factory is now producing 60 cars per day, with a capacity of 100 cars.

Purchase and construction of new machinery at a cost of between $80,000 and $100,000 is the main item of the program, in addition to which a new [illegible] is also under consideration.

Plans [illegible] the production of the [illegible] automobiles make necessary the extensive replacement of machinery and the remodelling of welding [illegible], said Mr. Highfield who was in Regina on a tour of inspection of the local plant. These operations [illegible] would mean the expenditure of thousands of dollars in Regina labor he pointed out.

The steam-plant project would involve a switch in General Motors' fuel policy from crude oil to Saskatchewan coal, and if this plan were followed, it would protect the company against any oil shortage. Installation of the coal-burning equipment, said Mr. Highfield, depended entirely upon the continuity and dependability of the oil supply.

The Diseases Of Ornamental Plants And Their Control

(Experimental Farms News)

At this season of the year a host of diseases usually make their appearance on ornamental plants, marring the beauty of foliage and flowers, oftimes causing the death of the entire plant. Such plants as the delphinium, peony, rose, hollyhock, aster, and lilac are particularly subject to disease at this date.

For a number of years, officials of the Dominion Laboratory of Plant Pathology at Fredericton, states S. P. Clarkson of the Laboratory, have been studying the local diseases of ornamentals and their control, and the results indicate that many of these diseases may be checked or controlled by relatively simple measures. It has been shown that most ornamental diseases may be controlled by the application of certain well known fungicides supplemented by the simple sanitary practice of destroying, by burning in the fall or early spring, the stems, leaves, etc. of diseased plants.

The destructive black spot disease of delphinium may be held in check by spraying the soil surrounding the plants with 4-4-40 Bordeaux before growth begins and later spraying the plants at intervals of one week from the time of their emergence from the soil until flowering begins. Badly diseased plants should be pulled and burned. As a further precautionary measure burn all plant debris in the fall and spray the soil and clumps with the Bordeaux mixture.

The foliage and flowers of the peony are annually damaged by the peony blight disease. This malady produces characteristic brown spots on the leaves and a rot of the flower buds and flowers. This disease is effectively controlled by spraying with 4-4-40 Bordeaux or Copper Hydro 40, 2 pounds to 40 gallons. Apply the first spray when the plants are about one foot high, and the second spray at the time the flower buds are between one-half and three-quarters of an inch in diameter. Some growers object to the deposit which these sprays leave on the foliage. In order to avoid this, Burgundy mixture of the 4-3-40 formula may be employed. Because of the waxy nature of peony leaves, it is advisable to add some type of sticking agent to these sprays.

Roses are often rendered unsightly by the black spot diseases which produces characteristic circular black spots on the foliage. In severe infections the plants are defoliated and the blossoms stunted. The fungus responsible for the black spot disease overwinters in infected fallen rose leaves. All fallen leaves should be carefully raked up and burned in the fall. On the bushes, the disease may be held in check by spraying with 2-4-40 Bordeaux. Red copper oxide used at the rate of one-half teaspoonful of the chemical to 3 gallons of water has been highly recommended for the control of this disease. These sprays should be applied at 10-day intervals beginning about the middle of June. Roses, especially the climbing variety are often attacked by mildew. Mildew appears as a white coating on the leaves and stem, often causing curling and distortion of those parts. Thorough dusting with ordinary flowers of sulphur every 10 days is sufficient to combat this malady.

Hollyhocks are universally ravaged by a rust disease which manifests itself on the lower leaf surfaces in the form of reddish-brown pimples. Severely affected plants are usually defoliated. The disease over-winters in the crown of the plant. Thorough spraying with 4-4-40 Bordeaux making the first application when growth begins in the spring and continuing at 10-day intervals until flowering begins, will materially reduce the damage occasioned by this disease. As a further precaution, collect and burn all diseased plant parts in the fall.

Our two common aster diseases are known as wilt and yellows. The former disease may be avoided by planting the excellent resistant varieties which are now obtainable from any seed house. Aster yellows is a virus disease which effects a yellowing of the foliage and the release of many flower buds. The flowers are wholly or partially abnormal with respect to their true colour value. This disease occurs commonly in many of our native weeds such as dandelion, plantain, and daisy, and from these it is transmitted to the aster and other ornamental plants of the same family, by a small insect known as a leafhopper. Where this disease is prevalent, healthy asters can be produced only by growing the plants from the seedling stage to maturity, under cotton covered cages.

The disease known as lilac blight is becoming increasingly prevalent in this province. This disease becomes evident early in the spring when affected shoots appear black as if killed by frost. Later on small reddish brown spots make their appearance on the leaves. The disease has been checked by four applications of 2-2-40 Bordeaux, applying the first spray just before the buds unfold in the spring and the remainder at 10 or 12-day intervals before flowering begins. Thorough spraying of the leaves and shoots is essential for good control of this disease.

For further information write to your nearest Plant Pathological Laboratory.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

"I sure will know this fall which of the new varieties of wheat is best for my farm" said a good friend to me a few days ago. "How will you know that?" I asked him. "Well," he said, "I've seeded two acres to Thatcher, Renown, Apex, Reward and Red Bobs and I'll compare the yields of each with my main crop of Marquis. Then next year I'll sow the seed on a larger acreage from whichever of the two acres proves to be the best."

"That's a fine experiment," I answered him, "but don't for goodness sake use next year any of the seed from those two acre plots, for you'll find it very difficult, if not impossible to harvest, thresh and bin all those different varieties and not get them badly mixed."

"From my own experience in seed growing, and from observing the work of hundreds of our best seed growers," I said, "I advise you to haul to the elevator the grain from all those two acre plots, and then next winter to purchase some good pure Registered or Certified seed of the variety you finally choose. Sow this good seed on clean land and then you will have a real good start with the variety you like."

"Mixtures of varieties" I told my friend, "are certainly one of the commonest causes of low grades, hence of serious money losses to farmers."

Following factors have tended to raise price: Heat damages spring crops in Russia and Bulgaria—North American rust reports increase—Argentine corn still making below normal progress—United Kingdom buys large quantity of Roumanian wheat—Active European demand for American corn—Flax stocks afloat for Europe are small.

Following factors have tended to lower price: Russia and Roumania offering wheat more freely—Roumania announces export bounty—Indian autumn food grain crops have good start—French wheat estimates increased—Wheat crop in Turkey expected to exceed 1937 crop—U.S. Government estimate wheat crop July first at 967 million—Prairie moisture conditions improve.

'Dead' 6 Years Found Alive

VANCOUVER, July 18— John William Rogers, who was "buried" in France for six years before it was discovered he was alive in Winnipeg is one of Vancouver's first candidates for membership in the "League of Forgotten Men," proposed in Toronto recently.

On New Year's Eve of 1916 Rogers was wounded badly and shellshocked at Vimy Ridge. He was sent back to Winnipeg and rejoined his family. In 1922 his family received notice from the Imperial war graves commission that he was buried at Souchez, France.

Seeks Sell Eye To Pay His Bills

CALGARY, July 18— Unemployed, William G. Whittit, 19, of Calgary, wants to sell his right eye—slightly injured.

"I am prepared to sacrifice my right eye to obtain money to pay off accumulated medical bills," Whittit said in an interview with newspapermen. "I am not a crank, I am serious about this offer."

He thinks $1,500 would be a reasonable sum for his eye—"just what I would receive if I obtained compensation for losing my eye in an accident. I am informed by doctors it can be put in good shape again."

"Whittit expressed the wish to help some man or woman suffering from loss of sight.

Old Winterburn Indian Approves Modern Life

Slowly, two feathers appeared above the rocky ledge. Two black, watchful eyes peered at the camp below, and told the lurker the time had come to strike . . . to kill!

With sudden frenzy the band of Indians swooped down on their enemies, a neighboring tribe and with one deft stroke their enemies were wiped out. And then they danced, paying tribute to their chief because he was the fiercest of them all.

They danced because they had won, and with their belts hung heavy with scalps. Mad-like they screamed and danced because the White Spirit had favored them in battle and had given them much meat and game and good squaws.

Tomorrow they would kill again, and so they danced . . .

Then Came Whites

Then came the Pale Faces . . .

Facing hardships unknown in other countries, the white man snaked across the prairies, built towns and cities and railroads and boats, grew crops, shot buffalo and fought like madmen.

Gradually the Indian menace was quelled and the red-skinned natives helped in the awakening of a new civilization.

All this has changed and the white man's mode of living has taught the Indians many things; things which have tended to make the Indian live differently and respect the white man. If the Indians were to have the "old life" back again, they would all die because they are not as hardy as before. Such are the views of Alexis Moran, considered the most intelligent Indian on the Winterburn reserve.

Known to the Indians of the reservation as Wapmotoowasis, or White Calf Child, this 67-year-old Indian went back into early times to compare in an interview with The Journal, the totally different modes of living of pioneer Indians and present-day Indians.

"Sure, I like to fish and hunt, but when I stay away from my home and family I get lonesome and want to return," the Cree said.

"I have a radio, a good stove, wear modern clothes and eat modern food, and have been living this way for more than 30 years. How can I go back to our forefathers' way of living, after all this?" he continued, pointing to the furniture in his home, his barn and a few cows that could be seen from the window.

Couldn't "Go Back"

"Take the younger generation, for instance," he went on. "If our children were suddenly transported to a life similar to that in the early days and God provided them with buffalo and plenty of game, most of them would die in a few weeks because they couldn't adapt themselves to the life.

"The good Lord put all the people of the world in different places, but now we are all mixed together. I often wonder," White Calf said with eyes that looked far into the future, "what will happen to our people in a few thousand years."

Born "somewhere near Drumheller," the stalky Indian worked as a pilot on the Saskatchewan river for logging camps "farther upstream." He helped to bring modern civilization to the "old, old west" and he is proud of that fact.

"Education is very important and my children and my grandchildren cannot get enough of it to suit me. I wish my father had had enough sense to send me to school. Now I'm an old man I don't know anything much.

"I try very hard to learn but my brain is getting dull. My granddaughters are patient and help me with my English," he related.

Recalling again the "early Indian" mode of living, White Calf called the chief of every tribe a "murderer and thief."

If they had only known of what exists today the progress in science and industry, our forefathers might have changed their tactics.

Warring and Eating

"All they thought about was warring and eating," he said.

"After killing a few Blackfeet and other Indians, they would go back to the tepee to dance and sing and eat, and trade wives for horses."

Asked whether he thought his views were the same as other Indians, in that their physical condition is not as hardy as their fathers, White Calf paused and then said, "All Indians feel the same.

"There are very few Indians living today who deep in their hearts do not respect the white man and his civilization," White Calf declared.

Questioned as to where he got the name 'Moran' White Calf said that his great, great, great grandfather was a Frenchman.

White Calf is the proud owner of a five-tube radio which is in constant use by his chubby wife and three grandchildren. Queried as to what programs he liked the best the Cree answered quickly "I like the news, grain prices and old-time music."

Bank Of Montreal Crop Report

General — Crops throughout Canada are approaching maturity in most promising condition, and prospects continue good for satisfactory yields of the main staples in every Province of the Dominion. In the Prairie Provinces light to heavy showers have fallen in practically all districts during the past week, and with higher temperatures prevailing crops have made favourable progress, with wheat headed out over large areas. In parts of southern Manitoba and northern Saskatchewan crops are in need of further moisture, but elsewhere there is sufficient for the present. On susceptible varieties of wheat stem rust continues to develop in southern Manitoba, and traces of rust are also to be found in some sections of southern Saskatchewan. Grasshoppers are active in Saskatchewan and parts of Manitoba. In Quebec province the hay crop is large, coarse grains are in healthy condition, roots are doing well, and canning peas, berries and tobacco are satisfactory. In the Maritime Provinces the hay crop is heavy and grains, potatoes and other roots, as well as apples, are doing well. In British Columbia dry weather in the lower Fraser Valley and on Vancouver Island is affecting yields of hay and grain, but elsewhere crops are good. Most vegetable and root crops are growing well and tree fruits generally are expected to yield better than last year.

Alberta—Further rains and warmer weather have promoted rapid growth. In the Peace River district the drought has been broken by fair rains and coarse grains show improvement, but the wheat yield will be light. There is sufficient moisture in other districts for the present. Wheat is about 60 per cent headed out; coarse grains are well advanced. There is a good hay crop and pasturage is good. Sugar beets are good.

THE SPIRIT OF PROGRESS—

SCARCELY ANYONE within a hundred miles of Edmonton have not at some time or other, heard or read of the Edmonton fair. It is not even easy to go around and find people who have not visited the Edmonton fair at some time or other. The Fair directors like to quote the slogan "where town and country meet," which sentence used as a statement is true enough.

You hear it said many times when speaking to folk just returned from the fair that "it is the same as other years." This of course is partly true, it could not be otherwise. But while there is a sameness, as the years roll round there is a difference too. This year the fair is celebrating the sixtieth anniversary of its organization and surely there is a vast difference in the fair of this week and the early exhibitions of the 80's or 90's.

To each individual attending the fair there is something amid the multitude of attractions that impress him or her most. We had just entered the main gate and were heading for the manufacturer's buildinng when the sound of a band playing near the Women's building attracted our attention. Always very partial to bands we drifted over to listen. The band was playing a march very creditably, and was composed mostly of juniors. There were quite a number in the band that appeared to be around 13, 14, 15 years of age. Even the bandmaster was youthful looking. And were they playing? One had only to observe the concentrated effort of mind and muscle to realize that these youthful artistes were putting their whole heart and soul into playing that march. We were pleased that at the conclusion of the piece, those listening accorded them applause. We drifted on up to the manufacturer's building and in the bandstand near the entrance a senior band was playing a march. Again we stopped to listen and enjoy the music. Our ears caught the swiftly changing notes of the piccolo. Looking up we observed the player, a veteran who by all appearances saw the sun rise and set before it shone on the first Edmonton exhibition. And our mind went back to the youthful band we had just left. The puffing cheeks, the visible concentrated effort of the young girls and boys, some of them no doubt making their initial exhibition appearance and sensing the importance thereof. To them the musical world was barely open. Some of them at least in years to come will be playing in bands at exhibitions, the size and grandeur of which are at present undreamed of. The piccolo player—and still a good one—can look back upon past exhibition glories, secure in the knowledge that the past sixty years have been an era of progress, mechanically spectacular, unprecedented in the world's history.

And while it may please the Edmonton Exhibition directors to classify the fair as a place where town and country meet, it pleases us to recognize it as a place where age and youth unite. A place wherein a spirit dwells which never dies. The spirit of progress.

SYMPATHY AND DUTY—

IF BY ANY chance you were a member of a rural municipal council, the problems of your life would not be easier and simpler, but rather more numerous and complex. Among many other matters which continually demand attention is the question of relief. When and to whom to give and how much? And if you were like the majority of men, gifted or cursed as the case may be, with a heart larger than a mental calculating device, you would upon numerous occasions be torn between a sympathetic desire and a sense of duty

Something akin to the above occurred at the last Cornhill municipal council meeting, when five neighbors of a former relief recipient waited upon council to urge the renewal of relief. The case in question had been on the relief roll for the past four years and while there were some very genuine and distressing circumstances connected with it, a solution of the problem was not being arrived at by continuing the procedure of the past four years. The Council were very sympathetic, so much so that they went out of their way to accede to certain requests. But they recognized what they had done in the past, what they were doing now, would have to be done over again and again. Relief except in rare instances, is or should be of a temporary nature. Something to tide an individual over a difficult time. If it can be given and used to set an individual upon his feet again, its purpose is accomplished and the giving is well worth while. But it should be remembered relief is not a pension and there is a definite limit as to how far a rural municipal council can accede to the demands for relief and still remain solvent.

In a Nutshell

He was at his club and had talked politics for an hour and a half.

"That's the situation in a nutshell," he declared at the close.

"Good gracious!" exclaimed a member to his neighbor. "What a nut!" Edinburgh

Triplets Born To South Edmonton Cow

Rare event in the animal world, birth of triplet calves to a cow on a South Edmonton farm two weeks ago has resulted in grave "family" complications involving definite disowning of two of the brood by the maternal parent.

Birth of the triplets on the farm of Adolph Busse near Mill Creek at the city's southern limits, is unusual in itself, but the fact that the three frisky calves are thriving makes them a rarity.

Multiple births among cows occur with approximately the same frequency as among humans but the mortality rate of animals is much higher, explained a University of Alberta farm expert.

Daisy Belle, a prolific Holstein, is the mother of the triplets. Her offspring, two bulls and a heifer, have been named by Mrs. Busse, Pete, Repeat and Repeater.

Pete and Repeat, the sons, have been made to shift for themselves by Daisy Belle. The cow ignores them completely, showering all her attentions on the daughter, Repeater, the owner said.

From the day of their birth, Pete and Repeat have had to depend on artificial methods of feeding while their sister has enjoyed the mother's milk.

Despite parental discrimination, the two bulls have thrived equally with their sister and the trio now comprise one of the friskiest calf groups ever seen by Mrs. Busse.

Pete and Repeat started life at a great disadvantage. From the moment of their unattended birth in a bush near the Busse home their mother frowned upon them.

Daisy Belle appeared in the farm yard one forenoon, proudly shepherding Repeater. Pete and Repeat were not discovered until several hours later. Lusty and persistent bawling led searchers to their natal place. From that day to this, Daisy Belle has refused to recognize her sons.

Enthused with scientific ardor, Mrs. Busse is conducting an experiment with the triplets. She is intent on ascertaining if the calves fed by artificial methods are as healthy as their more fortunate sister. If they do, motherless calves in future will have nothing to fear if their owners acquaint themselves with Mrs. Busse's "orphan" feeding procedures.

Future of the triplets after the experiment is completed is uncertain, their proud owner confessed.

Unless science or another farmer steps in, Pete, Repeat and Repeater may be sacrificed to housewive's demand for veal, it was hinted.

Perhaps Daisy Belle will be sorry then for her neglect of Pete and Repeat.

Sunscald Of Swine

(Experimental Farms News)

White skinned pigs that are suddenly exposed to the hot sun during spring and summer often develop a skin condition known as sunscald. Nursing, weanling and young growing pigs of the white breeds are tender in the skin and more susceptible to sunscald than older pigs of the same breed or pigs with dark coloured skin.

The first parts to be affected are usually the backs of the ears. With continued over-exposure to direct sunlight, the top of neck, top of shoulders and finally the back and sides may become burnt and sore. Burnt or scalded parts are first slightly reddened or inflamed in appearance, later followed by a dry, scaly or scabby stage, after which cracks frequently appear in the skin of the neck, shoulders, back and sides, gradually becoming deeper and more painful. When the shoulders or back become burnt, the pig usually shows abnormal slackness or weakness of the back and may frequently be seen wincing with pain or even dropping suddenly to the ground on its belly.

If suitable and timely preventive measures or treatment are not followed during early stages of sunscald, affected pigs soon become unthrifty and stunted, failing to make satisfactory or economical gains even when well fed.

Prevention is always better than cure. If young pigs are allowed out for a short period daily during dull weather, in spring, summer or fall, and the time of exposure gradually lengthened, they usually become hardened or seasoned and there will then be little danger of scalding if reasonable precautions are taken and suitable shade provided. Shelter may be supplied by cabins, open sheds or trees. If self-feeders and troughs are placed in the shade, the pigs will feed in greater comfort. Young growing pigs should not be allowed to run in tall, rank, pasture crops wet with dew or after a rain, especially during hot weather. Water or wet feed should never be poured over the heads or shoulders of the pigs at feeding time.

When the first signs of sunscald appear, affected individuals should be immediately removed to a building or shade and scalded parts treated. Carbolized vaseline (Crude vaseline containing 2 1-2 per cent of liquid carbolic) states W. W. Cram, Assistant in Live Stock and Poultry, Experimental Farm, Indian Head, Sask., is excellent for this purpose because of its cooling, softening and healing action. Used crank-case oil applied to the burnt areas has also been found effective by some breeders. Treatment should be repeated at intervals of a week or ten days until all parts have healed. Care must be taken to keep pigs in the shade after applying vaseline or oil, otherwise they will be in danger of more serious injury.

Daredevil Airman Wires Self in Crate For Atlantic Hop

NEW YORK, July 18— When Douglas Corrigan climbed into his dilapidated airplane to fly the North Atlantic, he had to wire himself in. The knob had come off the cabin door so he closed it with a piece of baling wire hooked around a nail.

DUBLIN, July 18— Douglas P. Corrigan the flier who took off from New York on a flight to "California" dropped unheralded from the skies today at Baldonnel, Ireland.

He made the flight in 28 hours and 13 minutes. He took off Sunday at 3:17 M.S.T. and landed at Baldonnel, airport for Dublin at 6:30 a.m. M.S.T. Monday..

Most airmen on this side of the Atlantic had not conceded Corrigan one chance in 100 of making the Atlantic crossing after reading cabled accounts of his "dilapidated" craft.

Baldonnel, where he landed in the fulfillment of the ambition he had nursed for more than a year to fly to Ireland, is the airfield on the outskirts of Dublin.

Because of the United States department of commerce's rejection last year of his application for permission to make such a flight and because strict regulations cover such ocean trips, officials at Floyd Bennett field doubted he would try a "sneak" hope.

The officials had believed he carried only one navigating map — of the United States with optional northern and southern routes across the continent.

He was piloting a dilapidated monoplane of a Vintage, similar to Charles A. Lindbergh's "Spirit of St. Louis" which was capable of a trans-Atlantic crossing when it was new—in 1927.

Corrigan's ship carried 300 gallons of gasoline, enough to keep him aloft about 40 hours, long enough for an Atlantic crossing; and there were unconfirmed reports around the airfield that he was going to try.

He landed at Floyd Bennet last Sunday after flying non-stop from Long Beach in about 28 hours. Airmen considered it an unusual feat because of the age of his craft and the fact that it carried a minimum of equipment as compared with the elaborate instrument carried by modern planes.

Flabbergasted airport officials rushing to the machine saw a grinning pilot jump out.

"I'm Douglas Corrigan," he said. "Just got in from New York.

"It took me 28 hours and 13 minutes."

"By the way, where am I," the flier asked the gathering crowd.

The crowd looked at Corrigan, at his plane and its nearly empty gasoline tanks, then back at the cheerful young pilot dressed in leather jacket and trousers.

Broad smiles broke.

"Corrigan, eh?" asked one Dubliner. "Have a nice crossing?"

"Not bad," was Corrigan's reply. "There was not much to it. I flew over the clouds all the time and never saw the ocean until I reached the coast. The weather was good."

Then, quite belatedly attendants thought of landing papers and asked Corrigan for them.

"Forget it," he said yawning. "I thought it was California all the time."

Corrigan's plane was believed to be capable of only about 100 miles an hour. The plane Lindbergh flew to Paris in '927 is preserved in a museum.

Corrigan had no radio and only the barest navigating instruments.

The first intimaton of his whereabouts was today when at 5:08 a.m. M.S.T., when he flew over Belfast.

Officials of the Belfast Harbor airport noticed its United States registration markings. But they were unaware of a trans-American hop and did not immediately report his arrival.

Veteran fliers said Corrigan's feat was accomplished against odds of 100 to 1.

The report spread quickly that there was a "crazy flier" in town and it reached newspaper headlines just like that.

Corrigan sat munching sandwiches as airport officials pressed him to produce his landing papers.

"Really now, I thought I was heading for California," he beamed. "It was not until I saw your mountains here that I realized it was not California."

It is expected he will be the guest of the United States minister, John Cudahy for several days.

Technically Corrigan is under detention because of his lack of papers, but that did not seem to bother him.

He said he circled around the northern coast of Ireland after reaching the western coast and finally picked out Dublin's Baldonnel airport for his landing.

$500,000 Is Listed For Road Building

Federal expenditure for highway in Alberta this year will amount to nearly $500,000, causing other provinces to feel that this province is receiving more than its fair share of dominion appropriations, states James A. MacKinnon, M.P. for West Edmonton when interviewed Saturday on his return after having attended the house of commons sessions at Ottawa.

Mr. MacKinnon denied the charge made last week by Hon. W. A. Fallow, minister of public works, who asserted upon his return from Ottawa that the dominion was showing "absolute discrimination" against this province in respect to road agents.

The Alberta minister had expressed keen disappointment over the dominion granting the province "only $75,000" to aid in tourist road construction, when $200,000 had been sought.

On Scenic Highway

"It is true that the dominion is prepared to grant the province $75,000 for the Waterton to Banff highway," said Mr. MacKinnon. "But in addition, the dominion is spending $300,000 this year to complete if possible, the Jasper-Lake Louise scenic highway. It is also spending $100,000 on the highway from Banff to Radium, B.C.

"This makes a total of nearly $500,000 that the dominion is spending in Alta this year. While the major part of the dominion appropriations are in the national parks, which are owned by the dominion, these roads all form a part of the Alberta highway system and they will be used by the tourists who come to Alberta.

"Other provinces do not draw a distinction between money spent in the national parks and on the provincial system. They feel that Alberta is getting more than a fair share of the federal grants", said Mr. MacKinnon.

Premier King is planning to make an "informal tour" of the west next September but his itinerary has not yet been settled upon said the member.

The premier is expected to visit Edmonton and various other parts of the west much in the same way as he did on his last tour through this section of the country some years ago.

Mr. King's plans would depend to a great extent upon the early or late completion of the new trade treaty being negotiated between Canada and the United States, said Mr. MacKinnon.

Asked whether a fall session of the commons is likely, the member said this also hinged to a great extent on the completion of the trade treaty.

There was a feeling among members of the house that a session might be held in October or November, then an adjournment taken for three weeks at Christmas after which the members could reassemble at about their usual meeting time in the new year.

" Many of the western members feel that the session should be finished up in April so that they can return to their homes in time for the spring work, instead of having the session run into the summer months" he said.

Mr. MacKinnon who motored here from the east, said he had been especially impressed with the fine crop outlook in Saskatchewan areas that had suffered from drouth for several years.

A Modern Knight Throws Down The Gauntlet

When his foreman at the Woolwich arsenal made an insulting reference to Scouting and Lord Baden-Powell, Rover Scout Tom Bromley, of the 12th West Ham Rover Crew, challenged him to a fight to a finish at the Green Gate Boxing Ring. The challenge was accepted and the fight held. The Rover proved the better fighter, flooring his opponent three times, but the foreman was the better boxer, and the fight was declared a draw. At the conclusion the foreman apologized for his remarks and later applied to become a member of the Rover Crew.

Dog, Leg Hurt, Awaits Master

PHILADELPHIA, July 11—Small wooly dog, resembling a dirty lamb, still stood Monday—on a patched up broken leg—at a subway entrance awaiting the master who has yet to return. The dog began its vigil four days ago. Saturday night a truck hit it breaking a leg. Three taxicab drivers got splints and bandages and in the light of the street lamp reset the bone. The canine snapped down hamburgers and returned to its post

Hail Does Damage In South Alberta

LETHBRIDGE, July 11.—Hail did damage to southern Alberta crops over the week-end. At Monarch, 20 miles west of Lethbridge 30 per cent damage was done to 3,000 acres of standing crops while at Eastend, on the border of Saskatchewan, south of Medicine Hat, hail did 75 per cent damage on a mile-wide stretch several miles long. Rain fell in several areas, during the week-end and crop conditions generally are excellent. Most of the wheat is heading out and making good progress. Absence of hot winds, and the frequency of showers are features of the crop weather map.

"The Crop Testing Plan" Field Days

"The Crop Testing Plan" method of crop improvement which has attained international fame, and is endorsed by all authorities, is now in full operation throughout Western Canada.

See the nearest Searle or Home Agent for the dates of the field days in your district.

"The Crop Testing Plan" will make more money for you.

LINDBROOK

First of all, we are very sorry to hear of the losses by hail that have been the misfortune to happen to many of our friends in the neighbouring district of Ketchamoot. It is well, the word is unspeakable, to see it all go in a few minutes, and when one thinks of the hours and hours of labor, to say nothing of the expense of putting in the crop, well its — (call it what suits you.) This hail business is something like the war, its a case of, I wonder who's next?

The school picnic was held at Mr. [illegible] beach at Hastings Lake and was enjoyed by all.

Mr. Bra[illegible] and family have rented a cottage at Cooking Lake for the holidays. Jim gets down there when he can get away from the store for a while.

Mr and Mrs. F. Evans, accompanied by Miss Eileen Best (their niece whose home is Athabasca) motored up there for the week end. Mr. Evans' [illegible] being up there. Mr. Evans and Miss Best and her brother returned but Mrs. Evans will stay there for a while.

Mr. J. H. Brown has been away on a tour of the mountains for the past [illegible] weeks. Whilst there, Joe plans to try out some of the hot springs [illegible] bathe out there. We hope they [illegible] beneficial as also the holiday itself for he sure has earned one.

A meeting was held to discuss the building and maintenance of a Community Hall here, but beyond the initial stages of discussion as to site, [illegible] nothing definite was agreed upon, so another meeting is to be held to have another go at it.

Ball fans had the pleasure of hearing Miss Eileen Best sing over the CJCA station last week. It was pretty good too. Miss Best is the niece of Mr and Mrs F. Evans of Lindbrook and known to many here.

Mr. [illegible] Scott was a visitor to [illegible] this week.

Two Hills Slayer Of Babe And Little Niece Falls Into Net of Police

Wanted for the murder of his seven-month-old babe and his ten-year old niece at his farm home near Duvernay, 40 miles north of Vegreville last Thursday night, Harry Shire, 33, year-old Polish farmer was captured single-handed by Constable Lionel Broadway of the Camrose detachment of the Royal Canadian Mounted Police in a clump of bush just west of Killam about 10 p.m. Tuesday.

Killam is 120 miles southeast of Edmonton and about 80 miles directly south of the scene of the crime.

Police credited the keen observation and intuition of Mrs. Noren of the Horseshoe Cafe at Killam, for the capture of the fugitive who had eluded police, a civilian posse and dogs which have been seeking him since last Friday morning.

Shire, unshaven and dishevelled, walked into Mrs. Noren's cafe late Tuesday evening and ordered supper. With a woman's keen insight she noticed something about the stranger that attracted her attention to him. As she looked closer she thought she noticed a resemblance between the man who had ordered supper and a picture she had seen of the wanted Harry Shire in a newspaper. Returning to look at the paper she was convinced that the man eating in her cafe was the murderer sought by police.

She immediately phoned Inspector Tucker of the Royal Canadian Mounted Police at Vegreville who dispatched two men under Sergeant Hancock, and who phoned Camrose and instructed Constable Broadway to proceed to make the arrest.

Lindbrook may be a sleepy rural district and all that but one wouldn't think so of late, from dawn till dark the air is throbbing with the hum of tractors busy breaking new land, several outfits being busy, whilst a lot is being cleared preparatory to breaking. "We hope the Grain Exchange doesn't hear of this, the price is dropping now and this really would put the skids under it."

See J.O.A. Lewerenz regarding the new Alberta Hail Insurance Plan.

MIDSUMMER SALE SPECIALS

BARDO

Mike Erickson had the misfortune to loose one of his best horses, a six year old. The horse died of the dreaded brain disease (Encephalomyelitis) which has been quite prevalent in Manitoba and Saskatchewan. This is the first case in this district so far.

About 100 people from here spent Sunday at Poplar beach, Hastings Lake. The day was spent swimming, boat riding and fishing for perch.

About twenty girls and boys from here are leaving on Wednesday to attend the Luther League Bible Camp at Hastings Lake, Rev. Lerseth in charge. The Bible Camp is sponsored by the Edmonton and Camrose Lutheran circuits and will continue for two weeks.

Tom Rorum and Geo. Hendrickson returned last Wednesday from the Pacific Coast where they have been holidaying.

Mrs. Petra Stauffer entertained the Bardo Ladies' Aid last Thursday.

Mr. and Mrs. Pete Lerbekmo and Jackie are holidaying at Alberta Beach on Lake Wabamum.

The Bardo Male chorus have discontinued practices till after the busy season.

Final standing of "Power Line" Ball League.

As the league ended in a three way tie it will be necessary to stage a play-off for the Championship and holder of the cup. No play-off dates have been set.

AMISK CREEK

WEDDING

The first wedding held in Amisk Creek church took place last Sunday when Nora Evelyn, second daughter of Mr. and Mrs. H. Hillerud, was married to Hilmar Cornelius, eldest son of Mr. and Mrs E. A. Moen. The church was nicely decorated for the ceremony, pretty streamers, fresh flowers and wedding bells. The bride was given away by her father. She carried a lovely bouquet of roses and carnations. The bridesmaid was her sister Merle Hillerud. Marvin Moen, brother of the groom was best man. Rev. C. Hoverstein officiated. Pearl Patterson played the Wedding march and Mrs C. Patterson, sister of the bride sang "I love You Truly." After the ceremony about one hundred guests were served a buffet supper at the bride's parent's home. The happy couple left for a short honeymoon. About the first week of August they will make their home in Hazeldeene. Both bride and groom are very prominent young people around here, both having been born and raised in this neighborhood. We all join in wishing them a Happy and Prosperous future.

A number of the Youth Training Girls spent the week before last camping at South Cooking Lake.

We are glad to report that Mrs. Erickson is home from the hospital and is feeling fine.

Mr. J. Berild who was operated on for appendicitis is now home again and doing well.

On Wednesday of last week a shower was held at the Hillerud home for the bride-to-be. She received many nice and useful presents from friends and relatives and much good advice for the future. Lunch was served.

Mr. and Mrs. Skiles, Miss Merle Hillerud and Matt Solberg left for a week's holiday last Sunday evening.

Ruby Berg was home for a short visit before she left for the coast for a two week's vacation.

Mr. J. Amebo has been taking chiropractor treatments in Edmonton. We are glad to hear he is improving.

Mrs. J. Blackburn from Lavoy is now taking care of her mother, Mrs. J. H. Olson. Mrs. L. Watt is having a vacation in the city with her son and daughter.

A large number of the Wheat club motored to Lacombe on Saturday, July 16th. They all report a very pleasant and interesting time spent at the Experimental Farm.

Mr. and Mrs. C. Erickson and son spent last Monday at the Sorensen home at Poe.

Mrs. P. O. Flaaten took the bus for Viking last Monday.

Arthur Patterson and Norman motored to the city last Saturday. Bert Berild and Pearl Patterson accompanied them on their return the same evening.

Opal Straustad is assisting Mrs. C. Erickson with the work.

LINDBROOK

The dance put on for the benefit of the funds of the proposed Community Hall, and held at Mr. R. Hammersley's barn last Monday night was a decided success in every way. Despite the heavy shower of the afternoon a good crowd managed to get there. The "Lindbrook Hot Shots" supplied the music and at midnight a lunch was served, and after the usual "after dinner talks" etc. the dance continued till around 2 a.m. Everyone present voted it an A1 affair and we hear that the financial end was also very satisfactory.

The L.C.C. held their annual picnic last Sunday at Lake View but we leave details to their own correspondent.

A Surprise party was sprung on Mr. and Mrs. W. Robinson and family at their home here on the 18th, the occasion being to honor Mrs. Robinson on her birthday, which isn't however, the 15th, but is near enough, because of the "unalterable law" that says that country dances must be on Friday.

Mrs. Lust is enjoying a visit from her sister and her two little girls from Edmonton who will stay for awhile during the holidays.

Mr. J. H. Brown returned home from the Coast, where he met many old friends.

Mrs. W. Robinson spent a pleasant visit with her son and daughter-in-law last week.

Mrs. John Brown of Lethbridge, nee Miss Martha Rogers, daughter of Mr. Asa Rogers of Lindbrook is here visiting relatives. At present she is staying with her sister, Mrs. Earl Wilson of this district.

Haying has started and so have the showers, its only what was expected anyway.

Master Douglas Best of Athabasca is here on visit to his uncle Mr. F. Evans of Lindbrook.

LOCAL & PERSONAL

Mr. and Mrs. W. H Iemond of Abernethy, Sask., visited with Mr. and Mrs Stinson last week. Mrs Stinson and children returned to Abernethy on Monday for a month's vacation.

* * *

Mr Jim Mackenzie from Athabasca is visiting at his home here.

* * *

Mr and Mrs. W. Pollard of Edmonton spent a few days visiting in Tofield with friends and relatives.

* * *

Mr James Munro will be in charge of the Post Office with Leonard Worton as Assistant while A. B. Clutterham is on Vacation.

* * *

Mr and Mrs. Joe Wiltzen returned from their fishing trip at Floating Stone Lake.

* * *

The Misses M. Wood and Ardis Wood returned from a motor trip to Spokane.

* * *

Mrs. Baynes of Gadsby spent a week with her daughter, Mrs. M. C Wood.

* * *

The Misses Annie Swift, and Ella Taylor from the Royal Alexandra hospital in Edmonton are enjoying their holidays.

* * *

Miss Margaret Whyte returned to her duties at the Royal Alexandra hospital on Sunday after spending an enjoyable three week's holiday.

* * *

Miss Jean Innis returned from Wetaskiwin last week where she has been visiting with Enid McLaughlin for the past month.

* * *

Miss Alleen Allen returned from Edmonton on Thursday last.

* * *

Mr. and Mrs. Harold Green spent the past two weeks holidaying at Pigeon Lake.

* * *

Messrs. Les Stan and Norman Glover, Reg McCarthy, Glenn Wood Art Francis and Harry Bowick spent the week end fishing at Lac La Nonne.

* * *

Mrs. Swift and Annie left on Friday by train for California where they will visit Mr. and Mrs. W. Swift.

* * *

Mr. Bert Everett of Cadomin is spending a few days here visiting with Mr. Everett and Ross.

* * *

Mr. and Mrs. C. Patterson are holidaying at Banff.

* * *

Messrs. W. Abernethy and J. Ingram are delegates from the Tofield C.C.F. branch to the National Convention being held in Edmonton this week. Other members attending are Geo. Abernethy and A. P. Moen.

ALL RESIDENT RATEPAYERS OF THE MUNICIPAL DISTRICT OF CORNHILL ARE NOW ENTITLED TO RECEIVE THE MERCURY. IF YOU KNOW OF ANY RESIDENT RATEPAYER NOT RECEIVING IT, YOU WILL HELP US BY HAVING THEM SEND IN THEIR NAME AND ADDRESS.

KETCHAMOOT

Born To Mr and Mrs Joe Sutton, Thursday, July 21, a daughter. Congratulations.

The regular monthly meeting of the Ladies' Aid will be held next Wednesday August 3rd, at the home of Mrs C. A. Ingram. A cordial invitation is extended to all.

The Sunday school pupils and their parents enjoyed a days outing at Lakeview on Sunday. Dinner was served at one o'clock also lunch in the afternoon besides ice cream, lemonade and candy. All enjoyed the get-together and many went in bathing.

Practically all the neighbors spent some one day at the Edmonton Exhibition.

Mrs. F. A. Owen and grand daughter Frances Cressey of Edmonton, came on Sunday for a week's visit with friends and relatives.

Mrs. Melton and son of Edmonton visited a few days at the Schultz home. On Sunday Mr Melton and daughter came down from Edmonton, Mrs Melton and son returning home and Miss Melton remaining for a longer visit.

Messrs. Ivan Mitchell and Jim Whillans returned home one day last week after several week's motor trip visiting friends and relatives in Oklahoma, U.S.A.

Mrs C. A. Ingram and Mrs. Lorne Lee motored to Hay Lakes Saturday. Mrs Lee's daughter, Noreen, accompanied them home.

Mr and Mrs P. Lerbekmo and son, Mrs Chas Whillans, daughter Joyce and son Neal, are spending their summer holiday at Alberta beach.

A large crowd of friends and neighbors of Mr and Mrs. Lorne Lee gathered at their home Thursday evening to welcome them back and to offer congratulations and best wishes. After a social time lunch was served and Martin Lawson, on behalf of the friends presented them with a purse of money. Treats of cigars and candy was passed around by the bride and groom, which brought a happy evening to a close.

Horse Disease Now Believed To Be Encephalomyelitis

At first believed cases of sunstroke, officials now believe that the sickness effecting horses is a brain disease known as encephalomyelitis. The disease has appeared in various parts of the province, including this district. Consequently the vetinary surgeon is a busy man. In conversation with Dr Sampson, he said that in this district his estimate of the number of horses effected is about 30. Of these eight or ten have died. Farmers are advised to watch their horses and if they show symptoms of the disease to keep them in a cool place with subdued light. Have a support for them to lean against and procure advice from those qualified to give it.

High Minimum Price For Wheat Grain Men Urge

Point Out Pre War Price Was 88c But Living Costs Up 31 per cent Since Then

Urging upon the Dominion Government the fixing of the highest possible minimum price for wheat a communication was forwarded July 20th to the Chief Commissioner of the Canadian Wheat Board and members of the Wheat Committee of the Dominion cabinet by C. E. Hayles, president of the North West Grain Dealers' Association

The North West Grain Dealers' Association memorandum points out that cost of food, fuel, clothing and sundries are 31 per cent higher than 1913 in which year the average price for One Northern Wheat in store Fort William was 88 cents per bushel.

The communication released today reads:

July 20th 1938.

Mr. Geo. H. McIvor,
Chief Commissioner,
The Canadian Wheat Board
Winnipeg, Manitoba.
Dear Sir,

We understand from recent Press reports that the minimum price for the current crop year for wheat will be determined and announced by your Board and the Government in the next week or ten days

Our Association placed in evidence before the recent Royal Grain Enquiry Commission the following

Volume 1, page 20 "At this point I may state that my clients endorse whole-heartedly any movement for a relief of the farmers' burdens and for the granting of support as long as any condition, either National or International, external or internal, render that relief and that support necessary for the maintenance of adequate living standards for farmers and their families." And again, Volume 1, page 26, "If the deliberations of this commission are to have the constructive effect which it is desired we believe that it should consider the economic position of the Western farmer in the national household in any enquiry directed towards those ends and in any movement to ameliorate this position, I am instructed to state that my clients will whole-heartedly join."

Bearing in mind the welfare of the producers, may we respectfully urge that your Board and the Government give consideration to the relationship between the present costs of necessities and the price of wheat. We understand that recent statistics released by the Dominion Bureau of Statistics covering food, fuel, rent, clothing and sundries show that the average cost of these items for the year 1937 to be 31 per cent higher than the cost of the same articles for the year 1913. The average price for No 1 Nor. wheat in store Fort William for the year 1913 was 88c The handicap under which we believe our clients are laboring is set forth in the evidence given on our behalf by Mr. L. W. Brockington, K.C Volume 1, page 16, through 26, of the evidence of the recent Royal Grain Enquiry Commission. It is the hope of this Association that the Government will consider the highest possible minimum price consistent with the welfare of the Dominion of Canada.

Yours very truly,
C. E. Hayles,
President.

Bank Of Montreal Crop Report

General— Throughout the Dominion crop prospects remain good, with weather that on the whole has continued to be advantageous, though in some districts damage from lack of moisture is reported. Grasshoppers, rust and hail have taken a certain toll of grain on the prairies and in Quebec and Ontario army worms have appeared, but so far such damage as has occurred has been of a local nature. In the Prairie Provinces, while grain crops are somewhat backward, they promise an abundant yield although to maintain present prospects good rains over wide areas are required. In Quebec the hay yield is proving satisfactory and all other crops continue in good condition. In British Columbia hay and grains are light crops owing to dry weather, but tomatoes, hops and fruits give good promise.

Alberta— The weather has been hot with only scattered showers. A portion of the south central district north and north-east of Calgary has suffered severe hail damage. Prospects continue good except in the northwest of the Province, which is suffering from drought. Other districts need rain soon for filling. Wheat is mostly headed out. Coarse grains are promising. Sugar beets are above the average. Hay and pastures are good.

* * *

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

This is a proud year for one of the oldest and purest races of white people in the World. I mean our good friends the Swedes.

1938 is the 300th anniversary of the first settlement of the Swedish people on the American continent. They have since successfully colonized large areas in the United States and in Canada.

Tacitus, the great Roman historian, in 98 A.D. just 1840 years ago, wrote of the sturdy Swedes under a strong King, cultivating wheat and other products of the soil with industry and patience.

Intelligent hard workers, good citizens and loyal kindly friends, the Swedish people have added much to the wealth of the United States and Canada and so have enhanced the welfare of the two peoples

It is interesting to note too, that 1938 is also the 160th anniversary of the death of the great Swedish botanist Linnaeus, who originated an entirely new method for the classification of plants; which new method helped much towards the improvement of all farm crops. Svalof, Sweden, true to the heritage left by Linnaeus, today is one of the World's greatest plant breeding institutions From Svalof came Victory oats, so much prized in Canada.

So hats off this year, 1938, to the Swedes in token of their fine accomplishments, and say skaal to them whenever the opportunity offers!

Following are factors which have tended to raise price: Government attempting to reduce U.S. wheat acreage 32 per cent—Poland considering state wheat reserve — Grasshoppers and hail damage Western Canadian crops— Uncertain prospects for corn in Danube Basin— Officially admitted Russian spring wheat widely damaged by heat and drought—Rust damage to American and Canadian spring wheat crops confirmed.

Following factors have tended to lower price: South Africa makes first corn export in several months—Broomhall's 1938 European wheat estimate larger than 1937—Poland considering export subsidy— Continental offers of feed barley from Russia, Turkey, Poland, Denmark, U.S., and Danube— Expect wheat crop in Greece of possibly record proportion —Rains benefit Indian autumn feed grain crops — Record citrus exports from South Africa.

Shallow Vs. Deep Tilled Summer-Fallows

SHALLOW VS ....
(Experimental Farms News)

Shallow tillage is coming into more general use as a method of controlling weeds and soil drifting on summer-fallow.

Shallow tillage makes it possible to germinate weed seeds and destroy the seedlings to better advantage than where ploughing is practised. In the case of deep tillage and ploughing, many of the weed seeds are buried so deeply they will not germinate until they are brought nearer the surface by subsequent ploughings or deep tillage operations. Thus shallow tillage tends to reduce the weed seed content of the soil while deep tillage tends to increase it.

Deep tillage or ploughing the summer-fallow tends to intensify rather than control soil drifting for the reason that all the stubble and other plant refuse is buried in the soil. Shallow tillage leaves part of stubble at the surface, thus providing some protection against wind erosion.

Shallow tillage in itself will not control soil drifting, but must be used in conjunction with good farming practices. Farmers in Central and Northern Alberta, where the binder is the implement used to harvest the crop, tend to leave too short a stubble. In many cases little or no use is made of the straw after threshing. It is therefore much better to leave as much stubble as possible and still be able to tie the sheaf. It is much better to incorporate as much straw as possible in the surface soil where it will be a benefit in controlling soil drifting than go to all the extra work involved in handling long-strawed sheaves, and then burn the straw when in the stack. The one-way disk and other shallow tillage implements soon break up the long stubble into smaller pieces so that it will not interfere with the operation of any tillage machine.

Experiments conducted at the Dominion Experimental Station, Lacombe, have shown that the use of a cover crop on shallow tilled summer-fallow effectively controls soil drifting The cover crop consists of one-half bushel of wheat seeded the middle of August The date of seeding is important. Earlier seeding develops more growth than is necessary and thus uses more plant food and moisture than necessary and which could be utilized to better advantage by the succeeding crop, while later seeding does not develop sufficient growth to provide a protective covering.

The most approved method of summer-fallowing for districts with soil and climatic conditions similar to Lacombe is as follows: As much stubble as possible should be left in harvesting the crop on land intended for summer-fallowing. This land should be disked or cultivated after harvest or early the following spring to promote weed seed germination. If a long stubble has been left, the land should be worked with a one-way disk as soon as the weeds have made a fair start, or as soon as possible after spring seeding is completed. If a short stubble has been left, a duck-foot cultivator will do good work. Subsequent tillage should be given with either the one-way disk, duck-foot cultivator, springtooth harrow or the rod weeder The number of tillage operations and the implement to use will be governed by the soil, the amount of rainfall, and the degree of weed infestation; all of which will vary from year to year and from district to district.

Good Medical Care

Whether social medicine ever comes or not, there is a growing realization that some means must be found to secure good medical care for everyone.

At the recent National Conference on Social Work at Seattle, it was estimated that about one out of five families earning less than $2000 a year pay more than $100 of it for medical treatment. Low standards in food, housing and clothes increased the amount of illness; at the same time, low incomes meant that medical care was less swiftly and less surely available.

These facts deserve consideration along with the frequent warnings that early diagnosis will prevent illness. A claim that failure to call in a doctor is due to ignorance and stubbornness and not to low income evoked the following comment at the conference mentioned.

"The very poor and the very rich do not have to worry about medical care. The man earning $30 to $60 a week is denied medical services. He does not want charity and prefers to get along as best he can without asking favors.

"The very rich pay for all they need in the way of family doctors and specialists, hospitals and nursing care. The destitute can claim [illegible] care at public hospitals and clinics, charity wards and out-patient departments and the services of a visiting nurse.

"But the man who has managed to keep on paying his way during the depression or who is to be able to again after a long period on relief, is not going to beg some doctor for help. He is not going to stand in line at the clinic if there is a stigma attached to it. He would rather take a chance of getting well alone. So the wage-earner does without a doctor as long as he can, perhaps until the nagging cough develops into tuberculosis or the small pain is an incurable cancer. He buys a bottle of patent medicine because it is cheaper than paying both doctor and druggist. He reads the almanac and tries the remedy of the man next door. When he finally goes to the doctor he is scolded for not having come before and then is made miserable because he cannot pay his bill."

In Canada, our relief systems make a feeble effort to provide medical care for the poor but the social-economic consequence of unmet medical needs is devastating—they point to the urging of a national health program.

A Paying Occupation

Does begging pay? Emphatically it does, states James Finan, in the Forum. The professional beggar's "take" in authenticated cases, has touched $50 a day.

A 22-year-old beggar, arrested for scratching the arm of a restaurant hostess when she refused to let him solicit from table to table was found to own a home in Riverside, Rhode Island, and a $4,800 bank balance. He claimed that the income from begging in the eastern seaboard cities had dropped, during the recession, from $65 to $12 or even $10 per day.

Fifty thousand dollars per day is the estimated haul by beggars in New York City alone. Most of this is picked up by individuals, operating on their own. But signs of syndicated management appear.

A man in the Bronx, arrested recently, turned out to be a pan-handling overlord. Each morning he delivered his beggars to "work" in his car. He called for them at night and collected their money; then he lodged and fed them and plied them with cheap liquor to keep up their morale.

Brigadier-General Sir Henry Page Croft

Brigadier-General Sir Henry Page Croft, Bart., C.M.G., M.P., who will make a tour of Central British Columbia from August 10th to 20th, has represented his present constituency BOURNEMOUTH, for 27 years, as a strong supporter of the Conservative Party.

He was educated at Shrewsbury and Cambridge, during his school and University days he was a great sportsman and oarsman. He rowed for Shrewsbury for three years, two of them as Captain of the Boat. He twice won the Thames Cup at Henley, and for three years he rowed for his College.

On leaving Cambridge Sir Henry enlisted with Lord Lloyd and several others under the banner of Mr. Joseph Chamberlain, the great Imperial statesman, father of the present Prime Minister. It was at Mr. Joseph Chamberlain's request that Sir Henry commenced his political career by fighting Lincoln City.

Few men have put so much hard work into their politics. From the moment of his first contact with Mr. Joseph Chamberlain, Sir Henry has been inspired with the ideal of a real brotherhood of nations within the British Empire and to this end he has worked indefatigably. The first step—that of the establishment of Protection for Home Industries and Imperial Preference—has been taken and has already achieved remarkable results on behalf of Home and Overseas prosperity. But Sir Henry believes that reciprocity of trade is not enough, but that there must be co-ordination in defence, in communications, in the distribution of population and, above all, in purpose—if the co-operation of all the nations of the British Empire is to provide a practical solution to the present-day perils in which we live

During the war, Sir Henry served with the 1st Battalion of the Herts Regiment. He was several times mentioned in despatches and was awarded the C. M. G. In 1916 he was promoted to command the 68th Infantry Brigade, being then the youngest General in the British Army

From 1913-17 Sir Henry was Chairman of the Executive Committee of the Tariff Reform League; in 1928 he was Chancellor of the Primrose League; since 1926 he has been Chairman of the Empire Industries Association. It was the strong Parliamentary Committee of the Empire Industries Association which was primarily responsible for the change which took place in our fiscal policy in 1931, when the National Government decided to introduce Protection for Home Industries and to extend the system of Imperial Preference

Sir Henry's visit to Central British Columbia in August is made at the invitation of the Mayor and City Council, and the Board of Trade, of Prince George, which the Provincial Government has endorsed. The object of his visit is to examine openings and opportunities for new British Family settlement. Particular interest attaches to Sir Henry's visit and its object, because the just published Report of the Overseas Settlement Board of the Dominions' Office in London advocates strongly an early resumption of Empire Migration as a means of strengthening the Empire.

Cereal Crop Field Day

Dominion Experimental Station, Lacombe, Alberta

The annual Cereal Crops Field Day will be held at the Dominion Experimental Station, Lacombe, on Friday, August 5th.

Plant breeding, variety testing and verification of purity projects and experiments will be reviewed. Some 4031 plots, including 600 samples of farmers' grain are being grown in verification tests for purity of variety and other information-producing experiments.

Of particular interest are the plant breeding projects in which new varieties of wheat, oats, barley and flax are being developed. The 4500 plants resulting from crosses between wheat and grass, the first step in developing a perennial wheat, are in themselves worthy of a visit to the Station.

Dr. L. H. Newman, Dominion Cerealist and other prominent Field Crop authorities will be on hand to give information on problems related to the production of cereal crops

The programme will start sharp at ten o'clock in the morning with a meeting of the Alberta Branch of the Canadian Seed Growers' Association in the Pavilion. The regular Field Day programme will begin at 1:15 p.m immediately after lunch. A day packed full of interest is assured, irrespective of weather conditions Come early and bring your own lunch—coffee, cream, sugar and cups will be supplied by the Experimental Station

Defined

A woman entered a bank to make a deposit. She had some bills and checks to deposit, so she procured a deposit slip which required the listing of bills, specie, and checks. She listed her bills and checks in their respective places but was in doubt what to list under specie.

After a few moments' thought she wrote after the word specie "Female" and handed in her deposit.—Montreal Star.

NINETY CENTS—

WITHIN A FEW days, a week at the most, Western Canada will know its fate. Farmers and non-farmers of the west will know the minimum guaranteed price for wheat F.O.B. Fort William. That, after a period of inaction, the Wheat Board will function again this year, is a matter of much satisfaction to westerners depending upon a new grain crop for a further lease upon life—at least the necessities of life. But the satisfaction derived from the news that the Wheat Board is going to function will be dimmed if the minimum guaranteed price is going to be set at a figure which is inadequate to the producer. Within the past few days there has been several different amounts mentioned. One, the lowest, and one that sent chills racing down one's back, was 70c. There have been articles printed mentioning 77c, 80c, 87½c (the same as formerly); and in the nature of a request $1.03. In justice to the Wheat Board and the Dominion government it is necessary to recognize that they have their problems also. For them to set a guaranteed minimum price figure that is too high and out of all proportion to the market price would be doing more harm than good. It would be setting in motion forces that would eventually overwhelm the wheat industry of western Canada. A guaranteed price placed too high would eventually land us in the same position as Brazil with regard to her coffee. And moreover, we do not wish to either burn or sink in the ocean, any surplus of Canadian wheat. So while the clamor is on for a high minimum guaranteed price it is wise to keep in mind where too high a price would eventually lead. It is quite certain fears in this direction are quite groundless.

If we understand eastern thought at all, there need not be any fear that the price will be set too high, but rather that it might be set too low. But here again the interplay of trade and commerce is such that too low a figure will do the east as much harm as the west. What is needed, as far as human ingenuity can arrive at it, is an equitable figure which will balance the needs of the west with the east.

Certainly a figure of this kind must be above cost of production. It must also allow for reasonable wages for effort expended in raising the crop, and allow for a fair standard of living for the producers. Unless this is done, the east as the producer of most of Western Canada's manufactured articles, is going to suffer. One thing an erector of buildings soon learns is that the foundation is one of the most important if not the most important part of any building. And the foundation is generally the most inconspicuous and least observed. Therefore any economy in which a minimum guaranteed price for a basic product is concerned, must have a good foundation, regardless of the individual viewpoint of either east or west. The foundation of the west is agriculture, it is safe to say the foundation of Canada is agriculture; therefore it is agriculture which should be given first consideration. The superstructure of industry then has to be built upon agriculture. It is to no small extent the purchasing power of the west which makes the wheels of industry, particularly heavy industry, turn in the east. Therefore guaranteed minimum price must be adequate, if not Canada as a whole will suffer.

According to the Searle index, a bushel of wheat to-day in terms of money will only purchase about eighty-seven per cent of goods that it would purchase in 1913-14. Therefore if those years are to be taken as a basis, the farmer is under a handicap at the start. At the present time "Things Western Farmers Buy" cost thirty-eight per cent more than they did before the war and Winnipeg wheat at $1.00 per bushel is only about twenty per cent higher. The lower the Winnipeg price goes, the worse the farmer is off.

Now, the guaranteed minimum price is not intended to be the full amount the farmer should receive. However much we would like a government guaranteed price for a primary product to be a proper remuneration to the grower, we cannot have it that way because if we did the scheme would eventually fall of its own weight. The guaranteed minimum price for wheat is a safeguard against distress due to over production and collapsed markets. It acts as a bridge between an era of low prices and an era of higher prices, and is a government service to save the farmer from the disastrous results of an extremely low market price.

Words are useful insofar as they explain. But to those with something to sell, figures speak volumes. Taking into consideration all the phases of western life we are conversant with. Remembering that there are in the east factories ready to turn out goods of all kinds at a moments notice—and trains standing ready to bring them here. Knowing that trade and commerce is essentially an exchange of goods and services so that all may live a fuller life, our idea of a fair minimum guaranteed price is ninety-cents.

Richard Cobden— Free Trader

This year, 1938, is the 100th anniversary of an historic meeting of seven men that [illegible] place in [illegible]chester, England; the outcome of which has had a profound effect on the welfare of almost every person in Canada, for it is indeed perhaps not too much to say, that had that meeting not taken place, there might today be no important wheat industry flourishing on our Western Prairies.

At this Manchester meeting in 1838 there was formed the English Anti-Corn Law League, which immediately began to advocate free trade in the importation of wheat and other foodstuffs into England, and which soon afterwards advocated free trade for manufactured goods as well as for agricultural products.

A man who later became a great English statesman, Richard Cobden was the inspiration, soul and spirit of this first small gathering of Manchester men. The meeting on that momentous first day was addressed by Dr (later Sir John) Bowring who had just returned from Europe. He related to those present a statement that had been made to him by farmers of Normandy and Brittany in favour of free trade with England. It is recorded as follows:

"Admit our corn (to England) and then we'll see whether anyone can prevent the importation of your manufactures into France. We are millions," they said, "willing to clothe ourselves in the garments you (English) people send us, and you have millions of hungry mouths to take our corn." Dr. Bowring reported further. "The same language is held by every nation in trade."

This eventful and historic meeting of seven Manchester men then drew up the following remarkable petition, and forwarded it to the English House of Commons:

"Holding one of the principles of eternal justice to be the inalienable right of every man freely to exchange the result of his labour for the productions of other people, and maintaining the practice of protecting one part of the community at the expense of all other classes to be unsound and unjustifiable, your petitioners earnestly implore your honourable House to repeal all laws relating to the importation of foreign corn and other foreign articles of subsistance, and to carry out to the fullest extent, both as affects agriculture and manufactures the true and peaceful principles of Free Trade, by removing all existing obstacles to the unrestricted employment of industry and capital."

Tariffs Were Repealed

As a result of the spiritual and inspiring enthusiasm of Richard Cobden branches, of the Anti-Corn Law League were soon formed in every part of England. Their strenuous efforts eventually resulted in the repeal of the oppressive Corn Laws, or tariffs against the importation of foreign wheat into England. After this had been accomplished Richard Cobden, with his famous associate, John Bright, worked to bring about freer trade in the countries of Europe, in which effort, to a great extent, they succeeded.

Under that system of comparative international free trade, the peoples of England and Europe soon enjoyed a standard of living that hitherto had been thought impossible of attainment.

Today in every country of the world unfortunately the sound teachings of Bright and Cobden have been forgotten, and the world has permitted itself to be deluded with those false and harmful policies of "Nationalism" and "Self-Sufficiency" for he ever linked peace and disarmament with international free trade. The liberty of commerce, he thought, was the true key to international friendship. Duties and tariffs, he ever averred, were the prime causes of wars.

The assertions made by the people of Normandy and Brittany, as quoted by Sir John Bowring, and the principles involved in that most admirable petition to Parliament drawn up by the seven Manchester merchants, are as true today as they were then, 100 years ago.

That high tariffs and other trade restrictions, by depriving certain nations of foodstuffs and raw materials cause countries to build up vast armaments, and so lead inevitably to war, we have evidence of on every hand at this very moment.

That the ability of the "have-not" countries, such as Italy, Germany, Japan and others, to obtain foodstuffs and raw materials, as they once used to do by means of honest trade and commerce has been sharply curtailed by the same tariffs, is undeniable

That farmers are prevented by tariffs from enjoying the use of cheap manufactured goods made by foreign people, who in turn need badly the farmers' foodstuffs too, is admitted by all thinking people.

Yet the peoples of the world and their governments seem to be utterly unaware of these simple things, and of the dangers crowding upon us today resulting from the false policies under which we live

Another Cobden Needed

What the world badly needs today is another Crusader like Richard Cobden, who will remind the people and their governments of the evils that spring from high tariffs and from other restrictions against trade and who will reveal to us all the economic delusions and madnesses of "Nationalism" and "Self-Sufficiency" that so sadly have gripped our minds —a Crusader who with his supporters will constantly preach happiness and prosperity, friendship and peace that once again can be brought to the world, if only the exchange of food, raw materials and manufactured products between the peoples of different countries can be freed from the chains of high tariffs, quotas and other restrictions that now bind us all fast. In short we need badly now another Cobden League— Searle Grain Company, Limited.

Picnic Days Are Here Again

Picnics should be happy events for everyone, and in no way should the enjoyment be marred by elaborate preparations. The campfire picnic is voted as among the most popular, probably because it is a real change from regular meals and takes little time and effort in home preparation No matter what type of picnic, the hamper should include a variety of foods that will combine to provide a complete, balanced meal, and in figuring the amounts required, allowance should be made for the hearty appetites always in evidence on such occasions.

The following menus may suggest some new ideas for picnic baskets:

Campfire Menu 1
Toasted Bacon & Tomato Sandwiches
Fruit Salad, Berries or Melon
(using the luscious Canadian fruits as they come in season)
Buttered Scones
Lemon Cheese Tarts
Cocoa for All or
Coffee or Tea for Adults—Cocoa for Children

Campfire Menu 2
Cheese filled Rolls—Toasted
(Split rolls and spread one side generously with grated cheese mixed with butter. Put together and toast over coals of campfire.)
Fresh vegetables such as Radishes, Lettuce, Green Onions
(Fresh from the garden, market or store)
Fruit Shortcake
(Split rich tea biscuits. Cover bottom halves with sweetened, crushed berries, or sliced fruit. Berries may be prepared at home and carried in covered cooler.)
Cocoa for All or
Coffee or Tea for Adults—Cocoa for Children

Hamper Menu 1
Cheese Sandwiches
(Made with wholewheat bread)
(Vary the cheese sandwiches from time to time by combining grated cheese and salad dressing with chopped peanuts, chopped green pepper, chopped cooked bacon or chopped cucumber
Chopped Egg and Onion Sandwiches
Fresh fruit in Season
Spice Drop Cakes
Milk for Everyone
Coffee or Tea for Adults—Cocoa for Children

Hamper Menu 2
Salad Plate—Devilled Eggs and a Combination of Fresh Vegetables such as Cucumbers, Tomatoes, Pickled Beets
Buttered Bread or Rolls
Fruit Salad
(Carried in covered cooler)
Gingerbread
Milk Shakes for All

Edmonton-Vancouver Picnic Is Gala Occasion

Under the towering evergreens of Stanley Park in Vancouver, residents and former residents of Edmonton, numbering 1,100 gathered one afternoon recently to celebrate the twelfth annual picnic of the Edmonton-Vancouver Association. Of the 1,100, 400 were summer visitors to Vancouver.

Welcoming the guests was Mr. Gerald V. Pelton, a former Edmontonian, while replying on behalf of the visitors was Rev. W. M. Grant, D.D. pastor of Metropolitan church who is preaching at Ryerson United church in Vancouver during July.

Knots of grey-haired men and women, chatting happily under the tall shady trees, discussed Edmonton "in the eighties" when the city was a Hudson's Bay trading post of between 200 and 300 people. Among the picnickers as pioneer Tommy Lauder, whose father built the first frame house in Edmonton in 1881 after he had brought his family from Winnipeg by Red River cart, a trip that took three and one half months.

Spanish Coins Salvaged From Old British Ship

AMSTERDAM, July 26— The British frigate Lutine yielded a number of Spanish coins Monday to salvagers seeking her rich treasure of gold and silver

The Lutine was wrecked in 1799 at the entrance to the Zuider Zee, while enroute to Hamburg The fortune she carried never has been accurately estimated but has been placed in the neighborhood of $10,000,000.

The coins were brought to the surface by the Netherlands dredger Karimata which has undertaken the salvage operations for Lloyd's the London insurance corporation which paid the insurance when the Lutine sank

Gosling Has Turkey Leg

Alec Demert of Beaver district, has on his farm a gosling with one turkey leg and one leg with only one web It was born three weeks ago, and is much smaller than its brothers and sisters

Tarzan Call By Boy Lures Lost Monkey

TORONTO, July 26 —An unidentified boy who stood under a tree and called "Tarzan, Tarzan" last night captured a pet monkey that had escaped from its cage before a service station in suburban Scarborough. The monkey the boy said, just came down from the tree where it was hidden and perched on his shoulder

The pet escaped Monday and easily avoided Humane Society employees who sought to capture it with a net The boy heard the chase and stationed himself in a wooded section and called the monkey by name until it responded.

Bite Of Deer Fly Fatal To Alberta Boy

CALGARY, July 26—"Beware of deer flies" was the warning issued here today. Deer flies are prevalent throughout the foothills country of southern Alberta and it is feared they are feeding on rabbits suffering from Tularemia, a comparatively rare disease.

A 17-year old Cardston youth, Douglas Shaw died last Friday believed to have been a victim of Tularemia. He was bitten on the chin by an insect believed to have been a deer fly five days before his death

Warning Issued

The warning was issued here by J. H. Reid, provincial milk inspector whose work takes him throughout the foothills country. He is also an authority on wild life

It is a disease to which hunters are particularly susceptible. It may be contracted apart from a bite by a deer fly, by handling, dressing or eating infected game The germ it is believed is also carried by wood ticks and mosquitoes It produces a highly toxic blood condition, in most cases fatal

Never Epidemic

Tularemia however is never epidemic by transfer from man to man according to medical authorities.

Juvenile Pirates Must Learn Ten Commandments

SANTA CRUZ, Cal., July 26 —Three juvenile "pirates" who sailed away in a "borrowed" $25,000 yacht last May must go to church and learn the 10 commandments

Superior Judge Roy B. Maxey sentenced the trio Monday to Preston reformatory, but suspended commitment on condition the "pirates" use no liquor or tobacco, attend religious services weekly, learn the 10 commandments and make no public appearances.

Judge Maxey also barred the voyagers—Lyle Tara 17, James Henninger 17, and William Grace 16—from writing or authorizing any articles or permitting pictures to be taken

The youths got as far as Puerta Vallarta, state of Jalisco, Mexico, when their projected south seas trip ended.

That great big Mississippi watermelon which ex-Governor Dennis Murphee of Mississippi presented to Alderman A. Bisset last Wednesday became succulent fare for children in the crippled children's ward at the University hospital, at the week-end.

Reporters at the C.N.R. station last week had seen the melon and walking around behind it discovered Ald. Bisset was holding it. After that they lost track of it, so the alderman, who is acting mayor this week, was questioned.

"On Saturday, Mayor Fry and Mrs Fry, Mrs Bisset, myself and my two small daughters, Beryl and Lorna took the melon to the children at the hospital" he explained. "We had it kept fresh in the ice-box at my house and I understand the children enjoyed it."

Ashes Taken From Grave as Maritimers Honor Hero

AULAC, N.B. July 26— The man who saved the maritime provinces for the empire was honored Sunday at historic Fort Beausejour.

The only cannon left by the French when they were driven from the fort boomed over wind-swept Tantramar marshes in salute. A bell tolled— the same bell with which Abbe Loutre bitter enemy of the English, summoned his parishioners in Acadian days.

The ashes of Major Thomas Dixson, taken from a bramble-covered and forgotten grave, were re-interred with an impressive military service, while thousands watched silently.

Thus, 162 years after his death a hero took his place in the history of Canada. Speakers eulogized his deeds of courage and told how he had braved the Bay of Fundy in an open boat to obtain reinforcements when strategically placed Beausejour was besieged by American rebels

A bronze tablet placed on the wall of Beausejour museum in honor of Major Dixson by the National Sites and Monuments Board was unveiled by Mrs. Wycoff Rogers of Amherst, N.S., writer and the mother of Hon Norman McLeod Rogers, federal minister of labor

Seven Neutral Nations Want To Act Freely

COPENHAGEN, July 25— Seven neutral nations Sunday denounced the League of Nations covenant article compelling them to join economic and financial punitive measures. They declared their right, in effect, to debate in sanction

Members of the 'Oslo states,' at the close of a two-day conference here, announced

"Belgium, Denmark, Finland, Luxembourg, Norway, the Netherlands, and Sweden, convinced of the necessity of participating in the League's work, declare they regard the sanctions system under present conditions and in accordance with practices recently followed, as being non-obligatory in character—not only for a single group of states but for all league members.

"They are convinced it is the League's interest to state this right of free estimation."

Storied Sea Serpent Again Seen In B.C.

VICTORIA, July 26— Return of Cadborosaurus — British Columbia's storied sea serpent—was reported today by summer residents of Deep Cove near here.

Charles and Albert Ward of Sidney, B.C., and Mr and Mrs. H. B. McLean of Vancouver said they watched a strange sea monster sporting in the waters of Deep Cove about 400 yards from shore

Firestone TIRES ARE
GUM-DIPPED
EXTRA STRENGTH
58% Longer Flexing Life

GUM-DIPPING is a patented Firestone process not used in any other tire. With it every hundred pounds of cord fabric absorbs eight pounds of rubber and, as a result, every fibre, every cord and every ply in a Firestone tire is coated and insulated with pure rubber to counteract internal heat and friction—the greatest enemy of tire life.

Due to this extra process, Firestone Gum-Dipped Cords have 58% longer flexing life. Yet you do not pay one cent more for this extra value! See the nearest Firestone Dealer today!

Mr. Alex Bergum had a horse die last Monday with this new disease. Others are sick in the district.

C.G.I.T. NEWS

A C.G.I.T. camp was held at Camp Lake 12 miles east and 2 miles north of Viking, from July 6-15. There were 40 campers altogether, 33 girls, 5 leaders and Rev. and Mrs. Longmore from Irma. The girls came from Paradise Valley, Minburn, Irma, Phillips, Viking and Tofield. The camp president was Pat Firth, Secretary, Margery Murray, Camp Editor, Marian Rogers and Song sheet distributor Mildred Coy. There were four different Interest Groups "The Little Theatre Group" instructed by Miss Ellen Tatham, Edmonton "The Melody Maids" instructed by Miss Aletha Knudson Irma "The Camp Lake Athletes" instructed by Miss Helen Westbrook Phelps, and the "Camp Lake Campers" instructed by Miss Helen Fitzmaurice Viking. The "head leader" was Mrs. P. C. Bennett (Bessie) from Calgary.

Shirley Temple in "Heidi" Coming Next Tuesday

Next Tuesday, Sharpe's Shows presents at the Variety Theatre, Tofield, Shirley Temple in Heidi. Without attempting to use superlative adjectives, we can say without question this is a splendid picture for the whole family. The charm of Shirley is captivating while the acting of Jean Hersholt as, at first an embittered then a loving grandfather, is wonderfully realistic. The writer has seen this picture and can unreservedly recommend it as first class entertainment. The principles are supported by a brilliant cast including Arthur Treacher, Helen Westley, Pauline Moore, Thomas Beck, Mary Nash and others of equal ability.

SUMMER BIBLE SCHOOL

A summer bible school is to be held at the Salem Mennonite Church, lasting two weeks. There will be services each forenoon and children from 5 years of age will attend. The school will be conducted by Mr. D. Stauffer assisted by twelve teachers.

TOFIELD STUDENT WINS SCHOLARSHIP AT VERMILION

At the last Tofield School Fair, Irene Hosey won a week's tuition at Vermilion Agricultural school. While attending the school last week Irene was awarded a $75 scholarship at the school for all round proficiency. The scholarship can be made effective in any year. Congratulations.

REMEMBER

Weeds Fall To The Scythe

Geo. Edwards has been busy this week wielding the scythe and in consequence millions of weeds have been shorn of their unwanted glory. The weed problem is quite a serious one, especially by road sides and vacant lots. However the town was alive to the danger and with George swinging the scythe the menace is not nearly so bad as it was.

Ukrainians Hold Picnic On Sunday

Unfortunately marred by a heavy shower which fell at a most inopportune time the annual Ukrainian picnic was held at the Tofield Fair grounds last Sunday. Even though due to the rain, baseball had to be cancelled, quite a number of people were present and enjoyed themselves with the usual party pleasures.

Basketball Team Gets In Finals At Edmonton

Winning the first two games, the Tofield (Lakeshore) basketball team lost out to Vegreville in the finals on Friday last. The final game was quite close, the score being 21-24. Injuries to two of the players weakened the Tofield team. However the team which is really a country team did well to get into the finals and acquitted themselves well in the final game.

NOTICE

In the estate of MICHEL SCHMAUS late of Ross Creek, Alberta, Deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the above named Michel Schmaus who died on the 5th day of February A.D. 1932 are requested to file with Mrs. Elizabeth Pogue of Leduc, Alberta by the third day of September 1938 a full statement duly verified of their claims and of any securities held by them and that after that date the administratrix will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to her knowledge.

Dated this 25th day of July, A.D. 1938.

ELIZABETH POGUE,
Administratrix of the Estate of Michel Schmaus deceased
Address:—Leduc, Alberta.

30 Killed As Plane Strikes Grandstand

BOGOTA, Colombia, July 25.—More than 30 people were killed and 150 injured when a military plane crashed into a crowd during a military review at the inauguration of the Campo De Marte near Bogota Sunday.

The plane piloted by Lieut. Abadia was doing acrobatic stunts 90 feet from the ground when it attempted to pass between the grandstand occupied by President Alfonso Lopez, and President-elect Eduardo Santos, and the diplomatic stand.

A tip of the wing hit the stand occupied by diplomats and then struck the presidential stand.

The wildly careening craft crashed and cut through bystanders like a scythe.

The crowd ran in every direction but some were powerless to escape. Some of those in the path of the propellers were decapitated and their heads thrown a great distance.

No harm came to either President Lopez or Santos as the burning plane fell but a few yards from where they were standing.

26 Person Meet Death In Accidents

Wreckage of an automobile lay today on the bottom of an isolated northern Ontario ravine, 30 feet below a dilapidated wooden bridge through which it crashed and only six feet from the raging waters of a creek. It carried to death E. A. Shepard, Ontario provincial police constable.

The 31-year-old policeman was one of 26 persons who died in week-end accidents in many parts of Canada. Death toll was heaviest in one week-end so far this year. Six provinces reported fatal mishaps: Quebec, nine; Ontario, nine; British Columbia three; Alberta, two; Nova Scotia, two; Manitoba one.

Eleven persons died Saturday and Sunday of injuries suffered in traffic accidents. Eight others were drowned. Several causes were responsible for the deaths of seven other persons. Among the dead were seven children, one of whom was killed when struck by the idling "prop" of an airplane.

Violates Two Traffic Laws; Nabs Robber

CHICAGO, July 26.— Chauffeur Bert Saggerman intentionally violated 2 traffic rules and won the praise of a policeman. Saggerman drove through a red light and then made a left turn directly in front of Policeman Michael Mulvihill. As the chauffeur stopped Mulvihill whistled sharply. Saggerman stopped his car and called: "There's a robber in the car." The policeman found Eugene Nolan, 31, in the machine. Saggerman told Mulvihill that Nolan stepped into the car, took 80 cents from him and ordered him to drive north.

David Lewis, C.C.F. National Secretary Addressed Gathering

A small, but enthusiastic number of citizens attended the C.C.F. meeting held in the Community Hall, Saturday afternoon, to hear matters of national importance discussed by leaders of the party.

Geo. Abernethy of Tofield, president of the Vegreville C.C.F. Provincial Constituency Association was in the chair.

William Irvine, Alberta President of the Association, after a few remarks introduced the principal speaker, David Lewis, National Secretary of the C.C.F.

Mr. Lewis in his address, touched briefly on the dangerous situation in all countries outside of Canada and pointed out that we in Canada need to immediately awaken to the situation if we wished to avoid disaster.

He pointed out that the present Federal administration had been criminally negligent of the welfare of the Canadian people, and that any worthwhile measures passed were the result of the pressure of the small C.C.F. group in parliament.

In answer to a question "why the C.C.F. manifesto does not include the nationalization of land," Mr. Lewis gave two reasons. First, That land and natural resources are in the hands of the provinces and the provincial program could include it if they wished; and secondly that it was considered of more pressing importance to take over such industries as exploited large numbers of our people through the greed or ignorance of individual management. The farmers were exploited as much as any other group.

Mr. Lewis also said that the people of the east were amazed at the patience with which the exploitation by the large corporations through unfair tariffs freight rates and exhorbitant profit prices on farm machinery and that people of Eastern Canada were in turn exploited by the same interests.

Divine Laws On Marriage Top Power Of Parliament

MONTREAL, July 26—Divine laws on marriage supersede civil laws and even a divorce granted by Dominion parliament cannot dissolve a marriage, according to Mr. Justice Alfred Forest of the Quebec superior court.

"Before the divine law in accordance with our civil law a marriage can be broken only by death of one of the parties but never by a divorce even obtained from parliament," Mr. Justice Forest ruled yesterday in a judgement annulling marriage of Arthur Cholette, a Roman Catholic, to Margaret Twallowley Jones, a protestant.

The woman had been divorced by parliament before she married Cholett in New York state. Mr. Justice Forest ruled that ecclesiastical laws of Quebec prevented Cholette, as a Roman Catholic from marrying Miss Jones while her first husband still lived.

Sailor Battles Fireless Fire As St. Elmo Strikes

ROCHESTER, N.Y. July 26—St. Elmo's fire, a rarity on Lake Ontario, struck the Rochester-bound yacht Vision some 12 hours out of Toronto, it was reported on the boats arrival here Saturday.

To the amazement of the crew of five aboard the ship the bluish flames ran up and down the shrouds, the mast and yard arms. One member of the crew, thinking the ship afire, attempted to extinguish the apparent blaze with a fire extinguisher the skipper reported.

Only the lee side Skipper Woodburn Thompson said was without the unusual electrical display named after St. Elmo patron saint of sailors.

Of a flamelike appearance, St. Elmo's fire or light is seen usually only in stormy weather. More frequent in the tropics, it is of the nature of a brush discharge of electricity, reddish when positive, bluish when negative.

SALE OF ODDMENTS

Half Price Or Less On Many Clearance Lines

$1.96 GIRDLES FOR $1.00—
Peach Rayon Brocade with insert of surgical elastic. 14 inch length, sizes 24-29 half price $1.00

KINGMAN

Mr. Peter Rodunsky of Edmonton spent a few days in Kingman last week at the Hardin home.

Miss Emma Hardin who has been visiting at the Hardin home here for the past three weeks has returned home to Edmonton.

Mr. Thor Horte and Mr. Albin Anderson attended the C.C.F. convention held in Edmonton last week.

Mrs. B. Severson and sons, Leonard and Edward are visiting with Miss Idie Thompson.

Mr. and Mrs. Cliff Fairbrother and children were visitors at Mr. Earn Fairbrother's last Thursday, near Woodlawn.

Quite a large crowd attended the Social Credit picnic at the Thomas Gibson home last Sunday. The members surprised Mr. Shalen, their president) and presented him with a purse of money.

At the Kingman hall last Friday evening a large crowd gathered and held a shower for Miss Irene Horte the bride to be. There was a program and the guest of honor was the recipient of many gifts. A delightful lunch was served and an enjoyable time was spent by all present.

On Sunday afternoon at the Horte home, Mr. Lloyd Hamilton and Miss Irene Horte were united in marriage. Rev. Hoverstein officiated.

On August 8th, vacation Bible school for the children will start at the Lutheran Church.

The regular meeting of the Lutheran Church Ladies' Aid will be held in the Kingman Hall on August 11th at 2:30 in the afternoon.

Born.—To Mr. and Mrs. Hostouler, on July 28th, a daughter.

ROSS CREEK

Mr. and Mrs. A. Ford and family attended the Vegreville fair on Tuesday of last week.

Mr. MacColman Sr., Mr. Sid MacColman, Miss Ruth MacColman of Wildwood, have been visiting at the home of Mr. and Mrs. Ralph MacColman.

Mr. and Mrs. Arnold Snider and children motored to Vegreville on Wednesday and took in the fair.

Miss Jennie Steskyn and Miss Grace Law, teachers at Ross Creek are holidaying in Vancouver and Seatle.

A large number from Ross Creek motored to Elk Island Park on Sunday.

Mr. and Mrs. J. Shutel, Mr. A. Thor, Miss Mable Sampson motored to Rimbey on Wednesday last to visit Miss Mae Shutel who operates a beauty parlor at that point.

On Monday evening the Black and White soft ball girls team from Edmonton motored to Ross Creek and played the Silver Lake girls' team. The game ended in favor of the Black and White team, the score being 16—8.

Miss Josephine Ekenski visited her friend Miss E. Sampson on Tuesday afternoon.

HOWARD SCOTT WEDS

Miss Betty Lavine Eckman of Dulee, Sask. and Mr. Howard Lee of Edmonton were quietly married at Edmonton Tuesday, July 26th, Rev. A. Stewart officiating. After a short honeymoon, the newlyweds will reside in Forest Heights, Edmonton.

Mr. and Mrs. Howard Lee of Edmonton visited their brothers and families in our district on Thursday.

Mrs. M. Davison and brother, William Stairs left one day last week for a short holiday at their homestead at Drayton Valley. They bought the Model T Ford from Mr. W. A. Mitchel and motored through.

Mr. and Mrs. Gallegar and family and mother all of Edmonton visited Mr. Gallegar's aunt, Mrs. E. McMullen on Sunday.

Miss Kathleen Ingram entertained the Girls' club at her home Friday afternoon.

Mr. and Mrs. William Ingram and James Ingram and Frank Ratigan visited Mrs. Ingram's relatives at Fort Saskatchewan Sunday evening.

Two young ladies from Three Hills are holding a bible vacation school at the school house this week.

Mrs. Owen and Frances Cressey returned to their home in Edmonton Saturday. They were accompanied by Miss Kathleen Ingram.

Several families made up a party

(Continued on back page)

CORNHILL MUNICIPALITY BUYS MAINTAINER PATROL

On Thursday and Friday last the Adams Machinery Co. of Edmonton demonstrated a modern maintainer patrol to the Cornhill Municipal district council. It is an efficient machine and apparently did the work required of it to the satisfaction of the Council. It will maintain roads already constructed at a cost of 40c per finished mile. Its speed while working is three to four miles per hour. It has greater speed for purely transportation. It is equipped with rubber tires and an engine rated at 23 horse power. The Council agreed to purchase the patrol at $3798.00, less $900.00 for old equipment turned in. Mr. Stan Smith has been engaged to operate it at a salary of 40c per hour.

EVERYBODY SING AT VARIETY NEXT TUESDAY

Laugh crowded musical spectacle to yours . . . as six bright stars pop up in the hilarious adventures of a high-hat theatrical family and an "ugly duckling" daughter—who gets shushed all over the place—until she panics New York as a High Priestess of Swing! A musical show with an entertaining and mirth provoking story. You will like Fannie Brice, Allan Jones and Judy Garland in this swing-time melody picture.

FOR SALE.—Six foot used Deering binder. This binder cut 100 acres of crop last year and would suit man with small acreage. Low price for cash.—Apply E. McClymont, Tofield.

Frost & Wood Oil Bath and Alimite Lubricated Binders

The Frost and Wood binder is easy on horses because it is easy to draw. It is easy on itself because of its perfect balance, correct design and plentiful use of high-grade ball and roller bearings. It is easy on your pocket book because of its strength, durability and minimum expense for repairs.

The Tofield Service Station

Whats Wrong With The World

(From Country Life in B.C.)

"The world as a whole, over a given length of time, has almost certainly been fed below cost for the last hundred years." When Sir Josiah Stamp, noted British economist and financier, made this statement, he defined unerringly one of the main sources of grief in the world. The question is: How long can the world function in a business way with its principal industry losing money, not only year after year, but for a hundred years at a time?

Recently Digby Russey deBurgh, of Port Washington, B.C., in a contribution to "Country Life in B.C.", asserted that the cost of producing a bushel of wheat on the prairies was not less than $2.50. He explained that when the wheat was sold, the loss to the soil through what was taken out was not considered, any more than was the labor, risk, ability and capital of the farmer who grew the grain.

Only a few years ago, the best wheat in the world, that from the Canadian prairies, was being sold at less than 35c a bushel. Once this century has Canadian wheat brought a price approximately on a level with Mr. deBurgh's figure. That was for a brief period during the war—never under normal marketing conditions.

What obtains in Canada, relative to the price of wheat, obtains in every producing country, because wheat is a world commodity and the price offered in Liverpool practically establishes the same flat price wherever wheat is grown and marketed.

When wheat is sold below cost of production, so is bread and everything into which wheat enters, including livestock. It is true that the selling price is not below cost to the intermediary agencies, such as the merchandisers and processors. When wheat or fruit or any other agricultural product is turned over to the the succeeding links in the chain which binds together producer and consumer, everyone of these agencies figures on a minimum of a fixed profit. There may be even some "velvet" in his deal and every now and again, as a result of public pressure, a Royal Commission or some other investigating body looks into this "velvet" situation.

The real tragedy, as Sir Josiah Stamp intimates, lies in the fact that the basic industry—the industry which supports and feeds the whole world—is not receiving a fixed profit, or "velvet", or any other kind of profit. So the question: How long can this continue, is a fair one.

Searle Precipitation Report No. Nine

(Compiled from 292 Rain Gauge Station Reports

Taking into account the precipitation which occurred last autumn, during the months of August, September and October, and the rains which have fallen this year from April 1st to July 25th, inclusive, and weighting for wheat acreage, the records reveal that the moisture situation for the three Prairie Provinces, as a unit, on July 25th, was 88 per cent of normal, as compared with 94 per cent three weeks ago, and 71 for July 25th a year ago.

The moisture condition for Alberta on July 25th was 90 per cent of normal, as compared with 81 per cent at the same time last year.

In Saskatchewan, on July 25th, the condition was 87 per cent of normal, as compared with 89 per cent at the same time last year.

For Manitoba, on July 25th, it was 84 per cent as compared with 105 per cent last year.

88 per cent of normal rainfall usually would provide a very fine crop. Unfortunately, while the rain has grown the crop, rust and grasshoppers have taken a toll, the amount of which will only be determined at harvest time.

Cow Tails Stir Humane Society

COATESVILLE, Pa., July 26 — This is a tale of a cow with no tail and another cow with two tails. One of Howard Fulton's cows appeared at its barn Monday without its tail. Another cow flipped at flies with a double tail. Investigation for the Society for Prevention of Cruelty to Animals put two and two together and sought whoever tied the tails together.

Start Wheat Cutting At M. L. Ryan Farm

Believed to be the first in the district northwest of Edmonton, cutting of wheat was under way early Tuesday at the farm of M. L. "Mickey" Ryan, near St. Albert. The farm is managed by Robert Budd. The 36 acre plot was sown April 22.

Drought On Vancouver Island

It still seems incredible that we in the Evergreen Playground should suffer from drought. A few short months ago, "drought" was a word that featured highly in stories that poured in from the east. We associated it particularly with the drifting prairies. We felt that the damp coastal air made us immune from such a disaster. We have discovered our error.

After you have seen one crop after another wither from lack of moisture, you are apt to be disillusioned. If the crops are your own, you are very likely to be discouraged. At any rate, you begin to realize that drought is no unpleasant geographical phenomenon but a relentless reality.

The month of May was glorious. For four long weeks the sun rested above the cool green land. Brisk breezes from the ocean rustled through the trees. The maple leaves stretched proudly; the oak leaves reflected the light like sleek satin gloves. Fruits ripened on plant, vine and tree. The sea sparkled like a brilliant sapphire. The sunsets were vivid splashes of crimson on deep purple. The nights were cool and still.

But Beauty, in her summer guise, lingered too long. The month of roses was not so happy. The grass became scorched and lifeless. The mowers clipped the short dry hay. The tender garden shoots succumbed to thirst. The early-ripened strawberries withered quickly. The bulbs failed to mature properly.

In the middle of June, a few welcome clouds gathered on the horizon. But they passed us by. The loganberry and raspberry growers shrugged their shoulders despondently. The grain growers shook their heads and muttered. "It must come soon or ..."

Ah! The cherries were delicious and the crop was huge. "What of that?" inquires the man who owns the orchard, "There's no money in cherries."

July is passing swiftly . . . . and still, save for one brief, useless shower, the rain god has not returned. Farmers are wondering whatever made them think this country so superior to the prairies.

We have so many troubles. Our chant of complaint covers way in far countries, diplomatic policies, labor and capital, fascism and communism, unemployment, and the neighbor's chickens. Why, only a few month's ago we were growling about the persistent tapping of rain on the roof.

Beauty is with us yet . . . but the sinister banner of forest fire hangs over the hills.—Exchange.

A Generous Gift

The 2,500 acre, highly cultivated farm in the Okanagan known as the Fintry Estate, has been presented as a going concern to the Fairbridge Farm Schools Ltd., established by the former King Edward 8th, when Prince of Wales, as an agricultural training school for British boys and girls.

Capt. J. C. Dunwaters, the donor, has become known throughout the whole of Canada as an enthusiastic breeder of purebred Ayrshire cattle. Some years ago he presented the foundation stock of the University of British Columbia's purebred Ayrshire herd, importing the animals direct from Scotland for that purpose. Members of the B.C. Ayrshire Breeders' Association have many stories to tell of the generosity at the hands of "the Laird of Fintry," as also have former Old Country employees of this retired newspaperman and publisher, who at one time owned the Outram Press. It is learned that Capt. Dunwaters will make his home in Vancouver, but will retain a summer residence in the Okanagan.

Finish Surfacing Park-To-Park Road

Completion of a first course hard surfaced highway from Waterton Lakes park by way of Calgary to Banff, a distance of approximately 257 miles, is realized at last.

With the park to park highway blottered for the entire distance, U.S. tourists now will be enabled to travel over a good distance of hard-surfaced highway in Alberta.

Satisfaction with this accomplishment is expressed by officials of the Alberta Motor Association, which has led a campaign in this province for many years, urging the need of hard surfaced roads. With this 257 miles of main highway blottered, it is expected that tourist traffic over this route will reach a record volume this season.

Next scene of blotter operations will be on the 30 mile Calgary to Crossfield highway. Next will be the blottering of 34 miles between Millet and Ponoka, according to recent announcement by Hon. W. A. Fallow, Minister of Public Works.

Some Disadvantages Of Sunshine

A sunburn may be prevented by the previous application to the skin of a solution of Epsom salts or by similar use of a tannic acid solution, two teaspoonfuls to a glassful of warm water. Even strong tea may be used in an emergency.

Excessive or hard work in the hot sun may cause prostration. In severe cases the victim may have cramps in his legs. The profuse sweating involves not only a loss of water from the system, but it occasions a loss of salt that seems to upset the chemistry of the body. Under such circumstances very dilute salt water is quite palatable and, oddly enough quenches thirst better than plain water.

Heat stroke, popularly called sunstroke, is due to exposure to heat under conditions of high humidity which prevent the normal heat loss from the body. The body's normal heat regulating mechanism has failed. This condition may begin with headache, dizziness, thirst or nausea; oftener there is a sudden loss of consciousness with a rapid rise of body temperature as high as 107 or 110 degrees F. Heat stroke should be avoided if at all possible because the victim of heat stroke is thereby rendered sensitive to future heat exposure even as low as 80 degrees F.

High external temperatures complicated by stagnant or moist air, which fails to assist the cooling of the body surface by evaporation, are causative of heat stroke. Under such conditions bodily exertion must be limited. The wearing of light, well ventilated headgear gives a degree of protection.

If actual heat stroke has occurred or appears about to occur, the person should at once be removed to the coolest available spot. The bare body should be wrapped in a sheet wet in cold water and cooling by evaporation should be aided by fanning so as to gain a moving current of air. The temperature should be taken frequently and artificial aids to heat loss discontinued when the temperature has fallen to 102 degrees F. Plenty of fluids should be given by mouth. Many of these cases are most serious and in all cases should be under the supervision of a doctor.

Sunburn, heat prostration and heat stroke are some of the disadvantages of sunshine. These may be avoided. After all, they do not counter-balance the good that, in a variety of directions, come from the rays of the sun.

"Baby" Combine Harvester

The small combined harvester-thresher, the so called "baby" combine, first came on the market in numbers in 1935 and probably 10,000 were manufactured that and the following year. During 1937 approximately 15,000 or 50 per cent of the combines sold in the United States were of this type, most of them going into corn and winter-wheat belts. These combines cut a swath 5 or 6 feet, have a power take-off, and are mounted on pneumatic tires.

A series of tests of the efficiencies of these small combines in comparison with eight foot and larger machines were recently completed. These tests were conducted with wheat, oats, and soybeans, and the result in general indicate that the small combines are just as efficient as the large combines and that they may be pulled at speeds of from a half to a mile faster than the larger sizes. Some small machines were operated satisfactorily at 5 miles per hour.

Cutter-bar losses for the small machines operating in wheat constituted 66 per cent of the total machine losses and in oats 21 per cent. The comparative figures for the eight foot and larger sizes were 51 and 25 per cent respectively. Comparatively high threshing losses in oats emphasize the importance of careful machine adjustments.

Tests were made to determine the effects of adjustments. In an Illinois test, for example, a sieve adjustment reduced the quantity of wheat thrown out with the chaff from 2.20 bushels to 0.20 bushels per acre.

Hail Ruins Crops In Gleichen Area

Calgary, Aug. 2.— Farmers of Gleichen district, 50 miles east of Calgary, Tuesday surveyed ruined and damaged wheatlands, their hopes of the best crop in years shattered.

For twenty minutes Monday night hail swept the district, cutting a path 25 miles long and from two to four miles wide. Wheat growers estimated their losses from 50 to 100 per cent.

J. A. McArthur, who farms northeast of Gleichen, suffered almost 100 per cent loss on 600 acres of flax; houses and buildings were smashed, crops windows in several farm-

THE WORLD OF WHEAT

By R. G. L. Strange, Director "The Crop Testing Plan."

Many farmers decided last year to change their wheat variety; in Alberta from Garnet to Red Bobs, and in the rust areas of Saskatchewan and Manitoba from Marquis or Ceres either to Thatcher, Renown or to Apex.

Very special care must be used if during harvesting and threshing the new variety is not to become mixed with the old sort. From experience I have found the following methods will keep grain pure, at least from fields of five acres or more.

1. Stook the new variety on its own stubble, leaving a wide space between the stooks of the new and the old variety.

2. Clean the racks before hauling the new variety to the threshing machine.

3. Thresh the new wheat variety if possible after oats. (Oats can easily be separated from wheat with a seed cleaner.)

4. Run the separator idle for 10 minutes. Then clean out the two augers at the bottom of the machine, either by removing the bottom pans, or by passing a doubled up sack slowly through each auger.

5. With a whisk broom clean the lodged grain from ledges and cracks inside the separator.

6. Run the separator idle for another five minutes and clean the augers again.

7. Discard the first six bushels threshed, and either sack the remainder or thresh it into a clean bin by itself.

Following factors have tended to raise price:— Damage from grasshoppers and rust in Western Canada; Australian rains insufficient in main sections; Rust and lodging of wheat in Czechoslovakia; Tunisian wheat crop smaller than last year; Italian corn deteriorates from hot dry weather; Spain buys U.S. wheat cargoes; Bulgarian corn deteriorating; Germany wheat prospects doubtful.

Following factors have tended to lower price; More peaceful European political situation; Argentine moisture reserve very satisfactory; Greece offering to resell Australian wheat cargoes; Belgium re-imposes wheat import duty; Rains benefit Roumanian corn; Expect German rye crop will exceed last year; Prairie harvesting starts; Rains improve South African wheat crop.

Butter Dealer Heavily Fined

A manufacturer and dealer in creamery butter in one of Canada's larger cities was recently fined $50 and costs for representing and selling second grade butter as being first grade quality. It was branded with the words "First Grade."

Section 28 of the regulations under Part II of the Dairy Industry Act states in effect that any package containing creamery butter must be marked so as to give a true and accurate description of the quality of the butter contained therein.

Any province in Canada can give this section of The Dairy Industry Act and Regulations the force of law by enacting the necessary legislation. This has been done by every province except Nova Scotia and Prince Edward Island.

It is the intent of this law that consumers of butter will have some guarantee as to the quality of their purchases. The terms used to describe the quality of butter are "First Grade," Second Grade" "Third Grade," and "Below Third Grade." These terms are conspicuously placed on the main panel of the package and should serve as a guide to purchasers.

The marking of creamery butter with the grade as described has proven to be an incentive to the production of a higher quality product which should stimulate consumption of butter and thus prove to be a decided benefit to the dairy industry.

Identical Twins Share in Prize

twins Donald and Deane Sharpe of Munson district also are identical farmers.

In the Drumheller junior grain club contest, Judge M. C. Crosbie, of the department of agriculture, after viewing identical wheat plots, planted in identical soil, divided the first place prize between the twin farmers.

The grain plots were planted on the same day and both are expected to yield 40 bushels to the acre.

Trains Timber Wolves As Sled Team For Big U.S. Sportsmen's Shows

Big J. T. "Joe" Laflamme is a 225 pound Frenchman who knows his timber wolves as well as a housewife knows her cats. He uses his timber wolves for the same purposes as the ordinary "huskies" and prefers them to the more domesticated animal.

Joe came to Montreal recently to meet Albert C. Rau, general manager of the Boston and New York Sportsman's Winter Show. They met in the office of C. K. Howard, Tourist and Convention Bureau of the Canadian National Railways, to make arrangements for sending a wolf team [illegible] to these American cities for shows next winter. Just now Joe is on the hunt for a new team, and knows of two timber wolves in Saskatchewan which he is endeavoring to get. Between now and October he hopes to collect about five from the Sudbury area for a seven wolf team.

"Joe" sold his last team to an American movie concern at $75 a head. In trapping them he used a beaver trap, padded on either jaw with a bundle of cloth. One of the wolves he caught just by one toe in a mink trap.

Leather harness for a wolf team is not satisfactory, "Joe" pointed out. He makes his own harness out of canvas. "A wolf would chew a set of leather harness to shreds," he declared. "One wolf I used as a lead would take a three-quarter-inch rope in his mouth and, without any exertion or strain on a muscle, would cut it in two."

Joe collected his first team in 1923, nine brawny timber wolves, the largest 95 pounds and the smallest 70. The big thrill of his life came in 1926 when he exhibited them in Madison Square Garden, New York.

According to His Station

Mrs. Berkowitz looked down at her eight-year-old with a disgruntled look. "Trow me down a hunka bread 'n butter?" she echoed vic'ously. "Nice language you're using! Why can't you talk like Freddie Bartholomew?"

"Don't be silly, Mom," he rasped. "If I was Freddie Bartholomew, would I be satisfied with a hunka bread 'n butter?"—Southern Lumber Journal.

Perhaps Betty Has Quit School

AND THE Faithful Pony has no more work at your place. If so, it is a sure bet that there are other children that need a school pony. A "FOR SALE" or "WANTED" advertisement in the Mercury would more than likely be of service to you, whether you have a pony to sell or are just about to need one. The same thing of course applies to anything you need or have to sell. Look around your place, there is likely something that is worth real money and which someone else is needing. CLASSIFIED ADVERTISING RATES ARE LOW— One week 50c.; two weeks 75c.; four weeks $1.00. There is a generous allowance of 30 words.

The Tofield Mercury

THE TOFIELD MERCURY
A Weekly Newspaper Published At
Tofield, Alberta
W. Worton, Publisher

INFORMATION—

ONE OF THE main principles of this paper's agreement with the Cornhill Municipal District whereby each ratepayer receives the Mercury to end of January 1939, was that we should retain full freedom of expression. We prefer it that way, the council prefer it that way. We would like to make this very clear and definite because it might be inferred that because of the agreement, we are the mouthpiece of the council. We are no more the mouthpiece of the council now than we ever were. The agreement was engineered for two main purposes. Firstly we desired a larger circulation. Secondly we felt that it was possible for us to be of service to the ratepayers and council, as a disinterested party commenting upon municipal matters. We had attended council meetings and watched the council at work and were convinced, that while perhaps the councillors might not be one hundred per cent perfect, they were honestly trying to fulfil their duties, and compared very favorably with rural councils elsewhere. We felt that no small amount of the criticism they were continually being confronted with was to a large extent due to misunderstanding. And that we would be able through publicity, of we hope, the better kind, properly inform. We fully realize the task is not easy, the reason for this being that the public is not logical, it is emotional. It is impossible for councillers in casual conversation to adequately explain their view, based on study of municipal problems. And they only meet in the course of a year, a small number of their ratepayers.

However, it must be definitely understood that any writing we do is not done to please anyone, either council or ratepayers. If that was the aim it would not be worth reading. We would sell you groceries, dry goods, hardware, machinery, etc., to please you. For there, they claim the customer is always right. But we will not write with that aim in view. Of course we sincerely hope what comments we make will please you, but regarding this we can have no possible control. Ninety times out of a hundred when writers embark on a course of this kind, they are headed for the rocks and disaster, but this is a risk we must run.

The opportunity to write the above has come sooner than we expected. On Friday last the Council purchased a road maintaining patrol at a total cost of $2795.00, less $900 for a grader and planer turned in. The first payment of $395.00 becomes due May 1st, 1939, the balance in three equal annual installments commencing December 15th, 1939.

This writing is being done early Thursday morning. It was Wednesday night before we were able to confirm the report that the purchase had been made. The council has had this purchase under consideration for some time and to adequately cover the reasons for the purchase, entails more writing than we have time for at the moment. In the next issue we will deal with the matter exhaustively and will try as far as is humanly possible to present two views, that of the council and that of the valued subscriber who came in this week for information, and hurriedly left, under we believe, the impression that we were trying to put something over on him.

$390 Car to be Available to Every German Worker

LEVERKUSEN, Germany, Aug. 2 —Dr. Robert Ley, German labor leader, announced Monday that beginning immediately every German worker could save for a so-called "people's car" or volkswagen.

Special savings accounts, he said, would be opened on a basis of a minimum deposit of five marks (about $2) weekly. Announcement will be made later as to how much each prospective buyer must save before a volkswagen will be turned over to him on the instalment plan, Dr. Ley said.

Disclosing further details of the previously announced new popular low-priced automobile, he said the Reich's aim was "to every working German his volkswagen."

"This year," he said, "the first section of the factory for an annual production of 450,000 cars will have a roof overhead. By the end of 1939 regular production will be started. When the factory is completed, annual production will be 1,500,000 cars.

"In ten years from now there won't be any working man in Germany who doesn't have or can't have his car."

Ley said the car would cost 950 marks (about $390) would have a speed of 62½ miles an hour "on the super highways," and would operate about 40 miles on a gallon of gasoline.

Bank of Montreal Crop Report

GENERAL:— Canada has reached the actual commencement of the harvesting season, with the prospects still good for generally satisfactory crops in every province of the Dominion. In the Prairie Provinces grain is ripening rapidly and it is expected that in Manitoba harvesting will be general next week; in districts where crops are not so far advanced general rains are needed to aid filling. In Quebec the weather has been ideal for most field and fruit crops, all of which are making good progress. In Ontario harvesting of grain crops is well advanced, with satisfactory yields in prospect; other crops are in favorable condition; tobacco has made excellent progress. In the Maritime Provinces wet weather has caused loss during the harvesting of a heavy crop of hay; other crops are progressing satisfactorily in British Columbia a continuation of hot, dry weather has cut prospective yields below average in quantity except in irrigated districts, where there is still ample water.

PRAIRIE PROVINCES — Although showers have fallen over much of the grain growing area further general rains are needed to aid filling, particularly in Saskatchewan and parts of Alberta. Rust is prevalent in eastern Saskatchewan and in southern, central and northwestern Manitoba and while some damage has already occured to susceptible varieties of wheat, weather conditions have retarded its spread and development. Grasshopper damage has increased in southwestern Manitoba and southwestern Saskatchewan. Some serious hail losses have occured in local areas. ALBERTA — Crops are maturing rapidly, with prospects satisfactory except in the northwest and a portion of the southeast, where drought persists. Fortunately last weeks extreme heat has been broken by general light rains and lower temperatures, but further rain is required to properly fill wheat coarse grains are heading out. Sugar beet prospects are favorable. Pasturage is good.

An Ancient Prayer

Give us, Lord, a bit o' sun,
A bit o' work and a bit o' fun;
Give us all in the struggle and splutter
Our daily bread and a bit o' butter;
Give us health, our keep to make
An' a bit to spare for poor folks' sake;
Give us sense, for we're some of us duffers,
An' a heart to feel for all that suffers;

Give us, too, a bit of a song,
An' a tale, and a book to help us along,
An' give us our share o' sorrow's lesson,
That we may prove how grief's a blessin',
Give us, Lord, a chance to be
Our goodly best, brave, wise and free,
Our goodly best, for ourself, and others,
Till all men learn to live as brothers.

(This ancient prayer was found on the wall of an old Inn in Lancashire, England.)

Egmont To Build Ranch Home

Calgary, Aug. 2. —Modern country estate home to replace a $25,000 one destroyed by fire last February will be constructed by the earl and countess of Egmont on their farmstead a few miles south of Calgary.

Alberta's rancher earl and his wife who recently returned from a visit to the ancestral estate in England, plan to live in the ranch home until 1940 when Viscount Perceval, their son and heir, becomes of school age. He will then be taken to school in England. The viscount will be six years old Aug. 17, 1940.

"Ports of Call"

The Alberta Wheat Pool will present a half hour radio program, "Ports of Call" from Calgary station CFAC and Edmonton station CJCA on Sunday evenings at 7:30, commencing August 7th.

"Ports of Call" is one of the finest transcribed programs ever prepared for radio listeners. Each program dramatizes a different country, its history, personalities, and current events, with a background of the music of that contry. Not only is the program of high entertainment value, but its educational feature is bound to attract a large audience.

In bringing "Ports of Call" to the radio audience of this province the Alberta Wheat Pool believes it is making a contribution to the co-operative movement.

Pool members, patrons of Alberta Pool Elevators and others interested in the co-operative movement are asked to tune in at the above mentioned stations at 7:30 Sunday evenings.

They Found What They Wanted To Know

Winnipeg, August 1.—Dozens of letters, ranging from enquiries of small boys for literature describing the new Lockheed 14's to highly technical correspondence relating to modern aircraft equipment, are on the files of Trans-Canada Air Lines at Winnipeg. But T.C.A. officials have yet to be faced by a problem similar to that which stumped Imperial Airways' headquarters in London.

The other day a letter arrived written in a dialect which even the best experts could not decipher. Even the aid of foreign consulates was invoked in vain.

In desperation, prompted by the fact that the letter might be from a prospective passenger or shipper, it was turned over to a firm specializing in little known languages. After days of struggle, and after the cost of translation work had run into a sum of several pounds, the writing was finally recognized as an obscure Slavian dialect. And all that the letter contained were the words:

"Dear Sir: I beg to apply for a position with your company as a laborer."

Judicious Advertising is a Good Investment

Alberta Agricultural Report NO. SIX

Issued by Alberta Department of Agriculture, for the Period Ending July 30th, 1938

Crop conditions throughout most of the Province continues to be optimistic, according to the sixth crop report issued by the Alberta Department of Agriculture under the direction of Honorable D.B. Mullen, Minister of Agriculture.

A large portion of the drought area has prospects for a crop, if general rain falls within the next eight to ten days. Crop districts 2(Cardston), 4(Vulcan), 3(Brooks), 6(Rockyford and Olds) and 9 (Red Deer) report conditions excellent. The eastern part of crop district 7 has suffered from drought as in the vicinity of Empress, Foremost, and Chin Coulee area.

Some districts report all wheat headed and filling, whereas others indicate 60 to 80 percent headed. Over most of the drought area and in the area south of a line from Vermillion, Sangudo, Edson, the coarse grains are good to excellent. Native hay crops are yielding up to one and one half tons per acre, with Spear Grass seed ripened, and it is feared some danger may occur to the young lambs on this account. Pastures have maintained vigorous growth with the exception of drier parts as outlined above.

Crop reports from District 13, the greater part of 14, 15 and 16 do not have such good crop prospects. In these districts continued dry, hot weather has reduced the yield. Pastures are dried up and a feed shortage might occur. However, the season has not advanced sufficiently to clearly estimate this probability.

The irrigated districts of the Province has excellent crop prospects. Beet thinning has been completed. Slight damage is reported from Beet Webworm, but the application of Paris Green is checking this menace.

Grasshoppers are now flying, but a few isolated parts report grasshoppers still hatching. Farmers are being encouraged to continue to apply poisoned bait to reduce the number of eggs deposited. The forecast for Pale Western Cut Worms indicate two areas can expect severe crop damage, unless heavy spring rain occurs in 1939.

A plentiful supply of feed in the form of good pasture continues available for live stock, in practically all districts of the Province. Reports would indicate that all types of live stock are making good growth, and lambs and calves are doing very well. Markets are somewhat slow but prices remain steady. Buyers are looking for finished animals which are not very plentiful at the present time.

Some concern is felt in some districts over the out-break of sickness affecting horses. It should be most emphatically stressed that allowing horses to drink from sloughs at this time of year should be avoided.

Conditions in the Dairy Industry continue satisfactory, rainfall has been sufficient in most areas to maintain good pasture, and there is a steady increase in production. The estimated production of butterfat in cream for two weeks ending July 16th, is 20.5 per cent over that of last year. The production for the week ending July 9th, is 22.7 percent over the same period last year, and for the week ending July 16th, it is 20.7 per cent.

The poultry industry has enjoyed a profitable period, with the egg production lessening before the pullets produce. Eggs are now increasing in price. Broilers and friers find a steady market, however the spring chickens are now more numerous and a slight reduction in selling price is noted.

FOR SALE— Mower, good, $17.00; 2 steel frame hardwood Trailers, Sparton and Victor radios, Windcharger, Windmill, Connor, Westinghouse, Maytag Washers. Apply R. Heichon, Lindbrook.

CAR ACCIDENT NEAR PHILLIPS

(Viking News)

A car containing Mr. and Mrs. T. A. Stanyer, of Yakima Valley, Washington, their five children ranging in age from six to 13 years, and Mrs. Bader, mother of Mrs. Stanyer, overturned on the highway near Phillips about noon Thursday. All escaped injury except Mrs. Bader who was brought to Viking hospital suffering from a badly bruised shoulder and shock. The car, a large Oldsmobile, lurched into the ditch after one of the rear tires blew out. Both sides of the car were staved in, several windows broken and front lights damaged. They were on their way to Mosside to visit with relatives. We understand they were former residents of Bruce district.

REICH TO RETIRE JEWISH PHYSICIANS

Berlin, Aug. 4.—All Jewish physicians in Germany are to be deprived of "approbations"—licenses to practice—by an order published in the official Reichs-Gesetzblatt Tuesday night.

The order states that from Sept. 30th all such licences will become void. It is further stated that the minister of the interior may grant exceptions allowing Jews to practice "until further notice."

The order adds that in exceptional cases maintenance grants may be allowed Jewish physicians thus ousted from the profession provided they served at the front in the Great War.

The new order is described as being based on the Nuremberg racial laws, according to which Jews are only German "subjects", and do not have the status of a citizen.

[illegible] p.m.—Tofield.

KETCHAMOOT

(Continued from front page)

Sunday and spent the day at Elk Island Park. Those were: Mr. and Mrs. Nomeland and Torvel; Mr. and Mrs. Percy Sutton and family; Mr. and Mrs. J. Lerbekmo; Dr. and Mrs. Simpson; Mr. and Mrs. O. Barnes and son Douglas; Mr. and Mrs. Ralph Barnes; Mr. and Mrs. Coombes and family; Mr. and Mrs. Wm. Ingram; Mr. and Mrs. Sears and family; Mrs. Campbell and family; James Ingram and Frank Ratigan; Mr. and Mrs. Tollefson and family.

A pleasant afternoon was spent at the Lorne Lee home when the ladies of the district gathered to spend the afternoon with the bride. On behalf of the ladies Mrs. C. A. Ingram presented Mrs. Lee with a tea set and a purse of money. Those present were: Mrs. John and Roy Lee; Mrs. Geo. Lawson; Mrs. Davison, Mrs. Schultz; Mrs. Nomeland; Mrs. Lerbekmo; Mrs. W. A. Mitchell; Mrs. Leslie McGinitie; Mrs. John Brown; Mrs. Stanley Brown, Mrs. Thomas; Mrs. R. Ray; Mrs. C. A. Ingram; Mrs. Sears; Mrs. Wendel Wiley; Mrs. Albert Sutton; Misses Marguerite Whillans, Edna Sterritt; Hazel Sears; Edith Davison, Ethel and Esther [illegible], Marie, Evelyn and Nina Lawson, Kathleen Ingram; Margaret Mitchell; Maude Wildman; Nora Kenney; M. Melton.

Mr. and Mrs. Harold Smith and family of Vancouver came on Monday evening and will make their home with Mrs. Smith's parents, Mr. and Mrs. Geo. Lawson for the present.

A meeting of the Ketchamoot Provincial Youth Training Club was held at the home of Miss Kathleen Ingram on Friday, July 29th. Visitors were Miss Maud Wildman and Mr. Geo. Simpson. After the regular business a social time was had and a delightful lunch was served.

L.C.C. NEWS

The July meeting of the L.C.C. was held at the home of Mrs. A. Smith, Mrs. H. Logan [illegible] hostess. Twelve members and two visitors were present. Guests were Miss Eileen Best and Miss Margaret Cookson. The meeting was opened with the theme song and the roll call was answered by the most disliked household task." All the ladies were in favor of furnishing the lunch for dances held for the purpose of raising money for the community hall. Other ways and means of raising money was discussed. Mrs. A. Smith gave a reading on "Common accidents in the home."

A delightful lunch (including tarts) was served, after which all departed reporting having enjoyed the afternoon.

The August meeting will be held at Mrs. Joe Brown's, roll call to be answered by game or verses. Visitors welcome.

SILVER WEDDING CELEBRATION

On the evening of July 23rd a goodly number of friends and neighbors surprised Mr. and Mrs. H. H. Johnston, the occasion being their silver wedding anniversary. Everyone visited for a time, then joined in a few rounds of Bridge, after which a very nice lunch was served. Mrs. J. Wood read a short address and presented Mr. and Mrs. Johnston with a purse of money on behalf of all all friends as a small token of their esteem. All joined in wishing Mr. and Mrs. Johnston many more happy years of married life.

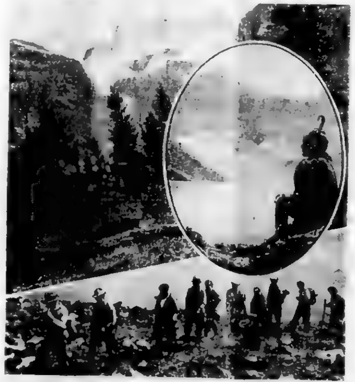
Hikers Take The Sky Line Trail



Peter Whyte, prominent Banff artist whose paintings grace many drawing rooms in Canada and the United States, will lead the Sky Line Trail Hikers of the Canadian Rockies on a most interesting four-day holiday this year to Larch Valley near beautiful Moraine Lake and the Valley of the Ten Peaks.

Plans have been completed for the annual outing, from August 6 to 9, of this unique organization which seeks out the loveliest spots in the Canadian Rockies and spends four healthy happy days on Shank's mare touring the valleys, alpine meadows, and rocky country above the timberline.

While hiking is a popular all summer sport at Banff Springs Hotels and Chateau Lake Louise, to the Trail Hikers goes credit for popularizing beauty spots off the beaten trails. Like explorers of old, they comb the country for vantage points to witness a spectacular sunset or sunrise, for camera shots to take back home as trophies, and for lakes where the trout bite freely. With a central camp in Larch Valley, the Skyline Trail Hikers of the Canadian Rockies will spend their official four-day outing in leisurely jaunts through this particularly interesting section of the Rockies. On the closing evening they will have a pow-wow and election of officers.

Bill Bailey Catches Live Beaver Near Town

Tuesday afternoon Mr. W. (Bill) Bailey caught a large beaver just east of town in the slough beside the railroad track. Due to the fact that the animal was evidently a stray and had it remained there would have been worried by dogs, permission was given to capture it. There is considerable conjecture as to where it came from, some people believing it came from the reserve north of town. Others that it escaped while some person or persons were transporting beaver from one place to another. Anyway Bill caught it and there has been a steady stream of interested persons to Bill's back yard to see it. It is quite large and probably a male. At time of writing its ultimate destination is uncertain. It may go to the Edmonton zoo or to a beaver ranch.

Its capture was of much interest as it is many years since a beaver has been caught around here. Many years ago there were quite a number here, the last colony, according to Frank Pruden, being captured about thirty years ago. This fellow appears to be in excellent condition and is docile in captivity.

Thank You, Mr. Gilchrist

EDITOR'S NOTE: We perhaps should be hung, drawn and quartered for publishing the following, but to a country editor a little praise is like old wine, it is apt to go to the head.

August 4th, 1938

Mr. W. Worton,
care Tofield Mercury,
Tofield, Alberta.
Dear Mr. Worton,

I have read with interest your Editorial contained in your issue of July 28th, and would like to congratulate you on an extremely well written, broadminded article.

We would say the farmers in your district are fortunate in having an Editor with such vision covering the welfare of Canada.

Agreeing with your Editorial, I could not refrain from writing our congratulations.

Yours truly,
J. M. GILCHRIST,
Vice-President Searle Grain Co.

BOARD AND ROOM For High School Students.—Apply Mrs. W. J. Bailey, Tofield. 27p

LINDBROOK

Haying is, or rather was, in full swing here until the recent rain, but then thats always the way, cut a bunch of hay and immediately "Jupe Pluve" pulls the shower cord.

Congratulations to Miss Irene Bailey, daughter of Mr. and Mrs. John Bailey of Lindbrook, on being the winner of a scholarship from the Vermilion school of Agriculture. It seems this particular one is given, one to the boy with the highest all round points and one to the girl winning the same, so Miss Irene must have been there with the goods to win this prize amongst so many competitors.

Mrs. J. Breegirdle and family have returned from their cottage at Cooking Lake after a month's holiday there. Mrs. F. Kortman enjoyed a brief holiday with them as their guest.

Mrs. J. Bailey and family have also returned from their holiday at Cooking Lake where they also had a cottage.

Mr. F. Evans, his niece, Miss Eileen Best and her brother Douglas, are at present on a trip to Athabasca, visiting relatives there.

The dance given at the barn of Mr. Gilbert Braaten last Monday in aid of funds for the Community Hall was a very enjoyable and successful affair, folks from far and near attending same. The Lindbrook orchestra supplied the music and at midnight a dainty but ample lunch was served, this being undertaken by members of the L.C.C. so no wonder it was good. The financial returns were good and a hooked rug that won first prize in its class at the Edmonton Exhibition, and kindly donated by Mrs. Arthur Gill, was raffled off, the lucky winner being Mr. McBratney of Tofield. The dance kept right on until the wee sma' hours, so you can imagine that it was a little bit of alright, and now, who's next.

The Sutton well drilling outfit have been busy around here of late several wells having been drilled and others cleaned out or re-drilled.

FRESH GROCERIES

FRESH TOMATOES— Per Basket	25c
BANANAS— 2 Pounds	25c

LOCAL & PERSONAL

Mr. Fred Martin of Duchess is visiting in Tofield. Friends will remember Fred when he was employed at the Tofield Service Station.

Mrs. Swift and Annie returned on Saturday after a few week's visit with Mr. and Mrs. Bill Swift at California. Annie returned to her duties at the Royal Alex hospital in Edmonton on Sunday last.

Miss Ella Taylor returned to the hospital in Edmonton after spending her holidays at her home here.

Miss Loret Ross spent the week-end in Edmonton.

Mrs. McCarthy is holidaying at Seba beach.

Stan, Les, and Norman Glover, Mr. McCarthy and Reg spent the week end fishing.

Miss Gwen Firth returned home from Edmonton after working there for some time.

Mr. Swift and Arnold and his niece from Edmonton and Aileen Allen are holidaying at Jasper.

Mr. and Mrs. Thompson of Leduc spent the week end visiting Lois Thompson here. Betty returned to Leduc after spending a week in Tofield.

Miss Mary Nahrebeski is spending a week in Edmonton.

Mrs. J. Letourneau, Goldie Jacobs and Pat Burnett spent Tuesday in Edmonton.

Miss Myrtle Bethel from High River is spending a few days at her home here.

Mr. and Mrs. E. Hardy, Mr. and Mrs. D. W. Jacobs, and Mr. and Mrs. J. O. A. Letourneau spent the week end at Lac la Nonne on a fishing trip. They encountered heavy rain almost all of the time but were successful in obtaining just over 100 fish.

Bert Lovel and Bobby returned from a visit to the coast this week.

Wheat Board To Guarantee 80c Minimum

Eighty cents per bushel for No. 1 Northern wheat delivered at Fort William is the price which has been fixed as the minimum price for the 1938 crop.

That is the fixed minimum price the Canadian wheat board is authorised to pay for deliveries of the crop now nearly ready to take off.

This was announced at the close of a cabinet meeting on Thursday last in Ottawa by Prime Minister Mackenzie King, who stated that the price had been recommended by the wheat board and approved by the federal government.

At the same time he indicated that there is to be no change in the marketing policy pursued by the wheat board and the government. Canadian wheat is to be offered for sale continuously and at world prices, and there will be no attempt to hoard the grain or to seek a monopoly.

Trade Minister Euler, chairman of the wheat committee of the cabinet said at the same time: "The milling and grain trade of the world are advised that notwithstanding the internal initial price of 80 cents a bushel the Canadian wheat board will continue its work of encouraging the use of Canadian wheat which will at all times be competitive on the grain markets of the world.

The chief grain commissioner of the Canadian wheat board, Mr. Geo. H. McIvor, said that farmers will follow the same procedure as in 1935 in selling their wheat to the board under the minimum set: that is, the farmer when delivering his wheat to the elevator will stipulate if the board is the purchaser or whether the grain purchasing channels and the tickets for the grain will be made out accordingly.

Horse Sleeping Sickness Less Severe Than In '37

Sleeping sickness is again appearing among South Dakota horses. Fewer cases have been reported than during 1937, but the season will last another six weeks. Vaccination with the tissue vaccine is giving somewhat better results than last year but less of the serum is being used. There is no treatment that is specific nor absolute but losses may be reduced by prompt recognition and proper care of the sick animal. The services of a veterinarian should be secured promptly.

The sick animal should be kept in a cool dark place and kept free of flies and mosquitoes. Working a sick animal is detrimental. Due to the high fever, the horse becomes greatly dehydrated and should be given in all cases, the horse will drink water if the water is held up to his head. He can not drink if the head is lowered. Veterinarians frequently pass a stomach tube to administer water.

Ice packs or cold water applied to the head seem to make the horse feel better. Rectal enemas will evacuate the bowels and some water will be absorbed. Any unnecessary noise or excitement should be avoided. The horse should not be drenched, because of the difficulty in swallowing. Saline solutions are sometimes administered through the veins. If an animal can stand most of the time it may be supported with a swing.

This disease is caused by a virus introduced into the blood by mosquitoes, causing an inflammation of the brain. The disease is not caused by bugs getting into the ear, or by eating weeds. Therefore nothing is accomplished by pouring hot lard, kerosene, turpentine or tar in the horse's ear except to cause an inflammation. Nothing is achieved by bleeding the horse except to weaken him that much more. Such treatments as vaccinating with hemorrhagic septicemia bacterin, influenza bacterin and hog cholera serum are pure quackery.— Pauliston Advocate, South Dakota.

Horse Disease Is Improving Talbot States

Sleeping sickness epidemic among the provincial horse population was reported on Wednesday by Dr. Percy R. Talbot, provincial veterinarian, as improving. "The situation is fairly good," he said.

Reports we are receiving from veterinarians throughout the province are that while the malady is still present, the horses are recovering.

He said that the situation in the Edmonton district was considerably improved and there was improvement also in rural areas.

Supplies of vaccine are being distributed for administration by veterinarians in various sections of the province.

A further supply of 6000 doses is expected to arrive from New York on Thursday.

Luther League Bible Camp at Camp Hastings

A very successful and well-attended Luther League Bible Camp was conducted at Lake Hastings July 27 – August 7. The Camp was sponsored by the combined Luther Leagues of the Camrose and Edmonton Circuits of the Norwegian Lutheran Church of America, and drew 90 young people as registered attendants besides a number of non-registered visitors. These came from many points within an area extending from Edmonton to Irma on the C.N.R. and from Edmonton to Camrose and Amisk on the C.P.R.

The camp site has been leased from Mr. Westlake and is located at Poplar Beach on the south shore of the lake. Two buildings, the kitchen and administration building and a bunk-house for girls were in readiness for use. A large tent served as chapel and classroom, and smaller tents as sleeping quarters. Thanks to fair weather it was possible to eat out-of-doors most of the time.

Forenoons were given to Bible and mission studies, the evenings to Inspirational Services and the afternoons to boating, swimming and other forms of recreation.

Camp Management

Dean of Camp, Rev. P. Lerseth, Rawlf; Registrar and Dean of Men, Mr. O. Stornnell, Edmonton; Dean of Women, Mrs. P. Anderson, Tofield; Field Supervisor, Mr. G. Loken, Rawlf; Camp Cook, Mrs. M. Rugland, Tofield.

Teaching Staff

Rev. I. Sangen, Pastor, Calgary; Rev. J. B. Stolee, Pastor, Viking; Rev. P. Anderson, missionary, Tofield; Mr. O. Stornnell, Student Pastor, Edmonton.

These Bible Camps aim to supplement the work of the Luther Leagues whose purpose is to "win and to hold our youth for Christ." To this end a thorough knowledge of the Christian Scriptures is essential. For "faith cometh of hearing, and hearing by the Word of Christ."

The young folks who gathered in camp this year were, on the whole, a serious-minded crowd, and a real spirit of understanding and fellowship prevailed. There were those who found Christ in the camp. There were those who became seekers after Him who is "the Way, the Truth and the Life." And still others who were led into fuller surrender to Him who said: "If any man would come after me, let him deny himself, take up his cross and follow me." (Mat. 16:24).

It is hoped that the camp may become an annual event.

AMISK CREEK

Mrs. B. Moen entertained the Ladies Aid Tuesday of last week. There was not a large crowd in attendance, but most of the members and some visitors were there.

On Sunday before last a shower was held for the newly married couple, Mr. and Mrs. H. K. Moen. They received many lovely and useful gifts from their many friends and relatives. A beautiful case of flatware was presented to them from the Y.P.A. of this district. Mr. and Mrs. H. K. Moen left the following morning for Hazeldoune, where Mr. Moen is attending an elevator.

Miss Ruby Berg returned from the coast on Friday, July 29th. She left again for Edmonton on August 1st.

This district has had some cases of the dreaded horse disease. Mr. Moen lost a valuable horse. Several horses seemed to recover from it.

Norman Patterson was camping with Frank Johnsrud at Lake View last week.

Born: To Mr. and Mrs. D. Dordock on August 6th, a daughter.

Mr. A. Erickson returned from the States last Saturday.

Mr. and Mrs. J. Jacobson and Mavis, Mr. and Mrs. A. Patterson and Grandma Moen, Anna and Gladys Berild were visitors at the E. A. Moen home last Sunday.

Miss H. Annabe spent several days in the city last week.

Mr. and Mrs. R. O. Berg and Alice and little Iona Kjelland visited at the B. Helgeland home last Sunday.

Mrs. P. O. Flaaten returned from Viking Wednesday of last week.

Mr. and Mrs. J. Berild called at the P. Flaaten home last Friday.

Rexall Milk of Magnesia

When your family needs an alkalizer, a laxative or both, they'll welcome the Milk of Magnesia with the better flavor. Rexall Milk of Magnesia combines gentle laxative action with effective alkalizing properties, thus tending to relieve acid-indigestion and constipation in a single dose.

Your first taste will reveal what chemical and microscopic tests prove—that Rexall Milk of Magnesia is free from the chalky-tasting substances that make so many brands of Milk of Magnesia unpleasant to take.

Buy it at your Rexall Drug Store. We also handle Rexall Milk of Magnesia tablets which you will find handy when away from home.

Discovery Of Prairies Will Be Commemorated

St. Boniface, Man., August 8—Western Canada will observe the second centenary of the discovery of the great plains by de la Verendrye by means of an extensive program of events which will include the unveiling of a monument to that gallant explorer. The celebration will take place early in September and will include [illegible] pageants, processions, exhibitions of appropriate material and religious ceremonies. It is anticipated that the gathering will be greatly augmented by groups from other parts of Canada. Plans have been completed for the [illegible] excursion from Montreal [illegible] Canadian National Railways.

Pierre [illegible] la Verendrye, discoverer of the West, is one of the great figures of Canadian history. A native of Three Rivers, he first established [illegible] a reputation as a capable soldier. Later he became a fur trader and then was fired with the spirit of exploration. This led him to [illegible] great adventure which [illegible] the great lakes [illegible]. He died in 1749 at the age of 64 to terminate a crowded life which left many entries on the pages of Canadian history.

Searle Precipitation Report

(Compiled from [illegible] rain gauge reports)

The rainfall situation in Western Canada shows very little change from last week.

Taking into account the precipitation which occurred last autumn during the months of August, September and October, and the rains which have fallen this year from April 1st to July 31st, inclusive, and weighting for wheat acreage, it shows the moisture condition for the three Prairie Provinces on July 31st to be 87 per cent of normal, as compared with 88 per cent last week.

The moisture condition for Alberta on July 31st was 90 per cent of normal which is unchanged from a week ago.

For Saskatchewan the condition on July 31st was 86 per cent of normal, which compares with 87 per cent last week.

For Manitoba on July 31st it was 85 per cent of normal as compared with 84 per cent of last week.

For Tomorrow's Dessert

Yesterday's crumbs are tomorrow's dessert, if you know the bit of magic that works the transformation. Just add the crumbs with a pinch of this and a shake of that, to sweetened condensed milk and, presto change! a batch of delectable cookies to serve with ice cream, fruit or a frosty beverage. These recipes are failure proof, too, and take little time or trouble in the making.

* * * * * * *

Chocolate Crumb Cookies

2 squares unsweetened chocolate
1 1-3 (1 can) sweetened condensed milk
1 cup toasted bread crumbs
Few grains salt
[illegible] cup walnut or pecan nut meats
24 walnut or pecan halves optional

Melt chocolate in top of double boiler. Add sweetened condensed milk and stir over boiling water 5 minutes until mixture thickens. Add toasted bread crumbs, salt and nut meats which have been chopped. Blend thoroughly. Drop by spoonfuls on buttered baking sheet. Press half a nut meat into each cookie if desired. Bake in moderate oven (350 degrees F.) 10 minutes or until brown. Remove from pan at once. Makes about 24.

* * * * * * *

Magic Date Crumbles

1 1-3 (1 can) sweetened condensed milk
[illegible] cups graham cracker crumbs
1/2 pound (1 cup) pitted dates
1 teaspoon cinnamon

Blend together sweetened condensed milk, graham cracker crumbs, chopped dates and cinnamon. Drop by spoonfuls on buttered baking sheet. Bake in moderately hot oven (375 degrees F.) 15 minutes or until brown. Remove from pan at once. Frost some with chocolate frosting if desired. Makes 36.

FOR SALE—Shed at rear of Variety Theatre. Apply Jim Campbell, Tofield.

BOARD AND ROOM For High School Students.—Apply Mrs. W. J. Bailey, Tofield. 27p

---

While the moisture condition has been more or less maintained, unfortunately other damage to crops has occured. There has been considerable amount of hail over large areas and reports of rust and grasshoppers still persist.

THE WORLD OF WHEAT

* * * * * * * * *

By H. G. L. Strange, Director "The Crop Testing Plan."

Popular Delusions and Amazing Absurdities! Such are the extraordinary beliefs that the student of history finds have been held by large numbers of people at various times throughout the ages.

In Canada, for instance, only a short time ago, it was seriously contended "That the climate over the Prairies had changed, that the desert was marching northward, that the drought was permanent, and that never again could we expect normal rainfall." Another statement was: "That even though it rained the land would not produce good crops as it had done in the past, because farmers stupidly had robbed the soil of fertility and fibre."

Yet last autumn, once again normal rainfalls occurred, and over large parts of the West, particularly in the drought areas, abundant rains have fallen so far during this growing season.

In addition, the soil in the drought areas, that many said had lost its fertility and fibre, is again growing a splendid wheat crop.

The truth is, that over a term of years climate does not seem to change, and that given normal rainfall average yields will certainly be produced. Also it seems that prophecies about rainfall and yields are misleading, futile and vain.

Following factors have tended to raise price:

Hail and grasshoppers cause further damage in Western Canada—Greece buys Danubian wheat—France to store wheat for military supplies—Japan and Russia clash on border of Manchukuo—Unsettled political conditions in the Far East—Unfavorable advices from Russian spring wheat territory.

Following factors have tended to lower price:

International Institute of Agriculture expects largest northern hemisphere wheat crop since world war—Large rye crops in Poland, Russia and Balkan States—Holland raises import levy on cereals—Greece resells Australian wheat—Expect wheat crop in the United Kingdom much larger than last year.

Perhaps Betty Has Quit School

AND THE Faithful Pony has no more work at your place. If so, it is a sure bet that there are other children that need a school pony. A "FOR SALE" or "WANTED" advertisement in the Mercury would more than likely be of service to you, whether you have a pony to sell or are just about to need one. The same thing of course applies to anything you need or have to sell. Look around your place, there is likely something that is worth real money and which someone else is needing. CLASSIFIED ADVERTISING RATES ARE LOW—One week 50c.; two weeks 75c.; four weeks $1.00. There is a generous allowance of 30 words.

Continuance Of Wheat Preference Urged By Exchange

Grain Men Advise Government that Kingdom Preferential Tariff Aids Wheat Sales

Urging that the preference accorded to Canadian Grain imported into the United Kingdom under the Ottawa agreements of 1932 be maintained the Council of the Winnipeg Grain Exchange has sent a letter to Prime Minister Rt. Hon. W. L. McKenzie King and members of the Dominion Government stating that the immediate interests of Canadian farmers will be best served by continuance of the preference.

In advocating continuance of the Preference the Exchange, in its letter said:

"The favorable crop prospects for the current year in Canada, the United States and other countries, including some of the importing countries, indicate that there will be a considerable world exportable surplus in excess of the world's immediate import requirements, reduced as they have been in recent years by the stringent restriction of imports involved by European importing countries in the endeavor to stimulate their domestic grain production and render themselves so far as possible self-supporting in essential foodstuffs.

"The marketing of the exportable surplus of Canadian grain during 1938-39 will require every effort of those concerned, apart altogether from any consideration of methods of marketing, and the moment would therefore seem to be entirely inopportune to increase the competition which Canadian grain must meet in the United Kingdom market by abrogating the British preference. Whatever benefit may have accrued to the Canadian grain growers from the operation of the British preferential arrangements ought not to be sacrificed at this juncture in the desire, however laudable in itself, to encourage trade between Great Britain, Canada and the United States, especially in view of the possibility of such sacrifice resulting in the accumulation of a new surplus of unsold grain with its resulting effect in depressing grain prices during future years.

"Since the establishment in October 1932 of the preference in favor of Empire grain imported into the United Kingdom the percentage of United Kingdom imports of Canadian grain and flour to total imports has risen appreciably. While it is true that this increase has been partly due to crop failure in other countries, it is also true that the barriers to the sale of Canadian grain in net importing countries have been increased. It is, therefore, imperative that every possible incentive to the sale of our grain should be utilized during the forthcoming crop-year. The United Kingdom is the largest single market for Canadian wheat and any interference with existing marketing conditions there may have harmful effects in Canada, and may neutralize the efforts to reduce the costs of living and production on the farm.

"The Council of this Exchange has always believed, and still believes, that the maintenance of open markets and free competition in the marketing of grain and grain products will, in the long run, produce the highest prices available to Canadian producers under normal conditions of world supply and demand. But access to overseas markets has been considerably curtailed, and monetary difficulties and exchange agreements have resulted in interference with the free play of competitive factors. Pending the recognition by consuming countries that production of other agricultural products essential to the balanced nutrition of their populations, cannot be maintained indefinitely, the Council feels that the immediate interest of Canadian grain growers will be served by the continuance of the United Kingdom preference to Empire grain and grain products.

"The Council recognizes that, subject to the operation of existing agreements, to the modification of which the consent of the Canadian government would be required, the granting of a free market for Empire grain and grain products in Great Britain, while similar commodities from non-Empire sources are subject to import duties is primarily the concern of the British government and people. It does, however urge upon the Canadian government the desirability of doing everything possible to prevent the discontinuance of this preference until such time as conditions favorable to the sale of Canadian grain and grain products in European countries normally requiring such imports have been restored and Canadian producers have been enabled to produce grain at the lowest possible cost and to sell their products, without artificial assistance, in competition with those of other exporting countries."

Nature's Plan Of Teeter - Totter

By William MacMillan in the Forest and Outdoors

The delicate manner in which Nature checks and balances the increase [illegible] decrease, of her multitudinous [illegible] has long been noted by the [illegible] conservationist.

Few species remain in a stationary [illegible], as far as numbers are concerned. They are either continually [illegible] or decreasing. And while [illegible] temptation to charge the [illegible] hunters with the crime [illegible] destructive of certain [illegible] the fact remains that most [illegible] animals live in more or [illegible] cycles of increase and [illegible]

It is now generally admitted by [illegible] making a close study of the [illegible] that overcrowding, disease, [illegible] food automatically [illegible] numbers and keep them [illegible] interlocking cir[illegible] the animals to [illegible] these advan[illegible] increase their [illegible]

[illegible] the numbers of [illegible] animals and their peaks of abundance have always interested and challenged the scientist. [illegible] man only knew [illegible] of the larger an[illegible] of the small[illegible]

[illegible] ptarmigan. Wolves [illegible] content with mice [illegible] the caribou and the [illegible] of nature seems in [illegible]

[illegible] of wild life is [illegible]

[illegible] Darwin [illegible] cats had to be [illegible] of all things, [illegible] depends on [illegible] for fertilization. The abundance of bumble-bees depends, in a large measure, on the field mice which, incidentally, feed on the nests of bees. The number of field mice [illegible] the number of [illegible] that the [illegible] more abundant near [illegible] to the advantage of [illegible] of the clover.

It is difficult to say which is the [illegible], annihilating [illegible] foreign ones [illegible] unsuspecting country.

While there are undoubtedly exceptions to every rule it is generally conceded that so evenly balanced are the [illegible] animals [illegible] the addition [illegible] to disrupt that fine balance and play havoc with more than one innocent animal.

[illegible] who in a [illegible] introduced rabbits [illegible] Australia have foreseen the disastrous results of his experiment [illegible] suppose that [illegible] abandoned [illegible]

[illegible] Australians give them a stronger name than that—due to the economic life of that country is astounding. It is figured, for instance, that since half a dozen rabbits can eat about the same amount of grass as a full grown sheep the millions of rabbits [illegible] unmolested, would [illegible] every blade of grass in Australia.

[illegible] annihilation of a species has far reaching consequences. Not only is it complete, but the lives of both flora and fauna in the immediate vicinity are affected for years to come.

A rather remarkable illustration of this was to be found in the shortage of clams suddenly discovered by pearl button manufacturers some years ago. And what you ask has pearl buttons to do with clams and the annihilation of a species? A whole lot. Because, you see, it is from clams that the manufacturers obtain their buttons. Investigation disclosed the fact that [illegible] fishermen had recklessly depleted the supply of [illegible] feeding fish, such as [illegible] and the like, thus unwittingly destroying the clams that pass part of their lives attached to them.

Canadians, as a whole, fully appreciate the value of wild life in the confines of the Dominion and heartily endorse both the conservation and the establishment of game sanctuaries. In every community however, there still remains a certain number who if not actually engaged in promiscuous slaughter are ready to do so if restraint is removed. And no wild thing is safe until such as these have been convinced of the reasonableness of conservation.

Price-Fixing In New Zealand

The scheme of a guaranteed price fixed by the government for export dairy produce is to be retained in New Zealand. This decision was announced by the Prime Minister following the rejection of the National Dairy Conference of the government's offer of an independent tribunal to fix prices. The Conference urged the appointment of an advisory body. The price-fixing scheme appears so far to have been more successful with butter than with cheese. Exports of butter rose from 2,780,-500 cwt. for the 12 months to 31st October, 1936, to 3,049,190 cwt. for the 12 months to 31st of October, 1937. The value for these two periods was £15,422,572 and £16,610602 respectively. Exports of cheese however, rose only from 1,644,136 cwt. to 1,688,010 cwt., though the value rose from £4,809,175 to £5,560,914. For the 1936-37 season there was a deficit of £550,000 on sales made by the Crown (which has full responsibility for marketing produce after acquiring it from the producers). For the current season the basic price of both butter and cheese have been raised.—International News Service.

Six Per Cent Interest For 5 Years Is Granted By Mortgage Companies

Sweeping reduction of interest is being offered by mortgage and other companies operating in this province which will mean an estimated saving of $8,000,000 to Alberta farm debtors.

Sign-up of new farm mortgage agreements on a six per cent interest rate for a period of five years, instead of seven and eight per cent rates that prevailed formerly, is in full swing.

One leading mortgage company is reported to be making the renewal agreements for a 10-year period.

Declaring that they failed to get anywhere after seeking the co-operation of the provincial government in negotiating a debt reduction scheme along the lines of one brought into operation in Saskatchewan in 1936, mortgage firms and also insurance companies with large investments in Alberta have taken the initiative themselves in reducing the burden of Alberta debtors.

The mortgage holding companies are not making a general reduction of interest rate. Instead, they are offering new renewal agreements which cut the maximum interest rate to six per cent until 1943.

One large company reported that since the new agreements were made available some weeks ago, fully 50 per cent of the debtors approached have signed up. Others stated that there was a good response but they were not in a position to give any percentage figures.

An official of one company stated for example, that out of 40 new agreements offered on a trip through the Edmonton district, 31 had been signed up. Of the remainder, some debtors were absent, others wanted more time to consider while a few rejected the offer.

In February, 1937, mortgage men recalled, they proposed to the Alberta government that the interest rate on farm mortgages in this province be reduced to six per cent, taking effect from Jan. 1 of that year.

Concessions also were to be allowed where there was an undue accumulation of interest arrears on account of crop failure. In addition, special treatment was proposed for districts which had been hit by successive crop failures.

The mortgage association expressed its willingness to put into effect in Alberta a farm mortgage adjustment plan similar to what had been adopted in Saskatchewan and Manitoba.

Nurse In Lung Making Fight: Another Case

CALGARY, Aug. 6— Another case of infantile paralysis, the eleventh since mid-July, was reported at Turner Valley, oil field centre southwest of Calgary, Friday night.

The victim was a 12-year-old girl. Her left arm was partially paralyzed.

No change was reported in the condition of a 23-year-old nurse who lies in an "iron lung" at her home near the town of Turner Valley. "Just fair" was the report last night.

In the north, at Rocky Mountain House, doctors held out hopes for the recovery of Glen Magoon, rural mail carrier, stricken this week. His son Verne, 11, was well on the road to recovery.

Since the dread disease made its appearance in Alberta in early July two deaths have occurred, one in Calgary, a patient from a rural district and one at Edmonton.

ROADS—

SO LONG AS people travel from one point to another, roads are necessary, and the quality of roads important. And the quality of roads, like the quality of everything else is largely, but not entirely, governed by the amount of money paid for them. No one complains of good roads as such, rather there is a continual demand for them. Any complaint arising from good roads is due to their cost, firstly as regards construction and secondly as regards maintenance. There are of course, roads and roads. Those upon which the traffic is such as to demand hard surfacing or gravelling, with the high cost associated with them. These are invariably associated with government highways and need not be considered here. Those that interest us most are rural municipal roads, trunk roads and side roads.

Rural road building, like every other form of endeavor, has, during the past two decades, undergone a transformation. The type of road construction which was suitable for the buggy and wagon travelling at moderate speed, is inadequate for automobile and truck. Take for instance the fall of the year when grain hauling is in full swing. It is common to see truck after truck, grain laden, rushing toward elevators. The passage of any one of these, as regards wear and tear on the road, is equal to quite a number of wagons travelling along at a walking pace. What this really means is that, to the advantages of truck haulage must be added increased cost of roads. There is a gasoline tax which takes care of haulage on highways, but there is no gasoline tax within municipalities. The same argument applies, but in a different way, to the passenger automobile. Here the punishment to the road is not as great but the need for smooth riding is greater.

One of the problems of rural councillors is to provide roads, suitable for present day traffic, yet within reason as to cost. It would be possible technically, within a year or so to have roads in this municipality equalling those in New York State. But it would be hopelessly impossible financially. Consequently all rural councillors are faced with the problem of providing roads of as high a standard as possible, at the same time keeping within their particular district's ability to pay.

For some years now the Cornhill Municipal District Council has given road construction and maintenance much consideration. In a sense, among rural municipalities it has pioneered its way into a better and more improved type of road construction. In doing so it has been subject to much criticism, some of it justified, some of it unjustified. But we are satisfied that the council have approached the problem of road construction in a serious manner, with a thought not only for the immediate present but also for the future. When municipalities are first organized, considerable roadwork is done by ratepayers working out a portion of their taxes. This is a very convenient arrangement because farms are generally only partially developed and incapable of producing at their maximum capacity. Then tax money saved by road work is a real boon. But as the years roll round and farms become more and more developed with a greater demand for attention, there is a corresponding less need for taxes to be partly paid by road work. Of course the wish to do so may remain and in individual cases the need may be as great as ever it was. But generally speaking, as a district becomes more and more improved, the revenue from each farm shows an upward trend and the need to work out taxes become correspondingly less. There was one weak link connected with ratepayer road work. It was not always uniform, it was not always efficient and the municipality as a whole did not always receive full value for money expended. Moreover, while ratepayers were compelled to use horse equipment, good enough in an earlier era, there was developing, due to the steady increase of motor vehicles, a demand for more uniform and a better type of road. It was also found that after quite a number of years of the hit and miss system of road building, very few miles, if any, of really permanent road existed. This was due to two factors, one that the roads were constructed for a horse and buggy age; two, that prairie dirt roads, however well constructed, will go to pieces under the stress of all weather present day motor traffic.

This was the condition of affairs in 1935 and 1936 when the purchase of the big grader was under consideration. This was a big undertaking, and much serious consideration was given it before the purchase was made. It can be said here that while councillors as a matter of policy put on a bold front at annual meetings, they are not always so bold when deliberating in council. It is the ratepayers' business they are doing and the responsibility is recognized. Anyway the purchase of the elevating grader ant later a caterpillar tractor was made. There was quite a wave of criticism, based on the fact that the purchase would result in a raise in taxes and also that a number of ratepayers who desired to work on the road would be prevented from so doing. The criticism was quite justified. Taxes have been raised and some ratepayers who formerly were able to work out a portion of their taxes have been unable to do so. But there is another side. Despite the criticism levelled against it, the elevating grader is in constant demand during the working season. And in addition to the regular program of work laid out for it, special work under government contract was, or is being done. This necessitated two shifts. In the three seasons that the big grader has been out, approximately 50 miles of trunk road has been built and it is expected 15 more miles will be done this season. To the man on the side roads this probably does not mean very much, but it should be remembered that in each division a certain amount of side road work is done each year, and that to travel to any central point within the municipality, almost every ratepayer has to travel over a portion of a trunk road. It is fairly well agreed that yard for yard, the big grader will move dirt more economically than under the old system of men and horse labor. It is also fairly well agreed that the big grader will do a better and more finished job. It is again also fairly well agreed that this improvement is arrived at through immediate increased expense to ratepayers. We say immediate, because we feel that some such move would have to be made sooner or later. Increasing interest on the part of other municipalities is evidence of this. Whether or not the purchase of the big grader and caterpillar tractor will be fully approved by the ratepayers, depends altogether upon the value they place upon a good roads program.

Earlier in this article it was said that no matter how well ordinary dirt roads were built, under the stress and strain of modern motor traffic under all weather conditions, left unconditioned, they soon went to pieces. Maintaining constructed roads has always been a problem. The municipality possessed a grader and planer and using these the cost of maintaining ranged from $1.80 to 80c a finished mile. Some maintaining has been done at 60c a finished mile but this was subsequently raised to 80c. The equipment the municipality possessed was becoming more obsolete each year and moreover was not doing either the quantity or quality of work the council desired. When considering the purchase of the new maintainer patrol several factors were taken into consideration. Perhaps the most important was that the use of a modern road construction unit called for the use of a modern maintaining unit, bringing about a reduction in the cost of and improvement in the quality of road maintaining. The fact that maintaining equipment the municipality already possessed was, due to general increasing interest in more modern road machinery, rapidly depreciating in value. And most important perhaps, was the spectacle of road already well constructed, going to ruin because of lack of adequate maintaining.

The purchase of the maintaining patrol was made advantageously. That is to say, that for the balance of this season the municipality have the use of the unit for nothing. A good trade-in price, $900 was obtained for the old grader and planer, and the first cash payment becomes due May 1st, 1939. The deal was as follows:

Price of road maintaining patrol	$2795.00
Less allowance for grader and planer ...	900.00
	$1895.00
Payment due May 1st 1939	395.00
Leaving	$1500.00

to be paid in three equal installments commencing December 15th, 1939, at 6 per cent interest.

The embarkation upon a long term good roads program on the part of the municipality will be viewed differently by ratepayers according to their temperament, location, and the kind of farm they are working. To the man living on or near a trunk road the advantages should be immediate; to those living farther back, a longer wait is necessary. To those actually needing the assistance of road work to enable them to pay their taxes, modern road construction and maintaining is not so good.

To the councillors it is a problem of providing the most good road service for the least amount of money spent, keeping in mind the element of time and ever changing conditions.

Summer Oranges For Summer Days

Out in California the summer oranges, known as Valencias, prove the adage that appearances are often only skin deep.

The sweet juicy Valencia orange is not as golden colored as its winter cousin, the Navel. Indeed as it matures it often assumes a greenish tint. Why this is so has not yet been explained by botanists and the phenomenon is often called the "green tinged mystery." The flavor and juiciness of this fruit, therefore, belies its complexion.

The summer diet requires large quantities of fresh fruits and vegetables to meet the demands put on the body by high temperatures and rapid loss of fluids and mineral salts through the skin.

Oranges not only provide the necessary liquid needed by the body, if generous amounts are consumed daily, but they fit into menus 'round the clock: orange juice for breakfast and other meals of course; an orange and seasonal fruit salad plate for lunch; and fruit cup for dinner or supper.

Blind Girl Sticks To Her Dog and Leaves England

LONDON, Aug. 6—Blind Hazel Hurst, 22-year-old American lecturer, sailed back to the United States Friday night after spending 10 minutes on English soil from which the government barred her faithful dog guide "Babe."

The ministry of agriculture refused to allow Miss Hurst's dog to enter the country without the usual six months' quarantine. Miss Hurst, rather than travel without her "eyes" abandoned plans to spend several months here visiting and lecturing.

Shortly before her ship, the American Merchant, sailed last night, the ministry of agriculture relaxed its regulations enough to allow her a brief stroll with her dog through the dingy Thames docks of East London.

The ministry refused to waive its rules to allow "Babe" unlimited free entrance, despite Miss Hurst's appeals during the week to the King, President Roosevelt and Joseph P. Kennedy, United States ambassador.

TESTED RECIPES

* * * * * * * * *

By Betty Barclay

One of my best recent "finds" in easily prepared but delicious dishes, a Chicken Mousse, is a salad that is also a favorite of one of the most famous chefs in the world. He is Gaston Magrin, premier chef of the world's largest ocean liner, the S.S. Normandie. His recipes produce food that world travelers look forward to enjoying when anticipating a trip, and always remembered afterward.

His salads would delight the eye and palate of any housewife in any land, I am sure.

The recipe I chose, and which he permitted me to pass on to my readers, is made with a prepared salad gelatin found on the American market, so I knew it would be easy to make. The speed with which this dish always disappears shows that it tastes just as good as it sounds and looks.

* * * * * * * *

Chicken Mousse

1 package salad gelatin (aspic)
1 cup boiling water
3/4 cup cold water
1/2 teaspoon salt
1 1/2 cups finely chopped chicken
1/2 cup mayonnaise
1-2 teaspoon paprika
1-2 cup cream, whipped

Dissolve salad gelatin in boiling water; add cold water and salt. Chill until it begins to thicken, then gradually beat in mayonnaise and paprika. Fold in chicken and whipped cream. Mould and chill until firm. Unmould and garnish with stuffed olives, watercress or other salad greens. 10 servings.

Jellies And Jams

Berries to the right of us, berries to the left of us, berries all around us. And in a little while there won't be any at all. But, if you're clever, you can make the berry season last all year around. Simply convert these delicious and colorful fruits into jams and jellies. They'll look perfectly beautiful "put up" in bright, shining glasses. And they'll taste marvelous with breadstuffs and meats of all kinds.

Besides, making jams and jellies is as easy as a snap of the fingers if you use the recipes given here.

* * * * * * * *

Blackberry Jelly

4 cups (2 pounds) juice
7 1/2 cups (3 1/4 lbs.) sugar
1 bottle fruit pectin

To prepare juice, crush thoroughly or grind about 3 quarts fully ripe berries. Place in jelly cloth or bag and squeeze out juice.

Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire and at once add fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard 1/2 minute. Remove from fire, skim, pour quickly. Paraffin hot jelly at once. Makes about 11 glasses (6 fluid ounces each.)

* * * * * * * *

Red Raspberry Jam

4 cups (2 lbs.) prepared fruit
6 1/2 (2 3/4 lbs.) sugar
1/2 bottle fruit pectin

To prepare fruit, crush or grind about 2 quarts fully ripe berries. Measure sugar and prepared fruit into large kettle, mix well and bring to a fully rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Remove from fire and stir in fruit pectin. Then stir and skim by turns for just 5 minutes to cool slightly, to prevent floating fruit. Pour quickly. Paraffin hot jam at once. Makes about 10 glasses (6 fluid ounces each).

First Wheat Delivery

The first delivery of wheat in Alberta this year reached the Alberta Pool Elevator at Purple Springs on Monday, July 25th. Harry Hart, farmer of that district, delivered two loads of winter wheat. R. B. Evans, the Pool agent, reports the wheat was a good sample and graded One Alberta Red Winter.

On Tuesday, the 26th of July, the Alberta Pool Elevator at Grassy Lake received delivery of a load of spring wheat.—Wheat Pool Budget.

Provincial Track And Field Meet On Labor Day

The 1938 provincial track and field meet of the Alberta Branch of the Women's Amateur Athletic Federation of Canada will be held under the auspices of the Edmonton Ladies Athletic Club on Labor Day, to take place in Edmonton's new $50,000 stadium.

Particulars of the meet and entry forms can be obtained from Miss Juanita Lawrence, secretary, 99311—104th Ave. Edmonton.

Bad Eye Offer Awes Easterner

WINDSOR, Ont., Aug 6—G. Hudson Strickland of Windsor was dumbfounded when he received a wire from a relative reading: "Poisoned eye will arrive in Windsor tonight." The relative arriving here, explained he telephoned the message saying, "Boys and I will arrive in Windsor tonight."

WEDDING

GALLINGER—McGARVEY

Three o'clock on Monday afternoon was the hour chosen for the interesting mid-summer ceremony solemnized in the west end home of Mr. and Mrs. E. F. McGarvey when their eldest daughter, Dorothy, and Wilbur C. Gallinger, only son of Mr. and Mrs. Claude Gallinger, also of Edmonton, pledged their vows of marriage.

Hearth Ceremony

Dr. William M. Grant officiated at the pretty ceremony performed in the [illegible] living room [illegible] wedding [illegible]

In Petal Pink

Miss Jean McGarvey, sister of the bride, was bridesmaid, and was dressed for the occasion in a summer gown of pale pink chiffon. [illegible] and shirred bodice with plain draped skirt were features of the frock and toning in with the dress was the bouquet of sweet peas and tiny blue forget-me-nots she carried. She wore a tiny cap of flowers on her head.

Mr. E. R. R. Field was groomsman and during the signing of the register, Mr. F. F. McGarvey, father of the bride, sang appropriately "Oh Promise Me."

Mr. Herbert W[illegible] played the wedding marches and accompanied the singer.

Fifty Guests

Fifty guests were entertained in the home following the simple ceremony, and to receive her guests, Mrs. E. F. McGarvey was gowned in flowered chiffon over gold. Her jewelry was of old gold [illegible]

Mrs. Claude Gallinger, mother of the groom, chose for the occasion a smart gown of blue lace and wore a corsage of pink roses.

Ivory tapers in silver candelbra lighted the daintily appointed bride's table from which tea was served. Sweet peas in pink and white and lilies-of-the-valley were the floral decorations for the table, on which was placed the lovely [illegible] wedding cake bedded in tulle.

Toast to the bride was proposed by Dr. H. G. Taylor of Calgary, who was a visitor for the occasion.

Motor Trip

Later in the day the bride and bridegroom left for a motor trip to Eastern Canada and the United States, to be gone about six weeks.

On their return they will take up residence in Tofield. To travel the bride was dressed smartly in a frock of rose, with smart tweed top coat and accessories in black.

"No, no," was the reply, I canna afford to deal wi' middlemen."—Co- [illegible] & Market News.

"Crime School" The Picture Coming Tuesday

A picture of the tragedy of youth, of "Dead End" kids is the feature coming to the Variety Theatre next. The picture deals with methods of correction which fail to correct, but rather make bad matters worst. Arranged around a story of intense interest the lives and searing experiences of certain classes of youth are laid bare. It is a startling exposure of a form of life generally unrecognized by America's teeming millions. There will be shown schools with barb-wire classrooms, teachers with cruel whips, pupils with scarred backs and hearts, and lessons in ways to make crime pay.

Grain Men Wish Government Able Fix Higher Price

Policy of Aiding Agriculture in times of adversity is approved

In an interview relating to the guaranteed minimum price of 80 cents for wheat announced by the Dominion Government, C. E. Hayles, President of the North-West Grain Dealers' Association, said:

"The members of the North-West Grain Dealers' Association are pleased to note that the Dominion Government has recognized the principle that, in the face of adverse international and national conditions, the economic position of the Western farmer is entitled to federal support, even at the risk of loss to the Dominion Treasury.

We wish, however, that the Dominion Government had been able to guarantee a higher price."

Paralysis Attack Invariably Sudden: Symptoms Quoted

VICTORIA, August 8—The onset of poliomyelitis is usually rather sudden. The common history is that a healthy child becoming suddenly ill with fever, headache, a feeling of drowsiness and soreness of the muscles. There is usually a loss of appetite, a lack of interest in the surroundings and the child is apt to appear irritated and to cry easily when disturbed.

Vomiting and constipation may occur. Often the characteristic symptom of cold or sore throat are present.

As these early symptoms are more or less characteristic of any acute infection to make a definite diagnosis without an examination of the spinal fluid which is obtained by the physician by means of a slight operation (Lumbar puncture).

On examination of the child, there may be stiffness of the neck or spine, or resentment at attempts to bend the head forward.

When the child sits up in bed he is unable to bend his head down and rest his head on his knees. There may be sensitiveness of the skin of the arms and legs, and a weakness of certain muscle groups.

These signs, together with the fact that the child does not want to be held, played with or fondled should indicate to the parents that the child has not a simple sickness.

"It is in this important preparalytic stage that the physician should be called. To delay may be dangerous. It is the doctor's duty, not the parents' to diagnose poliomyelitis and he should be called in all cases of fever, headache, vomiting, stiffness of the neck tenderness of the back, drowsiness or irritability.

In many cases of poliomyelitis the condition does not go beyond this stage and terminates after four to 10 days' illness with complete recovery.

There are the "abortive" non-paralytic cases which are just as important a factor in conveying infection as are the more serious cases.

In other cases, however, the disease proceeds into the paralytic stage in which there is marked irritability and drowsiness. The patient becomes mentally disturbed and the hands and feet may show trembling or twitching.

Definite paralyses of one or more groups of muscles supervenes and may even involve muscles necessary for respiration.

Statistics show that in the majority of cases muscles of one or both legs are affected, and in nearly 80 per cent of the cases the paralysis is limited to the legs.

Auto Driver Can Certainly Sleep Soundly

IPSWICH, Mass., Aug 10— An automobile—

Ran off the highway.

Mowed down fifty feet of fence.

Knocked over nine cement posts.

Crashed against a telegraph pole.

Awakened at the wheel by a passing motorist, Driver William Hurwitz exclaimed:

"Gosh! I'm a sound sleeper!"

Born On Bus, Gets Life Pass

WINNIPEG, August 10—A six-and-a-half pound baby girl has been given a life-time pass on all lines of a western bus company.

Daughter of Mr. and Mrs. William Hejhawy of Gimli, Man., was born on a bus Monday en route here from the northern Manitoba town.

Mother and daughter were taken to hospital and both were reported "doing well." Peter Neufeld, traffic manager of the bus company, presented the pass to Mrs. Hejhawy in hospital.

South Is Preparing Harvest 'Real Crop'

CALGARY, August 10—Farmers of an Alberta dry belt extending from Youngstown 200 miles northeast of Calgary, to the Saskatchewan border, prepared Tuesday to harvest the first "real crop" since 1932.

From land that a year ago returned barely enough for seed and in some cases not even that, 420,000 bushels of wheat is expected to roll into elevators shortly.

At Oyen, close to the Saskatchewan border, there was a crop of 2000 bushels of wheat last year. The 1938 harvest is expected to return 100,000 bushels.

Cereal district is looking for a crop of 55,000 bushels compared to last year's total of 1000.

Truck Fee Cut Is Moved Ahead To September 1

Reduction of 40 per cent in the license fees for motor trucks will be made effective on Sept. 1 instead of October 1, as originally intended Hon. Ernest C. Manning, minister of trade and industry and provincial secretary announced Wednesday.

The minister pointed out that regulations provide that the full license fee prevails until Oct. 1 when a 40 per cent reduction is brought into effect.

In view of the prospects of a larger crop this year and so as to in no way interfere with its movement, it was decided to make the reduction available on Sept. 1 instead of Oct. 1.

Mr. Manning pointed out that this reduction applies only to motor trucks and to no other vehicles.

Man Trapped In Bog Six Days, Lives

BELLEVILLE, Ont., August 6 — Officials called it "a miracle" that Hugh Jones, 44-year-old Rawdon township farmer was alive today after being trapped for six days in the swampy bog 10 miles north of here where he was rescued last night.

"When we reached him he was almost gone," Provincial Constable Dymond of nearby Madoc said today. "The oozy mud was almost up to his chin, but he was clutching a section of old log or stump to hold himself up a little while longer.

"It's a miracle. How he was able to battle the mud and mosquitoes for so long is a mystery to all of us."

Dr. G. S. Stobie of Belleville, who is attending the critically ill farmer in hospital here, marvelled at Jones' physical endurance. His face and body swollen by swampy water and insect bites, Jones is badly emaciated from lack of food.

Dr. Stobie said Jones' condition would not indicate he had been submerged in mud or water for a week. "His hands and feet may have been submerged 24 hours," he said. "Of course the mud is actually not water and in fact may have protected his body somewhat from water."

It has been estimated by grain men the "dry belt" will produce yields ranging from two to 15 bushels to the acre this year.

Shortage of livestock feed brought hardship last year. This year there is an ample supply with good hay throughout the drouth area.

WEEKLY RAIN REPORT

Supplied by Searle Grain Co. Ltd.

Thursday	
Friday	
Saturday	.15
Sunday	[illegible]
Monday	
Tuesday	
Wednesday	
Total for week	[illegible]

Total to date from April 1st, 1937, 7.40 inches.

Long time average from April 1st to date 5.76 inches.

Long time average for growing season, April 1st to August 15th, 10.07 inches.

Grade 12 will be taught again in the Tofield High School. It is expected that Mr. McLeay will be re-engaged to teach grades 7 and 8.

Mr. Graham Allan, who has been working at Jasper for the past few months, is visiting at his home here for a week. Graham has been ill and is recuperating before starting back to work.

Seven Skunks Playmates Of Quebec Child

ST. PIERRE, Que., Aug. 6— To the amazement of residents of this little Montmagny county village, four-year-old Hillaire Letourneau has adopted as pets a family of seven skunks he found near his home a short time ago. Hillaire's parents say they don't object as long as the pets "behave."

The Fight Goes On

Western farmers must persist in their fight for a greater degree of price security in the marketing of their main product—wheat.

To continue the fight for just and equitable treatment a strong concentration of effort is required.

The natural focal point for such an effort is the Wheat Pool movement.

BARDO

Heavy rain which fell over the week-end will stop harvest for a day or two, but the rain will benefit late oats and greenfeed. About 30 per cent of the wheat has been cut and some barley.

Mrs. Haugen is building a loft on her barn which was wrecked during a wind storm last summer. Mr. Detwiller of Kingman is doing the work.

Anderson Bros. and J. King have bought new binders.

John King has bought a 1-ton truck and has started a milk route, hauling to the cheese factory at Round Hill.

Bennie Finseth was in Edmonton last week taking medical treatments, to improve his health after having his teeth pulled. He is improving now.

Mr. and Mrs. Chris Peterson of Cold Lake visited our district last week. They brought down a load of blue berries.

Saskatoons have been plentiful but the raspberry crop has been small due to the dry weather.

Miss Esther Gabrielson of Holden is assisting Mrs. Ivar Moen with the housework during the busy season.

Mr. and Mrs. S. Olsenberg returned from Summer School at Edmonton last week. Mr. Olsenberg will teach at Bardo High next term.

Results of Grade XI have been received and all students writing were successful.

By defeating Tofield 4-1, Round Hill won the "Power Line" Baseball Cup, played at the Bardo diamond last Wednesday. Batteries: Round Hill, Appleby and Mittlestadt. Tofield: Swinton and Nomeland.

The "Power Line" Ball League was organized in 1933, the following are the league winners for each year: 1933— Ketchamoot; 1934— Bardo; 1935— Dodds; 1936 —Kingman; 1937 —Dodds; 1938— Round Hill.

Mr. and Mrs. A. Hauktedal and daughters, and Hannah Jenson and Carrie Brecken returned last week after a two weeks holiday along the Pacific Coast.

Those who attended the Bible Camp at Hastings Lake returned last Sunday. Rev. Palmer Anderson and Mrs. Anderson were teachers at the camp.

U.F.W.A. NOTES

The U.F.W.A. met on Thursday, August 11, at the home of Mrs. I. C. Olson. There was a good turn out of members and several visitors and the meeting was a very pleasant one.

We were especially glad to have two members present who have just recovered from serious illnesses.

Roll Call was answered by "My Opinion of Gossip" and many new slants on this common diversion were aired and discussed.

Mrs. A. Hauktedal read a paper on the "Life of Will Rogers" and the lively discussion which followed showed that the kindly humorist was known to and loved by all.

A delightful feature of the programme was the singing by Mrs. A. Torrie of two charming solos, "That Old Irish Mother O' Mine" and, as an encore, "Such a Little Fellah."

The September meeting will be held in the northern part of the district on the second Thursday, the place to be announced later.

Strange Trade Gives Baby A Foster Father

At Eldorado, in the North West Territories, Old Jimmy Soldat thinks there's nothing cruel or funny about his trading a $40 tent for an Eskimo baby.

The 54-year-old chief of the wandering Hare Indians wanted a son of his own, because seven of his eight children are dead of tuberculosis and doctors say the eighth will not live.

So when a bunch of starved Eskimos straggled into LaBine Point on Great Bear Lake, old Jimmy began negotiating for the slant-eyed baby. The penniless and sick mother was barely able to continue north herself—and the bargain was made.

Now Jimmy turns up almost daily at the radium mine camp here to sell Arctic herring to the cook so that he can buy powdered milk and clothes for his new son.

It makes no difference to Jimmy that the Hare Indians and the Eskimos are traditional enemies; he hopes that his son who looks so different will live where the others have died.

And no one here has told him Eskimos are even more susceptible to tuberculosis than are Indians.

BOARD AND ROOM For High School Students.—Apply Mrs. W. J. Bailey, Tofield. 1tp

LOCAL & PERSONAL

Mr. and Mrs. L. Carlisle and Belva returned this week from a motor trip to U.S.A.

Miss Jean Forestal of Edmonton is a visitor at the Branton home.

Mrs. Giffen and daughter Corrine, returned from a trip to the States.

Mr. and Mrs. Allan and Doreen are back from their holidays.

Mr. and Mrs. Wm. McIntyre and son are visiting at the Booth home.

Miss Jessie Archer of Lamont visited with Margaret McCauley over the week end.

Mr. Geo. McFadzean spent the week end in Edmonton.

Miss Bessie Hayden, Miss Emma Patterson and Messrs Frank and Tom Hayden all of Edmonton visited the J. W. Robinson home on Sunday.

Mrs. Younie spent a few days at the McCauley home. While here she had enjoyable visits with old friends in this district.

Mrs. Firth and Pat returned home this week after an enjoyable stay at Pigeon Lake.

Mr. and Mrs. Paul and Edythe Borden were Sunday guests at the Borden home. Mrs. Paul remained to spend a few days here with her sister, Mrs. Borden.

Mrs. Seale, Mrs. Thompson and Mrs. S. Yakabuski spent Tuesday in Edmonton.

Miss Beth McCollough and Miss Jean Brown of Westlock are guests at the Rev. Allan home.

Holy Trinity Sunday-School and Congregational Picnic was held recently at Lakeview. The usual bathing, races, games and picnic lunch were enjoyed.

Mr. T. Hutson returned from a visit to Blaine Lake, Sask. He reports crops pretty well dried out there and yields very light.

Mrs. D. W. Warner of Edmonton is visiting her sons and daughter (Mrs. Dodds) near Tofield.

Miss Dorothy Green from Calgary is renewing old acquaintances in Tofield for a few days.

DOMINION MISSION STUDY COMPETITION

In the Dominion Mission Study Competition held in May, the following Junior W.A. members of Holy Trinity Church were successful:

Marjorie Bailey had the honor of winning third Dominion prize with honors in the eight-year-old class. (Junior Paper).

Lorna Swinton was placed in the Third class for nine and ten year old scholars. (Junior Paper.)

Ralph Bailey was placed in the First Class and Buddy Sinclair in the Third Class for eleven and twelve year old scholars. (Senior Paper.)

In the Diocesan Mission Study Competition held in April, Ralph Bailey received the highest marks in the Diocese (86) and was awarded the Bishop's Prize—a lovely Prayer and Hymn Book. His sister, Marjorie, received 75 marks and was awarded a book from the Tofield Junior branch. Congratulations are due one and all for their outstanding record. In all 180 papers were sent from 34 Branches in 14 Dioceses.

To be placed in First Class, pupils must obtain 75 per cent or over, Second Class must obtain 66 per cent or over and Third Class 50 per cent to 65 per cent.

I SAW
By X.B.C.

Raymond Pincott and A. B. digging up a few sumptuous, succulent oysters at the Portage.

Doc Low taking a dive into the Briny at English Bay.

Bob and Mrs. Sherlock doing a little fixing around.

Dr. Bain leaving a surgical case to greet yours truly at Centralia, Wash.

T. W. Jacobs showing off his garden at Puyallup.

Geo. Moen, Frank Lewis, Bill Parker, Roy Lewis at Gresham, Ore.

Television:—

I saw "Madge" Jacobs holding up a big Jack fish in front of the Tofield Post Office.

Gallinger Bull Goes To Ontario

W. J. Kay, Guelph, Ont., has purchased an outstanding young red Shorthorn bull from Claude Gallinger, Tofield, Alta. The bull, Killearn Beauty Lad 2nd, is a son of Danny Boy 2nd, by imported Danny Boy. The dam is Balmuchy Beauty by Balmuchy Jasper (imported in dam), and the second dam is by the great show and breeding bull Wheatland Revelanta. —The Market Examiner.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "The Crop Testing Plan."

Thatcher, Renown and Apex, the new rust-resistant wheats, have been "tried in the fires and have not been found wanting."

This year most unfortunately a rust epidemic visited our Prairies, and many farmers who had to depend upon varieties susceptible to stem rust, such as Marquis, Ceres, Reward, Garnet and Red Bobs, have suffered serious losses with their crops both in yield and in grade.

The new rust-resistant varieties, however, have done well, for they have suffered little or no damage from the dread scourge.

Those farmers who were able this spring to obtain sufficient seed to sow their entire fields to any one of these new varieties are fortunate; those who were not, however, will have the opportunity this coming year of obtaining their full requirements of the seed of any one of these rust-resistant varieties, for good seed will be plentiful and at a moderate cost.

Resistant to stem rust as these new varieties are, however, they can only be regarded as "stop gaps", to be replaced as soon as our Canadian Plant Breeders are able to release for use some of the better new rust-resistant strains which the Dominion Rust Research Laboratory now has in the making.

Following factors have tended to raise price: North China continues to buy Australian flour—Continent and United Kingdom purchasing U.S. Pacific wheat—Drought and heat lowering corn yields in southern Europe and Danube Basin—Germany buys United States corn—Severe drought causes wheat crop failure in Spain.

Following factors have tended to lower price: Poland announces export bounty on wheat—Increased wheat production in Japan—France imposes import duty on oats, barley and rye—Bumper grain crop indicated in Germany—Private Hungarian wheat estimates larger than official—Most importers confining purchases to immediate needs— Widespread rains in northwest India benefit food grains.

D. W. Jacobs and son Tom with J.O.A. Letourneau were at Jackfish Lake last week end. One of them, we believe it was Tom, caught a large 15 pound Jackfish. The fishing was good.

DIVINING RODS!

By J. W. Gregory, LL.D., F.R.S., Glasgow University in "Forest and Outdoors"

The existence of water at slight depths under ground, with often no clue where to find a drop to drink, is the basis of the widespread faith in the divining rod. Its value has been a subject of perennial controversy. Its use was denounced as idolatrous by the medieval church and forbidden by the Inquisition for the detection of crime.

It has been repeatedly repudiated, after careful testing, by men of science and water-supply engineers. Though the church, academic science, and the practical man of affairs have alike condemned the divining rod, men learned in higher physics have suggested that modern discoveries may explain its action, and it is employed by people whose judgement carries great weight. The rod has unquestionably been often successful and it is perhaps used now more than at any previous time owing to the increased need for shallow supplies of water.

The rod usually employed is a forked twig of hazel with the forked ends each about 10 to 18 inches in length, about one-eight to one-quarter of an inch in thickness, and the butt a few inches long. It should be tough and springy, and therefore should be freshly cut. It is held with moderate firmness in the hand and often with each end of the fork passing between the little and third fingers, or between the second and third fingers. When thus held, pressure by the finger above the rod bends or twists it and causes it to rise or fall.

The view that the action of the rod is not physical is supported by the fact that any kind of rod will not serve. In the early days it had to be a rod cut about sunset or sunrise by a man standing in a particular position, with the sunlight shining through the fork of the twig, and it would respond on only certain days. But now any twig serves, and on the treeless plains of Australia a piece of iron wire taken from the nearest fence will act as well.

The conclusions that the claims made for the divining rod are invalid, but that in areas where water is most likely to be found by a 'wild-catting' a diviner may may often be successful, agree with the position expressed in 1897 by Sir Herbert Maxwell: "I don't believe in the divining rod, but I don't deny that its virtues are genuine and were I in a straits to find water, I should employ without any hesitation a professional water-finder—rod and all." His statements exactly express my own opinion that though the claim of the divining rod are invalid, an expert diviner may be useful under some conditions.

In many cases the diviners' successes are due to the fact that the water table is wide spread, and that in the kind of country where they are most successful water occurs everywhere. The rod is tested only where it indicates and not where results a renegative. Hence in such areas a high proportion of success is inevitable.

When To Cut Grain

(Experimental Farms News)

When the grain turns a golden colour and the straw commences to rustle, the grower begins to put a commercial value on his crop. From then come many anxious days of waiting for the proper time to start the binder. Anxiety and the pressure of unpaid bills frequently prompt cutting to start several days too soon. "Better some shrink than a heavy loss from shattering or hail" is the justification. Too frequently the shrinkage does occur and green kernels or those with a greenish or bronze cast on wheat mean the loss of one or more grades.

Red Bobs 222 and Garnet should be cut slightly on the immature side if shattering losses are to be avoided, states E. C. Stacey, Assistant Superintendent, Dominion Experimental Substation, Beaverlodge, Alta. When this is followed prompt stooking is imperative if advantage by way of some further filling is to be gained. Marquis can likewise be cut slightly on the green side and this may be preferable to chancing frost. Reward, on the other hand, must be harvested when quite ripe, otherwise the unevenly-maturing crop will be shrunken in volume and quality. When cutting is thus deferred this variety frequently yields No. 1 grade at the Beaverlodge Substation. Experiments conducted with Marquis and Reward over several seasons suggested that wheat is ready to cut when it has reached the firm-dough stage. Scant justification was found for the popular belief that grain continued to fill in the stook.

Most varieties of oats shatter very little and can be left standing until ripe, though a few growers may ensure having frostfree seed by cutting a few swaths before the crop is fully ripe. In some Northern districts it is considered expedient to have oats in the stook by the end of the first week of September regardless of maturity.

Barley shrinks badly if cut immaturely and should be left standing until fairly well ripened. Prompt stooking and capping is advisable.

Animal Vitamin-D For Feed Mixtures

Vitamins, those mysterious accessory food factors, are organic substances of unknown constitution, yet essential in the diet of man, bird and beast. The first vitamin to be isolated was designated "A". It is the growth vitamin and seems to fortify the body against infection from bacterial diseases. Its presence in the mucous membranes of the nose is therefore significant. "C" is known as the antiscorbutic vitamin because it prevents scurvy and probably dental defects also. "E" has been named the reproductive or antisterility vitamin and one of the richest sources of "E" is the oil of the wheat germ or embryo.

Vitamin D says B. Leslie Emslie well-known chemist-agronomist, is the most important of all the vitamins and its functions better understood. It has been the subject of much research and scientific treatises in many countries. "D" is known as the antirachitic vitamin because it promotes the assimilation of calcium and phosphorus by the blood stream, the two elements essential primarily for bone formation and for other body functions. The presence of an adequate supply of Vitamin-D prevents rickets and other bone malformations, leg weakness in pigs, chicks, etc., increases milk and egg production and the hatchability of eggs.

Speaking at the recent annual meeting of the Society of Chemical Industry in Ottawa, no less an authority than A. W. Knapp, chief chemist of Cadbury Bros. Ltd. of England, declared that vitamins occupy so important a place in nutrition that no food manufacturer can ignore them. He referred to the need for the addition of the vitamin to the winter food particularly, mentioning also the well-established fact that summer milk is two and one half times richer than winter milk ' Vitamin-D

"Sunshine Vitamin" is another name for "D", since its activity is promoted through irradiation of the skin by the ultra violet rays of the sun. These act as a sterol, a naturally occuring source of Vitamin-D in all bodies. Ergosterol is a source found in plants, whereas Cholesterol is the form in which it is present in animals. The brains and spinal cords of beef cattle contain large amounts of Cholesterol, a source which has been utilized in the preparation of an activated Pro-Vitamin D of standard, and constant strength. More recently another source has been discovered.

Codliver oil is a well-known source of Vitamin-D and has been used as such for the past 200 years, though it is only within the past 30 years that its true virtues were recognized as due to the vitamin. Unfortunately, in codliver oil, often adulterated with other fish oils, the Vitamin-D content is very unstable and some-times lacking. At the Research Institute, Reading, England, it was found, and confirmed by tests elsewhere, that the feeding of codliver oil to cows reduced the butterfat in the milk, whereas the substitution of an irradiated Pro-Vitamin D had the opposite effect.

An Activated Animal Pro-Vitamin, produced by the irradiation of Cholesterol with ultra violet rays, after five years in the laboratory stage, has proven in practice to be at least 50 per cent more effective than any other source of Vitamin D. The substance is assayed and always up to the standard of 500,000 international units of Vitamin-D per pound of milk powder with which it is incorporated. For convenience the material is put up in packages of one pound each sufficient for mixing with one ton of feed. In the mixer the usual amount of bran may be placed and the powder added, these two constituents being given a 3-minute premix before introducing the other ingredients and continuing the usual process.

Besides being cheaper and of standardized higher potency, Vitamin-D in the milk powder medium has several important advantages over codliver oil. The milk powder protects the vitamin from oxidation and is more uniformly and thoroughly dispersed in the feed mixture. In cold weather and especially on cold grain, codliver oil congeals rapidly, with the result that it is unevenly distributed, perhaps only from 25 to 50 per cent of the feed being coated. Some claim is made for the presence of Vitamin-A in codliver oil; but it has been shown that this disappears entirely after admixture of the oil with the feed. Vitamin[illegible] may be supplied abundantly by other products such as alfalfa meal.

Duck Hunters Wait 2 Weeks; Changes Made

Alberta nimrods will swing into action in quest of ducks two weeks later this season than last, according to new regulations issued from Ottawa under the Migratory Birds Protection act.

Zones also have been changed, W. H. Wallace, provincial fish and game commissioner, stated Saturday.

Instead of the Athabaska and Clearwater rivers being the dividing line between the northern and southern area, the line has been changed to Red Deer, running across from Compeer at the Saskatchewan boundary.

In the area north of the Red Deer line, the season for duck shooting will open Sept. 15 and close Nov. 15. South of this line season opens Oct. 1 and closes Nov. 30.

Last year the season north of the Athabasca and Clearwater rivers opened Sept. 1; south of this line opening date was Sept. 14. Duck shooting in all parts of the province closed Nov. 14 last year.

Only change in bag limits is in regard to the number a person may have in his possession, this being increased to 36, compared with the maximum of 12 last year. Request for this change was made by the Alberta Fish and Game league at its Calgary convention and endorsed by the provincial game commissioner.

Boy, 3, Confined In Chicken Coop

MARTINSBURG, W. Va., Aug. 13. "Skippy" a three-year-old waif, found confined —ill and undernourished—in a chicken coop, was receiving unaccustomed attention Saturday in a city hospital.

"Skippy" was a waif of the 1936 floods. He became separated from his parents in Harpers Ferry and eventually was placed in the home of a family near Charlestown.

The department of assistance heard several days ago he was being mistreated and investigators reported they found him in the chicken coop. Mrs. Mary Terry, department worker, said the child's weight had been reduced by malnutrition to that of one of five months and that the boy is unable to hear or talk

Out Against "Tipsters"

Henry A. Wallace, secretary of agriculture for the United States, has asked the co-operation of the leading commodity exchanges and of the United States department of agriculture to devise methods for preventing so-called "commodity counselors" from defrauding the public through promises of extraordinary profits from dealings in the commodity exchanges. These "commodity counselors" or "tipsters" have been instrumental in bringing into the futures markets persons of limited financial means who are unable to assume large risks and ordinarily do not speculate in commodities. Usually these men get their remuneration by sharing in the profits, but not the losses, of the clients. All of the sixteen counselors who controlled ten or more accounts each during the first eight months of 1937 lost money for a considerable proportion of their clients.

A personal history of all professional "commodity counselors" who controlled ten accounts or more each indicates that very few have been able to trade successfully for themselves. It was found that eleven of these sixteen individuals had incomes of less than $3,000 and only one made more than $7,000 in 1937. One counselor was on government relief during part of a year. Several were in financial difficulties and unable to meet their obligations. Two counselors had been discharged with prejudice from former positions. The majority of these persons set themselves up as "commodity counselors" after they had failed in some other line of work. Their business histories indicate that, on the whole, they have been as unsuccessful as the average small speculator in forecasting price movements.

During six months in 1937 the "commodity counselor" with the largest dealings had total wheat transactions amounting to $39,770,000 foreign transactions amounting to $11,130,000 and cotton totalling 239,100 bales.

Reflector Buttons To Guide Cars

Taking a leaf from the records of the Ontario Department of Highways, the government of the State of Michigan has adopted reflector buttons for the 70-mile stretch of concrete highway between Detroit and Lansing, the State capital.

Similar to those installed along part of the new Middle Road between Toronto and Hamilton, the reflectors consist of white crystal "eyes" set in the top of metal posts about three feet high. The posts are placed at regular intervals along the shoulder of the road at curves or other danger points.

As a car approaches the reflectors its head lights are "picked up" by the reflectors at a distance of more than half a mile, and the brightly gleaming eyes outline the course of the highway ahead without in anyway blinding the driver or interfering with his vision. Cars moving in either direction get the benefit of this first driving aid on their own side of the road and, as a result of the drivers being better able to gauge the proper distance from the shoulder of the road, the danger of side swiping and collisions on curves is drastically reduced. While the Ontario Department of Highways has installed these reflectors over only a short distance of the Middle Road, the Michigan authorities have expended $23,000 on the 6,900 reflector posts necessary for complete installation between Detroit and Lansing.

Tax Sale To Open On 4,500 Land Parcels

First municipal tax sale of the coming autumn is scheduled to take place at Drayton Valley on Nov. 2, it was learned on Thursday from municipal affairs department officials. Other sales have been set for Lomond on Nov 16; Retlaw on Nov. 17 and Tilley East area on Nov. 18.

In the Alberta Gazette of July 15 there appeared 35 pages of farm lands, mostly half sections, totalling 4,500 in all which were listed liable to tax sale.

A short time after that it was announced that no sales would take place until the autumn as in some cases there was standing grain on the land and authorities were anxious to enable farmers to derive the benefit of the proceeds of the grain and thus contribute toward the tax collections

Most of the land, about 4,400 of 4,500 parcels are in the drouth area of the southern and south-eastern part of the province.

Tax sales have been in order for years and the idea of them is to return control to the government, brought under control of the special areas board and then made available for re-settlement. Most of the lands now up for sale have been abandoned.

In cases where grain is standing, officials point out there is no difficulty in obtaining a stay of action and in no case has any holder been dispossessed of land.

Beaver Lake M.D. Minutes

The usual monthly meeting was held in the Municipal Office with all members present.

Complaints against the annual assessment were heard and dealt with; relief allowance of Mrs. Lena Marchonick was raised to $10.00 monthly and approval given for [illegible] Allowance for Mrs. Julia Kovshik.

Considerable time was spent in a discussion of the epidemic of Sleeping Sickness in Horses and farmers were urged to follow the instructions and suggestions put out by the Department, as to the care and treatment of sick horses. Farmers were also reminded that the Chick Vaccine obtainable through arrangements with the Department must be administered under the direction of a qualified veterinarian. A supply of Vaccine is being obtained for distribution.

Old Seed Grain Accounts were referred to the solicitor. Seed Grain Advances for 1926 to 1936 inclusive were discussed and each councillor was supplied with a copy of the List of Advances as posted in all elevators.

A resolution was passed protesting against the statute known as the Production Tax Act.

The problem of weed control was considered very serious and Weed Inspectors were requested to submit with their usual report, an accurate list of badly infested lands where reasonable co-operation has not been given by the owner or occupant.

Next meeting will be held September 10, 1938, at the hour of 2 p.m.

Combine Set To Cut Wheat: Hail Gets It

LETHBRIDGE, Aug. 12 —When hail hits the wheat belt in August it leaves a trail of gloom.

On Thursday H. H. Lenne pulled his combine into a 300-acre field of wheat south of Bow Island. It was ripe for the sickle. Friday he pulled the combine back to the barn. There was nothing left. Hail Thursday evening wiped the field out, 100 per cent loss.

Farm Machinery Sales Increased

Sales of farm machinery in northern Alberta will be from 25 per cent to 50 per cent greater than a year ago were described as "far-fetched" by city dealers.

"Such an increase is impossible," one dealer said. "Unless six pieces of machinery are being sold in a district where none was sold last year, that increase is impossible."

Increase in sales in northern Alberta would have been greater if the Peace River area had produced a larger crop this year, dealers declared. This district forms an important outlet for Edmonton implement dealers. Good crops in that area mean greater sales of farm machinery.

Greatest sale came in the binder and tractor divisions, it was reported. Few combines are in use in the northern section of the province while combine sales were among the first to increase in southern Alberta.

"WE MISS YOU, DADDY!"—

The following editorial was printed in the Rockville, Conn., Journal, about a year ago. Thereafter, to the editor's surprise, it was reprinted by most of the papers of the state, and was used by highway safety officials, insurance companies, accident prevention organizations, motorists' publications and by others who are fighting the great war against the toll of automobile deaths. Here it is—and any motorist will surely think twice about taking chances after reading it:

"Tuesday morning there was a fatal accident on the Minterburn Hill and when the medical examiner was going through the pockets of the dead man—a telegram was found. It was not very long, just the ordinary ten word length, but it was a message that would make any father happy. It read: WE MISS YOU DADDY. WHEN ARE YOU COMING HOME?

"That was all. It was a message sent by one of the children of the man who was killed. He had received the message and was homeward bound. The clothes were minus money but in his pocket he carried that message.

"Those who have little children, and those who were once little children, can think of the great blow to the child when the father did return home—dead.

"'Daddy' will be missed by those children in the long years ahead. No longer will they have his support, his earnings, and more important, his companionship.

"If ever there was a reason for people driving more carefully on the road it is that they might get in an accident and deprive their own child or some other child of their 'Daddy'.

"More might be written, but just let us repeat those words: 'We miss you, Daddy. When are you coming home'?"

MONEY—

WE ARE RATHER afraid that the correspondent from Red Deer, whose letter appears on page four, has almost asked the impossible. When one recalls the countless columns that have been written and printed about money during the past few years, further writing about money seems like adding fuel to a fire already sufficiently large. It is possible of course, that when the fire has exhausted itself, it will be found to have crystalized a jewel, or nothing more than ashes may be found. But whatever the result, we almost feel that the time for the cooling off process has arrived.

In approaching the subject of money, (the precise definition of the word money is immaterial) we have felt for a long time that most writers make a false start. They at once commence to apply money to humanity, whereas humanity behaving as it does, and the human possessive sense being what it is, humanity should be applied to money. Let us give an extreme illustration. If you placed a load of hay within an enclosure with a number of cows, all of them would eat their fill and walk away. But things of value among humans apparently must be owned by some person or persons. Now, there will always be bright boys and dull boys; energetic boys and lazy boys; economically sensible boys and economically foolish boys; thrifty boys and improvident boys; honest boys and dishonest boys. Add to this, good fortune and misfortune, advantages and disadvantages as to birth, education and opportunity, and you have a condition of affairs that no amount of money theorizing can remedy. For no matter what system was in vogue, among a free people, the bright boys would still get the plums and the dull boys the stones. Recognizing this, we can go on and write about gold and silver.

Presumably replacing an era of pure barter, money at different times and places have been different things. Sea shells, stones, oxen, to just mention three early ones. More recently, though still quite a long while ago, in our own Canadian Northwest, the beaver skin was a tally of value. These things prove conclusively that there is an **instinctive** demand as well as a **reasoned** demand for a standard of value, by which all other things can be appraised. As the world's trade and commerce gradually expanded, covering a larger area and including a greater variety of commodities, gold and silver gradually became the accepted standards of value. Sometimes to-gether, sometimes either one separately. When used to-gether it was found that according to the ratio, one or the other was given the preference. Ratios have been set at 15½ to 1, 16 to 1, 17 to 1, in an effort to make the two metals equally acceptable, but always there has been a decided preference for one or the other. Gold finally won out among occidental nations, silver making its last stand in the William Jennings Bryan controversy in the United States a number of years ago. The trouble with gold was that there was not enough of it. The eighteenth century saw an enormous expansion of world business and there was not enough gold to transact it. It was like trying to force the waters of a wide, flowing river through the neck of a bottle. To overcome this the gold standard was adopted by most occidental nations. This meant that each central bank was by an act of parliament passed in the various countries, forced to buy and sell gold on demand at a fixed rate. But they were authorized to issue paper currency several times in excess of the value of gold they possessed. This had the effect of increasing the amount of currncy for the people to do business with, at the same time satisfying the demands of people for gold when they wanted it. This condition of affairs prevailed until 1914, when all the belligerents, one by one went off the gold standard. This meant that central banks by act of parliament were authorized to refuse to pay out gold for paper currency. Subsequently, after the war Great Britain went back to the gold standard but left it again in a national emergency. To-day, there are few, if any nations strictly on the gold standard. It is impossible for us to trace all the twists and turns of major finance for years past, but we would like to note in passing that when the gold standard was in full play, international business was ever expanding. The Great War shattered a well oiled international commercial machine and since the demise of the gold standard procedure, world trade has lost its former glory. This demonstrates two things, one that in the interplay of commerce, humanity demands first a solid base, secondly a flexible superstructure.

To-day, gold is rarely seen by people outside the industry, except of course as it is used to make jewelry and other uses. It is mined, blocked and packed away in a fortress. But while the average person does not see much gold, we believe that never before in the world's history has gold played so important a part as it is playing now. We believe to a very large extent that the possession of huge stores of gold by peace desiring nations is one of the best safeguards against immediate war. We have heard of late years much about the huge gold reserves of the United States, the largest of any country in the world's history. And we often hear that the United States is adding to its gold reserves—and silver too. But few people know that Great Britain in 1936 purchased more gold than did the United States. About two years ago the Royal Bank of Canada monthly letter contained tables regarding the gold reserves of quite a number of countries for a number of years. During and immediately following the war the United States substantially increased her gold reserves; Great Britain kept her gold reserves about even; and Germany and a number of other countries had theirs sadly depleted. No two major wars are alike and should there be another great European conflict (which Heaven forbid) it will not be fought exactly on the lines of the last one, either as regards implements of war or credits. The Great War followed an era of trade expansion and easy credits. Credits on the scale of the Great War would not be easy to get, the vast war debts now existing would be remembered. It would be cash over the counter, and cash over the counter in international affairs means gold. A great power must have either the necessary requirements or the gold to buy them if it hopes to win any modern war. We know there are exceptions. Italy was supposed to be incapable of financing the Ethiopian campaign, but it was done. But generally, exceptions only mean deferring the evil day or providing time to make the necessary adjustments. So while a good many people believe it silly to dig gold out of one hole only to bury it in another, there is method in this madness.

So far we have dealt very little with the subject matter of our correspondent's letter. "Energy Money" sounds like Technocracy, something we are not very well conversant with. We felt that if any "money" writing was to be done at all, the present field should be surveyed before launching into a discussion of a new, even if beneficial thought. Perhaps next week we will continue and finally arrive at "Energy Money."

Canada-Wide Minimum Wage Law Favored

LAKE COUCHICHING, Ont., Aug. 15—Warren K. Cook, Toronto clothing manufacturer, was on record today as favoring a national minimum wage law for Canada and a law limiting industry's profits to six per cent on the "actual" investment, the balance of profits to be shared by the workers.

"All too many manufacturers and commercial organizations in Canada are not modern in their thinking," he told the seventh annual conference of the Canadian Institute of Economics and Politics here yesterday "They live in the dark ages by adhering to the policy of paying as little wages as possible and getting as much as they can for them."

Labor disputes and radicalism "usually" have resulted from that policy, Mr. Cook said. Legislation enforcing a yearly minimum wage, effective throughout Canada, would benefit industry, relieve the worker of strain and worry and stimulate greater co-operation between worker and management.

A "basically unsound" philosophy had dominated industry during the past 20 years. Industry was passing into the control of financiers "who have almost convinced us profits belong to the money involved—a fundamentally wrong idea."

"If laws confined profits to about six per cent on the actual investment —not in watered stock pumped in—the balance of the profits should be shared among the workers by the executives along the line," Mr. Cook suggested. "This would create immediate purchasing power and bring greater co-operation and satisfaction on all sides.

"In Australia, where a tariff board examines companies' balance sheets, a tariff cut is made without reduction in price if the profit percentage is greater than six. If that system were followed (in Canada), stock brokers would have to take off their coats and get back to their original intentions instead of selling stocks for gambling. Opportunities for young men would be controlled by those engaged in it and not by remote financial interests."

Too many organizations employ large staffs which necessitate periodical seasonal lay offs for weeks and often months, Mr. Cook said "You and I pay wages in the form of relief which should be paid by industry. Trade unions have improved working conditions in industry and any honest manufacturer is willing to treat his employees decently."

S. Insull Leaves Only About $1,000

CHICAGO, Aug. 11—Samuel Insull's will disclosed Thursday he was worth about $1,000 when he died July 16 in Paris.

The man who built a $4,000,000,000 house of power and once had a fortune estimated at $100,000,000, left the paltry sum that constituted his estate to the widow, Margaret

World Wheat Situation

Should conditions continue as favourable as in the past few weeks, world production of wheat in 1938-39 (excluding Soviet Russia and China) may exceed the record of 3,906 million bushels established a decade ago in 1928-29. This outcome is contingent upon conditions remaining favourable in the Northern Hemisphere until harvesting is completed and it assumes that average conditions will prevail in the Southern Hemisphere throughout its growing season. Stocks on hand are approximately 100 million bushels larger than a year ago so that supplies available for the coming year may reach 4,850 million bushels, an increase of 475 million over those available during the crop year just completed (July 31st).

In Canada, the weather has been particularly favourable and crops are substantially larger than last year. The present outlook indicates that the outturn will be the largest since 1932 when 443 million bushels were harvested. This represents a material improvement over conditions in 1937 when the yield amounted to only 182 million bushels and compares favourably with the long-term average of 354 million bushels.

Unfavourable weather conditions have reduced yields in the wheat-growing areas of the United States so that the record outturn of more than 1,000 million bushels expected earlier in the season will not be realized. The official estimate of the United States Department of Agriculture issued in July was 967 million bushels, indicating that the crop will be the second largest on record. Stocks carried over are substantial—approximately 200 million bushels—so that the quantity available for export during the coming season will be the largest in years. Mandatory methods of checking further accumulations are now provided under the Agricultural Adjustment Act of 1938. This provides for loans to farmers when the July estimates exceeds the normal domestic and export needs of about 750 million bushels. The loans are designed to enable farmers to hold their grain off the markets until conditions are more favourable. Acreage control is also likely to be invoked so far as plantings for the 1939 crop are concerned.

Wheat acreage in Europe, excluding Soviet Russia and Spain, is slightly larger than last year and the long term average. Weather during most of the spring was unfavourable for wheat, however, drought prevailing over most of western and central Europe as well as parts of the southern section. Damage was pronounced in Italy and Spain but some improvement has been reported. Crops in France and the Danubian Basin have made good progress, some increase in production over 1937 being anticipated. For Europe as a whole, the 1938 wheat crop is expected to be somewhat larger than in 1937.

Conditions are generally satisfactory in the Southern Hemisphere, particularly in Argentina where moisture supplies are abundant. In Australia, precipitation has been sufficient for immediate needs but further rains are required to maintain the present outlook. No official estimates of the areas sown have been released as yet; private reports suggest that unfavourable weather during seeding may have caused some reduction in Australia but this is thought to have been more than offset by increases in the Argentine so that the combined area may show some increase. —Royal Bank Monthly Letter.

The Bugs Have The Final Word

Man's fight with insects for the supremacy of this planet is gradually becoming more serious with the passing of the years. If man and his allies the birds stopped the fight for but a single week, the insects would have gained such a tremendous advantage that all other forms of life would be hopelessly doomed.

Solemn prophecy of the insect's final victory, and a truly delightful piece of description that should be better known is given by Dr. W. J. Holland as the final paragraph of his book, "Moths and Butterflies":

"When the moon shall have faded out from the sky, and the sun shall shine at noonday a dull cherry-red, and the seas shall be frozen over, and the ice-cap shall have crept downward to the Equator from either Pole, and no keels shall cut the waters, nor wheels turn in mills; when all cities shall have long been dead and crumbled into dust, and all life shall be on the last verge of extinction on this globe; then, on a bit of lichen growing on the bald rocks beside the eternal snows of Panama, shall be seated a tiny insect, preening its antennae in the glow of the worn out sun, representing the sole survivor of animal life on this our earth, a melancholy Bug." —Forest and Outdoors.

COMMUNICATION

Red Deer, Alberta,
August 11, 1938.

Tofield Mercury,
Tofield, Alberta.
Gentlemen:

Re Article published in Edmonton Journal, July 11th. The heading "Hard Surfaced Roads in Alberta," (from Tofield Mercury.)

The writer feels he must commend you for said article, and wishes to say he believes you have stated facts which are, and will remain hard to refute, however, I trust you will live to see the day when your doubt of the following will have disappeared.

"We doubt whether on a strictly dollar and cent basis, Alberta can afford to have a large portion of its highways asphalted, with the hundreds of miles of highways Alberta has, and the relatively small population the cost of asphalt in any large proportion would make taxation even more burdensome than it is at present."

Under our present interpretation of safe and sound business practices, (i.e. democracy) you are absolutely correct when you voice this doubt, but the writer hopes, and believes, that enough of the people will eventually advance from their present to that, of the much quoted "13 year mentality," and when that takes place, money will be looked upon and used, as a very handy and satisfactory medium for exchanging of various forms of "ENERGY" money will not be considered as a [illegible] or as the object but rather the means to an object, the object being [illegible] security to all humanity in so far as human and machine power can cause the earth to produce when such understanding and unity prevails you will not hear the statement, "How much will it cost," what you are more liable to hear is "How long will it take to do the job," and entirely because money will be made available (at energy cost) to accomplish any job, which, if done would be an asset to society.

However, such a condition can never be realized as long as we are divided in our opinions as to the best method of obtaining the objective, the writer believes it can truthfully be said that, most any method can be instrumental in obtaining an objective,—providing, a sufficient number reliable individuals support same method, the writer further believes that many progressive minded individuals are spending all of their time and effort in showing that any other way but their own (if they have a way at all) is wrong, and with some reservations this is the kind of individual who has not gotten up to the impartial mentality of the 13-year-old, the writer will be pleased for your views and criticism, it is by those that we progress.

Yours, for a sane interpretation of money.

D. D. HIGH.

How To Start A Stalled Car

If your car happens to stall three miles from nowhere there is no need to get alarmed. First of all, look in your gas tank taking care that the match you use for illumination is a safety match. The tank will be found to be half full, so that's not the trouble.

Now how about the distributor points? Open up your engine hood. [illegible] the other hand, and grab a few [illegible] Now go [illegible] off the [illegible]. That's better, isn't it? The next thing to do is to look at the rear end differential. Get under the car and look up at it. Receive drop of oil from eye and curse lightly.

Go around in front of car, open up hood, and remove a spark plug. Look in hole where plug came from. Pretty dark in there [illegible]. Now examine spark plug. Try to figure how it would look if there were something wrong with it. Curse moderately loudly. Curse two or three more times. Prepare to put spark plug back. Discover that you have [illegible]. Curse with vehemence. Look in left hand and discover that you have been holding it there all the time.

Go to front of car and remove radiator cap. Scream in considerable anguish as hot water spouts over you. Deliver kick at radiator. Deliver more kicks until foot is too sore to permit further assault. Deliver lengthy and colorful oration on the character of the s—"—s who invented automobile radiators.

Get back into car and step on self starter. Notice utter lack of effect. Keep on starting. Realize suddenly that you have forgotten to switch on ignition. Do so, and step on starter with great hope. Notice that it makes no difference. Leap swiftly out of car, seize large rock on side of road, and hurl it swiftly at the left door. Now walk three miles to telephone and call up garage. Three or four days later car will be in good running order again. — Parke Cummings in Coronet.

Gold & Platinum

The students in the grammar schools of other countries know that Canada contains great mineral resources, but even the business men in other countries have failed to realize the rapidity with which these resources are being developed. Petroleum production in 1938 has been three times that of the corresponding months of 1937. Since 1934 Canada has been producing about half of all the platinum in the world and Canada is leading the world in the production of nickel and uranium, and is one of the chief sources of radium. At a time when people have become accustomed to think of Canadian gold production as amounting to about $100 million a year, the statistics have changed and the present rate of production in March was so high that if it were continued throughout the year the total would be close to $175 million. With [illegible] new records are set in each successive [illegible] twelve months since there was a new record for lead, the latest high month for copper was January and that for gold was March. June or July figures may show that these records are already broken. New achievements along these lines are so frequent that Canada may be said to be in the midst of a mining boom, but a boom spread over so large an area that it no longer generates national excitement.

It was in 1915 that gold production first amounted to 100,000 ounces a month. In 1938 there has only been one month when gold output has been less than 350,000 ounces and in March it reached the high level of 375,000 ounces. If recent rates of increase are maintained, an output of 400,000 ounces in a month will be achieved before the end of the year.

If well-informed people are asked which country produces the great bulk of the world's platinum, the reply is likely to be "Russia" because prior to the war Russian production amounted to 90 per cent of the world's output, or "Colombia" because in certain post-war years Colombian production led the world. In 1937 more than half of all the platinum produced came from Canada. Canadian production amounted to 250,000 ounces, that of Russia amounted to about 100,000 ounces and that of South Africa and Colombia amounted to 30,500 ounces and 36,500 ounces respectively.

Over the past fourteen years the price of platinum has fallen from six times the price of gold until it is now approximately equal to that of gold. With this fall in price there has been a widespread increase in the industrial use of the metal.— Royal Bank Monthly Letter.

Bank Of Montreal Crop Report

General—Harvesting is now fairly general in the Prairie Provinces, with rapid progress being made in Manitoba, Saskatchewan and southern Alberta. Wet weather in many districts has temporarily delayed cutting, but the moisture has been beneficial to late crops and pastures. In central Alberta warm weather is needed to hasten the ripening of crops. The effects of rust in Manitoba and eastern Saskatchewan are becoming evident as harvesting progresses and yields and grades of superior varieties of wheat will be appreciably reduced. Grasshoppers are damaging standing crops in parts of Manitoba and Saskatchewan. Further hail damage has occurred at widely scattered points. Quebec Province continues to enjoy ideal growing conditions, with warm weather accompanied by light rains in many districts. Prospects as a whole are good for a satisfactory harvest. In Ontario harvesting is well advanced and good average yields of the main crops are in prospect in all sections. Maritime conditions are satisfactory and growing crops continue to make favourable progress. Prince Edward Island crop conditions continue to be favourable, with excellent prospects. In New Brunswick and Nova Scotia, following an over-abundance of rain during recent weeks, several days of sunshine in the past week have benefited all crops. Early grains are ripening rapidly and good average yields are indicated. British Columbia [illegible] cooler weather during the past week, with heavy showers in [illegible] districts, which have been [illegible] beneficial to crops generally. Harvesting of grain is under way in the interior with good yields on irrigated lands, but only 45 per cent of average on dry farms.

Alberta—Conditions generally are satisfactory, except in northwestern and southeastern districts. Cutting, which had commenced in most districts, will be delayed for a few days by recent rains. The moisture will, however, prove beneficial to late sown grains. Further hail damage has occurred in scattered areas in the south-central district. A good average crop of all grains is anticipated.

"Nothing Sacred" For Next Tuesday

A Technicolor production of a comedy nature is billed for the Variety next Tuesday night at 8:30. The story deals with a New York newspaper reporter who hard pressed for a sensation finds a girl in country town supposedly suffering from an incurable disease. She is doomed to die, so she believes, and is taken to New York to have a really good time before death overtakes her, the newspaper playing up her courage tremendously. After the agreement was made, however, it was discovered that she was not suffering from this disease and would likely live a normal life. It was decided to go ahead and publicize her as if she was going to die and the incidents in connection with the deception goes to make up the story.

Rushing Harvest Won't Combat Rust

Warning against too-early cutting of rusted wheat, under a somewhat prevalent impression that grain so affected should be cut before the normal time, is given by Dr. A. W. Henry, plant pathologist of the University of Alberta, who says that instances of such practice in different parts of Alberta, and Saskatchewan have come to his notice. Loss of yield and grade rather than gain, is likely to result, he points out.

Only slight infestation of stem rust has developed in Alberta this year, says Dr. Henry, but, as in previous seasons, there are fields in different parts of the province showing some rusted wheat, and while the danger period is past in most cases there is still some danger for late fields.

"Careful investigation made at several different experimental stations," the university pathologist says by way of counsel to farmers, "have demonstrated that rusted wheat left standing in the field will continue to gain in yield and quality more than cut wheat. Other factors, of course, may make it advisable to cut a crop on the green side, such as danger of frost and hail, but so far as rust is concerned, its presence is not sufficient reason for early cutting.

Echoes Of The Past

Bygone days of motoring are recalled by a unique collection which has been made by Frank Walker, head of Pontiac Motors' Courtesy Department in the United States. It consists of 500 automobile radiator emblems and name-plates gathered from the cities and countries where motor cars are built or have been built in the past 40 years.

Walker's collection grew out of a desire to make an ash tray out of radiator emblems. But after he had obtained a half-dozen name-plates from defunct cars at a junk yard and had cleaned and polished them, the beauty of their enamel work so impressed Walker that he decided to make a permanent collection. Among the seldom remembered makes represented in the collection are: Leach, Paterson, Moon, Kissel, Haynes, Colby, Halladay, Briscoe, Chandler, Case, Diana, Fremont, Barley Six and Elcar.

Discover New Fact In Drowning Aid

TORONTO, Aug. 13 —Toronto medical research men, one of them Sir Frederick Banting, were reported Saturday to have discovered a new physiological fact in their study of artificial respiration for drowning persons.

The Health League of Canada announced an article to appear in the September issue of the Journal of the Canadian Medical Association states in a large proportion of drowning cases a laryngeal spasm develops which prevents air getting into the lungs even with artificial respiration.

The Toronto doctors found the essential free passage of air to the lungs could be achieved by passage of a catheter, or tubular instrument, through the larynx by the attending physician. Artificial respiration then became effective. Use of various drugs to counteract the spasm and to promote circulation through the lung is discussed in the article.

2-Foot Snowfall Features Freak Storms In Britain

LONDON, Aug. 13 — Terrific freakish storms smashing across British Isles Friday left a train of fires, floods and property damage.

There were three deaths and property damage estimated at $7,500,000 in two days of storms.

Two feet of snow fell in some parts of Yorkshire and Norfolk. Hailstones nearly as large as walnuts struck northern London with such force that they made children cry with pain.

Lightning set a silk mill on fire at Macclesfield, Cheshire and one woman died, trapped in the wreckage, while other women escaped. Two others were killed by lightning.

Crops and bridges in some districts were swept away. Automobiles were marooned, roads were flooded and communications broken over extensive areas.

The shower of hailstones in north London knocked off bowler hats, slashed umbrellas, smashed window panes and stopped traffic. Many motorists reported the windows in their cars shattered by the hail.

Man's Body Taken To Hospital Where Daughter Working

VANCOUVER, Aug. 17 — John Angus, 50, was killed in a traffic accident last night, and his body was taken to the hospital where his daughter worked.

Miss Bernadette Angus was at the switchboard in the hospital when the body was brought in. Following the usual routine Angus' name was given to the girl for record purposes.

His name on the slip of paper was the first word Miss Angus received of her father's death.

Specials For Fall Needs

LARGE FLANNELETTE BLANKETS PR. $2.50—
Ibex No. 1 quality, grey or white, striped ends 70x84
Plaids, whipped singly, five colors, 70x84 inches
Plain white, whipped singly, heavy weight, 70x90 in.
ALL ONE LOW PRICE, Pair .... [illegible]

MAYTIME KNITTING WOOL, 10c PER BALL —
This popular wool in 25 colors has previously been selling at 2 for 25c, Now a new low price, per oz. ball 10c

Mr. and Mrs. Thorson and daughter and two sons of Okotoks visited at the Andrew Johnson home for the week end.

Mr. Holmston of Hay Lakes while visiting at Mr. T. J. Rognass' had the misfortune to have his horse get ill and die last Thursday.

Mr. and Mrs. T. J. Rognass and Arnold had dinner with Mrs. Ellen Rognass last Sunday.

Miss Olga Johnson and Henry Johnson moved in their new home last Friday.

Mr. Alex Asp is remodelling his garage making it large enough for his truck.

The regular meeting of the Ladies' Aid will be held in Kingman hall on Sept. 8th at 2:30 p.m. The hostesses are Mrs. Alex Asp and Mrs. Karl Skalen.

Mr. Ole Bartness returned from the States last week.

Quite a number of ladies spent last Friday afternoon at the Palmer Boness home.

Mr. Ross Fleming has fixed the school house fence up in good shape.

School Open Thursday, September First

Tofield schools will re-open for the fall term on Thursday, September 1st, with the following teachers on the staff: Principal, Mr. L. A. Broughton, Vice-principal, Mr. M. W. McDonnell, Grades seven and eight, Mr. L. R. McLeay, Grades five and six, Miss M. Stewart, Grades three and four, Miss Ruth Wingrove, primary room, Miss J. McCrea. Mr. Broughton and Mr. McDonnell will teach grades nine to twelve inclusive.

A meeting of the council was held on Monday evening, August 22. Business was purely of a routine nature. Present were Mayor Swift, and Councillors Taylor, Brace, Lovell and Bellamy.

KETCHAMOOT

Little Miss Ruth and Cleone Coombes returned to their home at Red Deer after spending several weeks with their grandmother, Mrs. E. McMullen.

Miss Maude Wildman is visiting at the home of Mrs. John Warner.

Mr. Horace Fawcett, who has been very ill in an Edmonton hospital is recuperating at the home of his sister, Mrs. A. F. Schultz.

Miss Marguerite Williams went up to Edmonton Wednesday to write off two subjects in grade 12.

Mrs. O. Haley and baby of Sideview, near Ashmont spent the week end visiting her sister, Mrs. C. Coombes and old time friend, Mrs. Burnett of Tofield.

Mrs. Henderson, son Jason, Angus Mitchell, Mr. and Mrs. Lorne Lee, Miss Noreen and Emily Serada were Sunday guests of Mr. and Mrs. W. A. Mitchell, the occasion being Mr. Mitchell's birthday.

Miss Evelyn Lawson is assisting Mrs. A. F. Schultz with her housework.

65-Year Scrap Enough For Him

ELSINGFIRS, Finland, Aug. 24— Petitioner 87 years old walked into a Finnish court and asked for a divorce from his 85-year-old wife.

The court: "When were you married?"

Petitioner: "Sept. 6, 1873."

The court: "When did you start quarrelling?"

Petitioner: "Sept. 6, 1873."

The court: "Divorce granted."

Elephant Boy Coming Next Tuesday

For next Tuesday at the Variety Sharp's Shows presents the film epic Elephant Boy. This picture is based on one of Rudyard Kipling's famous books and has about as many jungle thrills as can be packed into a full feature film. India, always a land of mystery to those unable to visit its shores is depicted with a gorgeousness and a ruthlessness that is staggering. Leading actors are Robert Flaherty and Zoltan Korda. Show commences at 8:30.

LOCAL & PERSONAL

Mrs. R. Purdue of Oakville, Ontario, is visiting at the Emery home. Mrs. Purdue is a sister of the late Mr. R. E. Emery. On Monday evening and Tuesday afternoon Mrs. Emery entertained friends in her honor.

Mr. Gardam was host to the wardens, choir, and heads of the various organizations of Holy Trinity church at a banquet held at the Royal Alexandra Hotel on Monday evening. Rev. and Mrs. Wallis, who have been holidaying here the last week were also guests.

Mr. and Mrs. A. B. Clutterham returned this week from a motor trip to the coast and some points in the States.

Rev. and Mrs. Wallis of Camrose are spending their holidays at the Noland home here.

Mr. Ed Hardy, O. Letourneau and S. Graver spent the week end on a fishing trip.

Mr. Bob Evans of the Tofield Creamery staff, is spending his holidays at his home at Athabasca.

Miss Lois Thompson spent the week end visiting out of town.

Mr. and Mrs. Bell of Edmonton spent the week end visiting at the Norman Scott home.

Tom McBratney of Edmonton is spending a few days visiting at his home here.

Mr. Max Rogers is holidaying at Jasper.

Miss Enid McLaughlin is visiting friends in town this week.

Mr. and Mrs. Soper from Winnipeg, Roland and Mary Lou are visiting at the A. P. Mann home.

Rev. D. K. Allan attended the funeral service of the Rev. Dr. Leitch, held in Wetaskiwin on Monday, 22nd. Dr. Leitch passed away suddenly in the Wetaskiwin hospital after a short illness on Saturday, 20th. Dr. Leitch visited Tofield two years ago during the Conference session and took the Sunday services there.

Mrs. Geo. McLaughlin of Wetaskiwin is visiting at the manse.

Miss Margaret Allan is spending the latter part of the summer holidays with her parents, Rev. and Mrs. Allan.

B.C. Ready Grant Land To Settlers

VICTORIA, B.C. Aug. 24— B.C. government is prepared to make a free grant of all lands necessary to a British settlement scheme "provided that suitable arrangements can be made between all parties concerned.

The premier made his statement after conferring with Sir Henry Page Croft, Brig.-Gen. M. L. Hornby of Lethbridge, and R. S. Dalgleish, British shipowner from Newcastle-on-Tyne.

Sir Henry has proposed settlement of 10,000 British families on unoccupied agricultural lands on inter B.C. which he surveyed last week in company with Brig. Gen Hornby and Mr. Dalgleish.

Mr. Pattullo said his government was thoroughly in favor of an assisted settlement scheme, believing the influx of settlers backed by necessary capital would materially benefit the entire province.

He said he was prepared to "pursue at Ottawa advocacy of such a plan." Details of the actual settlement plan were not discussed Mr. Pattullo added.

I SAW

BY A.B.C.

(While On Vacation)

Where the Bicarb Soda trade hits a boomtime.

Corn on the Cob has the U.S.A. by the Ears, not to speak of the Blueberry pie, Frankfurter and Roll, Shore Dinner, Softshell Crabs, Fish and Chips, Clam Chowder and Oysters.

Now—Let us take Corn on the Cob Swingsters Annual Season of Indigestion. There is little excuse for eating Corn on the Cob except to oil the face without buying regular facial creams. It is unpleasant, it is laborious, it is unsightly, it is noisy and it violates all the fundamentals of table manners, but the custom persists. All over Canada and U.S.A. today, one can see the millions gripping each end of a cob and moving it forward and backward rapidly across the mush. The operation resembles a greasing job on a flivver, and it sounds like a cross between a locomotive letting off steam and a horse trying to eat marbles. The submissive attitude of a guest is amazing. A fellow who would rebel point blank at taking a ham in his hands and gnawing it with great gusto, and would indignantly refuse to grab a length of Bologne, will take an ear of corn without a protest and make a holy show of himself, without blushing. But let us come to the Blueberry or Huckleberry Pie craze. This is also a hazardous pastime in which the millions engage. You can eat 12 other kinds of pie, all of which taste great, without danger of ruining your clothes, changing your complexion or transforming the tablecloth from a spotless white square of linen to a blue and gray desk blotter. It takes years of natural skill and a great delicacy of manner to handle Blueberry pie, yet nobody will hesitate to try his hand at it. Huckleberries are not so hot as berries go, we could name a dozen tastier and few messier ones. Cheese on the side will help, but it is hard to tell which is the cheese or the pie. In fact it is hard to tell which is the consumer. But, coming to the Frankfurter or Prairie Hot Dog. Who are we to make any wisecracks in a futile attempt to dislodge the Frankfurter from the people's affections. All of which brings us to the Shore Dinner. There are Shore Dinners and Shore Dinners. The nearer you get to the Sea Shore the better. There is generally enough food for two horses rather than one human being, but we have sampled Shore Dinners that no horse would eat. A Shore Dinner starts with Clam Chowder. If there are any clams in it all is well, but too many Shore Dinner cooks seem to put nothing into a Clam Chowder but salt water and the tops of lead pencils. Then comes the softshelled crabs (not to speak of the crabs at the picnic). It is too often just an oversized spider with no more nourishment than you would find in a pair of spectacles. Catsup makes it taste more like a soft-shelled Catsup bottle. Then you get chicken, some Fish and French fried, if you can take it you get a Lobster, and it is a good idea to bring a nutcracker and your auto tools. Blueberry pie follows. It is not really a dinner, just an adventure in overeating. It is a funny thing that most people who are careful about their diet lose all control at a Shore Dinner. Many times we have seen Shore Dinner addicts go right through all the courses and then start eating the tablecloth, in fact we heard a man insist after eating a tin Pie plate that it was a real temper-offer—So folks, you can understand why the Bicarb of Soda trade is booming just now.

World Wheat Conference Meets Again

Cable despatches from London announce that after a six day meeting in private session, the International Wheat Advisory Committee adjourned after agreeing to continue its existence for two years beyond July 31st, 1939, on which date it was automatically due to go out of existence. Of the twenty-two countries which signed the original wheat agreement on August 25th, 1933, sixteen only assembled at the recent Conference, the rest having resigned. Those who have resigned, and who were not present, include such important countries as the Argentine, Bulgaria, Greece and Ireland.

The International Wheat Conference, it will be remembered, has met since 1933 at least once a year, and in some years it has met several times at a very considerable expense to the people of the countries concerned.

Harmed Canadian Wheat Producers

The results so far of all these extensive meetings have been absolutely nil and inconclusive. Not only this but the serious disputes which occurred in Canada in 1933, as to whether Canada had or had not been committed to a 15 per cent reduction of production or acreage, did, it will be remembered, a great deal to excite controversy, prejudice and bitterness between Canadian people. It will be remembered also that the Argentine finally exceeded her export quota, much to the harm of Canadian wheat producers because Canada, the United States and Australia, so the Argentine stated, had not lived up to their definite agreement to reduce acreage by 15 per cent.

Many Agreements Broken Throughout The Ages

What hope another conference would have of attaining any better results is not disclosed. We suggest the committee might well read the world's history throughout the ages of almost numberless similar conferences and attempts to plan international trade, which have been tried, and all led to nothing, the fact being, as the records clearly show, that hardly any country has ever lived up to any international economic agreement after it became no longer in the self interest of any particular country to abide by its contract.

History shows that international conferences for the allocation of markets for any particular product are usually called into being by those countries who feel that they have not an even competitive chance to win a good share of the world trade, and so those countries desire that others which possess better natural advantages should limit their opportunities.

It would appear that the present Wheat Conference is no exception to this principle, and that those countries which are most insistent on having limits placed on the amounts of wheat which Canada and other wheat exporting countries can ship, are those which produce either moderate quality only or whose costs of wheat production are relatively high.

Need For Freer Distribution

It would seem that Canada, having the highest quality wheat in the world and which is consequently more in demand by millers than any other such would have the greatest certainty of losing by making an international agreement, and would have the most gain by staying out of any combination or monopoly for restricting production or exports.

The Argentine, which produces good quality wheat, according to a recent editorial of "The Times of Argentina", sees the matter realistically as follows:

"One hears that there is to be an expansion in cotton as well as in grain in this country (Argentina) in spite of the lower prices being paid in these days. There is likely to be an attempt to curtail cultivation in this country, and if others do so, that is only so much the better for Argentina."

It seems a pity that the International Wheat Committee should have spent so much of its time and the people's money endeavoring to bring about a curtailment of wheat production instead of striving to bring about a freer distribution of that important food, which would make it more easily available to the millions of people in the world who today so badly need it, but who unfortunately because of restrictions against trade, are deprived of its enjoyment and use. —Searle Grain Company, Limited.

Grain Market Access To Be Granted U.S.

MANCHESTER, Eng. Aug. 23—The Manchester Guardian (Liberal) in a dispatch from London today predicted the Anglo-American trade agreement now being negotiated would give the United States free access to the British wheat market. Board of trade officials in London would not comment.

The Guardian said that in preliminary discussions last year between United Kingdom and Canadian cabinet ministers, the Canadians indicated their willingness to surrender Empire preference in wheat in the cause of better Anglo-American trade.

It was considered unlikely in London a treaty would be signed before mid-September though only minor details were declared to remain to be adjusted.

Under the Ottawa agreement of 1932 wheat from the Dominion receives a preference of six cents a bushel over the foreign-grown wheat in the United Kingdom market. Canadian wheat receives this preference when shipped through Canadian ports.

State Department Officials Silent

Washington, Aug. 23—Press reports from London that under a revision of the projected Anglo-American trade pact United States wheat would enter the United Kingdom market on the same basis as Canadian and Australian grain brought comment from state department officials here today.

The department officials, negotiating in Washington with British trade experts for many weeks, declined to discuss any provision the agreement might contain.

Against Preference

U.S. shipping and port officials long have sought a way around the preference of six cents a bushel Canadian grain receives in the United Kingdom when shipped through a Canadian port. Grain elevator interests of Buffalo have blamed the preference for a falling off in use of storage facilities at that Great Lake port. Boston and New York port and shipping interests also have campaigned against the preference.

Ottawa Officials See Handwriting On Wall

OTTAWA, Aug. 23—While Dominion government officials label as "guesswork" the reports from Britain that United States wheat may be allowed free access into United Kingdom markets under the new trade agreement the two countries are negotiating in Washington, there is a feeling here those reports will turn out to be the handwriting on the wall and Canada will lose the preference it now enjoys over all other wheat from North America.

Before the 1932 Imperial Economic conference in Ottawa, the United Kingdom wheat markets were free to the world. At that conference the United Kingdom delegation agreed to ask the British parliament to put a tariff on all wheat from foreign countries of two shillings a quarter (eight bushels) roughly six cents a bushel and allow Empire wheat to continue to enter free. Prime Minister R. B. Bennett, at that time was said to have been largely responsible for the British delegation agreeing to this proposal.

The British parliament later made good the delegation's undertaking and an impost of two shillings a quarter was imposed on all wheat from foreign countries with the provision the duties might be removed at any time the Empire countries were unable or unwilling to supply wheat to the United Kingdom at world prices.

Increased Volume Through U.S. Ports

Calgary Aug 23 Lew Hutchinson chairman of the board of the Alberta Wheat Pool, said today

"Last year the United States sold a considerable amount of wheat in the Old Country due to low Canadian stocks. Should they be given the same preference as is now enjoyed by Canada and Empire countries, the tendency might be to reduce the amount of wheat this country could sell in Great Britain.

"Should the United States be placed on the same basis as Canada, I would think there would be an increased volume of Canadian wheat handled through United States ports. This would naturally not be appreciated by shippers in the east.

Important Factor

"Whether the United States will have a surplus of high quality wheat above domestic requirements would be another important factor so far as Canada is concerned. Certainly if the preference is removed it makes it all the more desirable for the Dominion government to accept Washington's invitation to a conference regarding marketing of wheat."

Suggestion of allowing United States wheat free access to the British market emphasized, according to the pool chairman, that the Canadian farmer may consider himself fortunate to have a board accepting wheat at a guaranteed minimum price.

Rigorous Training Pilots Go Through

Winnipeg, Aug. 23—One of the most extensive training courses in the history of commercial aviation is that through which pilots of Trans-Canada Air Lines are working their way at Winnipeg headquarters and on cross country night and day runs to the Pacific Coast. They joined the company as first class pilots but are [illegible] rigid tests as navigators, wireless operators, and even study [illegible] phases of ground engineering.

Each pilot gains experience, too, [illegible] as an instructor in the Lodestar flight. In stops, he learns the [illegible] of handling the Electra type of aircraft and finally concentrates for hours in a rigorous course on the Lockheed 14's, the speedy monoplanes which will be used in the coast-to-coast flights once regular passenger service is inaugurated.

A parallel to the system of pilot-training used by Trans-Canada Air Lines is seen in that of Imperial Airways of London, England. Imperial's policy, on which TCA's is based partially, is to establish a full educational organization, not only for pilots but for ground crews as well. If, for instance, the application of the candidate for a ground engineer's license is considered he attends lectures with actual instructions and with hard labor as a member of a shift in the workshops; he goes for a few days to the works where the engines and airscrews are made; and then he is shipped in one of the liners, between voyages sharing with the maintenance team the duty of tending the craft in which he flies.

Transfusion 'Bank' at City Hospitals Aids Suffers in Emergent Cases

(Edmonton Journal)

The atmosphere was tense. A white-faced patient, stretched out on a metal operating table was receiving life-giving blood into his veins. Silently and anxiously, keen-eyed attendants viewed the process.

It was a historic occasion in Edmonton. It was a transfusion "without a donor." The blood being used in the procedure had been taken from a flask in a refrigerator. Days before it had been obtained from a citizen. It had been tested, identified and stored in a specially-constructed refrigerator.

Life-Giving Results

The scene of the first tense, "donor-less" blood transfer was the Royal Alexandra hospital three months ago. Since then, similar transfusions no longer considered experimental have been given by the score in the same operating-room with life-giving results.

In the civic hospital's laboratory today more than 100 blood-filled flasks are kept continuously awaiting the needs of ailing men, women and children whose lives often are dependent upon speedy transfusions. All are clearly labelled—identified as to type of blood and the period during which it has been stored.

It was just a year ago that medical science awoke to practical possibilities of preserving blood. Military officials, keenly realizing value of the development in time of war, fostered research.

Few months ago, leading hospitals turned to solve one of medical science's most troublesome problems—the time element in transfusions. Royal Alexandra and University hospitals in Edmonton were among the first institutions on the continent to take advantage of new findings in Europe.

'100 Per Cent Success'

Dr. A. F. Anderson, proficient superintendent of the city-owned medical centre, Tuesday told The Journal blood preservation at his hospital has proved a 100 per cent success.

"Until three months ago we seldom dared to keep blood for more than an hour. The moment it was exposed to air we hastened to add a preservative solution of sodium citrate. With a combination of refrigeration and citrate we now are able to keep it for at last 30 days," said Dr. Anderson, a specialist in internal medicine, and a former president of the Alberta Medical association.

"Beneficial results have been widespread. We can give transfusions at half the cost and without delay. We have a wide selection of blood to choose from—blood that has been tested rigorously by a skilled laboratory technician.

"The Royal Alexandra has between 40 and 50 transfusions every month. Blood transfers may be used for one of three reasons: To restock arteries and veins drained by hemorrhages; to replenish circulatory system depleted by loss of blood in accidents and to treat blood infections.

"At least 90 per cent of our transfusions now make use of preserved blood. Only in special cases is the old donor-to-patient method used," Dr. Anderson explained.

Time Was Lost

In the transfusion system outmoded by the march of science in the past year time was lost discovering a friend of the patient or a professional donor whose blood was suitable. Mixture of different blood types instead of saving a patient probably would kill him, said the superintendent.

"There are four types of blood. It is often difficult to find the required type speedily. The accepted donor's blood must be free of disease. It takes time and often loss of time may mean death to a gravely-ill person," Dr. Anderson observed.

One of the most pleasing features to medical men of the new refrigeration-preserving system is the opportunity it offers to test blood to be used for transfusions—to identify the type and establish its infection sterility.

"In our hospital one person is charged with responsibility of analyzing and safeguarding blood-filled flasks. No other attendant is allowed to remove blood from the refrigerator.

"Before it is set aside for transfusions the blood is subjected to tests that positively guarantee its cleanliness. Chances of a patient receiving unsuitable blood are almost negative. Every possible precaution is taken. The patient who gives the blood is examined. Everything possible is done," related the superintendent.

"Preservation of blood has made more transfusions possible," Dr. Anderson said.

A Story About Mustard

IT IS RELATED THAT A WEALTHY MANUFACTURER ONCE STATED THAT IT WAS NOT THE MUSTARD PEOPLE ATE THAT KEPT HIS FACTORY GOING, BUT THE MUSTARD THAT PEOPLE LEFT ON THEIR PLATES.

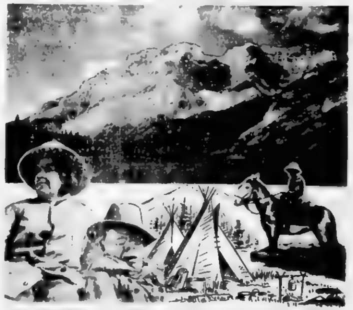
NOBODY WOULD WANT LEFT OVER MUSTARD, BUT THERE MAY BE, PROBABLY IS, SOMETHING AROUND YOUR PLACE THAT YOU HAVE NO FURTHER USE FOR BUT WHICH SOME OTHER PERSON WOULD BE PLEASED TO POSSESS.

A PIECE OF FARM MACHINERY, A HOUSEHOLD APPLIANCE, FURNITURE, USED AUTOMOBILE, LIVESTOCK OR ANY ONE OF THE NUMEROUS THINGS WHICH ACCUMULATE AROUND THE PLACE AS THE YEARS PASS BY. FEW PEOPLE KNOW YOU HAVE THESE THINGS OR THEY MIGHT HAVE BEEN SOLD. YOU CAN LET A LARGE NUMBER OF PEOPLE KNOW BY INSERTING A CLASSIFIED ADVERTISEMENT IN THE MERCURY.

CLASSIFIED ADVERTISING RATES ARE LOW—50c ONE WEEK; 75c TWO WEEKS; $1.00 FOR FOUR WEEKS. THERE IS A LIBERAL ALLOWANCE OF THIRTY WORDS.

THE MERCURY

"Away to The Canadian Rockies"



A [illegible] travel literature is the latest Brinley "Away" book, "Away to The Canadian Rockies and British Columbia," by Gordon Brinley, with illustrations by her artist-husband, Putnam Brinley.

Drawn to Western Canada by a booklet on the pleasures enjoyed by the Trail Riders of the Canadian Rockies, the "Traveling Brinleys" spent an entire summer in the pursuit of happiness and of notes and illustrations for an addition to their popular series of travel books.

In her happy, informal style Gordon Brinley, the writer, tells of their visit to Calgary to see the West [illegible] and prepare for a long pack trip to Mount Assiniboine. They spent a holiday with the Sky-Line Trail Hikers and the Trail Riders of the Canadian Rockies, visiting Moraine Lake, Larch Valley, and magnificent Yoho Valley, and thoroughly enjoyed the novelty of living in Indian teepees, fishing for trout in lakes in the clouds, and thrilling to the changing pageantry of their surroundings.

Further adventures carried them to such famous lakes as Louise, Emerald and O'Hara, right over the Great Divide into British Columbia, and on to Vancouver where they discovered another vivid countryside and excellent fishing in the Vancouver Island salmon runs.

The two adventure-loving Americans have a large following of readers who will see the Canadian West through their eyes, attracted by the charming drawings by Mr. Brinley, the blithe and readable text by Mrs. Brinley, and the definite practical information they incorporate in their book for those who would follow in their footsteps.

The pictures above show Mr. and Mrs. Brinley (photo by Peter Whyte) and some of the Canadian Rockies' scenery they like best.

MONEY—

(Continued)

IN ADDITION to the Central Banks, like the Bank of England, the Federal Reserve Bank in the United States and the Bank of Canada as well as central banks in other countries, there just naturally came into being to cope with the increasing demands of commerce, private banks. In one sense private banks superseded central banks, but not exactly as we understand banks today. Private banks have always been more or less governed by laws enacted by the country in which they operated, but these laws are so diverse and moreover are continually changing, that any discussion of the laws here would be futile. But one thing can be noted, that while the private banks were in general, dealing with the common people, and the central banks with the more wealthy individuals and institutions, the private banks were modelled after the fashion of the central banks. Even as the central banks made use of more gold than they possessed by instituting the gold standard procedure, so did the private banks have the authority to use more money than they possessed. This is a paradoxical statement but it holds good just the same. But, and this is a fact that should be stored within the mind, the gold standard procedure and the authority given to private or chartered banks was not designed so much as to make some people rich as it was to provide a wider financial channel through which the ever widening rivers of international and national commerce could flow. As to making bankers rich, at different times and places it made bankers both rich and poor. It was a double edged sword they were using and at best the bankers had only partial control over its swinging. The whims, fancies, desires and actions of the people furnished the motive power for the sword's motion. But on the whole, the plan worked. Not perfectly it is true, but it did work. Evidence of this is to be found in the general advancement of mankind in the last two centuries. Steamships, trains, new countries opened up, electricity, refrigeration, automotive industry, flying, roads, free schools, hospitals, all bear testimony to the working of the principle of a flexible financial super-structure on a solid base. Its chief fault was that it worked too well. It may be possible for some scientists to envisage the time before the earth was formed, but no man no matter how clever he is can envisage a time before the law of mathematics held good. Before the sun made this sphere a habitable world, two and two made four. That is a law transcending human thought and worldliness—it just is— and to ignore it is like going on a ship without a rudder or compass. Now, if an individual borrows a sum of money from any source, he is according to the accepted standards of business expected to pay it back plus a sum for the use of it. If through any reason either within or beyond his control he does not pay it back, he has broken the law of mathematics. Remember we are discussing money, not humanity. In actual practice quite a number who borrowed money could not or did not pay it back and the easier it was to borrow the more there were who found it impossible to pay back. So while the principle of the gold standard applied to both central and private banks, was responsible for a huge expansion of industry and business, it also was responsible for a huge accumulation of debt.

In a discussion of money much must be left unsaid as well as said, because the ever swirling tides of money are always around us, and every tiny whirlpool has its focal point of interest. But after one has briefly glanced at the history of finance and money, with its advantages and disadvantages, the thought occurs, can a better system be evolved? It should be remembered that the present system is an evolution of quite a number of years, embracing the thought and energy of a large number of men, continually being spurred into action by a public ever demanding more and more as regards a better standard of living.

With certain reservations, we do not expect any radical changes in the financial set up in our time. We believe people will always demand currency stability and currency stability can only be obtained when people are unanimous in the choice of a currency base. So far among comparitively modern free peoples this unanimity of opinion has only been associated with gold and silver, and even then the road has been anything but smooth. For instance, the German currency debacle, the devaluation of the French franc, and the collapse of the Rusian rouble. And to come closer home, the United States and our own 59c dollar. In our case raising the price of gold or lowering the value of the dollar, whichever way one looks at it, seemed to make little difference. But it is interesting to note that there are many people who believe it to be inevitable that commodity prices will eventually rise to the $34 an ounce price level. If or when this comes about it would have the effect of lowering debts in proportion to the value of assets as well as increasing the price of farm products.

If gold and silver by demonstration has been proven to be the only unanimous choice of free peoples for a currency base, what more is there to say? To us the problem seems to be one of adjusting human thought and action into the present set up rather than trying to change the set-up. In regard to this there is plenty of room for improvement. But before attempting any discussion regarding that, we would like to touch on two other matters, one foreign, the other domestic.

A year or so ago the United States passed a law whereby its silver reserve was to be kept at a certain ratio, two-thirds or three-quarters, we believe, to its gold reserves. This entailed buying large quantities of silver which proved very profitable for American and foreign silver mines, as well as silver speculators. And today in addition to huge stocks of gold, the United States possess huge stocks of silver. At the time this was done there was much wonderment as to why it was done. Originally intended to help the Nevada silver miners, the plan soon grew beyond that and at one point reached a stage where the people of some Central American countries on a silver currency base actually melted up their currency so that they coud sell the silver to the United States. In consequence, a finance minister of one country had to fly to Washington and the banks in that country were temporarily closed.

Over in China something else was happening. The Chinese people had adhered to a metalic currency in preference to a paper currency. Moreover, the more wealthy Chinese kept their wealth in the form of a small silver block, called, we believe, a tael. The Chinese banks, chiefly under British control instituted a movement whereby paper currency was used instead of the silver tael. The effect of this was that the banks kept the silver and the Chinese people had the paper. The next item of interest was that Japan was waging war on China. So we have this situation, the United States a highly industralized nation with a huge stock of silver. The Chinese banks largely under British control with a huge stock of silver. Japan exhausting itself in a futile war with China. When the smoke of battle has cleared away, who is going to be able to do business with a silver loving people. The answer is obvious, those who have silver to do business with. Of course the above happenings might have been purely a coincidence. Each person will have to decide that for himself or herself.

Now as regards Canada. During the depression we felt much more could have been done than was done even though the Conservative government had a tough situation to cope with. We were immensely pleased to see the five cents bonus on wheat, but what appealed to us then, as now, was the mining possibilities of the Dominion. Instead of relief camps, there could have been government controlled silver mining camps, organized to use as much manual labor as possible. The government could have called for silver and more silver and paid out paper money for it which would have automatically furnished the purchasing power which was so badly needed, at the same time increasing the financial resources of the country. We know that in the early part of the depression silver was only 29c an ounce, later going as high as 81c, but regardless of the price then prevailing silver is a precious metal and millions of people in this world are still doing business through it—and it will keep. The opportunity is not entirely lost. As to the present we feel a measure of prosperity could be brought about by a dual metalic currency base. Silver for internal use, gold for export use.

Judging from the above the reader might come to the conclusion that we have made a god of gold and silver. Nothing could be further from the truth. We would like to see the time when gold and silver will be dethroned and in its place brotherly love and mutual helpfulness prevail. We do not expect to see it, but we certainly would like to.

Definite Influence Of Organic Matter In Soil Composition

Soils are composed of mineral and organic matter, each of which has a definite influence on the physical and chemical properties, states Dr. J. L. Doughty, Dominion Soil Research Laboratory, Swift Current, Sask. The organic material is the residue of plants in various stages of decomposition. Part of the material still retains some resemblance to the original plant, while the remainder is an amorphous dark-colored material generally referred to as humus. The amount of organic material varies from 1 to 3 per cent in desert or arid soils to 85 to 90 per cent in mucks and peats. The humus generally makes up the major portion of the organic fraction except in some peat soils, and exerts the most influence of the soil processes.

The effect of the humus material can be classified as follows:—

Physical—modifies the colour, texture, structure, water holding capacity and aeration. Chemical—exerts an influence on the solubility of soil minerals, acts as a source for many of the elements required for the nutrition of plants. Biological—source of energy for the development of micro-organisms.

The nitrogen and other plant nutrients in the organic matter are made available for plant use by the action of micro-organisms. Cultural practices that tend to stimulate bacterial activity increase the supply of plant nutrients and likewise increase the rate of decomposition of organic matter. The two and three year rotations of wheat and summer-fallow, as followed in the wheat lands of Western Canada, favour the rapid oxidation of the organic material. During recent years, many fields in the prairie areas have lost some of the surface soil by drifting. As the surface soil contains most of the organic matter, such loss generally includes a lot of this valuable material.

A comparison of 5 virgin and cultivated soils from Southwestern Saskatchewan showed an average loss of 27 per cent of the organic matter. Similar work in North Dakota showed a loss of 16 to 35 per cent of the organic matter due to cultivation.

Laboratory experiments have shown that while these soils have suffered a large loss in organic material the material remaining contains an appreciable quantity of nitrogenous material that can be readily converted into nitrates. The results indicate that under normal conditions there would be sufficient nitrates formed to supply the needs of the crop.

Feeder Cattle and Calves

Arrangements are now complete for the 3rd Annual Show and Auction Sale of Feeder Cattle and Calves, to be held at the Union Stock Yards, Saskatoon, Canada, on September 28 and 29th, 1939. As it is an event of interest to all ranchers, farmers and feed lot operators, desirous of selling or purchasing Feeder Cattle or Calves, information can be obtained from the Saskatoon Feeder and Stock Show Association, Saskatoon.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "The Crop Testing Plan."

"Why is it" said my friend whom I will call John Skeptic — for he certainly is a real skeptic—that in May, 1936, the price of Winnipeg wheat was 73 cents, that in January, 1938, it went up to $1.54, and that now it is down to 77 cents? Do you think that these fluctuations are warranted?

A careful examination of the records revealed that when in May, 1936, the price of Winnipeg wheat was 73 cents, the Liverpool future was 83 cents—which is the proper price relationship—and that there was available then plenty both of Canadian and World wheat, that by January, 1938, there was considerably less world wheat, the Liverpool future price rose to $1.15, but there was proportionately much less, indeed quite insufficient, high strength Canadian wheat, so the Winnipeg price went to $1.54.

Now, however, the World price of wheat is down again to 78 cent and Winnipeg down to [illegible] cents, simply because there may soon be more World wheat and more Canadian wheat than may be required.

Actually we see in these fluctuations the law of supply and demand in action, showing how prices fall when supplies are abundant, rise when supplies become scarce, and rise very high indeed when supplies become insufficient.

Following factors have tended to raise prices: Threatening European political situation—Rumored developments in international currencies—Germany decrees creation of extra storehouses—Millers required to keep two months wheat supply—Italian trade wheat estimates below official—Wet European harvesting weather—Rumanian government recommends more wheat consumption to conserve corn.

Following factors have tended to lower prices:—Russia actively pressing wheat and barley. Wheat exports in most U.S. crops since July 1st—Insufficient foreign exchange in Continental countries to buy many raw materials—Prairie wheat crop still indicated over 300 million—Broomhall's preliminary estimate import requirements only 548 million.

Many Plan Vacations In Fall Months

Winnipeg, Man. Aug. 22—Post-holiday travel bargains announced by the Canadian National Railways promise to make September a red letter month for travel-minded folk who have stayed at home all summer.

May Become Unknown

CAMBRIDGE, Eng. Aug. 22— A prediction crop failures eventually may be almost unknown was made by Sir John Russel of the Rothamsted experimental station, speaking today to the British Association for the Advancement of Science.

Sir John said meteorologists some day would be able to estimate the probable rainfall during the crop growing season, from which a table of expectancy of yields could be worked out.

"We can expect to look forward to a time when crop failures will be almost unknown and when crop production will involve even less labor than it does at present," he said.

London is threatened with loss of its water supply within 35 years, Dr. Samuel Buchan, geological authority, told the association.

"A general progressive lowering of the level of water in the underground reservoir of London has been taking place over a long period, but during the past few years the fall has become more marked," he reported.

"Unless the fall is checked, the reservoir will be exhausted in 35 years or so."

Canadian National Railways have arranged for low fares from the prairies to the Pacific Coast and from the Pacific Coast to the western prairies.

Beginning Saturday, September 2, and on sale until September 11, with a return limit of 30 days, special fares to the west coast will be available from all stations from Port Arthur, Ont., westward including the Province of Alberta. Similar fares from the west coast to the prairies, with the same return limit, will be sold between September 6 and 13, inclusive.

Stopovers will be permitted at Calgary, Edmonton, and west of that point on westbound tickets sold in Alberta, Saskatchewan, Manitoba and Ontario, and on eastbound tickets they will be allowed at Calgary and Edmonton only. Tickets will be valid going and returning via the same line and route in each direction. Optional routes and side-trips will not apply.

Fares for these travel periods are quoted for coaches only at two and a quarter cents per mile, using one-way mileage for the round trip; for coach-tourist accommodation at two and three quarters cents per mile on the same basis, and for first class at three and one quarter cents per mile.

Teaches Farley To "Draw Long Bow"

Keen appreciation of the wonderful playground Canada possesses in the Canadian Rockies was expressed by Jim Farley, postmaster-general of the United States and organizer of the Democratic Party, who spent a pleasant few days with his daughters Ann and Betty at the Banff Springs Hotel. While at the mile-high playground, they took part in the various activities usually enjoyed by the international colony there and thoroughly explored the surrounding country by motor. Mr. Farley, who is noted for the fact that he can call people by their first names years after a single meeting, will have a hard time forgetting Jacob Two Young Man, chief of the Stoney Indian tribe, snapped showing him how to handle a bow and arrow in the accepted Indian style. Interested in the spectacle of their daddy taking orders from anyone less than President Roosevelt himself are Ann, left, and Betty.

JOHN CHINAMAN GARDENER

By Don Mason in the C-I-L Oval

For the eastern visitor, entering for the first time the fertile Fraser River Valley of British Columbia, one of the most [illegible] landmarks is the rural [illegible] rather the name [illegible] accustomed [illegible] McDonalds, Smiths, [illegible] and Larsens along the [illegible] of the East and prairie [illegible] Fraser River borders [illegible] on the [illegible] British Columbia [illegible] Chinese Canada. Here [illegible] enough the Chinese [illegible] Land of Gold [illegible] sought so [illegible] country.

Originally emigrating from the Canton area in 1870, they were employed as coolie labour on the railroad construction gangs then pushing the right-of-way victoriously through the West. On completion of construction [illegible] were scattered through the province [illegible] engage in a score of new [illegible]. Some who had been able to accumulate a little capital went into business for themselves, as [illegible] merchants and laundrymen. [illegible] however were dependent upon the roughest sort of manual labour for a livelihood. Of these the greater number were employed in the coal mines of Vancouver Island. At that time only a few found their way onto the land, the land that was to prove the refuge and salvation of the Chinese in British Columbia.

Prior to 1900, the Chinese population [illegible] had grown so [illegible] owing to unrestricted immigration, that a head tax of $100 had been imposed on each one crossing its borders. Even the head tax however, was too frail a barrier to withstand the inrush of Orientals whose enthusiasm had been fanned to fever heat by fabulous reports of the riches awaiting the fortunate prospector in the gold-fields of the Cariboo. Many hundreds came from San Francisco alone. So in 1903 the head-tax was increased to $500. In this year also occurred the first organized protest of white labour against Chinese competition. The demonstration was marked by riots and property destruction in Vancouver's Chinatown.

With the next few years, the anti-Chinese movement strengthened. In 1913, it culminated in the strike of all the white coal miners on Vancouver Island. Shortly after this event, the government of British Columbia prohibited by law the employment of Chinese for work underground in mines, and one means of livelihood was closed to the Oriental.

Following their exclusion from the mining industry the Chinese turned, practically en masse, to lumbering. But organized white labour was not yet through with them. Not long after their hegira to the sawmills of the province, the Minimum Wage Act was passed and put into force. This gave white labour its opportunity to deliver the final eliminating blow. Under the new law a mill operator had to pay his Chinese employees as much as he paid his native Canadian labour. Working from this point it was not difficult to convince employers that, in view of the prevailing feeling it would be as well for them to dispense with their Chinese employees entirely. Thus the cycle was completed. From the soil these Cantonese had come; to the soil they were driven back.

And yet no man standing by the banks of the rushing Fraser and looking to the horizon across brown, richly productive fields, would say that this was an altogether bad thing. For if the white man, by the inexorable increasing pressure of his labour organizations, has forced his yellow brother, who has sinned against the standard of living, out of the ranks of industry, his yellow brother has done something very similar to him. Today, it is estimated the Chinese control up to seventy-five per cent of the vegetable produce business of British Columbia. Of the 20,000 of their race resident in the province, 10,000 are engaged, directly or indirectly, in market-gardening. The number of their farms is reckoned at between 3,000 and 4,000. So they have been driven, one might say, from pillar to post to prosperity. The amazing success of their efforts is due to their own patient, endless toil and the scientific fertilization of the soil. The latter is especially important, owing to their peculiar methods of cultivation imported from the homeland.

Coming as these Cantonese do from one of the most densely populated regions of the earth, they have learned not to waste a single square foot of the good brown soil. The soil, generous though it is, is sadly overburdened. When one small ancestral field must support as many as three generations of a family of ancestor-worshippers at once, and perhaps an ox or a cow as well, there is not much margin for waste. Thus to this relatively empty land the Chinese farmer brings the intensive cultivation methods of the crowded East. In Canada he will harvest three successive crops from the same plot in a single season. Naturally the strain on the soil is terrific. Without the liberal use of fertilizer such remarkable production would be impossible.

To appreciate fully the miracle these industrious Asiatics have wrought upon the land, one should observe their vast fruitful gardens from the air. Stretching along the banks of the river for hundreds of acres, the strict unswerving symmetry of plot after plot, and row after row, gives one the impression of a giant blue-print. From the ground, one may learn the mechanics of the miracle.

In the fields the men work with that deliberate economy of movement which is characteristic of the man of the soil the world over. They wear the huge Tai-mo, a wide-brimmed straw hat, that has been worn by the farmers of China for four thousand years. This alone would set them apart from the farmers of the western world. Stepping with care between the plots, one's eyes may run with pleasure along illimitable, severely straight rows of every imaginable kind of tender green growing vegetable. From these plots the Chinese farmer takes three separate and distinct harvests each season. First he may plant lettuce, then a little later carrots between the rows of lettuce, then later still he interplants brussels sprouts, or perhaps cabbage. The yield per acre is enormous. The economy of this interplanting system is at once apparent. Also apparent, however, is the immense drain on the soil. To remedy this, the farmer, after each harvest, adds fertilizer generously. It is estimated that for each acre of land one and a half to two tons of fertilizer are used annually. For the peculiar needs of the soil the farmers employ, mainly, two chemical mixtures cryptically identified as "4-10-10" and "2-10-6", products of Canadian Industries Limited. To the layman such copious fertilization must seem incredible, but the success of the Chinese farmer is ample evidence of its effectiveness. The land, [illegible] of fatigue and renewed in strength, repays him abundantly.

The houses of the farmers are in painful and shabby contrast to their meticulously tended fields. They are rude, unpainted, temporary shelters; almost tragically symbolic of the impermanence of the Chinese in this country. For to the Chinese, Canada is not home. It is a land of exile, albeit profitable exile. Under the Chinese Immigration Act of 1923, the classes or categories of Chinese allowed admission to Canada are stringently limited. The great majority of Chinese in this country, as long as they remain here, must endure separation from their families. As an illustration of their unhappy situation the ratio of the Chinese men to their women in British Columbia is three hundred to one. Dynast as he is in soul and bone, the Chinese will not erect a permanent dwelling or buy land which he may not expect to be the home and property of his son after him. So his house is a roughly built shack, and his land is held from a white landlord on a long-term lease. The Chinese do not plan to live out their lives in Canada. So strong is their feeling of alienation that the bodies of Chinese who are unfortunate enough to die here are sent for burial back to China, where lie their hearts and families and traditions.

In spite of the stern necessity of the law, one may regret the inevitable passing of those wise and careful hands that have known so well how to draw from the land its treasure and how to minister to its needs. In simple gratitude for the productive beauty spread before his eyes, the admiring visitor must regret the passing from the land of a race whose humble courage, persevering industry and sheer agricultural wisdom have made possible the perennial wonder of the Fraser River market-gardens—the finest of their kind on earth.

They Know The Reason

Those grain producers who support Alberta Pool Elevators by delivering their grain thereto, are clear-visioned, far-sighted people who can discern the benefit to their industry in giving patronage to an organization which is thoroughly co-operative in every respect and is striving to advance the cause of agriculture in every possible way.

Tornado Cuts Through Area Near Fort William

FORT WILLIAM, Ont. Aug. 24—Leaving a trail of destruction along a 100-mile patch, what is believed to be the first tornado in the history of Thunder Bay district roared over the section south and west of Fort William late Monday.

The tornado ripped across 10 townships, levelled the farm buildings of Upko Pilo and Matt Alanen, killed cattle, uprooted trees and telephone poles and damaged numerous buildings in its path.

Pilo and his family were left homeless after the wind ripped their house to pieces, blew down their garage, rolled their automobile over two times and scattered their personal belongings far and wide.

Convicts Driven 'Stark Mad' By Heat in Cells, Is Charge

PHILADELPHIA, Aug. 24— Picture of death among convicts driven "stark mad" by steam heat in an "air-tight cell block" was drawn Wednesday by two officials investigating the deaths of four hunger-striking inmates of the Philadelphia county prison.

Coroner Hersch said autopsies disclosed the four—described by Warden Mills as "agitators" in a strike of 600 prisoners—died of suffocation in punishment cells where their nude battered bodies were found early Monday.

The coroner was quoted by a Philadelphia paper in a copyright story as saying the four, along with some 20 other inmates, were placed in the cells Sunday night, that the windows were closed and steam turned into the radiators—under orders from a prison official.

"We have ascertained that one of the guards said: 'Let's give—— the heat,'" Hersch was quoted. "A short time later orders were given to 'turn on the heat.'

"We know the guard who turned on the heat. What we want to establish now, is who gave him the order."

Similar versions of how they said the deaths occurred were given by [illegible] attorney Boyle, who said "interrogation of witnesses revealed conditions much more like the Black Hole in Calcutta than a modern prison."

Boyle declared "nobody went near the place (punishment cells) all night."

"All night long," he said, "the prisoners were screaming and yelling to have the steam shut off. They needed water desperately.

"The men went stark mad during the night," the assistant district attorney asserted. "They saw the weaker convicts go first. Raving mad for some time, and then dropping to the floor unconscious. And then dying."

Policemen Wednesday arrested two guards, A. W. Broughon and Francis Smith. The arrests were ordered by Mayor Wilson who said the guards would be given a hearing later on charges of homicide.

Coroner Hersch expressed surprise at the mayor's action. He had been conducting his own investigation and said earlier five guards might be arrested before the end of the day.

LINDBROOK

WEDDING

A wedding of interest to us all here took place last Wednesday, 24th of August, in Edmonton at All Saints Pro Cathedral (Anglican) when Hazel, youngest daughter of Mr. and Mrs. Geo. Weslake, oldtimers of this district, was married to Mr. Herbert Rayner of Leduc, Alta. Mr. Rayner is well known here, having farmed here for a few years until he moved to Leduc where at present he is engaged in the automobile business. Miss Dolly Weslake, sister of the bride was chief bridesmaid, whilst Mr. Rayner was attended by his brother as best man. After the ceremony, a reception was held at one of Edmonton's leading hotels, and then the bridal party and friends and relatives left to attend a wedding dance given in their honor at Ministik Memorial Hall. The hall was packed owing to the popularity of the young couple and everyone present enjoyed themselves immensely. We all extend our sincere wishes to the young couple, may they enjoy health, wealth and happiness and many long years together.

Mr. and Mrs. Jas. Bracegirdle and family motored to Wainwright for the week end visiting relatives and friends.

Mr. and Mrs. F. Evans are "at home" again after their trip to Athabasca.

School reopens Sept. 1st here. Miss Yvonne Phipps will be teaching here again this year.

Cutting and haying has been resumed after the recent spell of wet weather and before long threshing will have started. Practically all the wheat is cut, only oats and barley to cut yet, so if the weather will only stay put for awhile, all will be well. Luckily to date there has been no frost.

2 Birds Silence Bell At School

HERKIMER, N.Y., Aug. 31 — School bells will not ring out this fall at St. Francis de Sales Parochial school. The reason: two sparrows chose the school's bell as the place in which to build their nest, and Rev. Daniel J. McCarthy, principal of the school has ruled the birds are not to be disturbed.

AMISK CREEK

Harvest is very well advanced in spite of the rainy weather we have had. The wheat is nearly all cut and quite a lot of the oats.

Holidays for school children are now over again. Thursday of this week they will be packing their books back to school. Mr. Parson from Holden will be the teacher of this school, S. Hafso from Viking is to take over Standard School and Miss Annabo will be teaching at Ketchamoot.

The local Y.P.A. gave a nice program in the church last Sunday evening.

Merle Hillerud and Myrtle Moen were visitors with Mr. and Mrs. Hilmar Moen at Hazeldeen recently.

Alice and Lloyd Berg and little Iona Kjelland, who has been staying with the Bergs for some time this summer visited with their aunt, Mrs. U. Garthee and their cousin, Mrs. O. Kjelland. They returned the same evening, Iona remaining with her parents.

We are sorry to hear that Mrs. P. O. Moline is on the sick list. We hope for a speedy recovery.

Mr and Mrs. E. A. Moen and Edna were dinner guests at the J. Jacobson home last Sunday.

Mrs. J. Blackburn who has helped care for her mother, Mrs. J. H. Olson for some time, returned to her home at Lavoy last Saturday.

Mr. and Mrs. O. Brannes were callers at the R. O. Berg home last Sunday.

A family reunion was held at the I. C. Olson homes last Sunday. 25 persons were present including Missionary Tolbert Ronning and family, recently arrived from China, and also Mrs. Olson's aunt from the States.

Grandma Moen and Mrs. P. O. Plaston were callers at the D. Derdock home on Wednesday of last week.

Mr. A. Erickson spent a couple of days visiting in the city last week.

Merle Hillerud left last Monday for Grande Prairie to take up her duties as teacher again.

Arnold Berg is helping at the E. A. Moen farm during harvest.

"A little experience often upsets a lot of theory."—William Feather.

KETCHAMOOT

The regular monthly meeting of the Ladies' Aid will be held next Wednesday, Sept. 7th, at the home of Mrs. W. A. Mitchell. A cordial invitation is extended to all.

Mrs. Mabel Brown and son Archie of Banff visited at the McMullen and Coombes home Sunday.

Mrs. John Morton of Tofield visited her friend Mrs. Henderson on Saturday.

Mrs. J. Younie, Miss Mabel, Miss Henderson, and Jim and George Younie, all of Edmonton were guests of the W. A. Mitchell home Sunday for dinner.

Mr. and Mrs. Henry McGinitie and family were Sunday guests of Mrs. McGinitie's mother, Mrs. Bruha and brother of Shonts.

Miss Nora Kennedy returned to her home near Ryley Thursday after being at the C. A. Ingram home several months.

Mr. Horace Fawcett returned to his home in Edmonton Sunday after a two weeks stay with his sister, Mrs. Schultz. Harold Schultz and Stanley Sears taking him in the car.

After the services at Ketchamoot on Sunday, Rev. D. K. Allen, Mr. and Mrs. Chas. Whillans, Miss Joyce and son Neal motored to the George Cookson home, where the infant son of Mr. and Mrs Jack Cookson of Edmonton was christened, Gary Jack. Other guests were Mrs. J. Cookson's mother and sister, Mrs. and Miss Rutter, Mr. and Mrs. Jack Cookson sr.

Master Douglas and Harold Barnes and Miss Ella and Merlin Brown had their tonsils removed at the clinic in Tofield Monday.

Mr. Alvin Schultz of Edmonton is spending some of his holidays at the Nomeland home.

Mrs. Davison, Miss Edith, Messrs. William Stairs and Bill Davison were Sunday guests of Mr. and Mrs. F. Shupe at Lindbrook. Miss Edith Davison underwent an operation for the removal of her tonsils on Tuesday.

Mr. and Mrs. P. O. Moline and daughter Margaret of Amisk Creek were guests of Mr. and Mrs. C. A. Ingram on Sunday.

The big grading outfit is being used in our district now, the one mile south of Torries has been completed. They are now working one mile south of H. McGinities and 2 miles east of Sears' corner.

Mr. and Mrs. Leslie McGinitie and two daughters, Doris and Nola, visited Mrs. McGinitie's sister, Mrs Martin Lawson and Mr. Lawson on Sunday.

Mr. and Mrs. T. D. Ferguson and two sons Lloyd and Stewart of Lakeshore were Sunday guests of the J. H. Ingram family.

Miss Mabel Lawson spent two weeks at the parental home after attending the summer school in Edmonton. She is now visiting in Calgary before the re-opening of her school in Camrose.

Dr. and Mrs. Morrison and family, Mrs. Henderson and Jason, and Miss Eileen Stirrit were Sunday evening visitors of Mr. and Mrs. W. A. Mitchell.

Mrs. Kitchener and grand-daughter of Edmonton came on Sunday and visited her friend Mrs. Chas. Whillans.

Mr. and Mrs. Oscar Barnes were Edmonton visitors Tuesday.

BOARD AND ROOM For High School Students.—Apply Mrs. W J. Bailey, Tofield. 27p

LOCAL & PERSONAL

Mr. and Mrs. Murray McBeffey and children and Mr. Bill Craig of Edmonton were Tofield visitors on Sunday.

Mrs. Jack Letourneau, Mrs. Joe Wiltzen, Loret Rose and Goldie Jacobs visited the city on Thursday.

Mr. and Mrs. A. J. H. McCauley are visiting their son Bill in Banff.

Mrs. Hemsell of Edmonton is visiting her nephew, Mr. Bert Lovell.

Mrs. Stinson and family returned home this week after spending a month visiting in Saskatchewan.

Word was received that Mr. Bill Wood, former resident in Tofield, passed away very suddenly in U.S.A.

Mr. Alvin Schultz has been visiting in the Tofield district. He returned to Edmonton this week.

Mr. and Mrs. Bill Swift and boys visited at the Swift home here on Sunday.

Mr. Gilbert McSporran returned home this week after a several month's trip in the north country.

Mr. E. A. Moen was re-elected Wheat Pool delegate for sub-district 7. The election was held August 15.

Mrs. Robinson and Edith spent a few days in Edmonton last week.

Mr. and Mrs. M. G. H. Gardam of Westlock visited their son at Tofield over the week end.

Mr. and Mrs. J. T. Bullock, Elizabeth and Thornton of Minburn visited friends in Tofield over the week-end.

Blake Clutterham was successful in passing the recent Undertakers Certificate Exams.

School Opened Thursday

The classrooms at the Tofield school once again became charged with life on Thursday as youth for the most part eagerly resumed their school life. For two months except for the occasional person engaged in cleaning or renovating, the classrooms have been very quiet, unnatural to places devoted to the education of the young. Youth and activity are inseparable and even boisterousness is the perogative of youth. To those going back after previous terms spent at school it is continuing a course already partly known, but there are many eager juniors who on Thursday, started their school career, an event looked forward to for weeks, and a momentous one to them. To them particularly and to all other generally we wish bon voyage in the ship of knowledge with a safe landing in grade 12.

"The Hurricane" For Next Tuesday

Next Tuesday Sharps Shows presents at the Variety Theatre, a mighty spectacle of the screen "The Hurricane." Few pictures have met with the startling success and popular aclaim as this thrilling story of the south seas. It is truly a stupendous, super-colossal production, with a thrilling story packed full of breath-taking adventure. The production features such well known stars as Dorothy Lamour, Jon Hall, Mary Astor, C. Aubrey Smith, and others equally as great. The Hurricane is by the authors of "Mutiny on the Bounty" and will thrill you even more than that great picture did. Two hours of the most thrilling entertainment awaits you at the Variety Theatre next Tuesday.

Treated Fence Posts For Community Pastures

In the 1938 development of 945,970 acres of community pasture in Saskatchewan under the Prairie Farm Rehabilitation Act program, 1,266 miles of fencing were required for the huge undertaking. All purchases of material for fence construction is usually made through merchants located within reasonably close proximity to the pasture area. The work in connection with fence construction is done by men residing within the municipality where the pasture is established.

An interesting feature is the use of bluestone-treated poplar posts, as exemplified at the Dominion Experimental Station, Manyberries in their experiments over the past 12 years. During that time the bluestone treatment has proved very satisfactory in preventing decay. The use of these posts in the community pastures may prove to be the forerunner of a market for some of the good northern Saskatchewan timber. In March [illegible] were ordered from the northern areas and after delivery at the shipping point were treated in May and June under an experienced inspector with copper sulphate (bluestone).

The method of treatment consisted of peeling the butts of the posts three to four feet and one strip of bark completely up the post. The post is then placed in an upright position with its butt in a wooden tank which contained about 12 inches of saturation solution of copper sulphate. The posts absorb from one to two quarts of the solution, the colour of the bluestone showing at the top when the treatment is complete. The posts are then set aside to dry and can either be completely peeled or left to the weather. The posts last longer if peeled immediately after treatment. The time necessary to complete the treatment depends upon the weather. On hot days the solution will follow the sap to the top in six or seven hours. On dark cool days it may take 12 hours longer.

The sizes of the poplar posts used in the community pastures are 5-inch top, 7 feet long; corner-posts 8-inch top, 8 feet long. Standard community pastures have barbed wire strands with posts one rod apart. Reserve areas and irrigation canals are fenced with three to four strands of barbed wire with posts also one rod apart.

Release Details Of Wheat Subsidy

WASHINGTON, Aug. 30—U.S. department of agriculture announced Monday details of its subsidy policy designed to facilitate exports of 100,000,000 bushels of wheat.

Operating through the Federal Surplus Commodities corporation, the government will purchase wheat and flour from domestic producers for resale to exporters at a price low enough to enable them to sell it in the world market at whatever it will bring.

Losses suffered by the corporation will be made up from customs receipts, 30 per cent of which are set aside by law for disposal of farm surpluses.

Exporters will be required to conduct their operations under a bond which will guarantee exportation of the wheat or flour purchased from the corporation.

Acting Secretary of Agriculture, M. L. Wilson said the program had been adopted "as a necessary means of meeting a special situation."

"That situation is the fact that, up to the present, the major exporting nations are not co-operating in a general program for meeting the world wheat surplus problem," Wilson said in a statement.

He estimated the supply of U.S. wheat, including carryover, is 1,110,000,000 bushels and said that even with wheat exports of 100,000,000, the carryover on next July 1 may exceed 300,000,000 bushels.

Farm administration officials announced Tuesday the government agency had purchased 800,000 bushels of wheat since inauguration of the export program.

Fatal Handshake

NEW YORK, Aug 29— A handshake may cost David Brown, 27, his life. Bidding goodbye to a friend, Brown reached through a subway window to grasp his hand, sprinting along the platform as he did so to keep up with the train as it started. Brown reached the end of the platform and tumbled beneath the wheels. He lost his left arm and right leg.

Bank Of Montreal Crop Report

General—In the prairie Provinces fairly general rains have caused further delay in harvesting operations, although cutting is well advanced over most of Saskatchewan and southern Alberta and threshing has become general in Manitoba. A period of warm, dry weather is now required, particularly in Alberta, to facilitate the harvesting of the crops. In Manitoba, wheat yields will be fairly satisfactory and early marketings of rust-resistant wheat are grading well. In Saskatchewan crops show a wide variation and yields and grades have been generally lowered as a result of rust and drought. In Alberta crops generally continue promising. In the Province of Quebec harvesting operations have been hampered to some extent by heavy rains, but crops continue to give promise of abundant yields. In Ontario there are heavy crops of the main staples and good progress is being made in harvesting. In the Maritime Provinces the crops have been showing satisfactory growth, but in some districts excessive moisture has damaged potatoes and grain. In British Columbia occasional showers at the coast and heavy rains in the interior came too late to benefit grain and hay, and yields of these will be below average, but roots generally and tree fruits are doing well.

Alberta — Intermittent rains and lower temperatures during the week, have generally delayed harvesting and retarded ripening of late grains. Slight red rust damage is reported in the northeast and east central areas. Precipitation may have lowered grades. The pasture and feed situation is very satisfactory. There has been no damage from frost.

Lion Ignorant Of Daniel

AMSTERDAM, Aug. 29— Minister and congregation fled in terror Sunday when one of the two lions which escaped from a circus entered a church during services. The lion ran through the central aisle and then bounded upon the altar as the congregation scrambled for the nearest exits. Both lions were recaptured and no harm was done except that a few persons fainted.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "The Crop Testing Plan."

Alberta farmers in certain large areas need badly a new variety of wheat that will be as early as Garnet, and that will possess the high qualities of Marquis.

The University of Alberta, the Dominion Experimental Farms at Lacombe, Lethbridge and Beaverlodge, and the Provincial Schools of Agriculture at Olds and Vermilion are working steadily on this problem, but they now need the farmers help, for the much desired new variety will be produced quicker if the plant breeders in these institutions can find out what farmers think of the varieties they are now using.

The University of Alberta recently published bulletin number 30, which deals with cereal crops. I recommend every farmer to write for a free copy for this excellent bulletin and then to fill in and to mail the questionnaire on wheat that will be found therein.

Those who have received the bulletin, but who have not yet filled in the questionnaire, should, I courteously suggest, do so, for the information that farmers can supply, I am assured by Dr. Neatby of the University of Alberta, will most definitely help our plant breeders to produce the high quality earlier variety of wheat now so badly needed.

Following factors have tended to raise price:— Russia withdraws wheat offers— European political news still unfavorable— Germany makes substantial purchases of Argentine corn, Canadian and Rumanian wheat—Italian wheat import requirements believed large and corn moderate—United Kingdom taking good quantities of Australian wheat—Adverse weather delays Russian harvest.

Following factors have tended to lower price:—New Argentine wheat offerings below present prices. Switzerland increases wheat import duty.

Australian wheat crop improves. High Balkan minimum wheat prices restricts sales to countries with available currencies— Argentine wheat reserves may be larger than believed.

Rumanian wheat crop probably 24 million above 1937.

Dominion To Sell Crop At World Prices

OTTAWA, Aug. 29— While harvesting machinery hums with industry on the Canadian and United States farmlands, marketing experts of the two countries are looking anxiously over the world wheat situation and wondering how to dispose of an exportable surplus of some 300,000,000 bushels from North America.

Wheat held the spotlight in Canadian political circles this week and will continue to do until full details are known of the plans of Hon. Henry Wallace, United States secretary of agriculture, who has declared repeatedly that Canadian co-operation was needed in wheat marketing.

Talk But No Action

Last week after there had been reports that United States would subsidize wheat export and seek Canadian co-operation in marketing, a lot of experts from Washington interviewed Canadian government officials here. Officially it was stated the conference was for an exchange of information.

United States, with an announced policy of "subsidizing" the export of 100,000,000 bushels of its surplus wheat, has declared repeatedly that Canadian "co-operation" would be sought.

But so far as can be learned here not even the Canadian government officials have been advised of the exact nature of United States plans for operating this subsidy. Nor is it known here, so far as officials would reveal what kind of co-operation is to be sought by United States.

Secretary Wallace, on a visit to the conference of international agriculture economists at Ste. Anne de Bellevue, Que., Saturday, spoke again of the need for co-operation with other wheat exporting countries but without detailing the plan he had in mind.

Government Will Sell

The expressed policy of the dominion government is to sell wheat on the world market at competitive prices, rather than to hold it for a high price such as was done by the previous administration.

At present it would seem that under its fixed minimum price policy the Canadian Wheat Board, the government's marketing agency, would get the great bulk of Canada's surplus, about 200,000,000 bushels. Based on present prices and forecasts a loss of possibly $25,000,000 has been envisioned.

While shouldering this loss the government would probably save a large part of it in lowered cost of relief among western farmers who will enjoy comparative prosperity with the guaranteed minimum prices.

Co-Ops In Scotland

Scotland's really "big business" these days is the co-operative distributive and production industry, according to Alexander Buchanan of Glasgow, director of the Scottish Co-operative Wholesale Society.

"Scotland has the distinction of being the home of the first and oldest co-operative society in the world," Mr. Buchanan said. "Its success has been based on the variety of goods produced at reasonable prices."

He declared that to buy wheat from the United States or Canada, ship it to Scotland, make it into flour and then into bread and distribute it, costs the consumer, under the co-operative system, half the price of bread in America.

The co-operative movement, he said, has experienced phenomenal growth, especially in recent years. Since 1900 the annual sales of the Scottish co-operatives have increased from $[illegible] to $110,000,000. —Alberta Wheat Pool Budget.

Canadian Selling Campaign

R. V. Biddulph, European commissioner for the Canadian Wheat Board, has been in Canada in connection with the discharge of his duties abroad. While here he expressed the opinion that with plenty of wheat to offer and the excessive premium removed from the price the Canadian article should recover its place and popularity in markets abroad. It will take some time for bakers to work back to the former percentages of Canadian flour in their bread mixtures but this will be done by degrees. The customary amount under normal conditions is 40 per cent, whereas British bakers are at present using something like 20 per cent. There is now a demand in England for better quality bread and this should speed up the process of restoring Canadian wheat and flour to its old supremacy over there.

In order to hasten the change which Canada so greatly desires an advertising campaign is at present being carried on by the department of trade and commerce, with which branch of the government the work Mr. Biddulph is doing ties up. This advertising takes the form of posters, newspaper displays and cinema films; the latter being used in schools and lecture halls where interest in the empire and empire products is never-failing.

Mr. Biddulph does not believe the fixed minimum price which Canada is to pay its farmers for this year's crop will have an adverse effect on the sale of Canadian wheat. That is a domestic matter and so long as the wheat is always available to buyers abroad at world prices they will not question the right of the Canadian government to guarantee the farmer a living wage for producing the grain.

Will Reduce B.C. Gasoline Prices

Reduction of gasoline prices in British Columbia was forecast recently in a statement made by Premier Pattullo of that province.

Through the enactment of a new measure of fuel and other legislation it was stipulated that a cut in price was sought. It is recalled that a substantial reduction in prices there was urged after an investigation was made by the Macdonald commission.

This action in the coast province is expected to be reflected in Alberta where the Alberta Motor Association has been urging the need of lower fuel prices to motorists. Protests against prevailing prices were made in the legislature at the last session and an investigation by the government was requested.

So far the provincial authorities have made no announcement as to what action will be taken to implement the request of the legislative assembly but it is believed that steps will be taken before long by a commission to check up prices and see just to what extent reductions would be warranted.

It requires the intense cold of a few degrees above absolute zero to turn helium into a liquid.

Baby Elephant Passenger On Maritime Express

Moncton, N.B. Aug. 29 — Just a few short months ago she was roaming the jungle in Burma. A few days ago she was a passenger on the Maritime Express of the Canadian National Railways passing through Moncton on route from Halifax to Toronto where she will in future make her home. "Toots" weighs just 1800 pounds, is very playful and for her four years is possessed of great strength. She just delighted in pulling the iron bars from the windows of the express car in which she was a conspicuous passenger. In another playful mood she stepped on the large tin pan in which her food was placed and after pressing it flatter than a pancake, she used it as a toy, poking her trunk through the openings between the planks that penned her in at one end of the express car and endeavouring to snare the crushed pan with her trunk to drag it into her pen. On arrival at Moncton, the superintendent of the Canadian National Express, had a peace offering in the shape of a bushel of nice fresh juicy carrots which she considers a delicacy. Her ordinary fare consists of about one hundred pounds of hay a day.

The baby elephant arrived in Halifax on the steamship "City of Worcester" from Rangoon, spending two months on the water and left Halifax on her journey to Toronto where she will be placed in the private zoo of A. W. Miles at Erindale, just outside of Toronto. "Toots" while on the ship was the special charge of First Mate Rittey and at Halifax was turned over to A. W. Miles, Jr., who accompanied her to Toronto along with Bill Clark, who is overseer of the horses in Mr. Miles' miniature menagerie which contains deer, Monkeys, rabbits, etc.

Gearless Auto Planned

CAMBRIDGE, England, Aug. 22— Plans for a revolutionary automobile without gears or clutch were presented today to the British Association for the Advancement of Science.

Prof. Frederick C. Lea, formerly of Sheffield University, who presented the paper, said the new method could be applied to airplanes, ships and railroad trains.

It was understood an English company was being formed to promote the invention, credited by Professor Lea to Commendatore Piero Salerni, an Italian engineer living in England.

Claims for the gearless car— in which a centrifugal pump replaces the gear box and clutch—are that it would use less gasoline, increase tire mileage and quicken the acceleration.

Professor Lea said he based his conclusions on tests of more than 65,000 miles with such an automobile.

Substitution of the pump system for the orthodox clutch and gear box, he said, "results in improvement of performance . . . in getaway, general acceleration, hill climbing and drive on the open road."

"The driver, over long distances in traffic and climbing hills, is not wearied by de-clutching and gear-changing," he said.

"Mechanical construction of the transmitter is in every way simple and sound; as compared with the orthodox clutch and gear mechanism, it is simpler and less costly and its overall efficiency is apparently greater.

"Its scope transcends the field of the automobile and should include vehicles of every kind driven by internal combustion engines, both of the gasoline and heavy oil type."

Dives From Boat To Get Purse

MIDLAND, Ont. Aug. 30 —Mary Hartz of Chicago, got wet Monday but she saved her money, a return ticket to Chicago by steamer, and other belongings, when her handbag slipped from her hand and fell into Midland harbor. The young Chicago woman, a passenger on the steamer North American, which had docked here, dived 20 feet into the water after the bag.

A Story About Mustard

IT IS RELATED THAT A WEALTHY MANUFACTURER ONCE STATED THAT IT WAS NOT THE MUSTARD PEOPLE ATE THAT KEPT HIS FACTORY GOING, BUT THE MUSTARD THAT PEOPLE LEFT ON THEIR PLATES.

NOBODY WOULD WANT LEFT OVER MUSTARD, BUT THERE MAY BE, PROBABLY IS, SOMETHING AROUND YOUR PLACE THAT YOU HAVE NO FURTHER USE FOR BUT WHICH SOME OTHER PERSON WOULD BE PLEASED TO POSSESS.

A PIECE OF FARM MACHINERY, A HOUSEHOLD APPLIANCE, FURNITURE, USED AUTOMOBILE, LIVESTOCK OR ANY ONE OF THE NUMEROUS THINGS WHICH ACCUMULATE AROUND THE PLACE AS THE YEARS PASS BY. A LIVING OR A LIFE—

WE IMAGINE that farmers have been told so often that they are the salt of the earth that any repetition of the statement would fall rather flat. Yet it is true enough. But there are two ways of looking at this, one the farmers' calling in relation to other people and other callings, and two, the farmers' calling in relation to themselves. All living things whether of animal or of botanical origin are a part of nature's great plan. And while perhaps it may be true that "man is born to trouble as the sparks fly upwards," yet it is equally true that genuine happiness and contentment is included in nature's plan for her children.

At the present moment in this district and many other districts in Alberta, the land is fair to look upon. Field after field of stooks, with an occasional field of standing grain, bear testimony to the fertility of the soil and the diligence of humans. The trees still in their summer garb of green and the grass not having yet turned brown, there is a visual example of parkland beauty combined with the more serious side of rural existence, that of providing food to sustain life throughout the coming winter months. And as one drives through the country one comes upon little groups of buildings where either a life or a living is being made. Someone once wrote that an inanimate object could not be correctly called lovely, that whereas a lady could be lovely, her dress could only be beautiful. But surely as one comes upon a well kept farm home and grounds with flowers and trees, backed by barns and fertile fields, one could correctly describe such a sight as BOTH lovely and beautiful.

These days when one is continually confronted with problems of money, debt, interest and suchlike, one's mental vision is apt to get out of focus, even become distorted. Politicians may fight their battles at the capital, low lying war clouds afar off may emit their portentous rumbling, but the true test of personal judgement is the value placed on things nearest to one. We recall a farmer's statement made some time ago. In casual conversation extolling the economic advantages of mixed farming, this farmer said "I like to see the animals around," the statement depicting an attitude of mind —an excellent attitude of mind. While in the hurlyburly of life's events economic matters must be considered, (it is impossible to avoid them) there is a tendency on the part of many people to lay too much stress on making a living and too little on living a life.

No class of people are better able to live a full and happy life than good farmers on good farms. It is in this sense they are the salt of the earth to themselves. Living close to nature, in tune with the seasons, watching the marvelous forces which bring into being botanical, bird and animal life, they have advantages, real natural true to life advantages, which no child of the bright lights has access to. Farmers have to work and worry, but they have the morning sun shining on fields at first green and then ripe unto harvest. Farmers have to labor and toil, but they have the good things of the earth prepared as their victuals. Farmers have fear an anxiety, but they have the promise—and the proof—that nature never wholly deserts. Visitors to the recent Edmonton fair who inspected the exhibits in the Women's building probably saw the wonderful collection of canned products from one farm. Scores of different products from canned chicken to canned strawberries. A millionaire could not set a better table. The farm plus human endeavor can produce wonders.

This week we were privileged to visit two farm homes in this district which for sheer productivity and other charms would be hard to beat anywhere. And while we mention two, scattered throughout this municipality there are numerous others, places where a life is being lived as well as a living being made. Saturday we were in an orchard at the home of Mr. and Mrs. C. Kallal. Orchard is the right word to use as there were crab apple trees, plum trees, cherry trees, besides numerous berry bushes. Never have we seen apple trees more heavily laden with fruit. There was a red variety and a yellow variety and the trees were a riot of color. One tree which was fairly high had to have a frame built around it to support the fruit. The plums too, were numerous and above all, succulent and sweet. Of course there was the usual garden stuff, backed by very many acres of standing grain and stooks, and many head of cattle in the pastures.

On Sunday we were at the home of Mr. and Mrs. Swinton. Here was revealed what farm home grounds can be, even without the outlay of large sums of money. Mostly unseen from the road due to a windbreak of trees and a driveway lined by a caragana hedge, there is a park-like open space dotted with flower beds with a profusion of bloom. The whole arrangement, partly natural, partly planned, is very beautiful and is at the same time both inspiring and restful. There is a tennis court for play. Back of the house there is a large garden in which was grown all the usual vegetables and the largest plots of pumpkins and cucumbers we have seen in Alberta. There are literally hundreds of pumpkins, big fat fellows that will go to make heaven only knows how many pies. And tomatoes, the vines were loaded and the total yield must run into many hundreds of pounds.

Natural beauty has many forms. There are rugged mountains and turbulent streams that have a beauty of their own. Broad rivers and surging tides have their appeal also. But for real soul satisfying beauty, and as an anchorage for a life's endeavor, there is nothing that rivals in beauty a well kept farm home in well kept grounds, backed by grain laden fields and pastures dotted with choice livestock. For there a soul satisfying life can be lived as well as a living made.

Thinks Daughter 'Kidnapped' To Enter Hollywood Career

Anxious mother from Winnipeg told the Journal in Edmonton Tuesday she believed her 15-year-old musician daughter has been "kidnapped" by relatives who have taken her on a career as a movie actress.

From Vancouver to Winnipeg, Royal Canadian Mounted Police are searching for Ethel Barker, 15, who has been missing since she disappeared in Edmonton, August 14. Inspiring the search and intent on securing co-operation of United States law enforcement officials is the girl's mother, Mrs. Bertha Barker, who fears her daughter has been "spirited away" to Hollywood for a movie try-out.

Ethel and her mother left Winnipeg August 6 to visit her grandmother, Mrs. Margaret Pitman at Clairmont, a small town near Grande Prairie, 300 miles northwest of Edmonton.

Fake Telegram Received

On August 10, Mrs. Barker said here Tuesday, she received at Clairmont a telegram signed "Mrs. Clark" apparently sent by Ethel's only sister, Mrs. Kathleen Clark of Winnipeg.

The telegram read: "Send Ethel home at once. Her father very sick and wants his Ethel." Mr. and Mrs. Barker are separated.

Police have discovered the telegram was not sent by Mrs. Clark but from an address in Winnipeg at which they have been unable to locate anyone who knew the girl.

Mrs. Barker sent her daughter to Edmonton, August 12, with an uncle from Flint, Mich., who stated the last he saw of the girl was when he left Edmonton for his home August 12.

Last trace Edmonton police have been able to find of the missing girl was that she checked out of a hotel here Aug. 14. She did not use the return portion of a bus ticket from Edmonton to Winnipeg, investigations have shown.

Compared to Deanna

"Hollywood scouts told us Ethel's lyric soprano voice was on a par with Deanna Durbin's. She wanted to go to Hollywood herself and I think certain members of our family may have aided her. I'm writing to police and consular officials in Hollywood immediately," Mrs. Barker said.

"Ethel was a well-behaved, obedient girl and I'm sure she wouldn't do anything wrong of her own volition," the grief-stricken mother said.

"Whoever sent that fake telegram is behind this whole thing," she declared.

Five feet, five inches in height, Ethel Barker weighs 110 pounds, is slim, has curly chestnut hair and blue eyes. She is believed to have been wearing a blue suit and a black hat and was carrying two suitcases and a music case.

Search for her in Edmonton is being conducted by Detective William McDonald of the city police force.

Youth Opportunity Told To Albertans

TORONTO, Aug. 30— So-called secondary industries of Canada are an answer to the unemployed youth problem, J. C. Armer, chairman of the automotive parts sections of the Canadian Manufacturers' association said Tuesday in an address to directors of the Canadian National exhibition.

A Canadian boy does not have to go to the U.S. to become an expert mechanic as he did 20 or 30 years ago, said Mr. Armer. An apprenticeship may now be served in Canada's own parts industries where a boy can earn a comfortable living while he learns. For every dollar extra a Canadian pays for an auto or truck, 83 is paid out directly or indirectly in wages to Canadians, he continued.

Mr. Armer addressed his remarks in particular to seven boys including Frank Lutz of Edmonton and John R. Munro, Strome, Alta., who attended the directors' luncheon as guests of the C.N.E. The boys, along with five girls were awarded trips to eastern Canada as winners of an essay contest on the value of the automobile industry to the west.

Mr. Armer expressed dissatisfaction at the fact 13,000 automobiles were imported last year into Canada, an increase of more than 100 per cent over 1936 and more than 300 per cent over 1935.

Education Aims Of Anzacs Same As In Alberta

Leading educationists in New Zealand are "thinking the same way" and are aiming toward the same objectives as are those in Alberta, according to Miss Mary Crawford, Edmonton teacher, who returned here late Monday from a month's holiday tour of New Zealand.

"Education there is in the process of change as it is here; they are seeing the need for a great diversity of courses of instruction to meet the needs of a great variety of students," Miss Crawford said.

Claim "Best" System

The New Zealanders claim to have the best educational system in the world, Miss Crawford continued. Their population of 1,500,000 is controlled by one federal government, removing friction of provincial governments as in Canada, and the teachers are largely controlled by a federal board. They are thus civil servants and almost free from conflict in the "local" education boards, which are similar to Alberta's school boards.

The present Labor government, which has been in power for three years, has made a number of improvements to the education system, Miss Crawford stated.

Increased dental and medical service is provided. Milk is distributed free to a high percentage of the pupils. All education, even in normal schools and universities is free.

"They believe they should draw their teachers from the best brains of the country no matter in what economic class they are found," the Edmonton teacher observed.

During her tour of New Zealand, after questioning all classes of citizens, she could find no evidence of unemployment or of the problem of finding positions for students upon completing their education, Miss Crawford said.

Talk Socialized Medicine

At present the government is introducing a Social Security bill for socialization of medicine and this probably will be the issue of the next general election to be held in November.

General opinion seems to be that the Labor government will be returned, despite a possibly stronger opposition from the national party composed of old-line parties, she said.

En route to New Zealand Miss Crawford spent 12 days in Honolulu attending the New Educational Fellowship convention attended by many leading educationists from the United States.

Arthur Lismer, the Toronto artist, and Miss Grieg, department of modern languages, University of British Columbia, were the only other Canadian delegates.

"Revolutionary uprisings are usually the result of moral let-downs" —Ralph W. Sockman, D.D.

South Wheat Grading High

CALGARY, Aug. 29—Grain is grading high in many southern Alberta districts where last year there was virtually no grain to grade. At Champion last year the district virtually was dried out and the yield almost negligible. This season there has been a steady flow of grain to elevators.

One firm already has handled about 16,000 bushels and practically all is grading No. 1 Northern with a small quantity of No. 2.

Meanwhile faced with the probability of handling a large part of western Canada's potential 275,000,000 bushel wheat crop, operations of the Canadian wheat board for the [illegible] full swing.

[illegible] of elevator [illegible] of the west were [illegible] certificates and other necessary [illegible] for accepting deliveries for the wheat board and paying for them. Already some of the grain companies have turned in their tickets to the local office of the grain board.

Bacon Exports To U.K.

For the first time in several years, arrivals of bacon from Canada to the British market showed a decline during the first six months of 1938. In the corresponding months of 1937 the quantity imported from Canada was 769,810 cwts.; in 1938, the total was 700,933 cwts. This decline coincided with a slight fall in the total British imports of bacon which at the end of June from all sources amounted to 3,480,871 cwts. The trade is regulated in so far as foreign countries are concerned, so that there is little latitude for variation in sources of supply. Canadian hams imported into Britain for the first six months of 1938 totalled 121,867 cwts., [illegible] per cent less than in the corresponding 1937 period. U.S. hams [illegible] the British market rose 26 per cent compared with the 1937 six months.

Canada Year Book Is Now Available

[illegible] edition [illegible] Canada Year Book [illegible] published [illegible] W. D. Euler, Minister of [illegible] Commerce, is announced by the Dominion Bureau of Statistics. The Canada Year Book is the official statistical annual of the [illegible] roughly [illegible] natural resources [illegible] describing the history of the country [illegible] geography, its different branches of production, trade, [illegible] finance, education [illegible] a comprehensive study within the limits of a single volume of the social and economic condition of the Dominion. This new edition has been thoroughly revised throughout and includes in all its chapters the latest information available up to the date of going to press.

The 1938 Canada Year Book extends to almost 1,200 pages, dealing with all phases of the national life and more especially with those susceptible of statistical measurement.

There are over thirty maps and charts contained in the volume, and two photo-gelatine inserts illustrating the sections on "The Flora of Canada" and "Historic Sites and Monuments" respectively. Three lithographed maps are included.

Persons requiring the Year Book may obtain it from the King's Printer, Ottawa, as long as the supply lasts, at the price of $1.50, which covers merely the cost of paper, printing and binding. By a special concession a limited number of paper-bound copies have been set aside for ministers of religion, bona fide students and school teachers who may obtain copies at the nominal price of 50 cents each.

Crop Report Gives Promise Nice Return

Although across the Prairie Provinces fairly general rains have lately caused delay in harvesting operations cutting is well advanced over most of Saskatchewan and southern Alberta and threshing has now become general in Manitoba. A period of warm dry weather is now required, particularly in Alberta, to facilitate the harvesting of crops. In Manitoba wheat yields will be fairly satisfactory and early marketings of rust resistant wheat are grading well. In Saskatchewan crops show a wide variation and yields and grades have lowered as a result of rust and drought.

In Alberta crops generally continue promising. Intermittent rains and lower temperatures during the past two weeks have generally delayed harvesting and retarded ripening of late grains. Slight [illegible] rust damage is reported in the northeast and east central areas. Precipitation may have lowered grades. The pasture and feed situation is very satisfactory. There has been [illegible] damage from frost.

Saskatchewan: While harvesting has been retarded by cool, wet weather wheat cutting is now nearing completion in all but the central and west-central districts. Grasshoppers are still active and in the areas affected coarse grains are being cut for feed to prevent further damage.

In Manitoba rust has reduced some yields but owing to the high percentage of rust resistant wheat sown this year final returns on the whole will be fairly satisfactory.

R.C.M.P. Enforce Road Act In Sask.

Saskatoon, Aug. 29.— Clamping [illegible] on Vehicles Act offenders, R.C.M.P. of the [illegible] detachment brought in Robert Swain of Spring[illegible] who was convicted by Justice of the Peace Robert Herder of carrying passengers on his milk truck and fined $25 and costs.

R.C.M.P. [illegible] a warning that they are commencing a drive on all offenders under the Vehicles Act and intend [illegible] any one guilty of anything from driving without a light and failing to stop before entering a main road to illegal passenger carrying in any kind of vehicle.

North Mine Work Found 'Impressive'

Impressed more by the possibilities northern mining development holds for Canada as a whole than by its purely local and business possibilities, H. H. Cooper, Edmonton wholesale head, returned to the city Saturday after a week's tour of the north by air.

[illegible] development will mean [illegible] not only for Edmonton and other western centres looking the [illegible] on the outside, but also for Canada as a nation. That is what impressed me most," Mr. Cooper said.

Mr. Cooper travelled via Canadian Airways returning to Edmonton with Pilot Conway Farrell. He declared he was "thrilled" by the possibilities of the north for the future, citing the Yellowknife mining field particularly. "I was an eye-opener," said Mr. Cooper.

Take Out Patents For Rear Engine

WASHINGTON, Aug. 30.— General Motors Corporation patented Tuesday a system for rear engine operation of automobiles. Henry Ford also [illegible] recent patent [illegible] such a vehicle.

The General Motors [illegible] invented by Eric Olaf Seng[illegible] of Pontiac, Mich., would [illegible] the conventional clutch pedal and gear shift lever with the rear engine by means of metal ribbons.

Apple Tree Blossoms And Bears Fruit At Same Time

CHATHAM, Ont., Aug. [illegible] Fred Agar of Dover township has an apple tree in his orchard [illegible] blossoms and fruit at the same time. Agar said the tree is about 15 years old. Several other Kent county fruit growers have reported the same freak this year.

Suspicious

Widow Williams bent industriously over her washtub as she listened to the polite conversation of a man friend. Before long he started turning the talk round to matrimony, winding up with a proposal of marriage.

"Are you quite sure that you love me?" asked the widow, pausing to wring out a towel. "Are [illegible] telling me the truth?"

The man vowed of course that he loved her.

For a few moments nothing more was said. Then suddenly the widow raised her head again from the tub.

"You haven't lost your job, have you?" she asked. —Answers.

Thinks Air Route To Be Unity Aid

Early inauguration of the Trans-Canada Airways service will prove the greatest fillip to the spirit of national unity that has been felt since [illegible] efforts to overcome the handicaps of confederation bore fruit in the building of the first transcontinental railway over 50 years ago. That is the opinion of A. R. Brennan, publisher of the Summerside Journal and [illegible] Island Agriculturalist, who has been an Edmonton visitor while en route home from the Pacific coast.

"With T.C.A. service about to become a reality, one drawback to the [illegible], the amount of time consumed in reaching distant parts, will [illegible] in a large measure. The [illegible] distances in a day instead of a week will prove one of the greatest elements of unity that has [illegible]

It comes at an opportune time [illegible] the spirit of national unity [illegible] fresh impetus," he said.

Air service in the east suffered no [illegible] air mail on the prairies with the result that P.E.I. has become one of the greatest air mail [illegible], 1,000 pounds being exchanged with the mainland daily, said Mr. Brennan.

Knowing Edmonton's premier position in aviation for volume of freight [illegible] he visited the civic airport [illegible] splendidly equipped for [illegible] handling of all kinds of traffic. [illegible] the dominion recently to [illegible] the convention at Vancouver [illegible] Canadian Weekly Newspapers Association, Mr. Brennan said he found optimism the keynote from the [illegible] east to the Pacific because [illegible] in the maritimes, Ontario [illegible] in the prairies and in British Columbia. As a result Canada should [illegible] the eve of one of the best years [illegible] history, he said.

Virtue and Pot Roast

Mrs. Nellie Tayloe Ross, director [illegible] United States Mint, said in [illegible]:

The compliments a husband pays are sincere and truthful, but sometimes they are less pleasing to his wife than the ones he used to pay her when they were sweethearts.

"A husband was so delighted one evening with the pot roast his wife [illegible] for him that he said, as he filled up his plate again,

"Darling, I think I'll call you by the beautiful name of Virtue."

"Yes, for virtue is its own reward," she answered in a tired voice. "I cook and wash and iron and sweep and [illegible] and do all the housework for you without getting any wages."— Philadelphia Bulletin.

According to the research department of N. W. Ayer, if you bought the foods in a quart of milk separately at a chemist's, he would have to charge you more than $44 for them.

The Importance of Price

To the wheat producer the price of his product is a matter of first importance.

That is why the Alberta Wheat Pool fights so strenuously for price protection. Single-handed amidst the trade, it has striven to place the wheat price question in its proper light before all Canada.

In such a campaign it needs support and encouragement from the farm population.

This can best be done by delivering grain to

Cornhill Municipal District Held Annual Meeting

On Friday, September 2nd, Cornhill Municipal District held a regular council meeting at the municipal hall in Tofield.

There were present: Reeve Glenn, Councillors Anderson, Holmberg, Marden, Swabey and Walker.

The minutes of the last meeting were read and adopted.

A communication was read from the Bureau of Relief and Public Welfare asking for a new registration of relief recipients and relief applicants. It was decided to comply with the request.

The purchasing of the maintainer at $2795.00 was formerly approved.

The deal was as follows:

Price of road maintaining patrol	$2795.00
Less allowance for grader and planer	900.00
	$1895.00
Payment due May 1st 1939	295.00
Leaving	$1600.00

to be paid in three equal installments commencing December 15th, 1939, at 6 per cent interest.

It was suggested that a resolution be presented to the convention of municipalities regarding gas tax. At present municipalities pay the full tax while for tractor purposes farmers receive a discount. The discussion arose over a gas tax account which was passed for payment.

It was decided to obtain a complete report re the relief problem of John Sauer, Lac la Biche.

Mr. Cahill wrote asking for eyeglasses. The application was granted.

A communication was received from Holy Trinity Church requesting that parsonage now being occupied by Mr. and Mrs. MacDonald be vacated by October 1st. Reeve Glenn and Councillor Walker were appointed a committee to arrange for a place for Mr. and Mrs. MacDonald.

Adjutant Sharp of the Salvation Army, Edmonton interviewed council re grant. Mr. Sharp gave a brief description of the work the Salvation Army is doing, asking that a continuation of the grant be made. It was decided to make a grant of $100.00 as in previous years.

A letter was read from John Kozack asking that a weed inspector be sent to the vicinity of his farm. The council agreed that action should be taken but were of the opinion that it is too late to do effective work this year. It was decided to reply to Mr. Kozack saying that attention would be given to this matter next year.

Mr. Bert Anabel, who is an American citizen and also a ward of the municipality suggests that he be provided with transportation back to the States where he has a brother who will receive him. A committee was appointed to attend to this matter.

Mr. Frith made an application for old age pension, council deciding to recommend that the full amount be paid.

Councillors for the different divisions made application for what bridges they needed. The following applications were made.

Bridge on west side of section 15 [illegible] Mr. Anderson, Division 1.

It was decided to allow transfer of N.W. of 10-52-19 to Mr. J. Johnson.

It was decided that the cost of operating the maintainer in each division should be computed on an hourly basis.

The engagement of Stan Smith as operator of the maintainer at 40c per hour was approved.

A list of tax arrears in different divisions was given to the councillors and they will make some effort to bring about payment. J. E. Stinson was also engaged as arrears tax collector, remuneration to be 10 per cent and 5c per mile travelling expenses.

Mr. Adams is desirous of trading present road allowance near his place for a strip of land on his farm S.E. 6-52-20 running along south side of railroad. The secretary was instructed to get in touch with Mr. Adams and arrange the trade.

The meeting then adjourned.

United Church News

Sunday 11th—Services as usual at Lakeshore, Ketchamoot and Tofield.

Sunday 18th Harvest Thanksgiving services. The Rev. W. J. Bell, Holden, will preach in Tofield at the evening service, 7.30 p.m. Special music.

After the evening service the Communion will be observed. It is hoped that there will be a good attendance of members on this occasion.

LOCAL & PERSONAL

Mr. and Mrs. Neil Rose sr., and Mrs. Armstrong and children of St. Albert visited Tofield on Saturday. Mr. and Mrs. Rose are Miss Loret Rose' parents.

••••••••

Mr. and Mrs. Thompson and daughter Betty spent the week end in Tofield.

••••••••

Mrs. O. Letourneau, Mr. and Mrs. Bruce and son Jim spent a few days at Jasper.

••••••••

Miss Esther Pyle is attending the hair dressers' convention at Calgary.

••••••••

Mr. and Mrs. Frank Wood of Owls Eye visited relatives and friends in Tofield over the week end.

••••••••

Mr. and Mrs. R. Whyte of Wetaskiwin spent the week end at Tofield.

••••••••

Miss Pat Walker of Edmonton visited Miss Muriel Malcolm over the week end.

••••••••

J. H. (Bud) Hannan visited Tofield on Sunday.

••••••••

Sid Worton of Camrose spent a few hours in Tofield on Sunday.

••••••••

On Saturday afternoon the primary department of the United Church held their annual picnic at the home of Mr. and Mrs. J. W. Cookson. Despite the extremely hot weather, games, peanut scrambles, and everything that goes with a picnic was enjoyed by the kiddies. A real picnic lunch was partaken of and a tired but happy group of youngsters returned to their homes.

••••••••

Miss Maudie Rodig spent the holiday week end visiting at her home in Lacombe. Esther Pyle spent the week end with her going from there to Calgary.

••••••••

Miss Doreen Allen, who is working in an Edmonton bank, visited home over the week end.

••••••••

Isabel Robinson has resumed her duties as teacher at the Woodlawn School. She spent the week-end at the home of her parents.

••••••••

Mr. Yule and daughter Nora of New Westminster were guests at the J. Whyte home. Mr. Yule is Mrs. Whyte's brother and it is 17 years since they met. Other guests over the week end included Miss Margaret Wayte and Miss Johnson of Edmonton. Also Mr. and Mrs. Whyte of Wetaskiwin.

••••••••

The Manse had as visitors on Sunday, September 4th, Mr. and Mrs. Gordon Provost and Allan, Mr. and Mrs. R. Ponting and Miss Margaret Allan.

••••••••

Isabel and Edith Robinson spent a few days in Edmonton last week.

••••••••

Miss Aileen Allan is visiting her sisters at Westlock and Barrhead.

••••••••

Miss Gwen Firth left on Tuesday evening to attend normal in Edmonton.

••••••••

The Rev. W. Bell was a visitor at the Manse on Wednesday afternoon.

••••••••

Mr. and Mrs. Lawson and family of Stettler visited at the home of Mr. and Mrs. R. Wilson over the week end.

••••••••

J. W. Morton is rapidly completing a new chicken house. It has cement floor, insulated walls and up to the minute nest boxes. He recently purchased 200 white leghorns.

••••••••

O. Letourneau and E. Hardy spent the week end at Jack Fish Lake, west of Edmonton. There was just a fair catch.

Mr. Abbott Sr. Passes

Mr. Geo. W. Abbott, father of Mr. Lem Abbott, passed away at his son's home on Thursday night last, at the age of 82 years.

Mr. Abbott was born in Akony, Ohio, but has spent 38 years in Canada.

He came to Tofield 6 years ago and for some time lived at the Mine farm. Recently with his wife he has resided with his son.

He leaves to mourn his passing, a loving wife, sons Lem of Tofield and Clarence of Vancouver; a daughter, Mrs. Carr of Deville; also brothers and sisters in the United States.

The funeral was held on Sunday, service being held at the United Church, Rev. D. K. Allan officiating. Many friends of the departed attended to pay their last respects. The floral tributes were both numerous and beautiful. Interment took place in the Tofield cemetery.

BARDO

Threshing got underway last week with the Ness and Anderson machine starting at B. Anderson's. Other machines starting this week are the Ezra Yoder, Foshaug bros., Steen and Meyer, Joe Stauffer, M. Hagen and Rorem outfits.

Threshing rates and wages are, Wheat 4c, Oats 2½c, and barley 3c. Threshing help $2.50 per day.

The first new grain was delivered to the Bardo Pool elevator by B. Anderson. The average grade on wheat in this district is expected to be No. [illegible]

Mr. and Mrs. Palmer Anderson and family returned home last week after a visit in Saskatchewan. They expect to leave shortly for Minneapolis where Mr. Anderson will resume his studies.

Rev. Hovenstein conducted English services in the Church Sunday morning.

The L.D.R. gave a program at the Church in the afternoon.

Next Sunday, September 11, an all day Mission program will be held at the Bardo church starting at 11.00 a.m. Mr. Talbert Ronning and family, missionaries from China visited at the Rorem home last week.

Mr. and Mrs. B. Gardner of Portland, Ore., visited at the Haskedahl and Jenson homes a few days last week. Mrs. Gardner and Mr. Haskedahl are cousins.

Miss Hannah Jenson and Mr. N. Sand of Edmonton spent the week-end holiday at the Jenson home.

Mrs. I. Eggen and Mrs. S. Johnson of Tofield, spent a few days at their farm here last week.

The little baby boy of Mr. and Mrs. Emil Rude was taken to an Edmonton hospital to undergo an operation.

Born: To Mr. and Mrs. Morrad Fineth on September 1st, a daughter.

Born: To Mr. and Mrs. Geo. Hendrickson on September 2nd, a daughter.

Born: To Mr. and Mrs. Ivar Foshaug on September 2nd, a daughter.

Miss Carrie Brecken returned to her school at Berwyn last week.

Tenders For Coal

Tenders are requested for supplying and delivering coal to the schools of the Holden School Division No. 17 for the period ending June 30th, 1939 and starting immediately. For particulars apply to the Secretary, Holden School Division No. 17, Holden.

I account more strength in a true heart than in a walled city. —John Lyly.

THE WORLD OF WHEAT

• • • • • • • • •

By H. G. L. Strange, Director "The Crop Testing Plan."

The Prairies can still produce wheat in abundance! Normal rains this season fell almost everywhere, and wherever good rains occurred, average yields appeared, even in the drought and soil-blown areas.

Rust after 5000 years of effort at last we believe and hope has been conquered! Production, therefore, it seems safe to say, in the average over a term of years is assured.

Now, however, for the first time in 61 years, a much more serious problem raises its head: Can we sell what we produce?

Mr Broomhall estimates that we will come far short this year of selling our surplus. Yet our very economic existence in the west depends, it seems to me, upon selling all the wheat we normally grow. To induce world buyers to purchase all we are producing I am forced to conclude we must try for two things —

First to improve the quality of our wheat, and secondly for all of us together to strive unceasingly to persuade the Dominion Government to reduce tariffs, all so that foreign people can sell more of their own goods in Canada and by this obtain more Canadian dollars.

With more Canadian dollars, these foreign people would be able to buy more Canadian and other wheat, which, authorities tell us, their undernourished people badly need.

Following factors have tended to raise prices:—Ominous military and naval manoeuvres in Europe— Indian wheat shipments diminishing — Russian southern winter wheat yields disappointing —Italy buys Hungarian wheat —Germany continues to import large quantities of wheat and corn— Italian corn deterioration— Egyptian wheat crop smaller than last year.

Following factors have tended to lower prices:— Canadian spring wheat estimates show increase —Needed rains occur in Argentina —Harvesting under way in Germany, good production expected— Corn crop improves, coffee crop favorable and wheat crop good in Kenya, East Africa—British pound continues to decline on the U.S. dollar —Poland and Russia making cheap rye offers.

Shop Keeps Buyers Outside, Yet It Does Good Business

RALEIGH, N.C. —Charles B. Corbett, the merchant prince of Ivanhoe, is getting along all right, though he hasn't had a customer in his store in the past five years. The customers can't get in because of Corbett's merchandising policy. And thereby hangs the tale of the Merchant Prince of Ivanhoe.

The Corbett store is a department store sans departments. From floor to ceiling is stacked all the miscellany of the country emporium—in the [illegible]. Whenever a new order of goods comes in, it is pitched in the [illegible]. It might be coal scuttles and on top of that is pitched dress goods. If the next shipment is plowpoints, on top of the dress goods they go.

The stock has steadily increased, until now there remains in the store only a space of a narrow lane between the stacks of goods - just enough space to permit passage of the [illegible]. The customer [illegible], gives his order from outside and Mr Corbett, armed with a flashlight, goes in and digs out the wanted article. He can immediately find anything in his stock.

Thirty years ago Mr Corbett opened his little store in this village off a half [illegible] off the main highway. As the years went on, his stock steadily increased in its helter-skelter fashion until one day a young boy helping the Merchant Prince pulled out something from the bottom of a pile and down tumbled a bewildering stack of merchandise.

"Gosh!" he said. "How'll we ever get it back?"

"Don't bother about it," said Mr. Corbett. "We've got too much stuff in here anyway."

So he rented a vacant structure near by and opened up a new store —his present one. He still uses the old store as a sort of annex, and in addition has a third building he uses for a warehouse.

The new place has gone the way of the old. It is bulging with the accumulation of the years, because Mr. Corbett, for all his scorn of modern ideas of efficiency and departmentalization is anxious to stock new things.

Mr Corbett is usually to be found on the front porch of his store awaiting trade. Since there is no space inside, he confided, he has his office in the right pocket of his coat. In the pocket are perhaps 40 or 50 letters, he explained that he [illegible] to his correspondence when the notion struck him. As a rule, when he gets a letter, he sticks it on the inside of the batch of his pocket and then works on the letters on the outside. Thus, in due course, every communication gets its attention. The system, of which he is a bit proud, works out all right, he said.

Besides being the Merchant Prince of Ivanhoe, and apparently making a living with his chaotic "system", Mr Corbett is the village philosopher.

"I reckon a lot of storekeepers in your big cities would make fun of my place," he told a visitor, "but my system suits me and my customers all right. Folks have got sort of used to my way of doing things and I believe a change would worry 'em almost as much as 'twould worry me. What's the use of wasting a lot of time arranging stock and keeping things in order when you can set out on the porch and talk to your neighbors?"

'Blizzards' To Cool N.Y. Fair

NEW YORK, Aug. 6— This city's typically warm summer temperatures needn't bother visitors to the New York World's Fair, 1939, for "clear and colder" will be the weather report in at least one section near the amusement zone, where a "Winter Wonderland" costing $600,000 is planned.

Occupying an acre and a quarter of ground, the cold weather center will provide a daily blizzard, a toboggan slide, a ski jump, a skating rink, and dance floor, it was announced.

Atmosphere and setting of the exhibit will be characteristic of the Swiss Alps. Mountains will loom behind a quaint village, blanketed with snow. There will be houses, restaurants, and even a small church. At least twice during the summer Christmas holiday observances are to be held in connection with the singing of carols and other Alpine festivities.

Election of Howard A. Flanigan, formerly an administrative assistant, as Vice-President of the Fair was also made public.

Silence when nothing need be said, is the eloquence of discretion. —Bovee.

A Story About Mustard

IT IS RELATED THAT A WEALTHY MANUFACTURER ONCE STATED THAT IT WAS NOT THE MUSTARD PEOPLE ATE THAT KEPT HIS FACTORY GOING, BUT THE MUSTARD THAT PEOPLE LEFT ON THEIR PLATES.

NOBODY WOULD WANT LEFT OVER MUSTARD, BUT THERE MAY BE, PROBABLY IS, SOMETHING AROUND YOUR PLACE THAT YOU HAVE NO FURTHER USE FOR BUT WHICH SOME OTHER PERSON WOULD BE PLEASED TO POSSESS.

A PIECE OF FARM MACHINERY, A HOUSEHOLD APPLIANCE, FURNITURE, USED AUTOMOBILE, LIVESTOCK OR ANY ONE OF THE NUMEROUS THINGS WHICH ACCUMULATE AROUND THE PLACE AS THE YEARS PASS BY. FEW PEOPLE KNOW YOU HAVE THESE THINGS OR THEY MIGHT HAVE BEEN SOLD. YOU CAN LET A LARGE NUMBER OF PEOPLE KNOW BY INSERTING A CLASSIFIED ADVERTISEMENT IN THE MERCURY.

CLASSIFIED ADVERTISING RATES ARE LOW—50c ONE WEEK; 75c TWO WEEKS; $1.00 FOR FOUR WEEKS. THERE IS A LIBERAL ALLOWANCE OF THIRTY WORDS.

THE MERCURY

World Wheat Situation

Since the early part of August, world wheat prices have resumed a fairly sharp downward movement in continuation of the price adjustment occasioned by increased supplies of wheat. World production of wheat in 1938 continues to appear at record proportions with the most recent estimates indicating a total production of 4,227 million bushels, exclusive of the U.S.S.R. and China. The larger volume of wheat production in 1938 is distributed both among exporting and importing countries. With increased production this year in the European wheat importing countries as a whole, only the desire to acquire and maintain security reserves in several of the countries is apt to raise the volume of international trade in wheat beyond the very small volume traded in the past crop year. World shipments of wheat in the 1937-38 season reached 512 million bushels, only 15 million in excess of the record low volume of 497 million bushels traded in the 1935-36 crop year.

Against the outlook for another year of low import requirements, production in the exporting countries appears more definitely now to be much greater than needed to make up the deficiencies among the importing nations. Although the United States winter wheat estimate was raised and total production in the United States is placed at 956 million bushels, only 11 million [illegible] less than the estimate of a month ago. While no official estimate of Canadian wheat production will be made until September 9th, the condition figure for spring wheat in Canada as of July 31st was 82, the highest at that date since 1932. This suggests a crop in 1938, better than any in the past five years. In addition to the increased North American production, the four Danubian exporting countries are showing a combined production of 421 million bushels, almost 60 million bushels in excess of last year's harvest.

India's wheat estimate for 1938 has been raised to 402.5 million bushels, which is 38.5 millions in excess of last year's production. While no estimates are available for Russia's production this year, reports indicate that a normal winter wheat crop has been harvested, although the spring wheat crop is below average. Notwithstanding, the U.S.S.R. has been pressing wheat offers, and the bulk of the current international shipments of wheat are divided between Russia and the United States. While the southern hemisphere crops still have to be made, weather conditions have been favorable to date in Argentina, and the Australian crop has received some much needed rains. Even in the event that any misfortune occurs to the southern hemisphere crops, the effect would not be pronounced upon the world wheat situation since export supplies are already in sight in the northern hemisphere to take care of the season's total import requirements.

Potential competition among the exporting countries for limited export outlets is the principal contributing factor in the current uneasiness in wheat markets. With respect to export competition, the Canadian government has indicated in connection with announcing the minimum price to growers that the Canadian Wheat Board will not pursue a holding policy with the wheat it purchases. Accordingly the whole of the surplus from this year's crop may be regarded as available for export at competitive prices. The United States' government, through Secretary Wallace, has again intimidated that an export subsidy will be necessary to ensure an export volume of 100 million bushels for the present crop year. The Secretary's latest proposal, put forward informally on August 17th, is that Canada and the United States co-operate to prevent "throat cutting" in North American export competition. A formal proposal in this regard may be forthcoming within a week, when plans for the United States' subsidy program will be completed.— Dominion Bureau of Statistics, Agricultural Branch.

10 Tank Cars of Gasoline Burned As Train Derailed

MEDICINE HAT, Sept. 6— Ten tank cars of gasoline were burned Monday night three miles west of Empress when an extra freight train was derailed after running into a washout of the track about 9 p.m. No person was injured.

The track was washed out by an inch and a quarter of rain which fell between 6:30 and 9:00 p.m.

An auxiliary car from Medicine Hat with a crew was dispatched immediately news of the wreck was received. Local officials expect the line will be open for traffic in a few hours.

When it comes to politics, always remember this: The hog that squeals the loudest is the one farthest from the trough. —Washington Post.

TESTED RECIPES

BY BETTY BARCLAY

Lemon Chiffon Pudding

(Serves 6-8)

5 tablespoons flour
1 cup sugar
3 tablespoons butter
Cream and add
3 egg yolks, beaten
⅓ cup lemon juice
1 cup milk
Fold in
3 egg whites stiffly beaten

Bake in individual custard cups, set in a pan of warm water. Bake 35 minutes in oven (350 to 375 degrees F.) Will form a cake top with a layer of custard below.

* * *

Ham Moulds

1 cup cooked ham chopped fine
2 tablespoons butter
½ cup stale bread crumbs
2-3 cup milk
1 egg
1 teaspoon sugar
Salt and pepper

Melt butter. Add bread crumbs and milk. Cook five [illegible] stirring constantly. Add ham [illegible] slightly beaten [illegible] adding sugar. [illegible] cups. Set cups in pan of hot water. Bake in a moderate oven until firm. Serve with [illegible]

* * *

Sunday Supper Sardines

[illegible]

[illegible] a frying pan until [illegible] the butter and mix [illegible] chopped dill pickle. Spread a thin layer of prepared butter on each slice of toast. Place two sardines on each prepared slice of toast. Cover with remaining butter mixture. Serve at once. Serves 4.

* * *

Dad's Beefsteak Sandwich

1 cup cooked beefsteak, ground
1 hard cooked egg
4 medium sized sweet gherkins
Catsup

Put through food chopper the beefsteak, egg, and sweet gherkins. Add sufficient catsup to moisten. Spread between slices of buttered bread. Makes filling for 4 sandwiches.

* * *

Spaghetti with Pork Chops & Apples

(A Tasty Wheat-Meat-Fruit Combination)

½ lb. spaghetti
2 tablespoons butter
1 cup apple slices
4 or 6 pork chops
4 or 6 slices onions
salt and pepper to taste

Cook spaghetti in plenty of rapidly boiling water, well salted. Drain and butter. Fry pork chops until a delicate brown. Leaving skin on apple [illegible] add to the dish. Combine spaghetti with apple slices and fried pork chops, alternating the pork chops with the sliced onions. Bake the combined ingredients one hour at 300 degrees. Serves four.

Bush Fire Threat Hits Alberta Again

Abetted by several weeks of warm dry weather, ground fires smouldering in northern Alberta areas have blazed up in spots again during the past week and there is danger of renewed outbreaks, forestry department officials said here Tuesday. The department is watching developments closely and already has sent out several small crews to place small outbreaks under control.

The fires, never wholly extinguished, are left over from blazes which devastated the north early in the summer during a long dry spell. Chief danger centres lie now in Lesser Slave Lake, McMurray, west-of-Smith and Chisholm areas, it was stated.

Week-end rains beat down fires at Grande Prairie and Peace River, where most serious blazes occurred earlier and temporarily relieved the situation in those areas.

World's Largest Radio Marks Jubilee

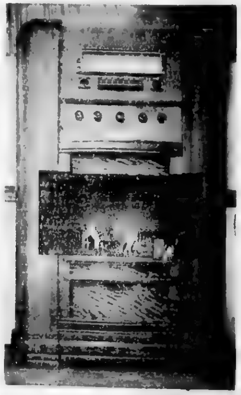

Illustration courtesy Montreal Herald

To mark the Diamond Jubilee of the Canadian National Exhibition at Toronto this year there are many unique features among which is the World's Largest Radio with an animated stage built in, on which a Marionette performance is produced eight times each day, and two special performances for children on Children's Day.

This gargantuan Radio Set, 16 feet high and 6 feet wide, is an exact copy of the new Northern Electric eighteen-tube Radio Receiver and is placed in the Company's Booth in the Electrical Building. In this Booth also is the "Talking Mirror," an ingenious device which speaks to those who see this conveniently placed mirror and invites them to view the new Marrophonic Radios on display beside it.

WATERFOWL POPULATION—

A FEW DAYS more and the annual initial cascade of shot will descend (or ascend) among unsuspecting flocks of wild ducks. Hunters from cities, decked out in all the latest hunting regalia, armed with late model repeater shot guns, will together with hunters from the small towns and farms, commence to make life miserable for the thousands of ducks that inhabit the small lakes and sloughs around here. Eary settlers in this territory found wild life, particularly water fowl, very abundant. Ducks were very numerous and together with geese, trumpeter swans and whooping cranes, it was a hunters' paradise.

The cranes and trumpeter swans are gone while ducks and geese are greatly reduced in number. Will man's ever increasing onslaught upon them finally reduce their numbers to those of stragglers, or will compulsory and voluntary action on the part of present and future hunters allow ducks and geese to increase and maintain their numerical strength. Past experience as regards conservation of wild life is not an encouraging one. Naturalists point to numerous instances where mankind badly decimated, even obliterated, certain forms of wild life. The Passenger Pigeon at one time one of the most numerous birds known is now completely extinct, and in spite of the promise of large awards not even one pair can be found.

Hunting is great sport, particularly to men whose everyday life keep them in the city. An intimate companion or two, modern weapons and ammunition, plus a bottle to keep the cold out, and you have a light hearted party on slaughter bent. They do not know, oftimes they do not care, how plentiful wild waterfowl life will be twenty years from now, their one object is to bag the limit. Some shooting is necessary. Unmolested and with the abundance of food provided by agriculture, it is likely that waterfowl life would increase to such proportions as to become a menace. Even now from grain lands near bodies of water, ducks consume large quantities of wheat and at certain times are somewhat of a nuisance. Yet it is more than likely that were ducks completely exterminated, other pests still more destructive, would appear. Pests which the ducks at present keep in check.

It is presumed that the average waterfowl hunter does not know whether the continent's waterfowl population is on the increase or decrease, he is satisfied if the hunting is good the day he is out. It is, then, clearly a case for government control plus due respect on the part of present hunters for future generations of hunters. Certainly indiscriminate slaughter will reduce the waterfowl population to the point where hunting is poor and in all probability result in an increase of insect pests.

A DISCOUNT OR A PENALTY—

A MATTER WHICH occasionally crops up at the Cornhill Municipal District Council meeting is the policy of allowing a discount for taxes paid on or before a certain date. The principle is well known, most towns and cities using it and practically all utility companies making it a regular way of doing business. We were never much in favor of the plan, perhaps because we looked at it more from a utility company point of view than from a municipal point of view. But while the practice is the same in both cases, the results are not.

When a utility service bill is paid on or before a certain date the amount paid is less, generally 10 per cent, than the amount required if settlement is made after that date. The saving is called a discount. But to our way of thinking a utility service customer when paying his bill promptly, has not earned a discount but saved himself or herself a penalty. We believe the price of water, gas or electricity is based on how much is received, not on how much is charged. Except as the law of averages show them, no company can tell within ten per cent how much money they will receive. Consequently we assume that the cost of the utility plus profit is included in the amount required to be paid by a certain date. The above is of little interest except to show that while a municipal discount is the same in principle it is different in results.

The object of a municipal tax discount is to bring in taxes early in the year. Nearly all municipalities run pretty close to the wind financially. Large surpluses are not desired because they immediately bring a demand for lower taxes which would probably have the effect of throwing the balance the other way. Tax collections are heaviest in the fall, and mid-winter generally find the bank balance at its highest peak. Expenditures are heaviest in the summer months and about two months prior to the commencement of fall collections, funds usually run out. Recourse to borrowing is the usual procedure, but with a discount for early payment sufficient funds come in to make this unnecessary. To put it another way, the early taxpayers become the summer financiers of the municipality for which they receive payment in the form of a discount.

There is one feature to this arrangement that generally escapes notice, that is it would not do for ALL ratepayers to pay early and receive the discount. It is assumed that a municipality has to collect a certain amount of money. This amount is arrived at by assessment and mill rate. Whatever the amount is, and it is set at the correct figure, all ratepayers receiving a discount would result in the amount collected being the amount required, less the amount of discount allowed. If the mill rate was raised to take care of this, ratepayers would be at the same point from which they started. Obviously then, a discount on municipal taxes is a device to assist the municipality over a difficult period and a concession to those who have money to pay their taxes early.

Jenny Morris Visits Edmonton

By Clyde W. Gilmour in the Edmonton Journal

Jenny Morris, beloved "London mother of the Princess Pats," arrived in Edmonton Sunday for a four-day visit and with her first smile and hug and kiss she had the city at her feet.

She came to Canada two weeks ago on an extraordinary personal mission that has stirred the hearts of ex-soldiers throughout the Dominion.

Tender and cheery friend and counselor during the war of 1914-18 to thousands of fighting men who found miraculous peace and solace in her London boarding house at 84 Bedford Place, Jenny Morris is touring Canada for a series of reunions with "my beautiful boys," as she calls them—grateful men who have idolized her for two decades because she nourished their souls and darned their socks and made them feel clean and strong and human again in the dark years when death thundered in the trenches.

Fifty or more of these men, representing hundreds of others who hope to shake her hand and gaze into her ageless brown eyes before she leaves Edmonton on Thursday for Jasper and the west coast, acclaimed her here Sunday and Monday and with an eerie sensation felt 20 years vanish from their minds as if they never had lived them—the 20 years since they were all youths in khaki together, finding rest and laughter at the home of Jenny Morris.

Plumper than then, but with her wise and merry face almost untouched by time—her voice still rich and warming, her step as nimble as a girl's—she moved through her brisk week-end of activities with boundless energy. And wherever she went, in all that she said to the glad hundreds who hailed her, she spread charm and graciousness and joy of living.

Veterans from other "outfits" leading the roles, the "Pats" who shared with Jenny the fondest memories, the most heartening reunions.

Over the holiday week-end, while warm sunny weather accompanied her visit, the "big sister of thousands of ex-servicemen attended a church service at which an ex-soldier preacher called her "the proudest woman in all Canada today."

With bowed head she joined the congregation and 30 of her "boys" in a prayer for the recovery of dangerously-ill Prince Arthur of Connaught, grandson of Queen Victoria and brother of Princess Victoria Patricia Helen Elizabeth, Lady Ramsay, in whose honor the famous "Pats" were named.

City is "Beautiful"

Jenny Morris met hundreds of old and new friends, went for an auto trip around the city, beamingly lauded Edmonton in the fervent words: "Beautiful, beautiful."

She visited the pain-wracked and bed-ridden men in the soldiers' wing of University hospital, Monday morning, gripping their hands tightly while compassionate tears shone through her smiling.

Flanked by 50 veterans and watched by 300 spectators she laid a wreath at the foot of Edmonton's gleaming white cenotaph, Monday afternoon—"in ever-honored and glorious memory of the officers N.C.O.'s and men of the P.P.C.L.I. who gave their all to God, King and Empire."

She was feted later in the day at a two-hour tea-time reception in the Macdonald, attended by 100 persons. Welcomed warmly to the city by Mayor Fry, she responded in a brief and simply-uttered speech, so moving and so obviously heartfelt that few of those who heard it will forget it ever.

And The Cat Came Back By Railway

Montreal, Quebec, September 6— "Shipper of car loaded with flour St. Jacobs, Ont. to Montreal suspects cat in car when door closed stop Urgent." The above wire from a Canadian National Railways agent started a chain of activities the result of which was, to quote an old song, "the cat came back". Kitty was discovered in the freight car on arrival at Montreal where Canadian National freight hands rescued her and entertained her royally. She was taken to the Superintendent's office, fed and placed in a box, then returned via baggage car to Kitchener.

Eight Little Loaves Of Bread Start A Woman in Big Business

FAIRFIELD, Conn. —Mrs. Henry Rudkin of this town is not the first person in recent years who suddenly has had to turn to and find a way to make some money, but probably very few who have had to have made any better job of it than she. And by hitting on the idea of making and selling one of the simplest commodities one imagines—bread.

The first day she did any personal bread making she made eight loaves. Today—and every day but Sunday—she sees to it that 700 or more loaves go into New York City, not on guesswork, but on orders. She laughs when she thinks of having become a one-woman bakery in the short space of a few months. But she says she has seldom had so much fun and that so far as she can see, the more loaves she sees to baking, the more fun she's likely to have.

She began the work as the result of the need to "feed a delicate member of the family back to health." Advisers told her the boy really ought to go to Arizona. It seemed a long way off. She thought she'd see what she could do for him at home first. She began investigating the properties of whole wheat. The first day she made any bread not needed by the household she took eight loaves in a basket on her arm to the general grocery store in near-by Westport. The proprietor had seen consignment goods come in before. He was not unwilling to try to sell them. Merely neutral.

Waiting On the Step

But he was waiting for her on the step the next morning.

"Why it was all gone in less than half an hour. How many loaves have you brought this morning," he exclaimed breathlessly, craning his neck to peer into the basket on her arm.

She laughed and said, "There! There! I've got twelve. I thought I'd take a chance . . . ."

"Here, give 'em to me. And mind you're here tomorrow morning with more!"

"Well," she said to her husband that night, "Whoever would have thought it!"

Mr Rudkin's business takes him into the financial district every day. "Say, why don't you give me a few loaves to take into town with me? I'm sure ———'s would like to have some of that wonderful bread." He mentioned a famous provision store to which he could send a Red Cap hopping, when he arrived each morning at the Grand Central.

The upshot of that was an order for so many loaves daily that they have to be sent into town by express —since Mr. Rudkin is no more a genius at carrying towering burdens than the next man.

In Old Stone Mill

"I have my flour ground in the old stone mill in Farmington. It used to be owned by Winchell Smith, and he ran it for many years. Calvin Coolidge was one of Mr Smith's customers. When Mr. Smith passed on, he stipulated in his will that the mill should continue under the same miller, and it has, and it is from him that I get the grindings. It is pure wheat flour, merely ground done, with none of the good removed."

Mrs. Rudkin has had other adventures. A few years ago she acquired a flock of turkeys, and planted hundreds of apple trees on her place, in an effort to put the farm on a paying basis.

"But the turkeys were too smart for me. They ate all the best apples so we had to put quite a distance between the two."

Thief Pretends To Be Employe

MONTREAL, Sept. 3 —A quick-witted thief escaped with $523 in cash and $200 in cheques from the office of Charles Monique Friday night.

Monique was out to lunch when a charwoman entered his office and found a strange man at the desk. He explained he was a new employe and she left.

When Monique returned the stranger was gone with the cash and cheques.

Commencement orators this year have appropriately talked a lot about liberty. Because that, as far as one can see, is what most of the graduates are about to be at.— Brubaker in the New Yorker.

Chinese Boy Scout And Girl Guide War Heroes

Of 16 Chinese Boy Scouts and Girl Guides of Singapore who enlisted for first-aid and hospital work in the Chinese war zone but one remains, according to a Weekly News Bulletin story from London Scout Headquarters. The survivor, Ng [illegible] Keng, a lad of 19, now lying in a Hankow hospital recovering from bullet wounds and a fractured [illegible].

Ten of his companions have been killed, two have been wounded and the remaining four [illegible] missing. His [illegible] remaining [illegible] Miss Chong Yong Tack [illegible], of the unit known as the Singapore Chinese War Front Service Corps, who had her right leg amputated as a result of a severe machine-gun wound while serving in a front-line field station on the Shansi front.

In the party of young heroes were nine boys and seven girls, all in their teens, mostly students in Singapore. They represented the cream of the overseas Chinese Scouts and Guides in Malaya. Most of them came from families of high standing. They were led by a capable girl, Miss Mak Sien Chong, the only daughter of a wealthy [illegible] merchant of Singapore.

Besides rescuing the wounded and giving first aid [illegible] were used as dispatch runners [illegible] constant dangers of the battlefield. They forgot their own safety when things of greater importance were to be performed.

The evacuation of the Chinese troops from Shanghai found three of their comrades dead, including a girl. One Scout was killed by a stray bullet while carrying a message. The other Scout died when a Red Cross truck, carrying wounded to a field station, was bombed, and death came to the Girl Guide, Cheng Kong Tee, during an air raid, while she was directing the evacuation of war refugees around Letien.

Eddie Cantor Coming Next Tuesday

Eddie Cantor of stage, movie and radio fame will appear on the silver screen at the Variety next Tuesday. Starring in Ali Baba Goes To Town, Eddie in particular, and the whole cast in general present a colorful musical extravaganza replete with riotous comedy and laughter combined with genuine musical excellence. The whole mirth-musical production sets a new high mark for shows of this type. Money, labor and talent were spilled freely to make this a musical hit to see and then to talk about. Included with Eddie Cantor are such well known screen favorites as Tony Martin, Roland Young, June Lang, Louise Hovick and a host of other equally well known stars. It is a 20th Century production and they planned to make and succeeded in making a show that will cheer the gloomiest soul and send into raptures all the light hearted.

COMMUNICATION

EDITOR'S NOTE: We are in receipt of an unsigned communication from "a friend who loves horses." We are unable to print unsigned letters at any time but in this case we will compromise by printing a section of the letter. We would like to add however that in the event of horses becoming sick, if at all possible a competent and qualified vetinary surgeon be called.

The first thing to do when a horse is noticed to hang on the halter is NOT to unite him, but support him with slings and blanket him. Once the horse goes down the unnatural position that he falls into together with exposure kills him in a few hours. Any well animal placed in the same position would die in a few hours from exposure and congestion. When the horse is supported treat his cold if he has one, give him kidney and bowel cleansing and do not wet him unless precaution is taken afterwards. If these same directions are followed and you lose your horse you will feel that you treated him right anyway, but if he is not allowed to go down, you need not dread the horse disease as he will have strength in most cases to combat same."

Yours very truly,

L.C.C. NEWS

The August meeting of the L.C.C. was held at the home of Mrs. Joe Brown. The roll call was nicely answered by gems and various verses. There were fifteen members present.

A vote of thanks to Mrs. S[illegible] who so kindly donated the wool for a comforter to be made up by the club and raffled off for the benefit of the community hall. Tickets will be sold by all L.C.C. members at twenty-five cents each.

Mrs. Bailey and Mrs. Smith are to visit the sick during September.

The meeting closed by repeating the Lord's Prayer. After much visiting among the members, a lovely lunch was served by Mrs. Brown and at five p.m. departures were made with members reporting having enjoyed the afternoon. The next meeting is to be held at Mrs. Robinson's. The roll call to be answered by Autumn verses. Visitors welcome.

"European military leaders claim they have the people behind them."

"In event of war, of course the positions would immediately be reversed."

Sleeps Better In A Train

Sir Hugh Roberton, distinguished Scottish musician, who recently travelled across Canada adjudicating at musical festivals, says, "I am one of those odd individuals who sleep better in a train than anywhere else. Canadian trains I find particularly sleep-inducing. They are also made so one goes to sleep to the accompaniment of bells and horns. The beds are wide and comfortable. And the dining cars have style. Then there is the parlour car, where one can stretch one's legs, loll on a comfortable easy chair, smoke, read the newspapers, look out on the landscape. I am never bored on these trains even on the longest journey." Of the Canadian hotels he states; "The New World has the Old Country beaten. I have just left the Canadian National Railways' hotel, The Fort Garry, Winnipeg. I have travelled much in my lifetime; I have yet to find the kind of service, the kind of courtesy, the kind of helpfulness one gets there, and in many other places on the American continent." Sir Hugh tells a little story of the Winnipeg children: "Addressing them, I had occasion to use the word 'Bawbee'. Did they know what a bawbee was? Up shot scores of little hands. Smart, I thought. Their answer was one of the highlights of the festival. With one accord they shouted—'An English policeman.'"

Houses Built Of Waste Ashes

CAPE TOWN. — A social welfare officer in the employ of the Union Government in the Transvaal has discovered that waste ashes form a valuable material for inexpensive house-building. The material used comprises [illegible] per cent ashes, 5 per cent sand and [illegible] with soap acting as waterproofing material.

A permanent building of six rooms with bathroom, timber floors, mosquito netting and verandah complete, was built by three unskilled laborers for £20. The waste material is used [illegible] it moulds. It solidifies quickly and technical experts, Government analysts, builders and architects who have seen the building have [illegible] highly.

The new material has been shown to stand the same pressure as bricks, and is said to be vermin-proof and [illegible] resist changes of temperature. After a heavy rainfall in the locality where this experimental house stands, it was found to have remained dry and warm. In view of the huge housing schemes by municipalities [illegible] and it is estimated that the use of ashes instead of brick and [illegible] would save some millions of pounds.

Cows To Honolulu

Holden, Alta. — A car load of Pure bred Grade Holstein cows were shipped recently over the C.N.R. to [illegible] their future home [illegible] Honolulu. These were purchased by [illegible] Carlisle, Secretary of the Holstein Friesian Association of Alberta, who made several trips to Holden to pick up these select animals.

Small Snail Beats Snake In Death Fight

LEBANON, Pa., Sept. 6—A small water snail killed a struggling, 15-inch water snake today and then died. The pair of battlers, still alive, was brought to a newspaper office by a fisherman. The snake's head was gripped by the snail's shell and the reptile threshed wildly trying to free itself.

School Fair To Be Held Next Thursday

A meeting of Tofield Teachers and others interested in School Fair took place Wednesday evening in the Town Hall to make arrangements for the Tofield School Fair to be held on Thursday, September 22nd.

The following committees were appointed. Supervisory committee —L. Broughton, J. Robinson, School work —Mis. Wingrove, Miss McCrea, Miss Annebo, Miss Glasiner, Mrs. Steen and Mrs. Patterson. Sports: Mr. Campbell and Mr. Gardam. Poultry: S. Olsenberg and J. T. Brown. Refreshments— F. Morden, Margaret McCauley and Hazel Moore. Cooking —Miss Phipps and Miss Hay. Vegetables—Mr. McLeay. Sewing—Mrs. J. Robinson and I. Robinson.

The committees in charge request that school entries if possible be sent in on Wednesday afternoon but all entries must be on hand at 10 a.m. Thursday as judging commences at this time. Arrangements will be made to have hot cocoa at noon hour served to the country children served in the basement of the Roman Catholic church where some elderly people will be in charge. This place will also be available in case of rain. All children are requested to take along their own drinking cup.

Exhibits may not be removed before 5 o'clock. As soon as the judging is finished the building will be open to the public at a small entrance fee of 10c, the proceeds of which will be used to help pay the Sports prizes. Special classes will be opened this year for Tomatoes, cucumbers and pumpkins.

CORRECTION

Two items of information appeared last week, which while not exactly incorrect, need clarification.

Regarding the editorial "A Discount or a Penalty" it should have been mentioned that at present rural ratepayers obtain a discount of five per cent if paid by December 15th.

Regarding the report of the Cornhill Municipal District Council meeting, referring particularly to the correspondence re gas tax, it should have been stated that the Council first pays the full tax of seven cents then in the course of time receives six cents back from the government.

LINDBROOK

With the arrival of fine weather after the recent rain which delayed threshing operations these same operations have been resumed and the separators hum, the tractors grunt [illegible] and the [illegible] the machines [illegible] perspire very freely, all so that the waiting trucks can speed it to the elevators "before the price drop" as the wise guys figure, but wouldn't it be a joke if it went up and its likely to as yet, with a general war in the offing.

Mrs. Joe Ellis of Vancouver, a former well known resident of this district is here on a visit to her brother-in-law, Mr. Norman Ellis and family of Hastings Lake. We all hope she enjoys her visit, also the sunny Alberta weather after the rains and fogs of the coast.

Last Sunday the friends of Mrs. J. Ellis gathered together at a picnic held in her honor at Hastings Lake. The weather was ideal and everyone had a real good time.

Mr. Gilbert Branten had a nasty mishap the other day. He was putting air into a new tire on his truck when it exploded and Mr. Branten caught the full force of it in his face, Glen Woods, standing near, was deafened. Mr. Branten was taken to the hospital for treatment and we hope to hear he is O.K. again and will suffer no ill effects of his accident. Too bad that it had to come at such a busy time too.

Mr. and Mrs. F. Burden and baby of Edmonton spent Sunday last at the home of their friends, the Bracegirdle family of Lindbrook.

A group of farmers sent a man to Edmonton to watch the wheat market and after a few days deliberation wired them to this effect, Some think it will go down and some think it will go up. I do too. Whatever you do will be wrong. Act at once.

BARDO

Mr. and Mrs. Marvin Johnson of La Glace, Alta, are visiting relatives here. Marvin has secured a job so they will be here for a while. Mrs. Johnson was formerly Miss Bernice Anderson.

Joe Stauffer and Co. have bought a new thresher, and Borven and Co. have sold their 32 inch case machine to G. Lee of Woodlawn.

Miss B. Ness and W. Scott of Edmonton, Mr. and Mrs. R. Dahl of Camrose and Esther Ness, who teaches at Duhamel, spent Sunday at the Ness home here.

Raymond Nordhus lost a horse last week. The horse had blood poisoning in his leg.

Snow-drifts won't stop Pete Lorbekmo next winter as he is making himself a snow-mobile.

Doris Glatsner of Dodds, who teaches Ingram school is staying at the R. Nordhus home.

Rain that fell last Thursday stopped threshing for a few days but all machines started the first of this week. Wheat yields are ranging from 15 to 25 bushels per acre.

A large crowd was present at the Lutheran church on Sunday last when a mission Festival was held. Rev. Hoverstein had charge of program and lunch was served by the ladies in the church basement. At the forenoon service, Rev. Palmer Anderson, missionary home on furlough, spoke his subject "Let your light so shine." In the afternoon, Dr. Talbert Ronning, who recently returned from the mission field in China spoke. In an earnest and forcible speech he brought a message from the people of China. He also described the present conditions in war-torn China. As Rev. Palmer Anderson expects to return to China at the end of his month it was also a farewell service for him and his family who have spent the past year mostly here in Bardo. An offering of over $60 was taken up which goes to the aid of Missions.

Rev. and Mrs. Palmer Anderson and family left Tuesday by car for Minneapolis, Minn., where Mrs. Anderson and children will remain for a time, while Mr. Anderson returns to China to his work as a teacher in a school conducted by missionaries of the Norwegian Lutheran Church. The best wishes of their many friends go with them.

Sorry to report that Mr. N. Roth, Bishop of the Mennonite Church is very ill at his home.

Miss Carey Brechan, who visited her mother and friends here has returned to her school at Berwyn.

Mr. and Mrs. John Ness of Edmonton were out to their farm on Sunday and also attended church services here.

Mrs. Ivan Foshaug and little daughter returned home on Sunday.

FOR SALE—Binder $35.00; Electric fence and battery $30.00; fall payments. Apply R. Heichen, Lindbrook.

LOCAL & PERSONAL

Mr. Max Rogers left on September 10th for Pasadena, California, U.S.A. He will attend university in an official capacity there.

Miss Anne Marie Robertson of Holden spent the week end visiting with Muriel Malcolm.

Miss Luella Hill of Edmonton spent the week end at the Noland home.

Mrs. Tom Schultz visited friends at Ryley for a few days.

Mr. and Mrs. Murray McIleffey of Edmonton were Tofield visitors on Wednesday.

Walter Schultz left on Sunday for Edmonton where he will work at Gainer's plant.

Miss M. Mallaffey from California is a guest at the J. O. A. Letourneau home here. Tofielders will remember Miss Mallaffey as a resident at Tofield a number of years ago.

Mr. A. J. H. McCauley is leaving Sunday night for Toronto where he will attend as delegate the General Council of the United Church of Canada.

Mrs. A. Pollard of Edmonton has been spending a few weeks at the home of her daughter, Mrs. C. Baptist, at Tofield.

Mr. Gardam attended the Deanery Meeting held at Edgerton last Monday.

Miss Marjory Stewart, teacher at the Tofield Public school, was operated on for appendicitis last Tuesday at the Lamont Hospital.

Rev. T. W. Teape of Kitscoty will take over the duties of the Anglican Church here on October 1st. Rev. Teape who was the first Edmonton born young man to take Holy Orders in the Anglican Church, will be remembered here as a Student in charge some years ago.

A Critical Week

Not since the Great War has the eyes of the world been so focussed on European affairs. The eagerly awaited speech of Chancellor Hitler before the Nazis Congress last Monday while informative did not classify the situation much or bring about a lessening of national tension.

The latest important development is the visit to Germany of Premier Chamberlain of Great Britain. This is an unprecedented event and proves that Great Britain is doing its utmost to avert a general European conflict. Until Premier Chamberlain's return and his report to parliament or the cabinet of his interview with Chancellor Hitler it is unlikely that sensational new developments will occur.

In the meantime reports of disorders in the Sudeten area of Czechoslovakia are rife. This area is the present bone of contention. It borders on Germany and there are 3,000,000 Germans living there who apparently desire union with Germany. The Czechoslovakian government refuses this but some way will have to be found to settle this problem if hostilities are to be avoided.

WHEAT

Events have shown that certain fears that have been rather widely held about wheat production on the Prairies are unwarranted. It has been rather generally considered by some for instance that "The desert was on the march northward over our Prairies."

Others concluded that "Even though it were to rain in abundance that normal crops could never again be produced on our Plains, for the reason," they said, "that fibre and soil fertility had either been blown away with soil drifting, or had been lost by wrong methods of farming."

This last season, however, over a large part of what has been known as the Prairie's drought area, general rains occurred, and wherever they fell normal yields to the acre appeared just as they had ever done in the past.

It is true that in some districts many of these fine crops, made by the rain and the soil, did not give a good yield but only because rust once again appeared; but those farmers who had rust-resistant wheats—Thatcher Renown and Apex—did not suffer, and by next spring there will be much more than sufficient seed of rust-resistant varieties to provide seed to every farmer in the rust area if he chooses to use it.

Apparently then, we can say with reasonable assurance that good production on the average over a term of years on our Prairies is assured.

This unquestionably is good news for the West, for the whole economic structure that supports our standard of living is mainly based upon wheat, on our ability to produce from 300 to 400 million bushels of wheat a year, that is to say that the revenue which comes from that quantity of wheat is the minimum revenue that is required to maintain our schools, our gravel roads, our railways, our villages and towns with their retail, wholesale and professional services they in turn render to the people. Many students of economics consider that if the acreage now in wheat in the West has to be seriously curtailed, or if the yield per acre on that acreage should on the average decline appreciably, that our farmers and all of us would be forced to a very much lower standard of living than we now enjoy, and the West forced to a much smaller population.

Can We Sell

It is good, therefore, to be able to believe that production is assured as far as weather conditions are concerned. For the first time, however, in sixty years of wheat production in the West an additional and most serious problem now raises its head. Can we sell the wheat which we produce? Up to the present time this has never been a really serious problem, for the ninety odd countries to which Canada sells its wheat and flour, always, in the past, have provided a ready market. Mr. Broomhall, however, estimates that Canada this year will only be able to sell about 146 million bushels of the probably 230 million it will have as an export surplus to dispose of. This is a most serious matter, and it has nothing whatsoever to do with those things which we in the west have spent so much time discussing in the past, that is, the price of wheat, or the methods of marketing. The problem is ever more serious than these things. It is simply, can we at any price sell that amount of wheat which apparently we must produce in order to maintain our present standard of living? For obviously if we can only sell each year about half of what we produce as an export surplus, then there would be no option but to reduce acreage considerably, with all the hardships that the consequent lowering of our standard of living throughout the West would entail to farmers and to all of us.

The Basic Trouble

To consider this matter on its merits it is necessary to remember that up to a few years ago the importing countries of the world used to require some 800 million bushels a year from export countries; whereas now they require not much more than 500 million. Canada, therefore, has two problems to solve if she wishes to maintain her present wheat industry. One is to try to increase her percentage of sales in competition with other countries, and the other is to do everything within her power to persuade importing countries to increase their total purchases of all wheat. The first problem it would seem can be solved by improving the quality of Canadian wheat; steps to do this are most energetically going forward by means of efficient governmental and private methods.

Tariffs Must Come Down

To enlarge the total world wheat trade seems, however, finally to admit of but one solution, which is that we must permit foreign countries to sell more of their own products in Canada and on other world markets so they can obtain more Canadian and foreign exchange with which to purchase more wheat from Canada and other nations. This means in short that high tariffs, which since the war have so obstructed the exchange of agricultural commodities for manufactured goods between the nations of the world, must be brought down.

The wheat growers of Western Canada now badly need all kinds of additional manufactured goods and commodities that the working people of Europe can make, and would be glad to provide. These European workers in turn—large numbers of whom are now unemployed—badly need, we are assured by the best authorities, more bread, better quality bread, and more of all kinds of other agricultural products. The real effort then, for Western Canada to make it seems, is to do everything within her power to persuade the countries of the World to reduce tariffs so that the exchange of goods commodities and products can proceed in large volume as once it did a few years ago.

Perhaps it is not too much to suggest that Canada and the United States, who this year have the greatest amount of wheat to export, should start this much-to-be-desired new international policy by reducing their own tariffs, and so start removing excessive trade barriers, for the United States knows, of course, that it was she who in 1930 with her Smoot-Hawley tariff increased very considerably the 1913 or pre-war tariffs, and it was Canada who then soon followed the example of the United States. (Searle Grain Company, Ltd)

A Story About Mustard

IT IS RELATED THAT A WEALTHY MANUFACTURER ONCE STATED THAT IT WAS NOT THE MUSTARD PEOPLE ATE THAT KEPT HIS FACTORY GOING, BUT THE MUSTARD THAT PEOPLE LEFT ON THEIR PLATES.

NOBODY WOULD WANT LEFT OVER MUSTARD, BUT THERE MAY BE, PROBABLY IS, SOMETHING AROUND YOUR PLACE THAT YOU HAVE NO FURTHER USE FOR BUT WHICH SOME OTHER PERSON WOULD BE PLEASED TO POSSESS.

A PIECE OF FARM MACHINERY, A HOUSEHOLD APPLIANCE, FURNITURE, USED AUTOMOBILE, LIVESTOCK OR ANY ONE OF THE NUMEROUS THINGS WHICH ACCUMULATE AROUND THE PLACE AS THE YEARS PASS BY. Woman Masks as Man For 35 Years

NEW YORK, Sept. 13 —Johnnie (Strong Boy) Nolan, for 35 years a feared contender for fistic honors in the bars around the Borough hall section in Brooklyn was stripped of his secret Monday.

Doctors at King's county hospital discovered it when they examined "him" after he had been admitted for treatment of a fractured nose, broken in a fall down a flight of stairs.

"Johnnie" about 60 now, was dressed as a man, as "he" has been for 35 years—as long as neighbors can remember.

"He" has been known mostly for feats of strength—twirling beer barrels and fisticuffs. In recent years "he" has been superintendent of the building in which he, or rather she, lives.

"Johnnie" was admitted to the male section at the hospital, but was hurriedly transferred to the female wing "He" has a high pitched voice but his five feet four and 150 pounds is all hard muscle.

Charles Ross Dies At Coast

VANCOUVER, Sept. 12 —Charles C. Ross, M.L.A., 54, former minister of lands and mines in the Alberta government, died suddenly Monday after collapsing on a Vancouver street. Death came while he was being taken to hospital. Mr. Ross was out for a short walk when he collapsed.

Mr. Ross had been spending a holiday here with his wife. Attendants at the hotel where he registered Sept. 7 said he had been in apparent good health before his seizure Monday.

Arrangements have been made to return the body of Mr. Ross to his Calgary home, where his two sons are at present. Funeral service will be held later this week.

Member of the Alberta legislature for Athabasca, Mr. Ross had been minister of lands and mines from the time Premier Aberhart formed his Social Credit government in 1935 until he resigned Jan. 5, 1937. His resignation came after a disagreement with Mr. Aberhart over the appointment of a cabinet member. Mr. Ross later explained that he "had the right to resign if and when someone is appointed with whom I cannot conscientiously work."

Aklavik Soon To Boast Cow

Northbound now on the Northern Transportation company's boat, Northern Prospector, Aklavik's first cow is scheduled to arrive at that Mackenzie river delta post within two weeks.

Ordered by Dr. L. D. Livingstone, newly-appointed medical and administrative officer at Aklavik, the lone representative of the bovine race was shipped from Edmonton by train to Waterways. There it boarded the last N.T.P. boat to the far north post, in company with 10 chickens, also for Aklavik.

Londoners Read Hitler's Speech and Turn To Sport

LONDON, Sept. 13— London's man in the street last night eagerly snatched evening editions carrying Chancellor Hitler's speech, took them into his pub to read—and then played darts.

Three principal evening papers issued extras carrying the text of the speech, the Standard, News and Star.

Extras were snapped up so fast in Fleet Street it was necessary a few minutes after they were issued to walk six blocks to find a vendor who was not sold out.

Nevertheless the common man, accustomed to the suspense of the last few weeks, appeared not enough impressed to talk about the prospects of war or peace, but continued his routing pursuit of his evening snack, a glass of beer, and discussing dog racing and gossiping.

One woman was heard to remark: "I suppose if we do not have war this year, we'll have to have it some time." Another said: "Isn't he a cheeky devil."

Thousands of German-speaking Britons listened to the speech direct, sitting before their radios. The reception was clear.

The average Londoner appeared unimpressed. He was accustomed to Hitler's dramatic fulmination of which the extravagant language was distasteful here as the anti-thesis of typical English understatement.

That Man Again

Overheard (in an air line ticket office):

"But this ticket says Miami and I want to go to Minneapolis!"

"You'll get to Minneapolis all right. Pay no attention to what the ticket says. We mark them that way when our Mr. Corrigan flies Trip No. 7."— June Provines in Chicago Tribune.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "The Crop Testing Plan."

"There are so many classes and grades of seed What is really the best to buy?" a farmer friend asked.

There are three main classes of seed, with No. 1, 2 and 3 grades within each class:—

(A) GENERAL SEEDS OF COMMERCE"— which require a Control Sample Certificate, stating that the stocks are up to certain germination standards, and that they contain no more weed seeds, nor seeds of other kinds of grain, than the Seeds Act permits.

(B) "CERTIFIED SEED"— which is the same kind of material as (A) excepting that it is a little purer in each grade, and also that the stocks are certified to be true to a high standard of excellence to one specified variety.

(C) "REGISTERED SEED" which again is the same as (B) excepting that it is even purer, and is true-to-variety to a still higher standard of excellence even than Certified seed.

The best qualities of Registered and Certified seed are contained in sacks, each individual sack having been inspected, tagged and sealed by an officer of the Dominion Seed Branch. Certified seed in the sack is more expensive than General Seeds of Commerce, and Registered seed is somewhat more expensive than Certified, simply because it is the highest quality seed obtainable.

Following factors have tended to raise price —Wheat harvesting losses from extreme heat feared in Russia—French and German wheat surpluses will be kept for emergency reserves—Feeding of cheap wheat in Europe likely above normal. Spain requiring for wheat. Estonian wheat and rye crops smaller than 1937—Britain negotiating to take fifty per cent of Balkan corn surplus.

Following factors have tended to lower price: International Institute forecasts record 1938 World wheat crop—General rains do immense good to Argentine crop—U.S. and Canada pressing liberal quantities of wheat for export—Russia wheat price offers considerably under Indian and American—Russia pressing barley—Italian wheat crop supposedly equal to needs—Holland has particularly good rye crop— Poland subsidizing rye exports.

Night Of Terror Told By Woman

ROBSART, Sask., Sept. 13— Tale of a night of terror spent in a railway bunkhouse while the man who had shot and killed her husband then threatened her life, was told at an inquest here Monday night by the wife of the murdered man, Fred Shofstak.

The inquest was held into the deaths of Shofstak and Sam Myronjuk, shot to death at Palisade railway siding six miles east of here Sept. 7.

Searle Precipitation Report

(Final for the Crop of 1938)
Compiled from 294 Rain Gauges

Taking into account the precipitation which occurred during the months of August, September and October, and the rains which have fallen during this growing season from April 1st to August 18th, inclusive, and weighting for wheat acreage, the records reveal that the moisture situation for the three Prairie Provinces, as a unit, on August 18th, was 80.8 per cent of normal.

For Alberta the moisture condition on August 18th was 95 per cent of normal, for Saskatchewan 87 per cent and for Manitoba 80 per cent.

80.8 per cent of the normal moisture would warrant, we calculate, a maximum wheat crop of approximately 375 million bushels. From this amount, however, has to be deducted the serious losses to the crop from rust and grasshoppers. What these rust and grasshopper losses have been will be difficult to estimate until threshing is completed inasmuch as the rust and grasshopper damage was very patchy. The losses certainly amounted, however, to several tens of millions of bushels —Searle Grain Company, Ltd.

Market Declines Under War Scare

TORONTO, Sept. 14— The war scare worried the stock market into another wide decline Wednesday and stocks were dumped in the heaviest volume since March 16. Turnover reached 1,549,000 shares.

Gold stocks recorded the sharpest set-back with an index loss of 5.02 Base metals fell back 3.40, the industrials 4.41 and the western oils 2.86. The oils were off to their lowest index level of the year. A mild rally developed in the last 15 minutes which cut the losses of most groups, especially in the senior golds and base metals. The industrial section recorded declines of one to two points.

NEW YORK, Sept. 14— A storm of selling in the stock market blew out of the darkening war clouds over Europe, as prices tumbled $1 to $5 or more a share in excited trading.

As the final hour got under way there was a minor lessening of pressure.

Boy's Tongue Stung By Bee in Sandwich

MINNEAPOLIS, Sept. 14.—Robert Road, 15, was eating his lunch at Marshall high school. He took a bite out of a sandwich and got a severe sting on his tongue. When he opened his mouth again a bumble bee flew out. He was taken to a hospital and treated for a badly swollen tongue.

WAR

As we read official cables and despatches it seems as though the world is nearer war today than it has been since the start of the Great War 1914.

The immediate cause of the matter in dispute—the dissatisfaction of some three million people of German blood in Czechoslovakia—can hardly be considered to be worth running the risk of a great worldwide catastrophe, a World War, which many think might ring down the curtain on our entire civilization, and might indeed as has happened to other civilizations in the past, send us all on the road towards barbarism; perhaps again to a caveman-like existence.

A careful study of the present situation reveals, however, that the immediate matter in dispute is but one effect of a much deeper cause, of the same basic or fundamental cause in fact, which seems to have been at the bottom of most of the wars that are recorded by history, i.e. the question of the welfare, or the standard of living, of the masses of people of different tribes or races or nations.

The Research Department of the Searle Grain Company has recently concluded an investigation into the wars of 528 years, (because this term coincides with the prices of wheat that have been compiled and charted for that same period, 528 years.)

The results of the study reveal some rather astonishing things, some of which are as follows, that in 528 years the world has only been entirely at peace for a total of 51 years; that from the year 1400 until 1600 there was not one single year of complete peace in the world; that from 1600 to 1800 there were only 16 years of peace and from 1800 to 1900, 25 years of peace, and from 1900 to date but 10 years of peace.

Years At War

The great nations have been at war during the 528 years under review as follows

France	390 years
Russia	361 years
Austria	230 years
Great Britain	212 years
Spain	213 years
Turkey	192 years
Germany	187 years
Italy	117 years
Holland	106 years
Portugal	40 years
United States	27 years

Why should the people of the world have spent such a large proportion of their time in destroying their lives, property, goods, commodities, products and resources, in making themselves poorer?

One can only suggest one real cause for it all which is man's unfortunate genetic "make up" which consists mainly of certain defects which seem to be so deeply engrained and inherent in man's nature. They are as follows:

Selfishness: (which shows itself in an unwillingness to share with others those resources of soil and minerals which has made available in and on the earth, and which certain nations have taken possession of).

Greed: born of the struggle for existence, the urge or the fear that man must accumulate things in order to tide over times of scarcity that might come.

Envy: the uncontrollable desire of any individual or nation to be as well off as other people; the determination to make others share with him the things that others own and have accumulated by one means or another.

Why Wars Are Fought

Almost all of the wars that have been fought, our study reveals, can be traced to one or the other of these basic characteristics of human nature. Some of the first and most bloody wars of which there is any record for instance were fought thousands of years ago for the possession of those fertile wheat lands between the Tigris and the Euphrates rivers in Mesopotamia; and so throughout the Ages it has gone: weak or poorly armed people are conquered by stronger or more virile nations; lands of the conquered are expropriated and the products of the soil or of the lands, foodstuffs, minerals, precious stones and so forth are used to improve the standard of living of the conquerors. Then soon after this other nations, who are not so well off, look with envious eyes at these more prosperous conquerors and determine in turn to secure their share of the good resources or as much of them as they can. History reveals that either a share of these resources is given up peacefully by those who own them, through the medium of peaceful trade and commerce, i.e. by the exchanging of goods commodities and services, or that the envious and less prosperous people in the end fight for the possession of those lands and of those countries which afford a better living. Frequently, however, wars have been averted for a time by those countries who have taken possession of vast sparsely populated lands by inviting the people of over-crowded countries —who in consequence have a relatively low standard of living—to come and settle freely in the less populated countries. Wars, it seems, have also sometimes been averted by the more prosperous countries being generous in their loans of capital to poorer countries, so that with this capital, needed products, goods and commodities and raw materials may be purchased by the poorer countries from the richer nations.

The Solution

In a nutshell then it would seem that those who have assumed possession of the natural resources in this world must be willing in one way or another to share them freely with the people of other nations, or run the risk of war. This is the fundamental lesson it seems that history teaches. At the moment then it would appear that the course of true statesmanship in the world, in order to insure the best chances for the longest term of peace, would be to permit as quickly as possible a much freer movement of goods, commodities, services, people and capital to and from the various countries of the world, and particularly to permit agricultural products, i.e. foodstuffs, to be exchanged, with as few restrictions as possible, for the goods, commodities and services of the people who live in cities. —(Searle Grain Company, Ltd.)

TESTED RECIPES

In view of the plentiful supply of tomatoes, the following recipes for the home canning of this fruit may prove useful

Pickled Whole Tomatoes

- 1 peck small green tomatoes
- 1 quart boiling water
- ½ cup pickling salt
- 1 quart vinegar
- 3 pounds brown sugar
- ¼ teaspoon cayenne pepper
- 1 teaspoon cinnamon
- 1 teaspoon mixed spice
- 1 teaspoon celery seed
- 10 whole cloves

Dissolve salt in boiling water. Put in a few tomatoes at a time and boil for twelve minutes. Remove each tomato carefully with a wooden spoon to prevent spoiling shape, drain thoroughly and pack in jars. Tie spices in muslin bag, put into vinegar, add sugar and boil until slightly thickened. Remove spice bag, pour liquid over tomatoes, filling jars full and seal tightly.

Tomato Catsup

- 10 pounds tomatoes
- ¼ pound salt
- ½ ounce whole cloves
- ½ ounce whole pepper corns
- 1-7 quart vinegar
- ¼ pound sugar
- 1 ounce allspice
- ½ ounce cayenne

Simmer tomatoes until soft and then make a puree by brushing through a fine sieve. Tie all the spices loosely in a muslin bag. Boil until quite thick, preferably using an enamelled vessel. Bottle and seal hot.

Tomato Cocktail (No. 1)

- 18 ripe tomatoes
- 1 chopped celery
- ½ cup chopped onions
- 2 tablespoons vinegar
- 3 sweet green peppers
- 1 sweet red pepper
- 2 tablespoons salt
- ¼ cup sugar

Mash and cut tomatoes but do not peel. Chop the peppers finely. Mix tomatoes, celery, onions, peppers and salt together. Boil for one-half hour. Strain through coarse sieve. Add the vinegar and sugar. Boil three minutes. Seal in sterilized jars.

Tomato Cocktail (No. 2)

- 1 bushel tomatoes
- 1 small head celery
- ½ teaspoon white pepper
- ¼ cup vinegar
- 1 cup chopped onions
- 4 teaspoons salt

Boil all together for 20 minutes. Strain and boil 5 minutes. Bottle and seal.

Instinct No Guide To Good Food Says Expert

Calgary, Sept. 13— Neither man nor animal selects health-giving foods by instinct, declared Dr. L. H. Newburgh, Professor of Clinical Investigation at the University of Michigan, speaking here last night at Central United Church in connection with the current campaign of the Canadian Medical Association to increase public knowledge of proper diet. Dr. Newburgh, a leading United States authority, asserted that chemical research had proven that instinct and appetite alone could not be trusted to tell people what they should eat.

The ill-health of mountaineers of the southern United States offers wholesale evidence of the effect of inadequate diet, said Dr. Newburgh.

"The habitual food of large groups of people contains far too little protein," he stated. "Thus in the central portion of the United States, especially in the mountainous districts, the food consists chiefly of corn, molasses, and salt pork. The natives are thin, pale, haggard, devoid of ambition and lacking in strength. It is characteristic that they accept their debility as a matter of course and evince no interest in overcoming it. Even though they are suffering from a protein deficiency, instinct does not prompt them to seek out protein-rich foods."

A child receives too little calcium for the proper development of bones and teeth unless it drinks four glasses of milk daily or takes the equivalent in the form of a pint of milk, four ounces of cream, an ounce of cheese, and a serving of some leafy vegetable, he contended. Since it would take 32 pounds of beef or eight pounds of bread to provide the calcium content of one quart of milk, Dr. Newburgh pointed out that it would be impossible to eat enough meat, eggs and white bread to fill the calcium needs of a growing child.

"Our forbears were wiser than they knew when they cherished the cow, for she patiently and with never a complaint extracts the calcium from high quantities of grass and delivers it to us in so small a package that we imbibe it with ease and pleasure," he commented, adding that physicians could prescribe calcium in medicinal form for the occasional child with whom milk does not agree.

He emphasized, too, the need for vitamins. These, he said, were lacking in the diet of the average American big city dweller, causing "deficiency" diseases. Thus, in addition to milk, eggs and meat, he recommended that daily diet include one pound of green leafy vegetables and fruit, raw or cooked.

Dr. Newburgh's western itinerary includes meetings at Vancouver, September 15th; Regina (date not fixed); and at Winnipeg Auditorium, September 22nd.

The Things That Haven't Been Done Before

The things that haven't been done before
  Those are the things to try.
Columbus dreamed of an unknown
  shore
  At the rim of the far flung sky,
And his heart was bold, and his faith
  was strong
  As he ventured in dangers new
And he paid no heed to the jeering
  crowd
  Or the fears of the doubting crew.

The many will follow the beaten
  track
  With guide posts along the way,
They live and for ages back
  Have a chart for every day
Someone has told them it is safe to
  go
  In the road he has traveled o'er
And all that they ever strive to
  know
  Are the things that were known
  before.

The things that haven't been done be-
  fore
  Are the tasks worth while today.
Are you one of the flock that follows
  Or, are you one that shall lead the
  way?
Are you one of the timid souls that
  quail
  At the jeers of the doubting crew

Adult Physical Education

Shortly after the first of October classes under the Dominion Provincial Physical Training Program will begin in Ryley. This better health program is new in Alberta but has been very successfully carried on in British Columbia for some years. The program of 're-creation' embraces those of 16 years and over, adult classes being entirely free of charge.

Training will consist of two classes per week for girls and two per week for boys. Duration of class will be two hours. Boys' and girls' classes to be held separately except where combined for social activities, ballroom and folk dancing.

Among other activities time will be spent at fundamental gymnastics, passive and bench exercises, tumbling and vaulting with and without springboard, folk and ballroom dancing, organized group games adaptable to gymnasium and social activities.

It is intended that the evenings will by no means become tedious nor laborious but rather take the form of recreation.

Before the end of September a public meeting will be held at which the plan will be outlined in detail and registration will take place. This will be preceded by a meeting of the sponsors of the local program. Those interested in further information communicate with E. B. Stauffer, Ryley.

Watch your paper for announcements of meetings.

Line Elevator Companies and the Wheat Board

Attention has been drawn to statements suggesting that Line Elevator Companies opposed the establishment of the Wheat Board and took no part in the advancement of the farmers' case before the Turgeon Commission. These and all similar suggestions are false.

The solution of the wheat question requires the co-operation and goodwill of all those interested in the welfare of Western agriculture.

The 1938 Wheat Board was established because conditions in the international wheat situation demanded it, because that fact was recognized by the Government, and, not least, because all thoughtful Westerners and Western organizations, including the Line Elevator Companies, strongly supported it.

Realizing that union and not dissension amongst all those interested in the progress of Western agriculture and the honest facing of common problems are more than ever necessary and that the greatest disservice that any organization or individual can do in these present difficult times is to spread falsehoods, innuendoes or half truths, the Line Elevator Companies feel it necessary to draw your attention to

The Following Facts:

Before the Turgeon Commission:

1. On the Opening Day. Counsel for the Line Elevator Companies was the first to address the Commission. He analysed the burdens upon Western farmers. He referred to tariffs, interest rate, the cost of things farmers buy, transportation costs, etc He said:

> (a) "It may be stated that the farmer suffers from the double handicap of buying his goods at costs which are enhanced by a closed market and selling his product on a market in which tariffs and embargoes have been raised against him.
>
> (b) "No one wishes, least of all those whose welfare is his welfare, to leave the farmer the victim of conditions which he did nothing to create.
>
> (c) "At this point I may state that my clients endorse, whole-heartedly, any movement for a relief of the farmers' burdens and for the granting of support, as long as any condition, either national or international, external or internal, render that relief and that support necessary for the maintenance of adequate living standards for farmers and their families."

2. At Calgary. Exhaustive evidence was offered of the increased costs of things which farmers buy. In answer to Mr. Justice Turgeon, Counsel for the Line Elevators, said

> "I want to say, quite firmly, my Lord, that the elevator companies do not oppose the establishment of a Wheat Board. Rather, we are all in favour of anything that will give the farmer the necessary protection. As I indicated at the beginning of this Inquiry, our attitude towards this Commission is that we would like to join with everybody else in searching for the best remedy for the ills of the farmers."

3. In the formal written argument—submitted on behalf of the Line Elevator Companies —Counsel said:

> "It is submitted that a wheat board organization should be retained and made available for the guarantee of price in case the prevailing world price declines below a fixed figure set to assure the grower the highest minimum price possible for his product."

The 1938 Wheat Board

In 1938 the Line Elevator Companies advocated and supported a Wheat Board and the highest possible minimum price. Oral representations to the Dominion Government were supported by the following letter sent on July 29th, 1938, to the Dominion Cabinet and the Chairman of the Wheat Board:

> "We understand from recent Press reports that the minimum price for the current crop year for wheat will be determined and announced by your Board and the Government in the next week or ten days. Our Association placed in evidence before the recent Royal Grain Enquiry Commission the following:
>
> "Volume 1, page 20. 'At this point I may state that my clients endorse wholeheartedly any movement for a relief of the farmers' burdens and for the granting of support as long as any condition, either national or international, external or internal, render that relief and that support necessary for the maintenance of adequate living standards for farmers and their families.'
>
> "And again, Volume 1, page 26, "If the deliberations of this Commission are to have the constructive effect which it is desired we believe that it should consider the economic position of the Western farmer in the national household. In any enquiry directed towards those ends and in any movement to ameliorate this position I am instructed to state that my clients will wholeheartedly join." Bearing in mind the welfare of the producers, may we respectfully urge that your Board and the Government give consideration to the relationship between the present costs of necessities and the price of wheat. We understand that recent statistics released by the Dominion Bureau of Statistics covering food, fuel, rent, clothing and sundries show that the average cost of these items for the year 1937 to be 21 per cent higher than the cost of the same articles for the year 1913. The average price for No. 1 Nor. wheat in store Fort William for the year 1913 was 88c. The handicap under which we believe our clients are laboring is set forth in the evidence given on our behalf by Mr. L. W. Brockington, K.C., Volume 1, page 16, through 26, of the evidence of the recent Royal Grain Enquiry Commission. It is the hope of this Association that the Government will consider the highest possible minimum price consistent with the welfare of the Dominion of Canada.'—Signed, C. E. Hayles, President."

After the price was set, in a newspaper interview, Mr. C. E. Hayles said:

> "The members of the North-West Grain Dealers' Association are pleased to note that the Dominion Government has recognized the principle that, in the face of adverse international and national conditions, the economic position of the Western farmer is entitled to federal support, even at the risk of loss to the Dominion Treasury. We wish, however, that the Dominion Government had been able to guarantee a higher price."

Line Elevator Companies

Death Spoils Vigil Of Long Waiting Wife

SOUTHAMPTON, Eng. Sept 13— For 10 years Mrs. John Roberts of Leeds waited for her husband to come home. He had left a year after their marriage for an engineering job in southern Rhodesia.

Year by year his home-coming was postponed. A few weeks ago he wrote that he was sailing. Mrs. Roberts came here to meet him. She stood alongside the gangplank watching the passengers disembark. The last one left. Roberts was not among them.

The captain said he had died suddenly a few days before the ship reached here.

We spent about three weeks travelling in Switzerland and Northern Italy. Some of the views simply took our breath away. —Letter in a Provincial Paper.

And they say that travel broadens one—Humorist.

Skunk Scores Victory

GALT, Ont. Sept. 6—A moral victory was scored by a skunk at the golf club here the other day. The little animal took possession of a shed adjoining the club house but lost out when two club employees appeared with rifles. The club lost out, too. The canteen and men's locker room could not be used and a service club luncheon had to be moved downtown.

AMISK CREEK

The Ladies' Aid held their monthly meeting Friday instead of Tuesday last week. The meeting was held at Mrs. R. O. Berg's home. In spite of the muddy roads quite a crowd gathered, most of the members and many visitors being present. A quilt was made and business discussed. The next meeting will be held at Mrs. J. Berg's.

Ruby Berg [illegible] and Nia Sand motored from [illegible] Saturday evening [illegible] Sunday and Labor day at their parents' home here. Ellen and [illegible] Kingman [illegible] evening.

The rain [illegible] week stopped threshing for a few days [illegible] has started again [illegible] [illegible].

Mr. and Mrs. [illegible] from [illegible] visited their parents' home [illegible] Sunday evening.

[illegible] attended the [illegible] Sunday.

[illegible] Sunday before [illegible] afternoon and [illegible] evening. Both were well attended.

Mrs. P. O. Fraser visited at the [illegible] on Tuesday of last week.

[illegible] has been assisting Mrs. [illegible] with the work during threshing.

Mrs. A. Patterson visited with Mrs. P. O. [illegible] last Sunday.

Miss Margaret Molne returned [illegible] after canvassing and selling [illegible] Rocky Mountain House [illegible].

KETCHAMOOT

Threshing started up again on Tuesday after being held up a few days owing to rain.

Born: To Mr. and Mrs. Leo Overland [illegible] Gertie Ingram, on Sunday September 11th, a daughter. Congratulations.

Mrs. W. [illegible] Mrs. Neale entertained the Ladies' Aid [illegible] Wednesday afternoon [illegible] a large crowd [illegible] were present, a pleasant [illegible] was spent. Mrs. Sears will [illegible] the next meeting.

Mrs. [illegible] of Edmonton has [illegible] week visiting at the [illegible] and renewing [illegible] acquaintances.

Mr. [illegible] visited relatives [illegible] Sunday.

Mr. [illegible] Mrs. Harold [illegible] children visited at [illegible] daughter and sister [illegible] Sunday.

Mr. [illegible] and three [illegible] and sister Miss Jessie Chin[illegible] of Edmonton, were Sunday [illegible] guests of Mr. and Mrs. [illegible] Lee [illegible] visited other [illegible].

Mr. and Mrs. [illegible] Williams are [illegible] a small house on their farm [illegible] Mrs. Williams' mother, Mrs. [illegible] owing to her advanced [illegible] alone. She is over 80 years old.

Mrs. [illegible] Wiley and small [illegible] are spending several [illegible] of Mrs. Wiley's parents Mr. and Mrs. J. H. Ingram.

Next Sunday, September 18th, [illegible] be Harvest Sunday. Special decorations [illegible] program will be the order [illegible] A [illegible] welcome awaits you.

Mr. Wesley Ingram arrived on Wednesday from [illegible] B.C. for a few weeks visit with friends and relatives [illegible] looking after his farm [illegible] the Farmington district.

UNITED CHURCH NEWS

Sunday, September 18th—

Lavoy	11:00 a.m.
Tofield	7:30 p.m.
Ketchamoot	2:30 p.m.

There will be Harvest Thanksgiving Services each place and will be suitably decorated.

At the Tofield service the Rev. W. [illegible] Bev[illegible] will preach. Come and join in the happy hymns on such an occasion. Come and give thanks.

Serving a Great Field

From United Grain Growers' terminal at Port Arthur to that at Vancouver is over 1,800 miles. It is over a thousand miles in a straight line from the most easterly of the Company's elevators to the most westerly one. Its most southerly elevator is 500 miles further south than its most northerly elevator. It is a vast area which is served by this farmers' company. Because of the great area served, it has resources, equipment, organization and information enabling it to give every possible protection to the interests of its farmer customers.

Organized by farmers, owned by farmers, controlled by farmers, this Company's essential purpose is now, as it has always been, to be of service to farmers. The experience of farmers throughout the vast area served proves that this purpose has been carried throughout the Company's history of more than thirty years.

September Eve

A haze of dust hangs over the country-side. Gradually it diminishes, when before it finally clears a muffled roar comes and sweeping clouds again drift with the breeze. The day has been hot with the rays of the sun breaking down on the toilers feverishly garnering the golden harvest of grain ere the weather changes. Tired limbs and sweaty bodies trudge and pitch all through the day and out of the spout of roaring, rattling machines pour wealth of greater value to mankind than liquid gold.

But the evening is cool and still, with but a faint trace of a breeze to come before morning. From an elevation in town one looks out over the fields and sees the shadows of night gradually creeping over hill and hollow and as one looks there comes the sound of a steady chug, chug, chug, chug. It is saying Bring More! Bring More! Listening one hears a second and a third engine laboring. For a second or so they are all in unison, then one gradually gets out of time and you know there are three. You also know that the elevators are busy, busy handling the grain brought there by truck after truck, rushing from field to elevator as fast as they can. As one stands and listens in the early darkness it is easy to understand that inside those sentinel like structures, activity is rife. Albert Haukedahl at the Pool, Tom Hutson at the Searle Grain Co., Joe Wiltzen at Gillespie Co., are all with helpers, working at top speed so that grain may be elevated to bins to make room for still more grain. The evening is well advanced, the heat has given way to the cooling shadows, when gleaming lights on the horizon bite the darkness and a muffled roar of increasing intensity is heard. In a few minutes a truck swings from the highway into "elevator lane" and another contribution to the world's food requirements is made. The moon comes up over the eastern horizon and casts its light on a scene changed from yesteryear, but still the chug chug goes on.

Duck Shooting opens Today

With ideal weather in their favor, many hunters once again enjoyed the sport of shooting 'em on the wing or otherwise this morning. While not as numerous as they once were there is still good hunting in this district and a good hunter can still obtain plenty of sport.

A hunter may shoot 12 ducks per day but must not have more than 36 in his possession at any time. There is a limit of 100 for the season. A hunter may shoot five geese per day with a limit for the season of 25.

SCHOOL FAIR

Next week will be a busy time for School Fair officials, teachers and scholars. Thursday, September 22nd is the date set for the Tofield School Fair. At last year's school Fair Tofield was the second largest School Fair in the circuit. When one considers that thirty-seven fairs were held in this northern circuit, Tofield did well. This has happened in former years, let us hope that the 1938 School Fair will be just as successful. There were 1435 entries last year from 310 pupils coming from 11 rooms. Think what the result could easily be if more school children in our town and district exhibited. Let us once again boost our School Fair and exhibit all we honestly can whether we have been a winner previously or not—always remembering that although individual points gained, thrill, the greatest thrill is realized when through co-operation the School Fair Association as a whole, is strengthened and leads the way for future successful years.

U.F.W.A. NOTES

"It's an ill wind that blows nobody good," and Thursday's rain which put a stop to threshing, made it possible for the U.F.W.A. to hold their September meeting as scheduled.

In spite of roads, bad and growing steadily worse, a large number of members and visitors met at the home of Mrs. B. Seale, who was assisted by her sister, Mrs. F. Thompson.

The roll call, "The worst Scrape I was ever in," was very entertaining, everyone present contributing to the list of varied dilemmas.

The reports from the 3 groups on their financial activities were called for, the results being: East division 1st, Central 2nd, and North standing 3rd. The last named must entertain at the October "Birthday Party."

The meeting enjoyed 3 humorous readings by Miss Lola Wilson given in her own clever style.

The president, Mrs. I. C. Olson has still a few of the popular U.F.W.A. Cook Books for sale to anyone wishing them.

Big Grader To End Season's Work in Division 6

The big elevating grader will end the season's work, it is expected, this week. At the beginning of the season each councillor was allotted $1000.00 for big grader work and $500.00 for maintenance work.

During the summer working in all six divisions, the outfit will close this [illegible] after doing work in Councillor Wa[illegible]'s territory, division six. It is difficult to say exactly how many miles of road has been constructed as in addition to some fairly long stretches quite a lot of patch work was done.

Tire Blows Out In Tofield Service Station

On Friday night last about 10:00 p.m. while a large tire was being tested for leaks in the Tofield Service Station it blew out. The report was terrific, momentarily deafening those in the building.

Mr. Gilbert Braaten received the full force of the explosion in his face which was cut somewhat by grit. His cap was torn from his head, the [illegible] being ripped, and was later discovered up near the ceiling on top of a tire rack. He also received eye [illegible] which we are pleased to say is gradually improving. Glen Wood was deafened for a time also.

Ideal Threshing Weather

With such ideal threshing weather it is difficult to estimate the quantity of grain threshed. Each day thousands of acres of stooks and thousands of bushels of grain go through and pours from the threshing machines. At time of writing, Thursday, it is estimated at least half, perhaps more of the grain has been threshed and another week of continued fine weather will bring most threshing units to the end of their season's labors.

Yields on the whole have been better than at first expected and while the price is not as high as last year more farmers will harvest and thresh a crop thus bringing about a great[er] distribution of money.

Tofield Child Has Nine Grandparents

A report in an Edmonton daily last week to the effect that an Edmonton child and nine living grandparents, together with the belief that it constituted a record for Canada brought out the information that Allee, daughter of Mr. and Mrs. F. Edwards of Tofield can boast of a like number of grand and great grandparents. They are Mr. and Mrs. Geo. Edwards, Tofield; Mr. and Mrs. A. P. Moon, Tofield; Mr. and Mrs. Geo. Edwards, Australia; Mr. and Mrs. F. Freeman, Mrs. Robinson, Tofield.

OBITUARY

The death occurred unexpectedly on Sunday afternoon, August 28th, of William Lewis Wood at Port Angeles, Washington, U.S.A. at the age of 46 years, due to heart failure.

William Lewis Wood was the son of the late Mr. and Mrs. Henry Wood of Tofield. He was born in Glencoe, Oklahoma, August 26, 1894, and came to Tofield with his parents in September 1901. He farmed in the Shonts district for several years, but had made Washington, U.S.A. his home since 1921.

He leaves to mourn his loss four brothers and four sisters, Lloyd, Melville and John of Tofield, Arthur of Port Angeles, Maggie of Tofield, Ardis of Marwood, Mrs. Horace Rollans of Viking, and Mrs. Joseph Majabey of Edmonton.

The funeral was held on Thursday, September 1st at Port Angeles, Washington.

"Good Old Soak" Coming

Wallace Beery in his most laughable, lovable role, "Good Old Soak" is the feature billed by Sharps Shows for Tuesday next at the Variety. It is a delightful picture and you can't help loving the star performer as Clem Hawley when he goes into action to get his son out of a jam. There is a grand all star—all fun cast, including Una Merkel, Judith Barrett, Ted Healy, Eric Linden, Betty Furness, Janet Beecher and George Sidney. Show starts at 8:30.

Latest reports are that Prime Minister Chamberlain will return to London at once, confer with the British cabinet and return to Germany for a second meeting with Chancellor Hitler.

Elevators To Have Regular Hours

Since the rush of threshing the elevators have been very busy, the elevator men working exceptionally long hours. Instructions have now been received by the rural elevators from their various head offices to maintain regular hours. In future during the rush season, elevators will open at 6:30 in the morning and close at 6:30 at night.

School Fair Held Today

EXHIBITS NUMEROUS AND EXCELLENT

To-day, Thursday, the annual Tofield District School Fair was held, with exhibits, if anything, exceeding in quality and variety exhibits of other years. We have no offcial figures but there appeared to be just a few less exhibits, but on the whole, they were of better quality and greater variety.

A new note is struck this year by the entrance of enterprise craft. This takes the form of construction of simple and more intricate things. This year this class ran to the construction of simple dwelling and primitive dwellings. The primitive dwellings included tropical huts, Indian tepees and Eskimo igloos. They were very realistic too. An exhibit that was outstanding was an African village. Another exhibit, though apparently not prepared for competition was "Healthland." This was remarkably good and was prepared by Miss Wingrove's room at the Tofield school. "Healthland" is worthy enough to merit a much larger showing there being such painstaking detail and artistic effort displayed. It also very graphically teaches the lesson of health.

There was the usual exhibits of school work, writing, drawings, maps, etc., all of which showed a high degree of skill. The domestic science classes included cakes, cookies, bread biscuits, candies etc., and much skill must have been required to produce such a variety of delectable products.

The sewing classes were well filled and the artistic claims of fancy work laid side by side with the utility claims of stocking darning.

Woodwork was much in evidence also, birdhouses being the favorite as to construction.

The vegetable classes were well filled and included as new entries, tomatoes, cucumbers, pumpkins and pop corn. There were of course, potatoes, peas, cabbages, turnips, carrots, sweet corn, all in a formidable array of entries.

The threshed grain class was well filled and brought out one very excellent exhibit. This was 36 different varieties of grain, all in small bottles neatly arranged on a card. Included in this exhibit put in by Aaron Wiltzen were the new wheats being propagated for various purposes.

The sheaf exhibits were quite good and shows improvement year by year in way of preparation. Only a few years back bundles were roughly put together, this year they are more neatly arranged.

The flower exhibit was excellent indeed, the profusion of bloom being very beautiful.

The poultry exhibit while not large, contained some nice birds.

The attendance was not quite as large as in some former years. This no doubt, due to threshing being in full swing, farmers being anxious to take advantage of the fine weather.

Visiting judges included Miss L. M. I. Milne, Inspector Robinson, Inspector J. R. McLean, Mr. W. G. Malaher and Mr. H. Scott.

Mercury Receives Diploma as Pulitzer Award

The Mercury this week received the diploma awarded by the Columbia University of New York known as the Pulitzer award. The diploma which is a handsome document is worded as follows:

The Trustees of Columbia University
In the City of New York
To all Persons to whom These Presents May Come—Greeting
Be it Known That
The Mercury

Has been awarded recognition for its co-operation with the Edmonton Journal recipient of a special Pulitzer Prize for distinguished and meritorious public service in 1937

In accordance with the provisions of the statutes of the University governing such award

In witness thereof we have caused this diploma to be signed by the President of the University and our corporate seal to be hereto affixed in the City of New York on the First Day of June in the Year of Our Lord One Thousand Nine Hundred and Thirty-Eight

LOCAL & PERSONAL

Mrs. Gordon Provost and Allan are visiting at the Manse all this week.

Miss Marie Scott underwent an operation for appendicitis last week.

Mrs. Ellis, Joan and Miss Cherry from Edmonton spent Sunday here as guests of Mrs. Malcolm and Muriel.

Mrs. Ralph Neale of Vancouver, B.C., arrived here Sunday. She will visit friends and relatives here.

Mr. D. W. Jacobs is visiting at the Jacob home here.

Rev. and Mrs. Wallace from Camrose spent Monday in Tofield.

Miss Edythe Barden, nurse at the General hospital, spent the week end at her home here.

Miss Lois Thompson visited her parents at Leduc for a few days this week.

Mr. D. G. McCarthy underwent an operation for appendicitis on Wednesday of this week. Mr. McCarthy has been a patient in the hospital for several days previous to his operation.

Mr. Graham Allan returned home Thursday morning after spending the summer months working at Jasper.

Rev. Murphy from Edmonton visited at the McCarthy home Thursday last. Rev. Murphy is 83 years old, but is still a keen hunter. He went out Thursday with Reg McCarthy and Norman Glover to bag a few ducks.

Mr. Sinclair is enjoying his holidays now, Mr. Van Dyke is here relieving him at the station.

Miss Margaret McCauley is nursing at the Royal Alex hospital for a short time.

Mr. A. J. H. McCauley left on Sunday for Toronto where he will attend the meetings of the United Church Council. He expects to be gone a week or so.

After several weeks stay with his son, Walter Rogers at Grassum, Alta., Mr. J. Rogers returned home last Tuesday.

Mr. and Mrs. Wm. Galloway of Waterloo, Iowa, spent the week end at the T. R. Murray home. Mrs. Galloway is Mr. T. R. Murray's sister.

"I've just called to compliment you on your service," said the lady to the postmaster. "Yesterday I received a telegram all the way from London and when I opened it, the gum on the envelope was still wet." —Montreal Star.

TWO TRUCKS COLLIDE

NO ONE HURT

On Friday evening last two trucks, an Oil Truck and an Orange Crush truck collided on the highway just east of town. Both trucks were proceeding west, the Orange Crush truck first. The Oil truck coming up from behind at a faster speed ran into the rear of the Orange Crush truck. The Oil truck was considerably damaged, but beyond some broken bottles, the Orange Crush truck escaped injury.

Constable Clark was called to the scene and flashing his light into the ditch was "lucky" enough to find a partly filled case of beer which nobody seemed to own.

Threshing Hitting On All Sixes

After a short delay due to rainy weather threshing got underway again and have had a remarkably good run. The yields are turning out very good and grain is being rushed to the elevators as fast as trucks can take it. In spite of the large number of trucks around, temporarily at least there is an actual shortage. If the fine weather continues for another week, many threshing outfits will have finished their season's run.

Worthy Grand Matron Eastern Star Visits Tofield

On Monday evening last Mrs. Harwood of Calgary, Worthy Grand Matron, Eastern Star Order, paid an official visit to Ionic Lodge, Tofield. In addition to members present there were about 100 visitors from Calgary, Edmonton, Camrose and Vegreville. Among the high visiting officers were Worthy Grand Patron Mr. Enaismore of Edmonton and two Past Grand Matrons and two Past Grand Patrons of Edmonton and Calgary. After the meeting a buffet luncheon was served. Mrs. Clutterham is Worthy Matron and Rev. Wallis Worthy Patron of the Tofield lodge.

TOWN OF TOFIELD

Notice to Relatives of Persons on the Assessment Roll and to Tenants

NOTICE is hereby given that during the months of September and October, applications may be made under the provisions of section 188 of the Town & Village Act for inclusion in the Voters List of the town of Tofield by the following persons, namely:

The wife, husband, father and mother and every son and daughter of any person whose name appears upon the assessment roll who are entitled to be placed on the said list:

(a) If he or she is resident with the said person within the town or assists him in a business in respect of which he is taxable; and

(b) If he or she is of the full age of twenty-one years; and

(c) If his or her name does not already appear on the assessment roll.

Tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of August of this year.

Dated at Tofield this 1st day of September 1938.

J. W. CHAPMAN
Secretary-Treasurer.

Card of Thanks

The Family of the late Mrs. I. H. Olson wish to thank their many friends for the kindness and sympathy extended to them in their recent bereavement, also for the beautiful floral tributes.

Anglo-French Plan Said "Perfidious"

MOSCOW, Sept. 20— Unqualified condemnation of the Anglo-French plan for the partition of Czechoslovakia was heard Tuesday in Moscow. The Soviet press denounced the project as "perfidious" "hypocritical" and a "new step toward a world war disguised as a contribution to peace."

Pravda, Communist party organ, said Chancellor Hitler first tried to capture the Sudeten territory through an armed revolt led by Konrad Henlein, Sudeten German party leader. When that failed he turned to Prime Minister Chamberlain of Great Britain who "obligingly hastened" to Berchtesgaden to help the fuehrer. It was not thought necessary, Pravda said, to discuss fundamentals at Berchtesgaden last Thursday since Hitler and Chamberlain were hand in glove.

The government organ Izvestia printed an analysis of the new situation by its Geneva correspondent, who wrote "liquidation of French influence in Europe."

The Production Of Winter Wheat

(Experimental Farms Note)

Much interest has developed in the production of winter wheat: Reports are received from different parts of Central Alberta of phenomenal success with this crop, and many farmers are considering the advisability of going into the production of winter wheat on a larger scale, states G. E. DeLong Dominion Experimental Station, Lacombe Alberta.

The arguments are all against an undue expansion of the winter wheat acreage. In the first place returns in yield per acre have been larger from the 1937 [illegible] crop than could be expected under normal conditions for the reason that there was less winter killing last winter than usual. For example all varieties included in the winter wheat tests of 1937-38 at the Experimental Station, Lacombe, came through the winter without any winter killing while the same varieties were completely winter killed during the previous winter.

[illegible] over a period of years indicate that in Central Alberta, the winter-killing in winter wheat varies from thirty to sixty per cent in normal winters, and that surviving plants have their vigor so reduced that considerable time is required for them to re-establish themselves in the spring with the result that winter wheats seldom ripen as early or yield as well as early maturing varieties of spring wheat.

The control of soil drifting on land which has been summer-fallowed is creating a new use for winter wheat. Experiments conducted at the Dominion Experimental Station Lacombe, show that the use of a cover crop of wheat seeded during the middle of August will control soil drifting. The use of winter wheat as a cover crop in this work suggests itself as being worthy of consideration. The winter wheat would protect the soil from wind erosion as well as the spring wheat, and, if it survived the winter would give a crop of grain. If thinned out by winter-killing, the stand could be thickened up by spring seeding an early maturing variety such as Reward. Such a combination would give a crop that would be all ripe at the same time.

Stubbling in winter wheat in the fall so that the stubble will hold the snow and protect the wheat has given [illegible] in many instances. This practice has not been in use long enough in Central Alberta to justify recommendations concerning it. It is possible however, that those farming in the grey wooded soil area where there is a protective covering of snow all winter would be justified in giving this method of growing winter wheat a trial.

It is suggested that growers would be well advised to not over-expand their winter wheat acreage. At best, winter wheat is a risky crop. Ideal soil preparation for winter wheat is also ideal for spring wheat and the production of spring wheat is less risky.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "The Crop Testing Plan."

The shadow of "The Four Horsemen" of the Apocalypse is falling on us. The chargers are being groomed saddled and equipped to spread war, hunger, death and destruction.

Should these evil forces be loosed, then the young men, under flying banners and to the strains of martial music, will march bravely to battle. But soon they will find that their flesh is but a poor shield against hurtling jagged steel splinters. They will choke with hard choking and blinded death from poison gas. They will experience the gripping dry-throated ghastly fear as their companions before their eyes become pieces of torn and shattered flesh and bone. They will see once happy homes and gardens made into heaps of muck and [illegible].

At home little children will tell, with pride, of the brave deeds of their gallant soldier fathers, but in quiet places dry-eyed gentle women will mourn their lost men, and will look to a future shattered and empty of hope.

Finally when "The Captains and the Kings depart", there will limp pathetically across the country the burnt-out veteran, trying in vain to re-establish himself in a busy world that [illegible] has forgotten him. Then for farmers the aftermath of low prices, "A measure of wheat and three measures of barley for a penny" the Scriptures tell us.

An International Exchange Of Campers

In an international Boy Scout camping exchange, ten New York Scouts spent two weeks with Montreal Scouts at Camp Tamaracouta this summer, and ten Montreal Scouts returned with them to spend two weeks at the New York City Scout camp at Ten Mile River, N.Y.

Modern Method of Stopping A Runaway

Pursuit of a runaway milk wagon team with a motor truck, passing the driverless horses as they galloped wildly down a hill, and manoeuvering in front so as to stop them before they reached a bridge, won commendation for Rover Scout James Hamilton of Edmonton. A number of children were playing near the bridge, and possible injury to some of them was averted.

"Before engaging you, Mary, I should like to know whether you have any religious views?"

"No, I'm afraid I haven't ma'm, but I've got some lovely picture postcards of Blackpool." —Tit-Bits.

Yet throughout the ages has ever rolled the clear but unheeded injunction to man—Share the fruits of your toil and of your lands freely with those in need—or suffer war.

How sad, how pathetic, how stupid it all is.

Following factors have tended to raise price: Fear of war in Europe—Reports indicate further Italian crop deterioration— Estimates substantial Dutch import requirements of wheat, corn, barley, rye and oats — Rains needed for ploughing and seeding in Russia and Balkans—Much Russian wheat infected with wheat bug—Sharp reduction in Chinese peanut exports—Mediterranean olive oil production low.

Following factors have tended to lower price: French threshing returns exceed earlier expectations — Russia makes large exports of barley and wheat—Prairie wheat crop confirmed well over 300 million—Showers in Argentina and Australia—International Institute estimates Italian wheat production at 294 million—France offering soft wheat for shipment to England

Green Grass Dried By Hot Air Proves Rich Forage For Cows

WILMINGTON, Del., Sept. 12—Dr. C. M. A. Stine, a Vice-President of the du Pont Company, is "making hay when it rains" on his dairy farm here and is reversing ancient theories of cattle forage. He cuts his grass five to eight times a year—not simply once—and dries it artificially.

Dr. Stine's aim is to produce a richer, more nutritious milk through careful cultivation of grass, and he has put material science to work in each step from soil chemistry to the milking of his cows.

On the rolling hills of his Pouden Farms near here, Dr. Stine cuts grass when it is only six inches high. It is swept up from the mower by an elevator to a trailer. It then goes immediately to a special barn, where it is dried in ovens fired by oil burners.

This method, he declared, takes the forage at its richest stage, preserving food values destroyed when hay "cures" by lying in the sun on the field. He said tests showed that grass cut at the six-inch height has 20 to 24 per cent protein, as compared with 7 per cent in ordinary hay, and is several times richer in carotene, a principal source of vitamin A.

Dr. Stine gets a minimum yield of two tons of dry fodder per acre a year. The average yield of clover, timothy, and alfalfa in Delaware is 1½ tons per acre. Rainy or drought periods do not deliver a crippling blow to farm economy, he said, and he can actually make hay when it rains.

The grass drier is of English design, somewhat modified to fit American conditions. The oven holds two trays at a time, with 600 pounds of grass in each tray. Hot air is blown from the oil burner underneath the trays, and sucked up through them by a fan. The average treatment is 17 minutes. The grass loses 80 per cent of its weight in that time—all water loss. Again, Dr. Stine said, tests have proved that no food values are destroyed in the quick-drying. The treated grass is baled and stored for winter use. It becomes a year-round food for cows like that of new grass in the spring, and "everyone knows how rich and yellow milk is in the spring."

Another benefit, he said, is erosion control. The grass roots grow close together and "only clear water runs off my land." Valuable plant food material is not lost.

The soil, furthermore, is always cool and moist, even in prolonged hot spells. Underground thermometer experiments show that the temperature stays within the growing range for grass of 40 to 90 degrees.

Dr. Stine is putting back into the ground certain "trace minerals" such as copper, manganese, iron, cobalt, and magnesium. These elements, it is held, have been depleted from eastern farm land during a century of farming.

Purity of the milk is assured by chemical and biological cleanliness, Dr. Stine explained, in both the care of animals and in milking and bottling. —Christian Science Monitor.

Learner Signs Help To Avoid Traffic Jams

Much of the hazard involved in the instruction of student drivers on street and highway is eliminated in an idea evolved by George E. Fisher, Los Angeles automobile driver teacher.

Adopting and extending the English practice which requires a new driver to display on his license plates for a full year a large letter "L", Fisher has developed striking "learner plates." Of enamelled metal larger than the license plates and fitted beside them, the learner plates are inscribed in bold lettering: "NEW DRIVER, Please Keep Distance." At the bottom, in smaller lettering, Mr. Fisher offers his advertising message and phone number, advising would-be drivers to take expert instruction.

"The sign has proved a great help" says Fisher. "Formerly, when a student driver stalled his motor at a busy crossing or on a curve, the motorist behind us usually would honk his horn, making the student more rattled than ever. But with the "NEW Driver" sign on the car, I have found other motorists to be much more considerate. They control their impatience and also keep a safe distance from him on all sides, thus reducing the danger to everybody concerned. Another result, of course, is that the beginner gains confidence much more quickly."

Forgive

Severe-looking woman (to businessman): "My son left your firm because you called him a blithering dummy. Will you take back the 'blithering dummy'?

Businessman: "Certainly. He can start again tomorrow.

New Signs For Alberta Roads

Numerous new signs are to be erected on Alberta main highways and on intersecting secondary highways, according to a recent announcement by Hon. W. A. Fallow, minister of public works.

Need of adequate sign-posts on the highways was taken up with the minister by the Alberta Motor Association.

Intention of the department is to proceed immediately with the erecting of signs at various locations selected by officials of the motor association who have made a special survey of the most desirable spots.

With the surfacing of highways being advanced by the department as speedily as possible, it is believed that the volume of motor traffic is bound to increase. In view of this heavier load it is felt that the present [illegible] have its sign-post system fully up to requirements.

One suggestion received by the minister is that a yellow centre line should be run along the main highways, as this would be seen more easily at night.

Another suggestion is that illuminated signs should be placed at curves. These suggestions, it is understood, are being considered by the department.

Impatient Purchasers

Long before the engineers have even begun work on forthcoming new models, orders are frequently received for new motor cars one or two years ahead of production. A recent example of this is disclosed by the Oldsmobile division of General Motors. Away back in 1936, a mining engineer who was going to South America for a two years' stay, ordered a 1938 model car. The other day he arrived home, and delivery of his car was made to him.

Another example involved a West coast citizen who a few weeks ago signed up for a two-year term in the Navy. Before he began service, he paid a down payment and his old car on a 1940 model Oldsmobile, to be delivered to him upon his discharge.

Too Long and Too Short

Two Negroes were boasting about their cars, both typical worn, shabby old wrecks.

One of them said: "Dey's jes' one reason why Ah can't run dis heah cab o' mine 60 miles an hour."

"De distance am too long fo' de shawtness of the time?" ventured the first. – Halifax Herald.

Serving a Great Field

From United Grain Growers' terminal at Port Arthur to that at Vancouver is over 1,800 miles. It is over a thousand miles in a straight line from the most easterly of the Company's elevators to the most westerly one. Its most southerly elevator is 500 miles further south than its most northerly elevator. It is a vast area which is served by this farmers' company. Because of the great area served, it has resources, equipment, organization and information enabling it to give every possible protection to the interests of its farmer customers.

Organized by farmers, owned by farmers, controlled by farmers, this Company's essential purpose is now, as it has always been, to be of service to farmers. The experience of farmers throughout the vast area served proves that this purpose has been carried throughout the Company's history of more than thirty years.

W. Werton, Publisher

THE SHADOW OF WAR—

IN 1914 OR 1915 an American magazine with a very large circulation had as its cover a picture of the figure of death knocking at a cottager's door. Inside the cottage was a man, woman and child. The woman was seated at a table, her head bowed within her shaped arms, the child was clinging to her skirts and the man stood prepared to answer the call. After four years of terrible conflict, peace was declared, a peace which, it was hoped, would be enduring. But now after 20 years, war dogs are again straining at their leashes and Europe totters on the brink of a fate too horrible to contemplate.

In the intervening years many important historical events have happened and among the most important was the forming of Czechoslovakia and the rise to power of Chancellor Hitler and the Nazi party in Germany. These two events it now appears are the basis of the present European crisis. Czechoslovakia as at present constituted is a post war revamping of national boundaries. On the north east and west it joins Germany, on the south Austria and Hungary, tapering off into Poland and Rumania on the east. It has a population of 15,186,944, made up of a number of nationalities. In addition to the Czechs, there are 3,231,688 Germans, 691,923 Hungarians, 549,169 Ruthenes and 81,737 Poles. Evidently then national unity was not the main purpose when the boundaries of the country were set up. Rather, being a part of the general settlement following the war, Allied interests were studied first and Germany's last. It was generally believed Germany was responsible for plunging the world into war in 1914 and to make a recurrence of such a thing impossible, France pressed for a strong ally to the east of Germany. Essentially, the forming of Czechoslovakia centred around the intense democratic principles of the Czechs. But there was another important consideration, the natural barrier of the Sudeten, Carpathian and Bohmerwald ranges of mountains. These mountains on the north, west and southwest of Czechoslovakia are the best kind of a defence a small country could have. Unfortunately for the Czechs, the three million or more Germans desiring union with Germany are on the wrong side of the mountains. That means if the territory containing the three million Germans is ceded to Germany, Czechoslovakia's natural defences go with them. Then nothing but Germany's self restraint can stop her armies marching east. Undoubtedly the Germans in Czechoslovakia would like union with Germany and Chancellor Hitler may feel that he would like them within his fold, but we believe Hitler's main consideration is to obtain the territory so that his armies can go eastward unrestricted should he believe it necessary for them to do so. The protestations of Hitler regarding the protection of the Sudeten Germans, while perhaps sincere enough in a way, lack conviction when it is known that large bodies of Germans were left to intense Italianization in the Tyrol.

The whole problem is an extremely difficult one and in escence is simply rebellion by Hitler against the settlements of 1918 and following years. The main question is Germany's place in Europe, or to put it another way, when will the demands of Hitler cease?

As this is being written word comes of the acceptance by the Czech government of the British-France proposals. It was a bitter pill to swallow, but they had no alternative. And Hitler having gained his point on this issue, many will wonder how long it will be before new demands are made.

Back of the whole European problem is that of raw resources. The increasing mechanization of all countries makes access to raw materials almost indispensable. How long will it be before Germany again sets the world on edge demanding the return of her colonies? And when the demand does come, what will be the answer?

The Great War now is more than twenty years distant. During this time a new generation have been born and many of them have reached the first years of manhood and womanhood. They were not responsible for the war and it is neither wise or good that their minds should be filled with hatred toward other nations because of the tragedies of the war. Any reasonable settlement of Germany's problems based upon considered judgement and not upon sword rattling and bluff, would, we believe, find favor with the world at large.

The situation now having reached a point where the Czechs are resigned to their fate and Germany having gained her demands speculation regarding the future is rife. Certainly if Germany pursues her course of the past few years by demanding—and taking—more and more, an European war is only postponed. But if with the acquisition of a part of Czechoslovakia together with the natural military barriers to the east, Germany is satisfied, a more tranquil Europe for many years to come should result. What the future holds for Europe means more to us here in Western Canada than is generally recognized. If Europe can settle down to a really peaceful existence and develop trade instead of super armies and navies, the different countries will be more inclined to lower their tariffs against wheat and lay more stress upon trading the things that they can best produce and manufacture for the things that we can best produce which are wheat and livestock products.

Economists Look At The Farmers

Four hundred or so agricultural economists drawn from about twenty countries met in conference at Macdonald College, Quebec, last month. In summarizing the sessions for The Western Producer, J. T. Hull states that the economists turned sociologists and discussed agriculture from the standpoint of social ideals. There seemed to be among them a general agreement that agriculture has always been under the heel of powerful interests in society from aristocratic land owners and feudal lords to tariff barons and industrial magnates who have so maltreated it that it can now be saved only by a few major operations.

For 100 years, declared Farmer A. H. Brown from England, the farmer has been exploited by industry and finance. Now he is bankrupt while thousands are starving, and if economists are not sociologists with a remedy for such lunacy then they are no good.

Senator John of Eire likened agriculture to a patient lying on an operating table with the surgeon on one side and the anesthetist on the other. The surgeon was economics and the anesthetist applying the gas was politics. In my country, responded a gentleman from middle Europe, the anesthetist applies the gas to the surgeon as well as the patient. As a pleasantry that was about equalled by a gentleman from New Jersey who said that the farmers in his state complained bitterly that all they had they owed to udders!

The conference listened to a large amount of information about what was going on in agriculture in other lands from Europe to Australasia and Argentina to North America. From all lands the same plaint was heard—the farmer is in a bad plight and only the intervention of the state with new systems of land tenure, planned production, organized marketing, fixed prices, tariff reduction, quotas or subsidies, can save him. Some countries produce and cannot sell. Some import but cannot buy. Over-production and bankrupcy for the farmers, deprivation and undernourishment for millions, said Farmer Brown. Sheer lunacy!

The outcome of the week's discussion may perhaps be summed up in this wise. Agriculture everywhere is the Cinderella of the economic family. It is the kitchen maid, hewer of wood and drawer of water, receiving an allowance from the family income that barely reaches a subsistence level. So far as orthodox economics has anything to say this is merely the inevitable result of the free play of economic forces in the agricultural world, with all kinds of organized resistance to the forces from the rest of society. Under these circumstances economics by itself has no solution for the problem of agriculture. It is a question of human well-being to be approached from the standpoint of social idealism. That necessarily involves a process of rational building with a redistribution of the national income among the national economic groups, which again necessitates large measures of administrative control, regulation and guidance.

Haunted Vicarage For Sale

LONDON, —Hidden away in a tiny village in Sussex is a 60-year-old vicarage with 23 rooms which, it is claimed is the most-haunted house in England.

Every vicar who has tried to live there in the past 14 years has been chased out by ghosts.

Now the bishop has given up the fight with the unseen—he has moved the present vicar to another village and the house, plus its ghosts is for sale at $8000.

Harry Price, of the University of London Council for Psychical Investigation, and 40 other people, some of them well-known doctors, scientists, lawyers and professional ghost hunters, have spent eerie nights in the house.

"I have spent my life unmasking ghosts," Mr. Price said recently "and nobody could be more of a cynic than I am.

Yet I am prepared to say that this house is haunted. In fact, it is the most haunted house in England.

Not only is this the most haunted house—it is the house with the biggest variety of ghosts.

Here the some of the things the investigators say they have seen or heard:

Mysterious writings appeared on the walls while every window was barred and every door locked.

Bells pealed for no reason.

Messages, one of them saying "Marrianne, come to my help" and another "Marrianne it is time for mass" appeared on the whitwashed walls of a passage two minutes after the watchers had passed by.

A man in grey clothes walked about the passages.

Perfumes suddenly wafted on the

Flickering lights appeared

Piles of books left on a mantlepiece were scattered

Mr. Price said that a vicar who tried to live in the house some years ago bricked up the study window because a ghostly vision of a nun in grey constantly peered in

Which Are You?

There are two kinds of people on earth today:
Just two kinds of people, no more, I say.

Not the sinner and saint, for it's well understood
The good are half bad, and the bad are half good.

Not the rich and the poor, for to rate a man's wealth,
You must first know the state of his conscience and health.

Not the humble and proud, for in life's little span,
Who put on vain airs, is not counted a man.

Not the happy and sad, for the swift flying years
Bring each man his laughter and each man his tears.

No; the two kinds of people on earth I mean,
Are the people who lift, and the people who lean.

Wherever you go, you will find the earth's masses
Are always divided in just these two classes.

And, oddly enough, you will find too, I ween
There's always one lifter to twenty who lean.

In which class are you? Are you easing the load
Of overtaxed lifters, who toil down the road?

Or are you a leaner who lets others share
Your portion of labor, and worry and care?

—Ella Wheeler Wilcox.

Merchant To Head New Market Board

Appointment of George A. Clash, merchant of Medicine Hat, as head of a new provincial marketing board, was announced Tuesday by Hon. E. C. Manning, minister of trade and industry.

Offer of the post was made to Mr Clash last July but he made no decision "until he was able to give the proposed set-up careful study and consideration," said Mr. Manning.

Announcement was made at 1:45 p.m., after the cabinet had been in session nearly three hours. Meeting was attended by G. L. MacLachlan, M.L.A., Social Credit board chairman and members of the Social Credit board. Mr. Clash is in Edmonton and has assumed his duties, but details concerning his work have not yet been released by the government.

Mr. Manning had no information to give concerning Mr. Clash's salary but stated the appointment was permanent. He said the new appointee has been a prominent merchant at Medicine Hat for some years. He still operates a retail business in Medicine Hat.

Career

A young lady called one day on Rubinstein, the great pianist, who consented to hear her play. When she concluded she asked, "What do you think I should do now?"

"Get married," was the answer.

Defies Bad Weather To Fly Sick Child

VANCOUVER, Sept. 20.—Twelve-year-old Wallace Winter was responding to hospital treatment Tuesday after Pilot N. E. "Molly" Small, of Canadian Airways recently at Edmonton base, fought [illegible] visibility to bring him from Port Alberni, 75 miles from here on the west coast of Vancouver Island.

Atmospheric conditions made smoke, clouds, sea and land merge so no horizon was visible. Wallace's parents appealed for aid. The child was in critical condition from acute mastoid. Pilot Small landed at Port Alberni by instruments alone, took off again, picked up the radio beam and flew in without trouble.

The [illegible] was [illegible] general knowledge.

"If you were a [illegible] car on a lonely road and the examiner [illegible] were being chased by another car travelling at 50 miles an hour, what would you do?"

"Sixty!" replied a puzzled but hopeful candidate.—Edinburgh Dispatch.

Start Harvesting Sugar Beet Crop

LETHBRIDGE, Sept. 20.— South Alberta farmers, already working at top speed to finish the big wheat harvest added another job to the list Monday when they began the sugar beet harvest.

Twenty thousand acres of beets expected to yield close to a quarter of a million tons of sugar will, in the next 75 days, move to the factories at Raymond and Picture Butte.

The beets are high in sugar content, samples showing an early-season average of 16½ per cent, which will increase later in the season as ripening continues.

New Zealand Gets High Standard In Its Cause Of Social Justice

(Edmonton Bulletin)

The New Zealand Social Security Bill, introduced in the legislature by Hon. Walter Nash, minister of finance, on August 12, contains many provisions for social legislation that set a new standard for social justice, Henry E. Moston, C.B.E. assistant secretary of labor, New Zealand, said Tuesday.

Special copy of the bill was forwarded by W. J. Jordan, high commissioner for New Zealand, to Mr. Moston at Ottawa and the latter Tuesday gave the Bulletin permission to its exclusive use.

Mr. Moston is returning to New Zealand after attending the meeting of the International Labor Office at Geneva. He is a guest at the Macdonald hotel.

The only charge made on individuals for all these benefits is that of a shilling in the pound, the rest of the cost being borne by the government.

According to the New Zealand Social Security Bill the age benefits will be paid to all citizens at the age of 60, if fully qualified, at the rate of $7.50 per week approximately (Canadian currency terms will be used here instead of pounds and shillings, with the value of the pound being taken at $5 for convenience's sake.)

The full rate of benefits can be received by an unmarried person who also gets $5 a week from elsewhere, making a total of $12.50 per week.

A married couple both of whom are qualified, can receive $15 a week age benefit, plus $5 from other sources, making a total of $30 a week for them. If the other income is more than $5 a week, the amount of the age benefit is reduced accordingly. In the case of a married person whose wife or husband is not qualified, the benefit will be $7.50 per week and the allowable income is $12.50 per week, again making a total of $20 per week.

May Grant Increase

Where a husband is not able to support his wife and she is not qualified for benefit, the commission may grant an increase in the benefit of 75 cents per week, plus a further 25 cents per week for each child under 16 years of age.

Applicants must have resided in New Zealand for not less than 10 years immediately preceding the date of application if in New Zealand on March 15, 1940, or for 20 years after that date.

Funeral Benefit

In the computation of income, receipts not counted as income include funeral benefit from a Friendly Society, fire insurance money, capital received under the will of a deceased husband or wife, compensation or damages in respect of bodily injury up to $2,500 if used for approved purposes.

Nor will any deduction be made from the old age benefit in respect of furniture and personal effects; the ownership of land or other such property; interest in mortgages, insurances or annuities.

However, the income derived from the above properties will be taken into account when assessing the pension.

Special Provision

By a special provision of the Social Security Bill, the gradual introduction of a system of universal superannuation will be effected. It is proposed as from April 1, 1940, to pay all citizens over the age of 65, $50 per annum, this sum to be increased by $12.50 each year until the superannuation reaches $390 per annum. (The average old age pension in Canada is about $240 per year.) When the $390 superannuation figure has been reached, the age benefit of the same amount is automatically superseded.

In the meantime, from 1940, the universal superannuation will form part of the age benefit for persons of 65 years or over.

Aid For Orphans

Orphans under 14 years of age are entitled to government aid, under the Social Security bill up to $3.75 per week.

An invalid, who is defined by the act as one being totally blind or permanently incapacitated, is entitled to the following government benefits: Under 21, if unmarried, $6 per week with allowable additional income of $5 per week; married man and wife, $10 per week and with one child $12.50 per week, with 2 children, $15 per week, with 3 children, $17.50.

To qualify for these benefits, an invalid must have resided in New Zealand continuously for not less than ten years immediately prior to the date of application, but provisions for the blind make it much easier for them to qualify.

In the case of invalid wives, where domestic or nursing assistance is necessary in the home and is paid for, the commission enforcing the Social Security bill has discretion to make a payment in respect of an invalid wife up to the maximum of $390 a year as long as the total income of the married couple does not exceed $25 a week.

Sickness Benefits

The Social Security bill also provides for sickness benefits. Persons under twenty, without dependents, after the first week get $2.50 per week; over the age of 20 without dependents $5 per week, married man and wife, $8.75 per week; with one child $10 per week; 3 children, $12.50 with a further $1.25 for every additional child under 16 years of age.

The maximum amount of sickness benefit is $20 per week.

Exactly the same benefits are provided as unemployment benefits. According to the Social Security Bill, an unemployed person is anyone over "the age of 16 years who is unemployed and is capable of work and willing to undertake it, is entitled to an unemployment benefit if he has resided in New Zealand for not less than 12 months."

A benefit may be deferred up to a period of six weeks, if the applicant has refused work or has voluntarily become unemployed or for any other good and sufficient reason.

To make sure that this bill actually does provide social security, it contains a special section known as the Emergency Benefits Qualification which declares that "persons who are unable to qualify for any other benefit and are not able to provide an adequate livelihood for themselves and their dependents by reason of age or physical or mental disability, domestic circumstances or for any other reason, will qualify for an emergency benefit."

Rate Of Benefit

The rate of benefit will be of a similar amount to that of the analogous benefit under any other part of the Act.

The Act sets up a health insurance scheme whereby the services of a general medical practitioner are assured to all, and this service is open to everyone over 16 resident in New Zealand.

Hospital benefits cover medical and surgical treatment, nursing, care and maintenance in any public or private hospital or other similar institution recognized as a hospital.

All hospital benefits received at any public hospital will be "entirely free of charge" to the individual except in those cases where he has recovered damages, or compensation for the cost of hospital treatment.

Treatment Free

All mental hospital treatment also is free.

Complete maternity benefits, either at home or at the hospital, during confinement and for 14 days after birth of the child also is made possible by the Social Security bill, as is free medical attention by a doctor during the ante-natal and post-natal period.

Double Feature For Next Tuesday

Next Tuesday Sharp's Shows will present a double feature as a special harvest feature. Tex Ritter and his wonder horse "White Flash," will star in a thrilling western "Headin' for the Rio Grande," and "52nd Street," a musical show that will move you to laughter and tears in the space of a few moments. 52nd Street is a modern musical swing production with plenty of life, yet carrying heart appeal to all. Please note that two full showings of this double feature program will be made. The first commences at 8:00 p.m. and the second at 9:45 p.m.

Czechs Accept Peace Plan In Principle

PRAGUE, Sept. 20— The Czecho-Slovak government announced Tuesday night it had delivered its reply to Great Britain and France on their proposals to end the European crisis and that it considered the way was left open to further "diplomatic negotiations."

The following communique was issued:

"The Czecho-Slovak government communicated this evening to the British and French ministers in Prague a note in which is set forth its attitude to proposals brought forward by the British and French governments.

"The attitude adopted makes possible further diplomatic negotiations in the spirit of conciliation which the Czecho-Slovak government has always shown."

An unofficial but informed source said the note "is acceptance in principle but makes a number of important reservations."

The note replied to communications delivered Monday by the British and French ministers, embodying the agreement reached by premiers of Great Britain and France in London Sunday.

London dispatches said the proposals included cession of Czecho-Slovakia's sudeten areas to Germany and other terms.

The communique was issued as [illegible] of Czecho-Slovak troops were ordered on the alert in the Sudeten area.

Anti-aircraft gun crews around the president's palace and government buildings kept watch for enemy bombers.

Mrs. I. H. Olson Passes

The funeral service of Mrs. I. H. Olson who passed away at her home, September 17th, at the age of 86 years, was held Sunday afternoon at the Amisk Creek Church, Rev. Hoverstein officiated. Interment took place at the Ryley cemetery.

Beautiful floral tributes were received from: The Family, Grandchildren, Helen and Dan Orobille, California, Amisk Creek Ladies' Aid, Mr. and Mrs. R. O. Berg and family, Mr. and Mrs. T. A. Ryrem, Mr. and Mrs. E. A. Moen and family, Mr. and Mrs. A. Patterson and family, Mr. and Mrs. W. Anderson and family, Mr. and Mrs. C. Kallal and family, Mr. and Mrs. J. Jacobson and family, Mr. and Mrs. H. Hillerud and family, Mr. and Mrs. Ward and family, Mr. and Mrs. P. O. Moline and family, Mr. and Mrs. Berold and family, Mr. and Mrs. Johnsrud and family, Mr. and Mrs. A. Haugan and family, Mr. and Mrs. Bert Moen and family, Mr. and Mrs. P. Valum and Vernie, Mr. and Mrs. J. L. Hay, Mr. and Mrs. C. S. Young, Mr. J. H. Hill, Charley and Henry, Mr. and Mrs. M. C. Hammond, The Staff Mutual Life of Canada, Edmonton, Tofield C.C.F. Club.

Beaver Lake M.D. Meeting

Council of Municipal District of Beaver Lake No. 486 met in regular session at Ryley, on September 10, 1938, all members being present.

September relief order for Mrs. Anna Lesiuk was withheld pending investigation and report by councillor.

Provision for relief for Mrs. L. Macukonik for September and October was made at the usual rate.

The department was requested to report on the Gordash children being cared for by relatives.

Resolution was passed approving a proposed petition for the straightening of road allowance between the N.E. of 35 and the N.W. of 36-51-17 W4th and between the S.W. of 1 and the S.E. of 2-52-17 W4th M.

Mr. Olaf Chetney and Mr. Nick Polischuk were appointed delegates to represent this Municipal District at the convention of Alberta Association of Municipal Districts to be held in Calgary, November 30 and December 1 and 2, 1938.

Secretary was instructed to seize for hail insurance taxes badly in arrears and for 1936 seed grain advances now outstanding. Mr. M. H. Dahl was appointed bailiff for the M.D.

Next meeting will be held October 8, 1938 at 2 o'clock in the afternoon.

UNITED CHURCH NEWS

On Sunday, 25th of September, "Communion Service" will be held at Tofield after the evening worship. A number are uniting with the Church at this time and a good attendance of the members is requested.

In the morning at 11:00 a.m. the Sunday School will observe Rally Day. Mr. J. W. Chapman will give the address and the pupils will take part in the program also.

The Harvest Thanksgiving Services held at Lakeshore, Ketchamoot and Tofield were well attended.

Mr. Allan wishes to thank all who contributed grain, vegetables and flowers for the occasion.

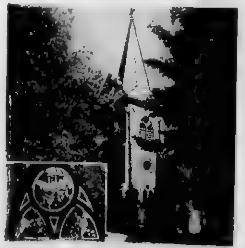
Memorial Window For Banff Church



Inspired by the beauty of the Canadian Rockies, and the sweet tones of the bells of St. George Church, Banff, Alberta, Miss Jessie Van Brunt of Brooklyn, New York, has presented the church with a memorial window which she designed and made herself. The window embodies the idea of the Church bells as angels or God's messengers sending inspiring invitations to worship. It was placed above the main entrance and is in memory of the late Canon Henry Montgomery, M.A. rector of this church from 1921-31, previously rector of St. Peter's Church, Kingsclear, N.B., and Canon of Christ Church Cathedral in the diocese of Fredericton, N.B., also rector of St. Barnabas Church, Calgary. He served in the C.E.F. from 1916-18, being chaplain of No. 14 Canadian Hospital at Eastbourne, England. He died at 76 on July 1, 1929.

Rt. Rev. L. Ralph Sherman, M.A.D. Litt., D.D., Bishop of Calgary, recently dedicated the window.

The bells which inspired Miss Van Brunt were donated by Hon. Robert Brett, Lieutenant-Governor of Alberta in 1925, later being dedicated by Rt. Rev. Cyprian Pinkham, D.D., D.C.L., late Bishop of Calgary, in 1927. Rev. Canon Tully Montgomery is the present rector.

'THE TOFIELD MERCURY
Vol. XVIII., No. 31 Thursday, September 29th, 1938 $2.00 Per Year. To U.S.A. $2.50

LINDBROOK

Threshing is nearing completion here now, the fine weather that we've enjoyed has been a great help in this respect.

The school is undergoing a building change. Ten feet more in length is being added to the east end of it. This was necessary to accomodate the increase in number of pupils which now total 43.

Three prizes were won by Lindbrook children at the School Fair in Tofield last week, and Master Richard Kortzman won a scholarship for his display of vegetables.

Mrs. Halliday of London, W. England, spent a week visiting at the home of Mr. and Mrs. A. C. Scott of Lindbrook.

Church was not held as advertised last Sunday owing to building operations on the school, making it unfit for same.

The young son of Mr. and Mrs. Alec Donald was badly kicked in the head by a horse the other day, but we hear that so far the injury is not serious and we hope the lad will soon be O.K.

Congratulations! "Mr. Mercury" on winning the Pulitzer Diploma.

Mr. Chas. Blake is at present in the Royal Alexandra Hospital, Edmonton, where he underwent an operation and probably will need another, but at last reports seemed to be doing fairly well. We hope that he will soon be well again and that we'll have the pleasure of seeing that genial personage about again as spry as ever.

BARDO

Wheat threshing has been completed and some good yields have been recorded. Topping the list is G. Nerland's wheat which averaged 37 bushels and A. Monkedahl's went 35 bushels per acre.

Tom Rosom's and M. B. Ness' wheat made 30 bushels. Bennie Finseth had oats going 64 bushels per acre. Threshing will be completed in a week or so. "Old Timers" say they have never seen more beautiful harvesting weather.

Julius Lerbekmo is second man at the Bardo Elevator.

A. Moen of New Westminster, B.C. is here and will rebuild his barn which was wrecked last summer in a wind storm.

The Misses Muriel and Sylvia Ness are attending Camrose College taking grades XII and XI respectively.

Leonard Stauffer is taking grade XII in Tofield.

John Ness who is now working on the Kresge Building in Edmonton spent the week end on his farm here.

Raymond Nordhus had a bad fall off the bundle rack injuring his back so he has been laid up for 2 weeks.

Miss Merle Bakken of Hay Lakes is assisting Mrs. M. Finseth with her housework and Miss Clara Haugen of Shonts is with her sister Mrs. Ivan Foshaug.

Five infants were baptised at the afternoon service on Sunday conducted by Rev. Hoverstein. The daughter of Mr. and Mrs. Monrad Finseth named Joanne Frances, daughter of Mr. and Mrs. Geo. Hendrickson named Joyce Anne, daughter of Mr. and Mrs. I. Foshaug named Maureen Anita Louise, daughter of Mr. and Mrs. E. Stiler named Gail Marie, son of Mr. and Mrs. Emil Rude named Lawrence David. Sponsors were Mr. and Mrs. Geo. Hendrickson, Mr. and Mrs. Monrad Finseth, Mr. and Mrs. A. Haugen, Mr. and Mrs. Clarence Rude, Mr. and Mrs. W. Simonson, Mr. and Mrs. Selmer Olsenberg, Mr. and Mrs. Olaf Anderson, Mrs. Rugland and Irene Rude.

Quite a number from here attended the funeral of Mrs. I. H. Olsen at Amisk Creek last Sunday, September 18th. We extend sympathy to the bereaved.

The infant son of Mr. and Mrs. Emil Rude who had an operation is doing very nicely now.

Mr. and Mrs. Ezra Yoder and family and Mrs. Barbara Stauffer were Edmonton visitors on Thursday last.

The pupils of the Bardo School attended the Tofield School Fair. Results will be given later.

Ladies' Aid Meeting which was to have been held at the home of P. B. Anderson, Thursday, September 29, is postponed until Thursday, October 6th. This is an important meeting so all members are requested to attend.

SCHOOL FAIR 1938

Tofield was fortunate in having good weather for the Annual School Fair which was held Thursday, Sept. 22nd. Entries were received from the rural schools of Anderson, Ingram, Ketchamoot, Lakeshore, Lindbrook, McKenzie and Woodlawn (this being the first year for Woodlawn) The six rooms of the town school also took part.

The judges were Miss M. L. Milne, household science; Inspector J. R. McLean, Art and Social studies; Inspector C. W. Robinson, penmanship and composition; W. G. Malsher, vegetables, grains and flowers; H. Scott, Manual arts and poultry.

The total number of exhibits was 1223, slightly lower than that of 1937 but the quality of both the agricultural and academic exhibits was outstanding. Edith Grace Robinson, a consistent winner of the agricultural scholarship throughout her public and high school career, obtained 96 points. As Edith had already attended the short course at Vermilion during the year 1936, this honor went to the next in line, Luella Wood of Lakeshore, with 67 points and Alice Bailey of Tofield was alternate winner with 64 points.

The boy receiving the highest number of points in the agricultural section was Richard Kortzman of Lindbrook with 47 points and Lawrence Graham of Lakeshore was alternate winner with 42 points.

Lakeshore school won the department of agriculture diploma; Room 2. Tofield was placed second and Woodlawn was a very close third.

Room 2, Tofield won the educational diploma; Ingram was placed second and Woodlawn third.

EXTRA SPECIAL

Save by getting your fall permanent now, at the Vanity Beauty Shoppe, Tofield. Prices $2.25, $2.95, and $4.00. From October 1st to 15th.

Rev. T. W. Teape of Kitscoty will take over his duties as Rector this week. Many will remember him as a student minister here during the year 1928. We shall be glad to welcome him again.

"Thin Ice" Coming Next Tuesday

This is not any prophecy regarding the weather but an announcement that Sharp's Shows present at the Variety Theatre, Sonja Heinie and Tyrone Power in the absorbing picture story "Thin Ice." Sonja Heinie, the world's premier lady skater is a picture star all love. Combined with songs, romance, glamor, comedy, and exhilarating entertainment is the star's marvelous ability on the steel blades. Sonja Heinie captured the hearts of the world in her first picture "One In a Million" and "Thin Ice" is rated even a better production. Show starts at 8:30

Sporting Card For Next Thursday

Next Thursday at the Variety Theatre, commencing at 9:00 p.m., T. Schultz is sponsoring a sport card of unusual interest, including both boxing and wrestling.

Boxing fixtures include two bouts between Alberta lads. J. D. Morrow and Leslie Bailey will box six rounds and Bob Gray and Lawrence Shanks will box eight rounds.

The wrestling card will include bouts between Spinner Thomas of Los Angeles, American Navy Champion and Dandy Dizzy Davis of Texas. Time 45 minutes, three falls to win. Both these men are expert wrestlers and are of a calibre rarely seen in small towns.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "The Crop Testing Plan."

"Where can I obtain a large quantity of reasonably good seed of the variety I want? I cannot afford to buy Registered or Certified seed for the two or three hundred acres that I shall sow."

I am receiving many queries like this from farmers who desire to change to a new variety over their whole farm.

My advice to those who require a large quantity of good seed and of good quality, is that they should enquire from their Elevator Agent for the names of their neighbors whose samples graded as "A" this summer in the "Crop Testing Plan" plots.

"Crop Testing Plan 'A' stock is true-to-variety to a good standard of excellence; and passing the test "A" is becoming more and more recognized as a mark of good seed; moreover, farmers who have stocks in their bins which graded "A" are usually willing to sell to their neighbours for a very small premium.

This year's "Crop Testing Plan" work revealed about ten thousand farmers in the West who had "A" stocks of Thatcher, Renown, Apex, Red Bobs, Garnet, Reward or Marquis.

Such "A" men, by selling to their neighbours, are certainly helping to improve the welfare of their fellow farmers.

Following factors have tended to raise price:—Germany decrees discontinuance necessity of corn mixing with wheat flour— Unfavorable reports about German potato crop—Decrease in wheat crops harvested in China, Manchuria and Japan—Rainfall insufficient for ploughing and seeding in Russia and the Balkans—High ocean insurance stops Indian wheat sales.

Following factors have tended to lower price: British pound continues to decline—Apparent possibilities of peaceful European settlement— Roumania sells wheat to Greece— Belgium again increases import duty on wheat— Denmark prohibits imports of wheat and rye—Heavy duty on imports of wheat into Switzerland—Turkey has large wheat and barley crops.

COMMUNICATION

CLIMBING ON THE WHEAT BOARD BAND WAGON

(To The Editor)

If it wasn't for the Wheat Pools, Bill 98 (The Canada Grain Board Act) would never have been passed.

If that act had not been passed there would have been no Wheat Board in 1935.

If there had been no Wheat Board in 1935 there would have been none in 1936.

If there were no Wheat Board in 1938 there would have been no minimum wheat price.

The above seemed to us to be a clear, logical and truthful relation of facts. But people are saying that we are in error.

It seems that L. W. Brockington, spokesman for the Grain Trade, demanded (or at least tactfully suggested) a Wheat Board in 1937 before the Turgeon Commission and C. E. Hayles, president of the Northwest Grain Dealers, asked for a high minimum price in 1938.

So that all the grain handling people of the west are now unanimous in their demands for the maintenance of a Canadian Wheat Board. (We are not just sure as yet whether that includes the abolishing of the Grain Exchange or not. Maybe it will take a year or two before there is unanimity on that point.)

Of course, the fact that the grain trade sent a delegation to Ottawa in 1920 to ask for the discontinuance of the 1919 Wheat Board should not now be mentioned in view of the splendid spirit of harmony prevailing.

Neither should the fact that the delegation were successful and the western farmers could not force the government of that day to continue the board.

Nor that the Wheat Pools battled alone among the grain handling companies, for a Wheat Board, from 1930 onward. Resolutions were sent to Ottawa, the countryside was canvassed for support, delegations met with members of the government on numerous occasions. Evidence in favor of a Board was given before the standing committee on agriculture. Finally the then premier, Hon. R. B. Bennett, a progressively-minded statesman yielded to the Pool pressure and the required legislation was set up.

A most fortunate chain of circumstances gave the western grain producers a Wheat Board. The farmers of the country know the facts as well as anybody. If they decide Mr. Brockington or Mr. Hales got the Board, well and good!

However, we had an idea that the orthodox grain trade said their methods of handling and selling were the only way for the west to follow.

Have not Sanford Evans, Mr. Darby, Major Strange and others on numerous occasions, before grain inquiry commissions, produced miles of charts and maps, and untold pages of figures, to show that wheat prices kept step with the general price trend and the course to follow was to keep hands off and all would be well?

No one should try to monkey with price levels, least of all governments, they said. Or were we mistaken? Was it all a dream?

But all that is history, dead, gone and forgotten. We in the west are standing together for the maintenance of a Wheat Board and a reasonable minimum price, now and forever!

But (secretly) we would like to have one more royal commission appointed to find out who was responsible for the formation of the 1935 Wheat Board!

Maybe it was The Winnipeg Free Press!

L. D. NESBITT.

Father, 94, Welcomes Son To Rail Veterans Ranks

Stratford, Ont. Sept. 26— When Frederick W. Helman, Canadian National Railways train dispatcher at Stratford, retired recently, he was welcomed into the ranks of the veterans by his father, Joseph Helman. The older veteran, now 94, entered the service of the Gdand Trunk Railway in 1873 and was for many years a bridge and building forman at Stratford. He retired in 1914. His son had almost 49 years' continuous service with the system.

Music is one of to fairest and most glorious gifts of God, to which Satan is a bitter enemy, for it removes from the heart the weight of sorrows and the fascination of evil thoughts. —Martin Luther.

Our Yield Per Acre

WELL, COUNTRY NEWSPAPERS DO NOT EXACTLY CALCULATE THEIR YIELD BY THE ACRE, BUT LIKE FARMERS, THEY DO HAVE GOOD AND POOR YIELDS. EACH SUBSCRIBER TO THE NEWSPAPER BUSINESS OFFICE IS LIKE AN ACRE TO A FARMER. SOMETIMES THEY YIELD GOOD, OTHER TIMES NOT SO GOOD. DRY WEATHER, POOR PRICES, HAIL AND FROST HAVE THEIR EFFECT ON OUR YIELD TOO AND OFTEN WE WAIT YEARS BEFORE OUR RETURNS COME IN.

IN A SHORT TIME WE WILL BE SENDING OUT NOTICES TO ALL SUBSCRIBERS IN ARREARS AND WE HOPE FOR A GOOD RESPONSE. WE DO NOT EXPECT TO GET ALL THE ARREARS BUT WE DO HOPE TO GET A GOOD YIELD. ALL WE ASK IS THAT SUBSCRIBERS TREAT US AS GENEROUSLY AS NATURE TREATS THEM.

THE MERCURY

The University On The Air

Commencing its 11th year of broadcasting activities, the University will go on the air at 7:00 o'clock on Wednesday, Sept. 28th with its opening program for the Fall season.

Behind this University program is the knowledge that thousands of people are eager to go on learning, to keep mentally alert and to widen their horizons. With intelligent choice and use, the radio program of talks, courses, drama and music should assist in meeting this need. The bulletin issued by the Extension Department shows a wide variety of topics. There will be a course this winter on International Affairs, providing an opportunity to become better informed on some of the difficult questions facing us today. For those of a scientific turn of mind there will be short series of talks from different University Departments, telling of the research work that is being carried on and its practical application. Once a month there will be a broadcast from one of the laboratories. Others will be interested in trends in contemporary literature and will want to listen on Wednesday evenings to the series on Recent and Contemporary Prose and Drama, to be given by members of the English Department staff. The Round Table on Thursdays will bring listeners vital discussions on national and international subjects, and assist greatly in keeping them well informed on current questions.

Then in the day time there are series for farmers and for the homemaker, language courses, book chats and even handicraft lessons. Many women will want to take advantage of these lessons in glove-making; the registration cost is nominal (25c) and notes and diagrams are sent to be used with the broadcast lesson.

The University Players have already made quite a name for themselves in the West; and this winter they will be heard on Wednesday evenings at 9:30 over the University station and the CBC Network, in a historical series on "The Building of Canada." No dry bones of history here, but vital, exciting drama about the men and women and movements that helped to shape this Canada. The first play will be broadcast on Wednesday evening, Sept. 28th.

Music lovers are not forgotten, for every evening between 7:00 and 8:00 there will be the Symphony Hour, bringing to listeners the best from the world's great heritage of music. There will also be organ recitals on the beautiful memorial organ in Convocation Hall and other special programs from time to time.

The University of Alberta through its radio station, the library and general Extension work, certainly extends its educational opportunities far outside its own walls.

More detailed information on the winter's program can be obtained from the radio bulletin issued by the Department of Extension, University of Alberta, Edmonton.

Preparing And Selecting The Winter Layers

(Experimental Farm News)

Pullets for the laying flock must have full opportunity, right from hatching time to maturity, to make normal, healthy growth. This requires first, an adequate supply of proper feeds and, second, good environment conditions. Overcrowding should be avoided and precautions taken to guard the health of the birds. Any birds showing signs of disease or weakness should be disposed of immediately. It should be constantly borne in mind that the maintenance of a healthy, profitable flock requires that culling should be a continuous process the year round.

Commencing when the first pullets start to lay, it is a recommended practice to go over the pullet flock every week or two, moving to their permanent winter quarters all those that seem almost ready to lay or have started, states L. A. Gnaedinger, Head Poultryman, Dominion Experimental station, Lennoxville, P.Q. Feeding should have been such that at this time, the birds should be heavily fleshed and fairly fat. The subsequent feeding program should be designed to prevent any marked decrease in body weight. Each bird should be carefully examined at this time and any that are poorly fleshed very small, or deformed should be culled out. Heavy, sustained egg production demands healthy, well-developed bodies and rugged constitutions.

In summary, one might: "Grow good birds and house no poor ones."

Spinsters Take Note

There are more women than men in the states of Alabama, Georgia, Massachusetts, New York, North Carolina, and the District of Columbia. All other states have more men than women.

Tofield School Fair Prize List

Carrots— 1 Norman White; 2 Audrey Bradbury; 3 Alice Noland; 4 Edna Heidebrecht; 5 Helen Sokolan.

Beets —1 Nora England; 2 Edith Robinson; 3 Lena Anderson; 4 Betty Weatherill; 5 Vernon Walker.

Turnips —1 Corinne Wilson; 2 Richard Kortzman; 3 Edith Robinson; 4 Muriel Ray; 5 Margaret Dodds.

Peas —1 Edith Robinson; 2 Douglas Ray; 3 Ray Gould; 4 Russel James; 5 Norman White and Muriel Ray (tied).

Cabbage —1 Richard Kortzman; 2 Billy Ewanovich; 3 Lessie Sokolan; 4 Mary Boise; 5 Norma Scott.

Potatoes (White) —1 Audrey Bradbury; 2 Edith Robinson; 3 Stella Sirdar, 4 Helen Sokolan; 5 Luella Tiedeman.

Potatoes (Red) —1 Jim Yakubowski; 2 Edith Robinson; 3 Kenneth Bailey; 4 Luella Tiedeman.

Potatoes (Russet) —1 Elsie Pearson; 2 Richard Kortzman; 3 Douglas Ray; 4 Alice Bailey; 5 Norma Scott.

Asters —1 Lorna Swinton; 2 Doris McGinitie, 3 Muriel Rogers; 4 Jack Lerbekmo; 5 Evelyn Stauffer.

Sweet Peas —1 Muriel Rogers; 2 Robert Torrie; 3 Eula Haukedahl; 4 Hilda King, 5 Luella Bailey.

Wheat Sheaves —1 Shirley Swinton; 2 Audrey Swinton; 3 Connie Swinton; 4 Raymond Gould; 5 Richard Kortzman.

Sheaf of Oats —1 Richard Kortzman; 2 John McGinitie; 3 Earle Francis; 4 Audrey Swinton.

Collection of Grasses and Clovers—1 Alice Bailey; 2 Luella Wood.

Threshed Wheat — 1 Herbert Warner; 2 Shirley Swinton; 3 Audrey Swinton; 4 Eleno Johansen; 5 John Berild.

Threshed Oats —1 Alice Bailey; 2 Irene Bailey; 3 Magda Johansen; 4 Gilbert Phillips; 5 Doris McGinitie.

Corn —1 Margaret Dodds; 2 Richard Kortzman; 3 Douglas Ray; 4 Evelyn Wood; 5 Florence Roth.

Collection Wood 1 Luella Wood 2 Alice Bailey; 3 Joyce Bailey

Cockerel Any English 1 Lawrence Graham; 2 Harvey McGinitie; 3 Doris McGinitie

Pullet Any or English —1 Doris McGinitie, 2 Lawrence Graham; 3 Corrine Wilson; 4 Harvey McGinitie

Mediterranean Cockerel —1 Donald Stinson; 2 Joyce Wiltzen; 3 Shirley Stinson 4 Aaron Wiltzen; 5 Ella Brown.

Pullet, Mediterranean Breeds 1 Joyce Wiltzen; 2 Aaron Wiltzen; 3 Allan Anderson

Gobbler or hen 1 Lawrence Graham; 2 Harvey McGinitie; 3 Ella Brown; 4 Elmer Tiedeman; 5 Joe Sirdar

Bird House 1 Douglas Ray, 2 Howard Burke, 3 Lloyd Campbell; 4 Kenneth Imler, 5 Luella Wood

Piece of Furniture —1 Walter Eaton, 2 Lawrence Graham, 3 Gilbert Phillips, 4 Mae Thompson

Handy Device Made of Wood 1 Walter Eaton; 2 Lawrence Graham; 3 Henry Wittenberg; 4 Eugene Phillips, 5 Donald Dunham.

5 Knots — 1 Jack Martin; 2 Arley Anderson; 3 Edith Robinson; 4 Norman White, 5 Corny Ewert

Raisin Cake — 1 Adeline Nahrebeski; 2 Eula Haukedahl; 3 Shirley Stinson; 4 Ila Moen; 5 Betty McGinitie.

Bran Muffins — 1 Adeline Nahrebeski; 2 Betty Stinson; 3 Evelyn Wood; 4 Eula Haukedahl; 5 Shirley Stinson.

ASSESSMENT INFORMATION—

DURING THE summer months J. E. Stinson has been travelling the highways and byways of the Cornhill Municipal District. His job was to assess the value of the farms and hamlet properties for taxation purposes for 1940 and a number of following years. As a number of ratepayers are more or less unfamiliar with assessment procedure and in answer to a request for the date of court of revision, we are giving a brief account as to assessment procedure in rural municipalities.

We should say, however, that we have had in mind for some time to run a story, perhaps spreading over several weeks, entitled "Your Municipality." We have yet to make the right contacts to get the historical background, but this will be done in the course of a week or so. Assessment procedure would of course, form a part of such a story.

Assessment in principle is very simple. But in practice there are very definite rules to follow, the rules being devised so that each ratepayer receives an equitable assessment in relation to other ratepayers. This is very important, because as will be explained later, the exact amount a ratepayer may be assessed for, does not, except in an indirect way, determine the amount of money he pays for taxes.

It should also be said that the assessment made this summer is for the year 1940 and a number of following years. In the past, assessments have been made at varying intervals every three years and every five years, and right of appeal only went with each assessment. But there is a new regulation entering into the present assessment, that, commencing with 1941, ratepayers will have an annual right of appeal. This is a new regulation only associated with the new assessment. Of course this is written subject to any future change in regulations.

The first step in assessment procedure is the appointment of an assessor by the council. He must be a man of experience because neither councillors or the office can suggest any assessment figures to him. As an assessor he stands alone with the responsibility the job entails. He goes out and makes personal inspection of properties and after fixing his own valuation base, works from that. For instance, he will place a valuation per acre on good farm land with good roads and near a school, and work from that according to quality of land, roads, proximity to school, etc. From time to time his records are turned into the office where they are tabulated. This calls for much detail work which ends up with the office mailing to each ratepayer an assessment notice. The notice is made out in accordance with the assessor's figures, but printed on the notice are words to the effect that appeal can be made within thirty days from the date of the notice. Note here that it is thirty days from the date appearing on the notice, not thirty days from the date of receiving the notice. Regulations are very strict as to time limit. There are also posters placed in post offices, etc., calling attention to the fact that the assessment roll is open for inspection and those feeling aggrieved may appeal within the time limit. A similar notice is also published in the newspaper.

Those ratepayers who feel aggrieved, or that an adjustment is necessary, notify the municipal office to that effect, when they will be mailed, by registered mail, we believe, a special form to fill in. These forms when filled in, are to be returned to the municipal office when they will automatically come before the court of revision for consideration and final decision, notice of which is mailed to the appellant. The Court of Revision is the Council.

At present writing, assessment notices for the 1940 assessment for the Cornhill Municipal District have not been dated or mailed, consequently it is impossible to say on what date court of revision will be held.

It should perhaps be explained that all municipal assessments are more a means of arriving at an equitable method of taxation, than a true valuation of the properties concerned. Taxes are computed by mill rate and it is possible to have a high assessment and low mill rate, or a low assessment and high mill rate, and in both instances pay exactly the same amount in taxes. A good assessment is when good and poor lands according to location and conveniences, are properly related to each other as regards valuation. And it is to bring this about in an orderly manner that the foregoing procedure has been devised.

Need Pencil And Paper

An Englishman walking in the Highlands entered a farmhouse to ask the time. Noticing an old grandfather clock, he said: "Your clock is surely wrong?"

"Naething wrang wi' it," answered the farmer. "It's you that doesna understand it. When the wee haun's straight up, and the big haun's straight doon, it strikes ten; but the richt time's five o'clock. After that," he continued, "ye've naething to do but calculate." —Tit-Bits.

"Mummy, I want to whisper something."

"Darling, big girls that are nearly five never whisper before company."

"All right then, but that gentleman over there took another cake when you weren't looking."

Peace River Folk March to the Sea

BY WILLIAM BENSON IN THE TORONTO STAR

You can count the buildings in the little hamlet of Rio Grande in the Peace River country of northern Alberta on one's hand. But its size is no indication of its importance. For here, in this frontier outpost, is Canadian history in the making. It is the jumping-off place of the trail-blazers and work crews of the Monkman Pass highway, the only road ever built in Canada through the Rocky Mountains by pioneer community effort.

On the morning of June 1, 1938, a tall, erect, bright-eyed man sits easily atop his experienced saddle horse before the hall at Rio Grande. You'd never guess he was 66 years old unless you knew Alexander Monkman, pioneer of the Peace, discoverer of the pass which [illegible] his name and trail blazer of the most un[illegible] road-building project in the annals of Canada. His horse too, knows the pass well and can pick the [illegible] spots for a pack or saddle horse to rest. On the other horse sits Helmar Johnson, road foreman. Behind them are strung out five wagons loaded with 20 men, two women and grub and equipment for a summer's work. A crowd of well wishers including the executive of the Monkman Pass Highway Association are on hand with cameras, words of advice and high hopes.

Suddenly a shout rings out: "Three cheers for the boys who are going to finish our outlet to the Pacific!" And while the crowd cheers lustily the cavalcade moves slowly off, the men waving until they are out of sight. The second year of road-building through the Monkman Pass is in full swing. The hardest-working unpaid executive in the Dominion takes a few deep breaths before tackling more knotty problems of their big task. But they are confident of success this year.

When volunteer crews started work on the Monkman Pass highway last year, sceptics scoffed at the idea of a mountain road, 132 miles long being built by community effort. Government members and railway executives who had refused to part with their money for a coast outlet, as well as the man on the street all said, "It can't be done!" Today, the simple, astounding fact stands that they are doing it and have no intention of stopping it until it is completed.

One night in October, 1936, in a home overlooking Lake Saskatoon, a few pioneer friends were discussing the urgent need of an outlet of some kind to the Pacific. Suddenly Alexander Monkman looked up from the map he was tracing and said, "Boys, we cut our way into this country. We can cut it out." And right there was formed the nucleus of the Monkman Pass Highway association. And the most dynamic worker for the project ever since is the hostess of that historic little gathering, Mrs. Art Smith wife of the publicity director of the organization.

A few days later the organization was formed "to promote the building of a 132-mile non-ferry connecting link with the coast highway through the Monkman Pass." Pioneering must run in the blood, for all the newly formed executives were sons of pioneers as well as pioneers in their own right. And most of them came from Old Ontario, which should prove something.

The winter was spent in spreading the new idea of self help as a solution to the problem of transportation. Here was something concrete after years of promises. Everyone gave what they could. Money, food, implements and labor and all was duly recorded. By June (1937) the first crew of 29 men started cutting trail. They used axes, saws, picks, shovels, but there wasn't a piece of road machinery in the lot, unless you except the grindstone for sharpening the axes. Before they left the pass in September for harvest they had cut 60 miles to Stony lake, through heavy stands of spruce and jackpine, deadfall and poplar, corduroyed bits of muskeg, built pole bridges over the small streams whose banks were remarkably low and made an eight-foot road over which a truck made the trip successfully. And the cost was less than $2,000.

With this achievement to their credit the drive for support is smoothed a bit. Since the proposed highway would be a boon to the fruit growers and business men of the coast as well as to the farmers of the Peace, and as all but a dozen miles of the work is in the western province, a strong delegation invaded Vancouver in April of this year. Charming, enthusiastic and tireless Mrs. Art Smith was one of the party. Cabinet ministers, M.P.'s, mayors and heads of trade boards and tourist associations, and many others were interviewed. The press gave their support. The result was the formation of a Vancouver branch of the M.P.H.A. which pledged itself to raise $15,000. On its roster are the names of some of the most prominent business men at Vancouver. Towns all the way up to Prince George are boosting for the new highway now, and adding their bit to the cause.

Last year there were only 20 men cutting trail. This did not include the two parties who made a quick trail blazing trip through to Hansard in July. This year there are 80 men on actual construction south and west of Stony lake. Each man donates two weeks' work. Then he receives a dollar a day and board. The executive receive so many applications for jobs that they find it hard to choose. It doesn't look as if young men are too lazy to work any more. To be fair to all sections of the country, men are chosen from widely scattered districts. Widely diversified interests are now being centred in this unusual road building project. A wealthy American couple are on a leisurely survey of the pass with saddle and pack horses with a view to possible location of a "dude ranch." Tourists are anxious to make the trip through the Monkman Pass to see Monkman lake, that mountain-guarded gem, Kinuseo falls, 230 feet high, the wonderful hunting and fishing spots, as well as to tour Canada by way of the fertile Peace river country. Truck concerns are making it their business to keep posted on progress. Oil companies drilling near Pouce Coupe have contracts to ship oil and gas if encountered, through the Monkman Pass to Vancouver and Bella Coola. The government is being urged to use its unemployed in building a real highway where the Peace river pioneers have shown the way. Sermons are being preached in churches and halls "outside" on this grand example of self-help in an age when government help is the hue and cry.

Bank Of Montreal Crop Report

General— Good progress has been made towards completion of harvesting operations in the Prairie Provinces, despite delays caused by heavy rains over a wide area in Saskatchewan and in part of Alberta. Threshing is virtually finished in Manitoba and is approaching completion in Saskatchewan. In Alberta operations are well advanced. The Dominion Government's preliminary estimate places wheat production at 334,000,000 bushels with Manitoba accounting or 50,000,000 bushels, Saskatchewan for 143,000,000 bushels and Alberta for 141,000,000 bushels. In Manitoba wheat yields vary but slightly from last year and the crop on the whole is of good grade. Wheat yields in Saskatchewan show a wide variation and rust damage has affected the weight and quality. In Alberta a generally satisfactory wheat crop of good yield and grade is being harvested. In Quebec, the continuance, over most sections of the Province, of heavy rain-falls during the past fortnight has retarded harvesting and crop estimates, which earlier in the season pointed to an abundant harvest, have been revised downward owing to damage from excessive moisture. An average yield, however is indicated. In Ontario the cereal crops have been above average in yield, but the quality was affected by poor harvesting conditions. Apples are of good size and colour, with yield expected somewhat below average. Other crops are heavy, including that of tobacco, which is of good quality. In the Maritime Provinces, while further damage to grain and potatoes from excessive moisture has occurred, prospects as to the yield and quality of the apple crop continue to be good. In British Columbia crops are being garnered under ideal conditions and yields generally are satisfactory.

PRAIRIE PROVINCES

Alberta— Harvesting has progressed rapidly under almost ideal weather conditions. Cutting is practically completed and threshing, which is well advanced, should be completed in two weeks if the weather is favourable. It is estimated that wheat will average about 17 bushels per acre, with grades two and three predominating. Coarse grains are very satisfactory, and there is ample feed. The harvesting of a satisfactory sugar beet crop has commenced.

Saskatchewan— Heavy rains over most of the Province have interrupted harvesting operations, but threshing is now nearing completion. The Dominion Government estimates the yield of wheat per acre at 10.4 bushels compared with 2.7 bushels last year. The rainfall has improved soil moisture conditions and pastures generally are in good condition. Fall ploughing has commenced.

Manitoba—Threshing is practically completed and a large percentage of the wheat crop has been delivered to the elevators. Wheat outturns on the whole are satisfactory and coarse grain yields are about the same as last year. Except in the northwestern district, where some rain has fallen, little progress has been made with fall ploughing owing to lack of moisture.

Here's a real buy!
THAT MEANS A BIG SAVING IN MONEY FOR YOU

Think what this wonderful offer will mean in enjoyment throughout the whole year for yourself and your family. Magazines of your own choice and this newspaper, packed with stories, timely articles, helpful departments and colorful illustrations. Now is your chance.

International Situation Easier

After a week of great anxiety, the international European situation has eased. A big four conference of Chamberlain, Hitler, Daladier and Mussolini is in progress to-day (Thursday) and hopes are held that a peaceful solution to the Czechoslovakia problem will be found. In the meantime war preparations are going on in all the countries effected.

L. Olsen, Gladstone.

Coal Areas Of Alberta

BY J. L. IRWIN

Statistician, Dept. of Lands and Mines, Government of the Province of Alberta

In reviewing the various potential coal areas of Canada an easy first place must be given to the Province of Alberta as a result of the vastness, quality and immense value of her reserves.

So easily does she win this distinction that it is a matter of very real regret that the industry is not as prosperous as it so obviously deserves to be. With the bulk of the Dominion's coal areas lying within her borders and with the possession of quite a noticeable percentage of the world's supply it is sincerely to be hoped that the long drawn out discrimination against Alberta coal may be near an end.

The Province of Alberta is presumably assisted by a subvention freight rate to Ontario of $2.50 per net ton where the ordinary rate is $8.00 or over. The value which this assistance has been, however, to the province may be illustrated by glancing at what actually happens and by taking for an example Alberta's coal exports for 1936.

During that year this province shipped only 64,659 tons of coal to Ontario when in the same period that province imported from the United States, in addition to shipments from Nova Scotia and New Brunswick, 10,-[illegible] tons. Alberta's shipments to Ontario in this particular year, in comparison with those imports from the United States on which tariffs up to 75c per ton were paid, represent a somewhat discouraging one-half of one per cent.

This illuminating and depressing revelation which is repeated year by year, is attributable solely to the fact that the subvention rate is not sufficiently generous to enable Alberta coal to enter an eastern Canadian province and compete with a foreign product.

Such a revelation of course finishes at only one conclusion. A conclusion which must quite forcibly demonstrate the fact that pending a fair and reasonable adjustment of the situation, Alberta, holding the bulk of Canada's coal reserves, must continue to be largely inactive regarding their development whilst eastern Canada continues to be supplied with her fuel requirements from foreign countries.

A general classification of Alberta's at present accessible coal might be given as follows:—bituminous, 59 per cent, sub-bituminous, 23 per cent and lignite or domestic, 18 per cent. Discoveries of anthracite in occasional pockets have been made but commercial quantities under this classification have not yet been found.

The highest grade coal beds of Alberta are perhaps the deposits lying just east of Banff, the deposits in the district of Sheep Creek in the southern part of the province and those in the vicinity of Smoky River in the north.

The product of these three areas emanates from a cretacious base and is described as a very high grade low volatile, semi-bituminous coal. The deposits in the vicinity of Banff are regarded as the highest grade of these three. Coal, similar in quality and reported to be in considerable quantity is stated to be evident just beyond the Alberta boundary in the neighbourhood of Hudson Hope, British Columbia.

Production of coke and briquettes has shown a steady increase in recent years. Coke manufactured in 1932 totalled 2,182 tons and in 1937 65,967 tons. The production of briquettes in 1931 reached a total of 15,102 tons and in 1937, 27,041 tons.

Production of coal in 1937 showed an increase of 987,292 tons over the total given for 1931. An increase in the purchase of electrical power used by the coal mines of the province is demonstrated by the total in 1931 of 16,318,652 k.w.hrs.

There are 125 by-products of bituminous coal—oil, perfumes, aspirin, acids, dyes, tar, gas, benzol, pitch, coke, lamp black, gasoline, etc. Each of these is representative of a possible future industry and a great deal may be dependent, with the coming of improved economic conditions and increased population, on assistance given by the Research Council of the University of Alberta with a view to the success of such development.

Hydrogenation or the extraction of oil from coal might perhaps be regarded as one of the most important of these. It is a process carried out on a large scale in Great Britain and one which may at a future date be successfully operated in Alberta.

The coal-beds of the Saunders Creek and Coalspur areas are considered the most suitable for this form of processing due to the fact that they are sub-bituminous in classification and possess a minimum of 30 per cent volatile matter. Lignite coal of the plains of a certain type and possessing sufficient volatility can also be successfully subjected to the hydrogenation process.

The quantity of gasoline extractable in Great Britain is at the rate of 1,400 lbs. or 179½ gallons to every 2½ tons of coal. The latest report on cost of the process, including use of fuel is 11d or 22c per gallon.

The process in Alberta, is not, however, practicable as yet for the reason that the cost of 22c per gallon is naturally unable to compete with the cost of about 10c per gallon in recoveries from oil.

Production of crude petroleum in the United Kingdom in 1936 totalled 119,000 long tons or 940,100 barrels. These recoveries were made principally from the hydrogenation of coal with a small percentage secured from the mining of shale and without the possession of a single producing oil-well. The industry in Great Britain is made possible by a protective tariff of 8d per gallon.

The day will unquestionably arrive when this new industry will also become possible in Alberta. Its eventual introduction into the province should in the course of time not only prove a powerful and invaluable ally to Alberta's oil industry but result in a tremendous increase in the development of the province's coal-mines and automatically create for such development a very much larger demand for labour.

The prospect of such a change in the future at least offers itself as a possible way out of the stagnation into which unjust discrimination has driven the development of the vast and extremely wealthy coal areas of Alberta.

Mrs. Sears Hurt in Fall

On Monday while working around her home, Mrs. W. Sears unfortunately fell down the basement steps. Besides suffering from shock, she sustained an injury to her ankle. Her many friends are wishing her a speedy recovery.

Mrs. Thompson of Leduc, formerly of Tofield, also fell down the basement steps last week, fracturing some ribs as well as suffering from shock. Leta Thompson of Tofield, her daughter, is home for a week taking care of her mother.

Applications Wanted

We have fine localities open around Tofield, Stony Plain, Entwhistle. Applicants must be neat, reliable and hard workers and have car or suitable travel outfit. An opportunity to get established in your own business. For particulars regarding other localities apply to

Auction Sale Of Cattle By The Pound

On September 15th a local association at Mannville held the first auction sale of commercial cattle sold by the pound, that has been held in Alberta. Their next sale will be at Vermilion October 11th where they expect about seven hundred cattle will be sold by auction. D. E. Ball was the auctioneer at Mannville and will also sell at Vermilion.

Big Crowd Attends Picture Show Last Tuesday

The special harvest attraction presented by Sharp's Shows drew capacity houses last Tuesday night. A double feature including news and comedy was longer than expected and it was two o'clock before the second show finally ended. Both features were well received.

Threshing Nearly Finished

Continued fine weather without a trace of frost has enabled threshing crews to put in full time and the close of this week will see quite a few outfits close down for the season.

With the exception of one break due to weather conditions, threshing has gone on uninterrupted for a month. Yields are quite good both as regards wheat and oats.

Good Values in Good Seed

Thousands of farmers have been shown to have "Crop Testing Plan" "A" stocks of good seed of recommended varieties on their farms.

Farmers requiring large quantities of reasonably good seed should secure some "Crop Testing Plan" "A" stocks from a near neighbor

See the agent of the Searle Grain Company for a list of those having "A" stocks in your district.

Tofield Rifle Club To Compete in Dominion Competition

One team, representing the Tofield Rifle Club, carries the Tofield colours in the 1938 Dominion Marksmen .22 Sporting Rifle Championship Competition—the largest rifle match of its kind ever to be held in Canada. On the entry of this club hangs the town's hopes for attaining the coveted Dominion Marksmen Challenge Shield, emblematic of the .22 calibre sporting rifle championship of Canada.

From the total entry list of well over a thousand marksmen representing points as far distant as Yellowknife, N.W.T., nine five-man teams will be declared as provincial champions in the first round of the match which closes on November 1, and these teams will be eligible to compete in the final round.

Designed to appeal to the many sporting rifle enthusiasts in the Dominion, who, prior to the advent of the competition, indulged in the haphazard potting of impromptu targets over the countryside, this supervised shooting event unveiled some remarkable talent when innovated last year. Defending the Dominion title which they captured in 1937 will be the Sunny Brae Rifle Club of Moncton, N.B., who catapulted from obscurity to fame under the direction of Rev. G. S. Bishett, when they turned in a perfect score in the final round of last year's competition to defeat such service units as the "K" Division of the R.C.M.P. at Edmonton and the 4 Towers Miniature Rifle and Revolver Association of St. Vincent de Paul, Quebec.

Three matches over a twenty-yard range will be shot by each team competing in the opening round, and a trophy will be awarded to the team from each province making the highest aggregate score. From these provincial champions will be decided the winner of the Dominion Marksmen Challenge Trophy by a further series of matches to be shot after November 1.

The personnel of the Tofield Rifle Club includes Messrs Burke, Clarke, Herndon, Dunn, Taylor, Lorbeckmo, and McBratney.

LOST— From Mrs. McConnel's pasture, one red and white steer, coming two, horns, branded 2 on right hip.—Finder please notify Geo. Cookson, phone 1817.

Town Council Meeting

A regular meeting of the town council was held in the Town Hall on Monday, October 3rd. Present were Mayor Swift, Councillors Taylor, Lovell and Bellamy.

A quantity of routine communications and accounts were considered and dealt with.

It was decided to re-engage Mr. J. Campbell as town constable. The curfew by-law will be enforced during the winter months again.

By resolution, the date of the annual tax sale was set on December 10th next.

An arrangement has been entered into between the Town and the four Edmonton hospitals whereby patients from the town of Tofield will receive the same rates and be charged for services on the same basis as those people living in the City of Edmonton. This will be advantageous to Tofield people. The agreement has to be approved by the provincial department of public health before becoming effective.

Statements of receipts and expenditures covering the months of July and August were read.

Following enquiries, prices were set on several vacant lots owned by the town.

L.C.C. NEWS

The September meeting of the L.C.C., held at the home of Mrs. Robinson was attended by ten members. The roll call was answered by autumn verses.

Mrs. Hooper related some very interesting accounts of the missionary work done in China as was told by Miss Margaret Gay. Miss Gay is a Chinese Missionary who was returning to China after a holiday in England and Canada.

A reading on the "Peace Gardens" of Canada and the U.S.A. was given by Mrs Bracegirdle.

The meeting was closed by repeating the Lord's Prayer. At four o'clock a delightful lunch was served after which all departed, reporting having enjoyed the afternoon.

The October meeting will be at Mrs Glenn's. Visitors welcome.

Johnston Ferguson Passes On

Tofield and district were shocked on Monday evening when it was learned Mr. Johnston Ferguson had died suddenly at his home. Mr. Ferguson suffered a severe illness about a year ago but had improved sufficiently during the summer to cause his friends to hope for many years of continued association with him.

On Monday he was taking one of his periodical walks when about 6 o'clock he returned home not feeling very well. Sitting down he suffered a heart attack from which he never recovered. Medical aid as well as other assistance was immediately summoned but Mr. Ferguson was beyond aid when help arrived.

Mr. Ferguson was well known in the Tofield district being a resident here for the past 25 years. For many years he farmed north of town but of late years lived together with Mrs. Ferguson in Tofield. He was very active in U.F.A. and Co-operative endeavor and of late years a staunch supporter of social credit. He came to Alberta from Grandby, Quebec, and was 66 years of age.

He leaves a sorrowing wife and three brothers and four sisters; John of Edmonton, Charlie of New Bedford, Mass.; Miles of Fort William, Ontario; Mrs. T. W. Ferguson of Tofield; Miss Candace Ferguson R.N. of Newport, Rhode Island; Mrs. George Neill of Kamloops, B.C.; and Mrs. Charlie Ostrander of Waterbury Conn. The funeral service will be held on Friday afternoon at two oclock at Howard & McBride's chapel. Rev. D. K. Allen will officiate and interment will take place in the Edmonton cemetery.

October Sixth and No Frost

For an all time record frost has stayed away until October 6th. Rarely does Alberta enjoy such a long period of frost free days and nights. Flowers which are usually killed off long before this are still in bloom. It is however, too much to expect that frost will stay away much longer, but even so it will not be really welcome for some weeks yet.

Edmonton Grads Retain Underwood Trophy

The Edmonton Commercial Grads Basketball team once again successfully defended their claim to world champions and holders of the Underwood trophy. The latest threat, and it was a real one, was from the Wichita Thurstons, a high grade aggregation from the United States.

The first two games were won by the Grads by fairly wide margins, but the third on Wednesday night was a ding dong affair to the last minute. In fact for a considerable portion of the game the Thurstons were in the lead. But in the last quarter the Grads showed class enough to retain their position on top of the basketball world. The score on Wednesday night was Grads 32, Wichita Thurstons 27.

The Perfect Specimen For Next Tuesday

Next Tuesday Sharp's Shows presents "The Perfect Specimen," a Warner Bros. production starring Errol Flynn, Joan Blondell and a long list of other screen celebrities. The perfect specimen, 6 ft. 3 in. tall, weighing 180 pounds, brown eyes and $20,000,000 in the bank, had never had a date. But he could cook, could lick fresh truck drivers and could sign a cheque for any amount. Then he met the perfect nuisance in the shape of a blond—and what happened is the theme of the story. Added features, news and comedy goes to make a evening of good entertainment. Show starts at 8:30

LOCAL & PERSONAL

● ● ● ● ● ● ● ● ● ●

We are glad to report that Mr. McCarthy has returned from the hospital much improved in health.

••••••

Arthur Smith from Delbourne is attending school here and is staying with his aunt, Mrs. Schmaltz.

••••••••

Annie Swift, nurse at the Royal Alex Hospital spent Saturday at her home here.

••••••••

Miss Lillian Smith of Edmonton spent the week end visiting at the J. O. A. Letourneau home.

••••••••

Miss Esthel Craig of Edmonton visited friends in town over the week end.

••••••••

Jim Brace left on Sunday for Calgary where he will attend technical school. Mr. and Mrs Brace motored over with him.

••••••••

Mr. and Mrs. Bert Swift and children of Fallis are guests at the Booth home.

••••••••

Rev. and Mrs. Wallis of Camrose visited at the Nuland home this week.

••••••••

Mrs. J. Chevreaux of Killam is visiting at the home of her son and daughter-in-law, Mr. and Mrs. Everitt Chevreaux of Tofield.

••••••••

Mrs. Cartillage of Spokane, U.S.A., is visiting at her parental home here. Mrs. Cartillage was formerly Miss Edith Riley.

••••••••

Mr. Saunders and Son, interior decorators of Edmonton, are in town doing work at the Swift residence.

••••••••

Mr. G. Blanchard returned on Tuesday from a summer's trip. He visited at Calgary, Brooks, Swift Current, Sask., and Sioux, Manitoba, returning via Portage La Prairie and Saskatoon. He found the crops pretty light in the south due to the grasshoppers and crickets. The red back bugs were also bad this season.

Carnival At Ryley

Ryley is staging a carnival under church auspices at which games and other attractions will be included. A carnival queen is to be elected from candidates nominated at Ryley, Holden and Tofield. Admission is by purchased ticket which admits holder to the carnival both Friday and Saturday nights, October 14 and 15th.

The queens nominated for Tofield are Muriel Malcolm and Euphemie McBratney.

Baseball World Series Now Playing

The annual baseball classic, the World series, is now being played, the New York Yankees and Chicago Cubs battling it out for premier honors. In the first game played Wednesday, the Yankees won by a score of 3-1 and to-day Thursday, repeated their performance by winning by a score of 6-3. The series is four games out of seven.

Pop Corn Grown Here

There are few people who do not enjoy the aroma as well as the taste of fresh roasted pop corn—with, if you like, butter and salt.

This week, Lawrence Gill brought in an excellent sample of this delicacy, popped and unpopped. The corn was grown in his garden and he has quite a nice stand of it. The kernels are a golden yellow in colour and the ears are much smaller than the ordinary sweet corn.

Car and Truck Collide

A collision between a car driven by Mrs. Clutterham and a truck belonging to Everitt and Son, occurred at the intersection of main street and the creamery road this (Thursday) afternoon. The truck was travelling east and Mrs. Clutterham was travelling south, consequently neither driver could see each other until too late. The car struck the side of the truck, damaging the radiator considerably. Fortunately Mrs Clutterham was unhurt but received a severe shaking up. The driver of the truck was also uninjured.

Western Poultry Goes To Guiana

Montreal, Oct. 4—The breeding of fine poultry in Canada has been recognized abroad for many years and now en route from British Columbia are two shipments of live poultry by the Canadian National Express consigned to the superintendent of the Government Experimental Station at Georgetown, British Guiana. The Egg and Poultry Branch of the Federal Department of Agriculture arranged the shipment.

Not since 1926 when British Columbia shipped $100,000 worth of birds abroad has there been such world trade in live poultry originating in that province and the present shipments mark a resumption of the business.

The Truth at Last

"No, Sah," said the elderly colored man to the visitor who asked if he had ever seen President Lincoln. "Ah used to 'member seein' Massa Lincoln; but since Ah j'ined de church, Ah doan 'member seein' him no mo'."

Pullets For Egg Production

(Experimental Farms News)

Under normal conditions a pullet hatched reasonably early lays more eggs during her first laying year than during the same period of time in any other part of her life. Hence for egg production alone, the pullets are more profitable than the older females. In view of this fact it is difficult to justify the keeping of the hen through the second winter, as far as egg production is concerned.

If the average farmer cares to purchase day-old chicks each year, they are available from the commercial hatcheries at the proper season, no breeding stock is required, no incubators or risks in hatching, no adult diseases and no testing for pullorum. The cockerels and yearling hens may be used each year for table purposes before cold weather comes in the fall and the only chickens to be housed and fed during the winter would be a uniform bunch of laying pullets. At winter prices it would not require many eggs to pay for the day-old chicks for spring delivery. There is little gained by getting sexed chicks at double price if cockerels can be used for table purposes.

However, if producing eggs for hatching at home or to sell to the hatchery, the adult hen is the better source of eggs. At the Dominion Experimental Station at SCOTT, Sask., states E. Van Nice, the Assistant in Live Stock, chicks hatched from hen eggs have been more vigorous than chicks hatched from pullet eggs. At the Central Experimental Farm at Ottawa, figures from all Experimental Farms in Canada have been compiled comparing the hatching qualities of pullet and hen eggs. Differences were apparent in the percentage of eggs fertile, the percentage of fertile eggs hatched, the percentage of chicks alive when wing-banded and the total eggs set, per chick alive when wingbanded. The average figures covering a period of four years ending 1937, from all branch farms, showed every point mentioned to be in favour of the hen eggs, although the differences were not great in any case.

The poultryman should decide whether breeding stock and hatching eggs are to be produced or whether eggs are to be produced only for food. In the former case the hen cannot be overlooked and must be carried through the second and often the third winter, but in the latter case, the procedure is simple and the labour as well as the overhead expenses are cut to a minimum.

Auction Live Stock At Bi-Weekly Sales

Commencing October 13th at the St. Boniface Stock Yards, Winnipeg, facilities are to be offered for the buying and selling of live stock by auction, the Marketing Service of the Dominion Department of Agriculture has announced. Co-operating with the Department are the Union Stock Yards Company and the live stock commission at the yards. Sales are to be held every Tuesday and Thursday until further notice unless public holidays intervene. Contributions to these sales will be voluntary.

While this departure from the established methods of selling at Stock Yards is in the nature of an experiment, it is designed to test the merits of the auction method as compared with private sale. The majority of the livestock offered at the first sale will probably be stocker and feeder cattle but it is anticipated that all classes of stock will be put through the ring in some volume.

Anyone desiring live stock is free to bid at these sales

THE WORLD OF WHEAT

By H. G. L. Strange, Director "The Crop Testing Plan."

Sometime ago our Research Department compiled and published a chart showing 538 years of wheat prices.

The chart revealed a number of severe rises and falls in price throughout the years. We found that these great fluctuations always coincided exactly with great wars. We therefore set about studying all the wars that had occurred for the same period, i.e. the last 538 years; and we found some amazing things.—

That the world during 538 years has only been at complete peace for 51 years. That France has been at war during the period [illegible] years; Russia 261 years; Austria 238 years; Great Britain 232 years; Spain 213 years, Turkey 192 years, Germany 187 years; Italy 117 years; Holland 106 years, Portugal 10 years; and the United States 27 years. The most peaceful country having been China.

Most of the wars were fought, we found to obtain possession of lands that produce wheat, foodstuffs or other raw materials. Then, later, other countries would arise and attempt to take those lands for themselves from those who had previously conquered them; and so it seems to have gone on and on throughout the ages.

One invariable result of war has ever been, first very high, and then very low wheat prices.

Following factors have tended to raise price: Apparent European political crisis. Rain needed in northern Argentina.—European millers desire best spring wheat to strengthen mixture. India reluctant to sell wheat—Poland distilling rye— Norway buys Canadian rye—Belgium buys substantial quantities U.S.A. wheat. France buys North African Durum.

Following factors have tended to lower price: Possibilities of peaceful European settlement — Liverpool wheat stocks double a year ago—Swedish wheat crop larger than 1937

Abundant supplies of bread grain in Germany—War risk insurance on cargoes to Germany suspended. All other rates at least doubled—Ukraine and southern Russia receive beneficial rains.

Urges Nomination of Non-Party Candidate In Athabasca

Calgary, October 3—Appeal for the nomination in open convention of one candidate, acceptable to the rank and file of all political parties opposed to Social Credit in the Athabasca constituency was made Wednesday by John I. McFarland, chairman of the Provisional Unity Council of Alberta. Mr. McFarland's suggestion was addressed to the leaders of the provincial political parties concerned in the by-election, and these were asked to lend their personal support to such policy

"The situation in Athabasca has been carefully studied by our Council, and we are convinced the nomination of more than one candidate to contest the by-election against the Social Credit nominee is not in the best interests of the province," Mr. McFarland stated in announcing his action.

"I have asked the political leaders to recommend to the friends and supporters of their respective parties in Athabasca, the holding of an open convention, to secure a candidate who can command the enthusiastic and wholehearted support of people of all parties," the chairman of the Unity Movement stated.

"There is doubt as to whether a nomination on any party basis can enlist sufficient support to secure a victory at the polls," Mr. McFarland stated. "This particular situation, in my opinion, calls for a candidate chosen by the Athabasca voters, irrespective of party, and responsible only to the people in the constituency," he emphasized.

Our Yield Per Acre

WELL, COUNTRY NEWSPAPERS DO NOT EXACTLY CALCULATE THEIR YIELD BY THE ACRE, BUT LIKE FARMERS, THEY DO HAVE GOOD AND POOR YIELDS. EACH SUBSCRIBER TO THE NEWSPAPER BUSINESS OFFICE IS LIKE AN ACRE TO A FARMER. SOMETIMES THEY YIELD GOOD, OTHER TIMES NOT SO GOOD. DRY WEATHER, POOR PRICES, HAIL AND FROST HAVE THEIR EFFECT ON OUR YIELD TOO AND OFTEN WE WAIT YEARS BEFORE OUR RETURNS COME IN.

IN A SHORT TIME WE WILL BE SENDING OUT NOTICES TO ALL SUBSCRIBERS IN ARREARS AND WE HOPE FOR A GOOD RESPONSE. WE DO NOT EXPECT TO GET ALL THE ARREARS BUT WE DO HOPE TO GET A GOOD YIELD. ALL WE ASK IS THAT SUBSCRIBERS TREAT US AS GENEROUSLY AS NATURE TREATS THEM.

IMMIGRATION NEXT?

AT LEAST A FEW readers will remember the visit in 1935 of Brigadier-General Hornby to Tofield in the interests of Empire settlement. Mr. Hornby had evolved a plan which he believed would eliminate most of the difficulties associated with previous migration schemes. The plan, very briefly, called for the settlement of groups of British settlers on blocks of land purchased in various parts of the Dominion for a period of five years. Houses, barns, horses and other essentials were to be supplied them and at the end of five years the first group would move off and a new group move on. The plan in detail has been previously described in this paper.

At the time of Brigadier-General Hornby's visit here, there was much local and district interest in the scheme, but as time passed and nothing spectacular happened, interest waned, and now in order to recall the circumstances surrounding his visit, memories have to be jogged. But empire emmigration is not a dead issue by any means. Following meetings held at quite a number of points throughout the Dominion, an immigration conference was held at Saskatoon in 1936. A complete report of this conference appeared in this paper at the time. In the following year an Empire Settlement conference was held at London, England, to which there were quite a few delegates from all parts of the empire. Other important conferences have been held at Newcastle, England, and Glasgow, Scotland. So while during the past few years, immigration has been at a standstill, work and study, officially and unofficially, has been going forward concerning it.

There has recently been issued a report covering two years work by the Overseas Settlement Board, a body presided over by the Duke of Devonshire and appointed by the British parliament. The Board finds that at the present time there is no prospect of mass migration of British workers to empty spaces within the empire. But it does recognize the need, urgent need, of a better distribution of the 70,000,000 white people of the British race. The Board is also of the opinion that the problem of migration can be gradually solved by methods already in use.

Among remedies suggested to help people the sparsely populated areas of the Empire are encouragement of settlers from such countries as Scandinavia and the Netherlands; a form of social insurance so that the British worker will not be leaving security for insecurity; and an expansion within the Dominion of light industry. There are two main purposes for encouraging the settlement of British Dominions by British stock. One, the overcrowding and unemployment conditions of certain areas in the British Isles, and two, the standing temptation to foreign powers of large areas sparsely populated under British rule. To remedy this state of affairs, opinion in responsible quarters in Britain is veering away from the straight dominions for agriculture, motherland for manufactures policy, to one of compromise between the two. It is suggested that the more simpler types of manufacture be encouraged within the dominions and the more complex types of manufacture continued in Great Britain. This, it is claimed, will serve a double purpose. It would provide work for British settlers and their work would, in turn, provide a market for the more complex types of manufacture carried on in Britain.

Speaking at Manchester, Eng., on July 15th, Mr. Malcolm MacDonald, Colonial Secretary for Britain said:

> "I do not believe that if industrial development in the Dominions is properly and wisely guided Great Britain is going to be a loser. What wants developing in the Dominions are the simpler forms of manufacture, and it is true we shall have to retreat from these markets in that production. But as working people go into the Dominions to carry out that production they will make those countries a far bigger market for us in our manufacturing of the more complex products; and I would like to see industrialists in this country and industrialists in the Dominions getting together in conference to work out plans of complementary industrial production by which, I believe, not only the Dominions but the Mother Country would be the gainer."

The greatest obstacle immigration met with was the Great War, the second, the depression, and the third, the uncertainty regarding another European war. Last week an immediate European war was averted, and it is profoundly hoped the foundation for an enduring peace laid. As the shadow of war and the clouds of depression gradually vanish, a spirit of optimism, enterprise and confidence will appear. With a better understanding between nations many of the barriers to natural trade expansion will one by one be removed and then that pre war trek of people to new lands and new opportunities will start again.

There is no place wherein better opportunities exist for incoming settlers than here in Central Alberta. A very careful choice of settlers will have to be made and a very expert economic set up will have to be created. If this is done and right and proper consideration given to our own young people there is reason to believe that a renewed influx of settlers would ultimately prove beneficial to Alberta.

CZECHOSLOVAKIA

Czechoslovakia is a country that is in many ways of particular interest to Western Canada. It is for instance, a substantial wheat producer, and in most years is an importer of quite fair amounts of wheat and flour.

Its particular fame, however, is that it produces the highest quality barley in the world, of particular value for the making of beer that has a worldwide reputation by reason of its excellent quality.

Next, Czechoslovakia is the largest exporter in the world of beet sugar. It produces also a good deal of corn, potatoes, oats and rye, and it [illegible] [illegible] cattle [illegible] square mile (52 head per square kilometer) than any other country with the exception of Denmark, Belgium, and Holland, which have a very dense cattle population.

Czechoslovakia enjoys an abundance of coal and iron ore, so it is favorably placed for the conduct of metallurgical industries. The country abounds with steel works and iron foundries. It also enjoys an enviable reputation for its fine glass, porcelain and pottery. It still has large forests, and so, like Canada, produces a good deal of pulp and paper for export. Like Eastern Canada too, it has developed an important textile industry. Czechoslovakia is a great believer in foreign trade, and has been in the forefront recently in reducing its tariffs.

All in all, then, Czechoslovakia undoubtedly is a country not altogether unlike Canada, filled with industrious people of a number of different nationalities who are interested in, and depend upon, commerce and trade with other nations.

Recent visitors to Western Canada from Germany, Czechoslovakia, Yugoslavia, Finland and England all noted with much surprise how well the people from central Europe of different races, creeds and religions got along together in Canada. The visitors were agreed that almost the opposite condition prevails over the greater part of Europe, where misunderstanding, prejudice and hatred between races and people of different religions was the common thing. One and all of them asked the question "If numbers of central European people of different races can agree and work together in a friendly spirit in Canada, then why can they not get along amicably together in Czechoslovkia and in other countries of Europe?"

There is of course much food for thought in this simple question. Perhaps one answer is that the pressure of population is very great in central Europe, whereas in Canada we have wide-open spaces and a sparse population. Perhaps, human nature being what it is, people resent having to be crowded together and having to rub shoulders day in and day out with those of different races and creeds. One wonders, therefore, wether some of the present troubles (which may at any time lead to war) in the densely populated countries of central Europe, would not be lessened if those countries that are but thinly populated, and have good natural resources, would open their gates to some of the worthy and hard working people of Europe.

Certainly it seems it would be worth making some considerable sacrifices for any country to be free from the continual fear of war, and the vast expense of armaments, that now seems to be our daily portion.

The Czech people are a very old race. They occupied the state of Bohemia (which forms the greater part of the present state of Czechoslovakia) almost two thousand years ago, and which then was a sovereign state having dominion for hundreds of years over a considerable part of the present Austria-Hungary, and some parts of the present Germany.

After the Thirty Years' War in Germany, however, in 1648, Czechoslovakia came under the Austrian monarchy, and by 1870 the last remnants of Czechoslovakian national independence disappeared. Czechoslovakia legions fought for the Allies during the Great War and the Allies recompensed them by giving back to them their ancient lands including Bohemia, which, however, by this time, contained in those areas bordering Austria and Germany a considerable number of Austrian and German people. The present difficult situation is also complicated by the fact that the areas occupied by the Austrian and German minorities form practically the only natural defences Czechoslovakia has against invasion, which explains no doubt the reluctance of the Czechs to give up these frontier lands.

If something of the same spirit of fairness and tolerance that prevails among the different races which live side by side in Canada today could only enter into the hearts and minds of the very same races now inhabiting central Europe, then it seems highly probable that the present difficulties could be easily overcome, and the world would have a chance again to breathe in peace. —Searle Grain Company, Limited.

War and The Western Grain Producer

In these present days when war talk is incessant around the world the people of Canada should not overlook the importance of the agricultural west to the British Empire in the event of another European conflict in which Britain might be called upon to participate. The food of Britain comes largely from overseas. There has been talk of storing immense food supplies in Britain, but it is believed the British government has decided that such a plan is impractical. Such supplies could only be useful in the event of a successful blockade of Britain, and an enemy, to do that, would have to destroy the British navy or render it useless. If such feat could be accomplished actual invasion of Britain would be inevitable and huge supplies of food would be more of an incentive to such invasion than otherwise. Britain's plan is to keep safe the sea lanes to Canada and to rely on the dominion for a large part of her food requirements, and that means relying on Western Canada.

There are three great food exporting nations in the world besides Canada, but this nation is the closest of all to Great Britain and on a route that the British navy can best protect. From Quebec to Liverpool is over 3000 miles, and from Australia to Liverpool 11,000 miles. It would be impossible for the British navy to effectively protect the sea routes to the latter two countries. The United States does not raise sufficient surplus food to take care of the British market. Anyway Canada is part of the Empire and naturally assumes this important function of supplying needed quantities of food in times of war.

However the western farmer does not want war. Nothing would please him better than that wars would end forever and nations pursue their courses in peace and harmony with increased trade. Being a world trader himself, the western farmer is anxious to see the extension of commerce between the nations. He looks upon the physical map of the world as being more important than the political map which has latterly been superimposed upon it, for providence apparently did not distribute fertile soils, minerals and climatic conditions with the modern nationalistic conception in view. The western farmer has always looked upon a good harvest as being a cause of thanksgiving, but under modern economic conditions an inscrutable force, operating through an unintelligible world economy, has seemingly reversed all the accustomed codes. The western farmer is willing and anxious to feed as many people in the world as he can, but he would like in return certain of the necessities, some of the comforts, and a few of the luxuries necessary to maintain an average standard of living.

The farmers of the prairie provinces of Canada know from experience that war is a destroyer of wealth even though it creates a false prosperity for a little time, that war dislocates business and trade, creates false standards, brings booms and collapses, and causes deep-seated enmities and seething unrest throughout the world. Worst of all, it levies its greatest toll on the young manhood of the nations involved.—Wheat Pool Bulletin.

Air Is Sterilized In New C.N.R. Coaches

Montreal, Quebec, October 3— Incorporating improvements and features of control not previously made use of in railway car conditioning, the Canadian National Railways have just placed in service a first class coach possessing various features never before combined in one unit in Canada, including an installation of ultra-violet ray sterilizers

The car is equipped with a water spray which accomplishes cooling by evaporation of the water. In hot weather this water is chilled by ice. Air from outdoors is drawn in by the main blower fan through large fresh air filters and mixed with the recirculated air. Air delivered from the main blower fan is passed through the spray and from there is delivered through the central distributing duct extending the full length of the car. Car temperature is governed by thermostatic control. Use of the spray eliminates dust, dirt and germs, controls the humidity and imparts a mellowness to the atmosphere of the car

In the winter months, the incoming air is passed through a steam heating coil which heats it to the proper temperature under control of the thermostatic system. The heat is supplemented by floor coils, also thermostatically controlled. Since the air recirculated in the car during the summer months is cleaned and washed by means of the water sprays, and as this system is not required during the winter months, other means are provided for sterilization of the recirculated air during the heating season. This is accomplished by ultra violet ray lights which are placed above the recirculating air grille. All air passing through these lights is sterilized before reaching the passenger again

But You Can't Do That

Mr. Brown had come home in a poor mood, for he had told one of his staff to do a job for him and the workman had done it all wrong.

"What's the matter, Dad?" asked his son.

"Oh, nothing," he said. "There's no doubt about it, my boy, if you want a job done properly, do it yourself. Always remember that."

"Well, Dad," grinned the little boy, "what about if you want to have a hair cut done well?" Birmingham Weekly Post

Nutrition Important Is Physical Development

OTTAWA, October 1st— In raising the general standard of health, diet was far more important than housing, Sir Edward Mellanby, eminent British nutritionist, told an Ottawa gathering last night.

"Far be it from me to discourage good housing measures, but diet is of first importance from a health standpoint," said Sir Edward, Secretary-General of the Medical Research Council of Great Britain and chairman of the League of Nations Committee on Nutrition, who is addressing Ontario audiences under the auspices of the Canadian Medical Association.

In support of his contention that proper food was more important than good housing, Sir Edward stated that the infant mortality on the Island of Lewis in the Hebrides where the houses are [illegible] the lowest [illegible] was only 30 per thousand and at the same time the death rate among infants in the rest of England was 130 per thousand.

"It would be hard to find worse housing conditions than on this island. There were no windows and no chimneys. Smoke escaped through the only door [illegible] pigs and chickens all lived in the same room with the family. But the babies were breast-fed and the children and adults all ate oats and [illegible] from the cow, the hen and fish from the sea," he said. "When an investigation was made in 1920 there was no tooth decay among the children and all had straight legs. When our investigator went back last year he found things had gone badly indeed. Where people lived near a shop where our so called [illegible] energy bearing foods were easy to obtain their general [illegible] was poorer. Where they lived far away and had to depend on natural foods, their health was greatly improved."

Developing the same theme, Sir Edward asserted that on the Island of Tristan da Cunha, in the South Seas, there was no tooth decay and no woman had ever died in childbirth. "They live on potatoes, not on white wheat flour," he commented.

Proper feeding would add to the physique and strength, mental and physical, of the average citizen, Sir Edward was confident.

"There is a great amount of stunted growth in all countries—stunted both physically and mentally. The poorer the person, the more likely he is to be stunted," observed the British scientist. Of 38,000 would-be recruits for the British army examined between 1930 and 1933, 40 per cent (22,000) were rejected due to bad teeth, deafness, flatfeet, and heart disease. This was indicative of the low health level of Britain's poorer classes, he said, as all these ailments were much commoner among the poor.

By the time English children were old enough to go to school, they were often "damaged goods," he observed. Of 1200 children attending London county council schools, 70 per cent were found to have badly decayed teeth [illegible] had had tonsils, anaemia and tubercular glands.

"This is damage that can never be [illegible] with [illegible] can never get them back to normal," he warned.

The wealthy also had their own [illegible], said Sir Edward. "If anything [illegible] the poor, the well fed have a higher death rate from diabetes and appendicitis," he added. [illegible]

Of all protective foods milk was by far the most important, declared Sir Edward. Races whose diet was rich in milk had greater stature, strength, physique and mental development. Among African tribes, consumption of milk meant the difference between a stalwart race of warriors such as the Dinkas and the Masai and "stunted, lackadaisical runts."

Tests in an English private school showed that addition of one pint of milk daily to the basic diet increased the strength and weight of the pupils. Their height increased [illegible] year by one inch more than those not obtaining the milk, while the gain in weight was almost double. The pupils played strenuously as ever but they had fewer fractured bones. Incidence of rheumatism also decreased.

Marquis Wheat Losing Ground

In 1936 Marquis wheat occupied 30.4 per cent of the total area seeded to wheat in the three Prairie Provinces. This last spring however, only 34.4 per cent was seeded to Marquis, all as shown by a survey of the "Distribution of Wheat Varieties in Western Canada," recently by the Research Department of the Searle Grain Company, Ltd.

Marquis has lost ground to the rust-resistant wheat—Thatcher and [illegible] extent to the still newer [illegible] Renown and Apex. The tendency for the replacement of Marquis by these rust-[illegible] going on, however [illegible] rapid pace [illegible] probable, therefore, that after next seeding, while Marquis will still be the dominant wheat in Western Canada, the percentage of land seeded to this [illegible] considerably less [illegible].

The second most popular variety now is Thatcher, occupying 14.1 per cent, displacing Garnet, which was second in 1936. Red Bobs is now in [illegible] with 10.[illegible] per cent. Garnet [illegible] place with [illegible] 1936 [illegible] 12.3 [illegible]

We understand that still better varieties of [illegible] wheat are [illegible] being tested [illegible] Dominion Rust Research Laboratory which originated them, and if [illegible] are found suitable [illegible] every way, they will be licensed [illegible] in the near future.

It will be noticed from these figures that Garnet, too, is losing favor, being replaced by that other early variety, which is more acceptable to the millers, i.e. Red Bobs.

In ALBERTA Marquis occupies 44.8 per cent of the acreage in wheat. Red Bobs 20.5 per cent, Garnet 14.5 per cent, Reward 6.3 per cent, Durum 5 per cent and Thatcher .3 per cent, with miscellaneous varieties 2.1 per cent.

In SASKATCHEWAN Marquis occupies 70 per cent of the acreage in wheat, Thatcher 14 per cent, Reward 3.6 per cent, Garnet 4.8 per cent, Durum 1.7 per cent, Ceres 1.8 per cent, miscellaneous varieties 2.4 per cent.

In MANITOBA Thatcher occupies 52.4 per cent of the total wheat acreage, Durum 29.1 per cent, Marquis 4.8 per cent, Reward 4.2 per cent, Renown 1.9 per cent, Ceres 3.6 per cent, miscellaneous varieties 2 per cent.

This Shrinking Violet Needs a Job

An acclaimed business executive, acute legal acumen, quickest adaptability and sharp common sense, will accept suitable engagements. Enviable references and acclamations by leading men.—Indian Paper. Modesty forbids him [illegible], more.—Humorist.

Short Division

[illegible]: "If your mother gave you a large apple and a small one and told you to divide with your brother, which apple would you give him?"

Johnny: "D'ye mean my big brother or my little one?"— Atlanta Two Bells.

[illegible] survey showed

"When children get adequate milk, they have fewer colds and their mental processes are brighter," he said.

The first vitamin to be discovered, Vitamin B1 came to light when [illegible] and beri-beri on the Island of Java, both of which were being fed on polished rice, developed the same disease, disclosed Sir Edward. Since the Great War, all the other discoveries regarding the health-protective features of natural foods had been made. It was not learned that rickets was due to lack of the sunshine vitamin, Vitamin D, until after.

Sir Edward Mellanby summed up the findings of nutritionists in the past 20 years with the message that [illegible] required for complete health could be obtained by building the diet around dairy products such as milk, cheese and butter, fresh and cooked vegetables, fresh fruit, eggs, fish, liver and kidneys, and meat.

All Grain Producers Can Unite

Alberta Pool Elevators

KINGMAN

Miss I. Thompson has returned home after holidaying at the coast for the past two weeks.

Threshing is about finished up for this year with the exception of a few oats left to be threshed.

Mr. J. R. Dettwiler made a water tank for Mr. Roy Fleming last week.

Mr. S. J. Wilson has been laid up with infection in his hand all last week, but is improving now.

Mr. Earnie Fairbrother of Woodlawn visited with his brother Cliff one day last week.

Miss Olga Johnson is home again after assisting Mrs. Osmton during threshing.

Junior Wheat Clubs

1,400 boys between the ages of 15 and 22 are participating in the work of Junior Wheat Clubs this season in the province of Alberta. There are 71 clubs in operation, distributed from Foremost in the south-east to Beaverlodge in the Peace River district. In 1930 the Junior Wheat Club movement had its inception with 15 clubs in operation and a membership of 300 boys. Alberta Wheat Pool will expend over $5,000.00 on the work of these Junior Wheat Clubs this season and this expenditure is considered to be well justified, not only from the standpoint of agricultural education for the junior farmers of the province, but also as a means of improving the quality of seed in general use throughout Alberta. Over 4000 bushels of registered or certified seed were distributed to Junior Wheat Club members last spring, 916 boys receiving this seed. The balance of the club membership provided its own seed requirements from the previous year's production. Each boy sows 4½ bushels in a segregated plot and in turn the yield from this crop is utilized as seed the following year in general farm operations.

Supervision and instruction in the work is undertaken by the provincial department of agriculture through its Field Crops Branch, the whole movement being part of a nation-wide organization set up by the dominion government through its national council on boys' and girls' work. Numerous club and inter-club competitions are held each season with the provincial championship club furnishing a team of two members who are given additional instruction and represent the Junior Grain Clubs of Alberta at the Royal Winter Fair at Toronto. The winning of the major prizes is certainly a real credit to the clubs concerned, but from the standpoint of Alberta Wheat Pool the main object in sponsoring the movement is in creating many sources of improved seed throughout the province and giving wide-spread knowledge to the junior wheat growers of Alberta as to the benefits to be derived from the use of pure seed.

This season the Alberta Wheat Pool challenge trophy for the highest average field score in the standing crops competition has been won by the Foremost Junior Wheat Club. George Oldenhof is leader of the Foremost club. It is the first time that this honor went to the south-eastern part of the province. Since 1930 the standing crops competition has been won by clubs at Barrhead, Mundare, Holborn, St. Bride's, Drumheller, Spirit River and Rochfort Bridge.

In the following summary the first ten clubs are listed according to the highest average field score obtained this year, mentioning the members who secured the highest individual score in his club:

1st, Foremost—Evert Van Staalduine.
2nd, Stony Plain—Charlie Shaul.
3rd, Milo—Jim Umscheid
4th, Beaverlodge—Robert J. Downe
5th, Ryley—Harvey Magneson
6th, Nanton—Gerald Lowe
7th, Spruce Grove—George Stauffer
8th, Drumheller—Donald Sharpe
9th, Wasel—John Rosychuk
10th, Okotoks—John A. Noble

—Wheat Pool Bulletin.

TESTED RECIPES

BY FRANCES LEE BARTON

Once upon a time there dwelt in the fashionable English watering-place of Bath a lady by the homely name of Sally Lunn—she ought to be the patron saint of all folk who gather together for an afternoon visit and refreshment. For she made a famous little tea cake which bears her name. But we've improved Sally's original recipe. Today we make our Sally Lunns more quickly—and more surely, with the aid of double-acting baking powder and cake flour, to give that feathery lightness so essential to hot breads.

Quick Sally Lunn

2 cups sifted cake flour
2 teaspoons double-acting baking powder
½ teaspoon salt
½ cup butter or other shortening
4 tablespoons sugar
1 egg, well beaten
1 cup milk

Sift flour once, measure, add baking powder and salt, and sift again. Cream shortening, add sugar, and cream together thoroughly. Combine egg and milk. Add flour to creamed butter and sugar, alternately with milk mixture, a small amount at a time, beating after each addition until smooth. Bake in greased muffin pans in hot oven (425 degrees F.) 25 minutes, or until done. Makes 12

Benes From Czechoslovakia Builds Stoutly In Manitoba

Winnipeg, Oct. 3—Josef Benes, native of Czechoslovakia and cousin of Eduard Benes, President of that nation and former president of the Assembly of the League of Nations, is proud of his family distinction but he is even more proud of the fact that he is owner of 100 acres of good Manitoba farm land and possessor of a home in Canada where his family may live in peace. Mr. Benes moved to Manitoba two years ago under the auspices of the Colonization Department of the Canadian National Railways, and so marked has been the improvements made by him in the property then acquired that it recently inspired a special article in the Winnipeg Tribune in which the work of the builder is admirably described. In particular, the writer is enthusiastic as to the manner in which a stone barn has been built, built for permanence with stout walls smoothly cement-coated inside and out. The writer adds "Looking through a window from the inside you think you are in a mediaeval abbey. And the total expenditure to date has been thirty dollars—for cement." Manitoba supplied the stone and Mr. Benes the muscular effort.

Choose Hardy Tree Fruits

(Experimental Farms News)

In testing upwards of a hundred varieties of tree fruits during the past twenty-five years at the Dominion Experimental Station, Scott, states G. D. Matthews, the Superintendent, the greatest single desirable quality has proved to be hardiness. Hardiness in crab apples is secured by crossing with the extremely hardy Siberian crab. Native fruits have contributed hardiness in plums and cherries.

Hardiness in fruit trees is the ability to withstand the combined effects of severe cold, intense heat and drought occurring in the prairies. A combination of a dry summer and a cold winter with little snow has proven particularly disastrous to promising introductions. Many specimens tested have survived well until the trees had started to bear fruit but fruiting caused a drain on the tree which resulted in winter killing during the following winter.

Certain precautions are necessary to help protect trees against these natural hazards. An effective shelter belt of trees lessens cold, gathers snow to add moisture, often prevents wind damage and lessens evaporation. Clean cultivation in the orchard provides the best possible chance for [illegible]. Encouragement of bush formation in growth of fruit trees aids in gathering snow, helps protect fruit buds and guards against injury from sun shining on the trunk of the tree. In favourable years and with certain varieties where new growth continues to grow after midsummer, ripening of the wood will be aided by pinching back one or two inches from the tip about the second week in August.

In choosing hardy varieties the following have proved their value in this respect: Crab apples: Osman; Florence, Prince, Alberta, Robin, Andrus and Rescue. Plums: Assiniboine, Mammoth and Objibwa. Plum x sand cherry hybrids: Opata, Sapa, Oka, Tom Thumb and Champa.

For further details on adapted varieties the grower should consult the nearest Experimental Station or University.

Many Motorists "Blind" At Night

Fully 10 per cent of automobile drivers are subject to "night blindness" and many of them don't know it.

This statement was made at a recent convention of medical men held at Ottawa. The authority for the statement was Dr. Ulysse Forget, of Warren, Rhode Island.

The statement has interested officials of the Alberta Motor Association which is active at all times in ways and means of making the highways safer for the motoring public and freer of accidents of all kinds.

Dr. Forget declared that if people who are subject to "night blindness" drive at night without realizing their affliction they are a menace both to themselves and to others. Night blindness is a sudden failure of vision which comes on with the approach of darkness, he said.

Successful Teachers' Convention Held at Holden

On Friday, October 7, all but one of the teachers employed in the Holden District gathered at Holden for a one day convention. An invocation by Mr. Bell and a welcome from Mayor White of Holden opened the convention. The Chairman of the Holden Divisional School board, Mr. J. W. Stambaugh of Bruce, addressed the teachers, reminding them of their privilege and responsibility in shaping the minds of the future citizens. A talk was much enjoyed from Mr. Dean of Viking, as president of the District A.T.A. Miss Thrasher of Holden gave a much appreciated demonstration of the teaching of Choral Singing in the Intermediate grades.

At the morning business session the reports of the committees on Festival and Salary Schedule were heard and approved and many of the teacher's problems were brought up and left over for a more detailed discussion in the afternoon. Inspector J. H. McLean told of the psychology which had led to the school curriculum, reminding us that education should not be the learning of facts but the learning of how to interpret and use the facts. He felt that as teachers we should never forget this.

The afternoon session opened with a paper by Miss S. Gilbert on the Background of the Activity Program in which she told about some of the struggles which led to the finished course. This was followed by a description of the methods and results of various enterprises by Miss I. Robinson, Mrs. E. Steen, Mrs. H. Duncan, Miss A. Hall, Miss R. Wingrove, Mr. L. Olsen and Mr. P. J. Condon. Mrs. S. Clark of Viking gave a demonstration of a Speech Training lesson in Division 1 which was a revelation of what could be done with that subject. An example of Folk dancing by pupils trained by Miss Anne was thoroughly enjoyed as was also a half hour physical training lesson given by Mr. Stauffer to nine boys from his school. Mr. Brownlee of the University Extension Department showed two educational films and made us all hope that this ideal method of teaching will soon be available in every school.

The afternoon business session opened with an election of officers for the District A.T.A. which resulted in: President, Mr. Chalmers of Holden; Vice-President, Mr. McDonnell of Tofield; Secretary-Treasurer, Mr. J. Hemphill of Bruce; Press-correspondent, Miss Collier of Bruce. A committee to deal with the matter of the Salary Schedule was made up of Mr. Chalmers, Miss F. Milne, and Mr. Olsenberg. It was decided that a Musical Festival should be held each spring in one of the towns included in the district and Holden was selected as the place for the spring 1939. Mr. McLean, Mrs. Selkirk and Mr. Broughton were chosen as the Festival Committee. A motion was passed that in the future the Games and Track meets should be separate with the Games meet taking place in Viking this spring; Mr. Dean to be chairman of the committee in charge.

At 6:30 the teachers met again to enjoy a chicken dinner and a well proportioned mixture of sense and nonsense in the afterdinner speeches. The toast to the King was made by Mr. Hemphill; to the Teaching Profession by Mr. McLeay, the response by Mr. Chalmers; to the Department and its representatives by Mr Richardson and the response by Mr. McLean. Dr. H. E. Smith, associate professor of the School of Education spoke on Education versus Indoctrination, taking indoctrination to mean simply propaganda. He said that a teacher can either give a child the knowledge of the past or he can give the child this knowledge together with today's events and, what is most important, try to teach the child to evaluate these; that only from this second method can social progress result.

The day was ended with a dance in the delightfully decorated hall.

Credit for an exceptionally successful convention goes to the convention committee: Mr. J. H. McLean of Holden; Miss Signe Anne of Holden; Mrs. S. Clarke, Viking; Mr. J. A. Richardson, Ryley; Mr. L. Olsen, Gladstone; and to the Chairman Mr. W. M. McDonnell of Tofield, as well as to those others who spent much time and trouble in decorating the hall and arranging displays of Enterprise, Social Studies and Science.

BARDO

The rain that fell last Monday has stopped threshing for a week. There is some oats still remaining. Threshing will start again this week. Threshing rigs that have finished their runs are: Rosen and Co., M. Hagen, Ezra Yoder, Ness and Anderson and Flaaeth and Rude steam outfit.

Mr. and Mrs. Art Moen entertained the Young People's Social last Friday night.

Hannah Jenson and Margaret Moen of Edmonton and Esther Ness, teacher at Duhamel, spent Thanksgiving at their homes here.

Mr. and Mrs. S. Olsenberg and daughter spent the week end with the former's parents at Killam.

Mrs. Ellen Steen, S. Olsenberg and Mr. Munro, local teachers, attended the teachers' convention at Holden last Friday.

Pete Lerbekmo is a member of the Tofield Rifle team which is competing in the Dominion Rifle Competition.

Mrs. B. Anderson and Mrs. A. Haukedahl are delegates to the W.M.F. Circuit meeting at Viking.

Mrs. Bennie Anderson entertained the Bardo Ladies' Aid last Thursday.

The Bardo Ladies' Aid are holding their annual sale and Lutefisk dinner at the Bardo Church on Saturday, November 5th, starting at 12 o'clock, noon.

Mr. and Mrs. A. Kindley, Mrs. A. Steen, Edna Steen, N. Falkeid, Geo. Hendrickson, Ed Bannerman and Eddie Steen were Edmonton visitors last Monday and attended the Grads and Wichita basketball game.

Bob Berreclough returned home last Saturday from an Edmonton hospital where he underwent an appendix operation.

M. B. Ness is driving a new 38 Dodge sedan.

Martin Hagen and Alvin Steen have new radios.

Mr. and Mrs. Hamilton of Camrose spent last Sunday with Mr. and Mrs. I. Ness.

Rev. Loraeth of Bawlf conducted services here on Sunday October 2nd. The Y.P.S. gave a programme in the evening. Y.P.S. officers: President, Olaf Anderson, Sec-Treas, Clifford Jevning; Programme committee - Muriel Finseth, Milton Jevning and Gordon Hendrickson.

Arnold Steen returned home on Monday after spending a year in a Saw mill near Gunn.

Eddie Haukstad of Sexsmith is here. He is assisting Mr. Moen building his barn.

Bardo Male Chorus will begin their practices on Monday, October 17, at Bardo church, starting at 8 p.m. All members are urged to turn out.

Ducks are very scarce in this district and bags are small.

A Litigant has been defined as a person about to give up his skin in the hope of retaining his bones.

"Victoria The Great" Coming Next Tuesday

Next Tuesday evening Sharp's Shows will present at the Variety Theatre, Tofield, "Victoria The Great." This is a picture that has won unanimous acclaim everywhere it has been shown. The picture, which is in technicolor is rated as among the finest ever produced and deals with a subject of absorbing interest to everyone. Victoria the Great lives again in this picture and while the entertainment is first rate, the historical interest is such as few pictures possess.

Two complete shows will be given the first commencing at 8:00 p.m. and the second at 10:00 p.m. School children in groups of ten accompanied by their teacher will be admitted for 15c each. This special rate applies to the first evening show only. With this exception regular admission prices will prevail, adults 35c, children under 14, 20c.

Water Supply Endangered

Well, its like this. Mr. Pruden who has delivered water in Tofield for many years is having his pails taken. Only last week two were taken from the back of his wagon while he was eating dinner. Pails have also been taken previously. It may be children it may not be children, but really Tofield is going to be very dry if Mr. Pruden cannot keep any pails.

Correction

The dates of the Ryley Carnival are October 21st and 22nd, and not 14th and 15th as announced last week.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "The Crop Testing Plan."

"These Registered and Certified seed growers seem to ask a pretty high premium for their seed. Isn't there some way to get it cheaper?"—a friend asked me last week.

"The seed is well worth the price asked," I told him. "It takes a lot of extra expense and care to grow Registered and Certified seed, but," I said, "If you don't want to pay the seed grower for doing the extra work, why not do it yourself and so save money."

"How?" he asked.

"Lay down a seed field on your farm," I advised. "Choose five or ten acres of your very best summerfallow and then buy just a few bushels of the best Registered or Certified seed and sow it on this small field, leaving an alleyway bare all around it. Protect the field, rogue it, harvest, thresh and clean the grain with care and then next year you will have enough seed for a large acreage."

"Oh," answered my friend, "that's a lot of trouble though, isn't it?". "Well," I ventured to say, "That's life all over. Either we must go to extra trouble ourselves to produce an extra good thing or pay some one else to do it for us."

Following factors have tended to raise price: Seeding in Russia behind a year ago—No further permits for South African corn exports—Expect unusually small Italian corn crop—War risk insurance rate reduced—Threshing in Poland not up to expectations—Increased complaints of deterioration in Australia—Food grains in northwest India deteriorate owing to continued dryness.

Following factors have tended to lower price: Roumania endeavoring to sell substantial amount of wheat—Rains bring relief in Argentina. Official reports state conditions satisfactory—Food Research Institute estimates 1938 world wheat yield may be greatest in history—Corn planting becomes active in Argentina— War possibilities fade and wheat offerings increase.

Importance Of Type In Brood Sows

Prospects for profit from hog raising are now the brightest they have been for two years, with the possibility that in their eagerness to increase numbers farmers may overlook the most important requirement —export quality. The first step in production quality hogs is in the selection of the sire and dam of the litter.

With the scarcity of mature or proven breeding stock in many districts, farmers will be obliged to depend largely on young sows or gilts for the 1939 pig crop.

The type and quality of next year's pig crop will depend to a large extent upon the care taken in selecting breeding gilts this fall. Sooner or later little pigs go to market and any gilts retained for breeding should be bacon type, thrifty, of quiet temperament and with at least ten well placed and well developed teats. The boar should be of similar type. The experienced stockman will have a look at the gilt's dam and its litter-mates as "like begets like" and a gilt from a large uniform litter of type is more likely to prove satisfactory. Wherever possible, breeding stock should be obtained at home or near home but in districts where satisfactory gilts are not available locally, the Dominion and Provincial Departments are prepared to assist in the selection and distribution of gilts of the right type. While the details of the scheme vary in each province the main features are similar.

Bacon type gilts are selected by officers of the Dominion Department of Agriculture, either from farms or at market centres and are sold to farmers at cost. A contribution equal to one-half freight charges is made towards transportation expenses from assembly point to destination. With shipments of 20 sows or more to groups of farmers in a district a pure bred boar may be supplied free of charge if needed in the district and if the boars can be obtained.

In past years, under similar conditions, many satisfactory gilts have been placed under this scheme, but in some cases orders came in so late in the fall that shipments had to be made during severe weather, resulting in hardship to both man and beast. At the present time, gilts are being marketed which would make good sows and orders placed now can be filled more promptly than is possible when the rush starts. Live stock fieldmen, or local agriculturists, can supply details of the scheme to any one interested.

The Wheat Situation

With war clouds over Europe dissipated for the time being, wheat prices turned downward. When the threat of a major war could only raise prices to the extent of a dime, it will be readily seen that the situation is far from encouraging.

World trade has been running between 10 and 11 million bushels weekly, which is under the average required to bring the total figure up to the estimate of 550 million bushels for the year. Canada and the United States are, of course, the largest contributors, last week's figures for the two combined being 5½ million.

Word from the southern hemisphere intimates that drouth is persisting in Australia and Argentina is reported to have experienced frosts but the damage in the former country will not be serious unless drouth persists during the next month, and frost does little damage at this period of the Argentinian crop's growth.

In western Canada total shipments have passed the 150 million bushel mark, indicating a record delivery. It is anticipated that from now on deliveries will slow up. Rains interrupted harvesting operations this week but the wheat has virtually all been cleaned up and comparatively little course grains remain to be threshed.

Right now there is very little "bullish" sentiment on the market and speculation is at a low ebb. Any further drop in prices should encourage speculators because at present levels wheat is on the bargain counter.

The prairie wheat crop is of pretty good quality this year, and the average protein content is 14.2 as compared with 13.2 last year.

Mr. and Mrs. Barnes had been discussing an arrangement which implied the exercise of the "give and take" theory.

"You know," declared Mr. Barnes, "that it always takes two to make a bargain."

"Yes," returned Mrs. Barnes, "but only one of them gets it."

Dominion-Provincial Youth Training Program

SHORT COURSE SCHOOLS FOR FARM YOUTH

Under the direction of the Department of Extension of the University of Alberta, in co-operation with the Provincial Department of Agriculture, it is proposed to offer in the winter of 1938—9 between 35 and 40 short course schools in practical agriculture, household science, handicrafts, recreational training and community leadership. These courses of two and three weeks duration are free to all rural young men and women between 18 and 30 years of age who are either unemployed or not gainfully employed. This classification includes all young men and women who are living on the farm and not in receipt of wages.

Courses of Instruction

The courses of instruction will be organized with the object of improving morale and developing a new sense of citizenship by giving the [illegible] a proper sense of the dignity and importance of the profession of agriculture as a way of life. The courses for men will cover the subjects of soils, field crops, animal husbandry, dairying, farm mechanics, farm management, poultry, horticulture, entomology, marketing, practical handicrafts, recreational training and community leadership.

Evening classes will be of a non-vocational nature and will include [illegible] discussions of literary, economic and social problems, films [illegible]. Full use will be made [illegible] illustrative material such as [illegible] films and radio, and [illegible] attempt will be made [illegible] better material [illegible] everyday life in such a way as to impress the student that his occupation and way of life is intimately related to the welfare of society as a whole.

Community Basis Of Schools

The school will be organized as a co-operative community venture between the University, the governments and the communities themselves. In other words they are to be real community schools. School centres will be chosen with the object of serving young people from the surrounding country within a radius of from 30 to 60 miles. Students living within four or five miles of a centre may live at home and come in each day. Those living at greater distances away may live in the school dormitories or stay with friends.

In order to keep the cost of this training to a minimum, local organizations such as town councils, boards of trade, church and the other community organizations will be asked to provide, free if possible, building suitable for class-rooms, dining halls and dormitories. Last year it was found that churches, community halls, schools and vacant stores or other buildings could be utilized readily. The minimum requirement for a school of approximately 100 students would be:

1. A hall large enough to hold all students and which could be used for general assemblies and as a class-room for men and women.
2. A second hall or building which could be smaller, to be used as a class-room for either men or women.
3. A building suitable for a community dining hall with one or two stoves.
4. A building suitable for a dormitory for girls.
5. A building suitable for a dormitory for boys.

Janitor service, light and heat will be paid for and by using community buildings as far as possible it is hoped to avoid rental charges or at least keep them to a minimum.

The community will also be asked to provide two suitable persons—one, a woman to be house-mother to the girls, and the other a man to act as dean of residence and live in with the boys.

Student Requirements

Students will be expected to bring beds or cots, mattresses and blankets from home. Brothers or neighbors may share equipment. In addition they should bring towels, soap, mirror, a cup and saucer, plate, knife, fork and spoon.

Students are expected to maintain themselves if they can. Last year it was found that the average cost for food in a two weeks' school was about $7 per person, and the student was given the option of paying this amount in cash, or contributing an equivalent amount in goods such as meat, vegetables, fruit, butter, milk, eggs, chickens, etc.

Those necessitous students who cannot contribute either goods or cash can be taken care of under a special provision which permits an allowance from the Youth Training fund of up to 50c per day for room and board. Every student is expected to make whatever contribution he can.

The community kitchen will be under the direction of a trained dietitian who is a member of the staff.

In organizing the second winter's rural youth training program, first preference in the establishment of schools will be given to those communities whose need is greatest and which were not served last year. In all probability schools will be held in a number of the same centres as in 1937-38 and in such cases students returning for a second course may be provided with a continuation of the course material taken in the first year.

In setting up co-educational, residential schools, it is recognized that there are certain definite values in having boys and girls together and in having them in residence even though the accomodation may be of a temporary character. Such an arrangement permits of better discipline and a more valuable and intensive type of training.

All rural young people between 18 and 30 years of age who are interested in the proposed schools should watch the daily and local press for further announcements and should keep in touch with their nearest District Agriculturist or write to Donald Cameron, Director Schedule "A" Rural Training Program, Department of Extension, University of Alberta, Edmonton, Alberta.

Wife—"Oh, do come to Mrs. Berkley's with me, Tom. She'll make you feel so at home."

Husband—"Then what's the use of going?"

Pack Smiling Lunches

BY BETTY BARCLAY

Back to school go the children. The old school lunch problem is with us once more. What shall we place in those little lunch baskets that will produce smiles instead of frowns when they are explored at noon?

If you can pack a lunch that is a body-building, smile-producing collection of mid-day foods, you rank high on the list of qualified mothers.

Always include fresh fruit in the school lunch. Oranges are ideal because they are available the year 'round. They stimulate appetite and are rich in those protective elements, vitamins C, A and B, as well as calcium. The orange, more than other food, provides the element of freshness, both from appetite and health standpoints.

These elements help prevent tooth decay and gum troubles, particularly in the 'teens when the foundation for good teeth is being laid, and maintain resistance [illegible] and other infectious diseases. And by the way, vitamin C is one of the factors in which the average diet is quite apt to be lacking, so that oranges in the lunch box are particularly [illegible]. Loosen the peel or [illegible] the segments before packing the oranges. They are then easier to eat.

The school lunch should be balanced and adequate in nourishment. Milk and an occasional egg for the protein; fresh fruit and vegetables for minerals and vitamins; starchy and sweet foods for energy.

Foods should be in a form children like. The milk, carried in thermos, may be plain or in the form of soup or cocoa. Fruits may be used in salads or desserts. Children like crisp vegetables, such as celery, raw carrot sticks and lettuce. For starchy and sweet foods there are sandwiches, light cakes, cookies, dried fruits. Pack your little boxes with these. Then you will have "smiling lunches."

Here are suggestions for some delicious sandwiches.

Peanut Butter Spread: Thin peanut butter with orange juice.

Cream Cheese Sandwiches: Thin cream cheese with orange juice or spread one side of bread with orange marmalade, one with cream cheese.

Pied Piper Sandwiches: Moisten mixtures of ground dates, raisins, figs, prunes and nuts with orange juice. If you like, add a little honey.

Tuna or Salmon Salad Spread: Combine 1 cup tuna or salmon, minced; ½ cup each of minced green pepper and celery; 2 tablespoons lemon juice and mayonnaise to spread.

Costly Sheep

Vancouver, October 11— Two sheep with a real price on their heads relaxed in regal comfort in the Canadian National Express sheds awaiting shipment to an Ohio sheep farm. Laid down in Vancouver the pair cost the new owner $1295. They were prize stock from Hawarden, New Zealand. They are a pair of corriedale stud rams.

Our Yield Per Acre

WELL, COUNTRY NEWSPAPERS DO NOT EXACTLY CALCULATE THEIR YIELD BY THE ACRE, BUT LIKE FARMERS, THEY DO HAVE GOOD AND POOR YIELDS. EACH SUBSCRIBER TO THE NEWSPAPER BUSINESS OFFICE IS LIKE AN ACRE TO A FARMER. SOMETIMES THEY YIELD GOOD, OTHER TIMES NOT SO GOOD. DRY WEATHER, POOR PRICES, HAIL AND FROST HAVE THEIR EFFECT ON OUR YIELD TOO AND OFTEN WE WAIT YEARS BEFORE OUR RETURNS COME IN.

IN A SHORT TIME WE WILL BE SENDING OUT NOTICES TO ALL SUBSCRIBERS IN ARREARS AND WE HOPE FOR A GOOD RESPONSE. WE DO NOT EXPECT TO GET ALL THE ARREARS BUT WE DO HOPE TO GET A GOOD YIELD. ALL WE ASK IS THAT SUBSCRIBERS TREAT US AS GENEROUSLY AS NATURE TREATS THEM.

THANKSGIVING—

A THANKSGIVING SEASON is as old as history, probably as old as humanity itself. People situated in different parts of the world, at different times, have expressed thanks for many things. Thanks for the abundance of good things from field and orchard is a lesson learned early in life. And thanks for the harvests of the sea, safe return from dangerous journeys, thanks for recovery from illness and thanks for international peace all have been expressed fervently. But somehow or other it takes something spectacular to raise the thoughts of man above what he choose to recognize as mundane surroundings. Yet these very mundane surroundings are the soil from which the spectacular reasons for thanksgiving arise. And by just a little thought and reflection, perhaps retrospection, one can recognize things to be thankful for—things that are very commonplace and which have been accepted because they simply are there. It should be easy to recognize the worth of a good neighbor. And having recognized it, to be thankful that there is one or more of them around. And being thankful should create a desire to show one's appreciation by becoming an excellent neighbor also. There was a time not so far distant when a neighbor meant something. They were few and far between and human intercourse was not as frequent as now. The very early settlers welcomed a new neighbor as something really worthwhile. A new neighbor gave added communal strength to the settlement and was valued and appreciated accordingly.

Perhaps thanks could rightfully be expressed for the variety of humans. It would perhaps be very nice if all our friends and associates were perfect, but it would, we are afraid, be very tame also. There is a degree of interest and pleasure in knowing that while one of our friends is a complete dub concerning some things, he or she is very clever concerning others, and turning from one friend to the other we find the reverse as to accomplishments. This great variety of human temperament is one of the motive forces which keeps humanity ever on the progressive march, and is worthy of thankful expression. A bright open smile, a cheery word are things without price, but while sunshine is generally to be preferred to shadow, shadow has its uses in the great scheme of creation also. Who does not admire and respect the dour, unsmiling, methodical, individual who pays his bills strictly on due date and whose word is as good as his bond? There are among humanity's millions many such, and thanks could rightfully be expressed for them. And there is the wise counsellor. The individual of quiet mien who in times of bewilderment, seem to know the right things to say and how to say them. We should be thankful for him, for few of us at one time or another have not been helped, even guided by his kindly well chosen words. And we could remember too, the "learned group." Those men and women, who, by gift of rare talents and strenuous training have led in the procession of world development. Their talents have been widely distributed. In the fields of medicine, science, literature, art, music, mechanics and statecraft, these men and women, often obscure, have labored unceasingly. And the world to-day is a better place in which to live because of them having passed through it.

The humanitarian world is built upon variety and co-operation. In the realm of human relations there is no such thing as "splendid isolation." The gifts, talents, endeavors and accomplishments of one group intermingle with those of others. And so while it is right and proper to be thankful for the product of field and orchard and the harvest of the sea, just being one of humanity's great complex family should bring forth thanks also.

BIG LITTLE MOMENTS—

THE MANAGING EDITOR of Messrs. Chapman and Hall, Publishers sat at his desk and pondered. He pursed his lips and looked doubtful. The young man sitting across from him was speaking very earnestly. The managing editor couldn't help feeling that there was sense in what he was saying. But, thought the managing editor, he is such a young man. Not over three and tweny.

"What I have been writing," the young man was saying, "Has been little more than a running comment to Mr. Seymour's drawings. It would be much better if you would let me think up the ideas and let Mr. Seymour illustrate my text."

"But," interrupted the managing editor, "that isn't the way those things are done. Mr. Seymour is a great artist. It is his name and his pictures which sell." "You are just a beginning writer. You should be more than content to be allowed to write these marginal sketches for such a great artist as Mr. Seymour. He may be the making of you."

"Or I of him," the young man said under his breath. Out loud he said, "Give me a try, sir, I'm sure I have some excellent ideas."

"Very well," the managing editor said impulsively. "Go ahead."

A few days later he looked upon the fruits of the young man's efforts: the first proofs of "Pickwick Papers" by Charles Dickens. — Vansant Coryell in the Christian Science Monitor.

Ghost Towns Of Banished Forests

By Bruce West in Toronto "Globe and Mail"

Pottageville, Ontario — If you should chance to be driving from Aurora out toward Schomberg some day you might notice — if you are not driving too fast—the Village of Pottageville.

It consists of three of four houses mellowed by age, and a service station. The only man in the village who can tell you of the days when Pottageville was not passed by in a cloud of dust is old Joe Hill, who lives in a little house with his grandchildren right beside the highway. It is almost concealed in the trees.

During his 81 years Joe Hill watched Pottageville rise, flourish lustily and die when the timber was exhausted and the hum of its three sawmills became silenced forever.

He recalls when great stands of virgin pine surrounded the village and the shout of "timber!" echoed across the land where now farmers follow their plows.

From Pottageville's sawmills "Little Annie Rooney" hauled millions of feet of pine lumber and towering masts for the sailing ships of Europe. Pine masts. Two and-a-half feet thick at the tip and more than 100 feet high. That's the kind of pine that once crashed earthward in this country of green fields.

"Little Annie Rooney" is gone now. There remains not even a trace of the rails over which she travelled, stopping obligingly at every crossing to pick up a farmer with his load of grain.

There were lots of houses in Pottageville then and a big hotel that stood in the centre of the village. The mills employed more than 200 men and they spent money like water. Everyone was making money and the lumbermen ripped away at the bush with a feeling that the pine and basswood were unlimited and would always keep a stream of gold pouring into the village until it grew into a prosperous city.

But one fall a lumber company did not bother to send its men to the camps. The timber had begun to play out. From that day on Pottageville commenced to die as so many other lumber towns had died before.

Money grew more and more scarce and the lumbermen moved on to other localities. The big hotel fell into disrepair and became a weather-blackened, rickety hulk that finally disappeared entirely.

Now there remains nothing but the handful of houses that nestle almost in shame behind the trees.

Belle Ewart, Ontario. — Down by the blue waters of Lake Simcoe is this port where ships never call, a ghost town not so forlorn as some of its companions in Ontario because it has become a haven of health and pleasure for summer tourists.

When the tourists have gone, the total population of Belle Ewart probably wouldn't reach 100. Yet, not so many years ago it boasted a population of 1,500.

The story of Belle Ewart's rise and fall is similar to that of many other Ontario ghost towns . . . timber that seemed unlimited, buzzing sawmills and prosperity, dwindling timber and finally idle mills and the tragedy of a deserted village.

Less than seventy years ago one of the largest mills in all Ontario sent the whine of its big circular saws echoing through Belle Ewart night and day. More than 300 men were employed in it.

Pile after pile of fresh pine lumber was stacked along the shore of Lake Simcoe. A spur line railway ran from Belle Ewart to Lefroy where it joined the Northern Railroad.

When pay-day rolled round the men from the mills walked home "flush" with bulging envelopes. There are those in Belle Ewart today who can recall the times when these light-hearted lumbermen pulled the small change from their pay envelopes to toss to the children. There was so much timber in the vicinity of Belle Ewart that residents could buy all the pine two horses could haul for 25 cents.

Large docks were constructed to handle the trade as goods were brought into Belle Ewart's port from settlements across the lake where the railway had not yet penetrated.

On the evening of a July 12 in the late 70's, a huge blaze sent its reflection streaking across the skies for miles around Belle Ewart and out over the waters of Lake Simcoe. It was Belle Ewart's funeral pyre.

The entire population raced down toward the waterfront to see their means of livelihood, the great mill, being devoured by flames that licked and curled through the frame structure with such speed and fury that they were helpless to do anything but watch it burn. When the fire was over, there remained only a tangle of heat-twisted machinery.

Had the timber still been sufficiently plentiful, the mill might have been rebuilt, but it had begun to peter out some time before the fire and when the workmen watched the mill go down in ashes they fully realized that it would never be rebuilt.

From that night on Belle Ewart gradually faded into obscurity. The Masonic hall was moved to Barrie. The railway freight house was carted away to Sutton. Other houses were pulled down. Some burned down. The spur line was discontinued and its rusty rails ripped up. Boats stopped calling.

Today, covered with weeds and grass, a few foundation stones of the mill remain and a few bits of rotting wood from the docks. Of the four places of worship that were constructed in Belle Ewart's boom days, only one remains, the little brick Roman Catholic Church. Of the three hotels there remains nothing. One little general store is the village's only business enterprise.

In the summer it is a happy spot. It is only in the winter when the summer residents have gone and the cold winds moan in off Lake Simcoe, that its forlorn and deserted appearance makes a ghostly contrast to the thriving little centre of sixty years ago.

TESTED RECIPES

BY FRANCES LEE BARTON

When the chill, shivery days come, how pleasant for the tired homecomers to be greeted by the welcoming savory aroma of hot comforting stew. For when a stew is well and carefully made it's a right royal winter dish. And when feathery light dumplings are in the stew this good old-fashioned dish becomes something to dream about. But the dumplings must be as light as light can be!

Feather-light Dumplings

1 cup sifted flour
1½ teaspoons double-acting baking powder
½ teaspoon salt
1 teaspoon melted butter
½ cup milk

Sift flour once, measure, add baking powder and salt, and sift again. Add butter to milk; add to flour and stir carefully until all flour is dampened and soft dough is formed. Drop from teaspoon on boiling stew; cover very tightly and cook, without removing cover, 5 to 7 minutes according to size of dumplings. Serves 6 to 8.

Plowing The Ocean Floor

Trials and tribulations make up the lot of the men on the cable repair ships who assist in maintaining cable communications between the countries of the world. Seaquakes, dragging anchors and submerged icebergs take their toll of the cables and if these were not enough, sometimes sinking ships, when they hit the bottom, foul the cable lines. As a case in point the freighter Seirstad which had the whole Atlantic ocean to choose from, picked a spot off Cape St. Francis, Newfoundland, where several trans-Atlantic cables converged just before heading out across the Atlantic, and then settled plump on top of two of the main Western Union cables, stated an official of the Canadian National Telegraphs. Then the fishing gear of trawlers sometimes gets mixed up with the cables. To overcome this a system of plowing in the cables on the ocean floor has been adopted, the cable being lain in a furrow or trough about 18 inches in depth which is made by the cable plow. Notwithstanding all this, however, constant vigilance and perseverance in face oftentimes of great difficulties on the part of the men who man the cable repair ships helps in maintaining continuous cable communications between the different countries.

Bags Albino Caribou

Winnipeg, Oct. 11—When Dr. Henry G. Bagbee, New York, was hunting in Jasper a few days ago, he saw an albino caribou, a rare and beautiful creature with white skin and pink eyes. He shot the freak, which, he claims is seen only about once in 20 years. "Now I'm quits with the hunter who bagged a white giraffe in Africa recently," he remarked when he passed through Winnipeg on Canadian National lines.

"The horse I was riding wanted to go one way and I wanted to go another."

"Who won?"

"He tossed me for it."

Celebrates 85th Birthday

On Sunday, October 9th, Mrs. M. Giles of Ministik community, Tofield, was entertained by her family at the home of her daughter, Mrs. A Leach. Other members of her family are Mrs. R Swabey, Mrs. C B. Leach, all of Ministik and Percy Giles of Edmonton. One son Thomas, of New Hampton, England, was unable to be present. The occasion was Mrs Gile's eighty-fifth birthday.

During the afternoon, Mrs. Giles had her photo taken out in the garden standing beside a small table on which rested her birthday cake with eighty-five candles on it. This cake made a very pretty picture later in the day when it was on the dining table with all eighty five candles alight. A very sumptuous lunch was served by the hostess.

Mrs. Giles received many loving tokens of remembrance all congratulating her on her eighty-fifth birthday.

Those present were Mrs. Giles, Mr. and Mrs. A. Leach, Mrs. Robert Swabey and two sons Frank and Ronald, Mr. and Mrs. C. B. Leach.

Farm Auction Sale

ACTING UNDER INSTRUCTIONS FROM

MR. MAURICE McGINITIE

I WILL SELL BY PUBLIC AUCTION ON THE

"To the organization that fought for the grain farmers through thick and thin."

Alberta Pool Elevators

LOCAL & PERSONAL

The Hon. Lucien Maynard, Mrs. Maynard and daughter Nora Anne of Edmonton were guests of Mr. and Mrs. Verlyn Moen over Thanksgiving Sunday and Monday.

Mr. H. Kendall from Vancouver, B.C. spent the week end visiting with his son Walter, and renewing old acquaintances here.

Mr. McCauley returned home from Toronto where he attended as delegate the United Church Council.

Mr. and Mrs. Murray McHeffey and daughters spent the week end at the Fred McHeffey home here.

Miss Muriel Malcolm spent the week end visiting friends in Edmonton.

Miss Esther Wick of Barrhead and Bill Robinson of Westlock were guests at the Harold Green home over the week end.

Mrs. Patterson and Mrs. Lovell went to Minburn on Tuesday in connection with Rebekah Lodge work.

Mr. A. Sinclair returned from his holidays. Mr. Van Dyke, who was relieving at the station left on Saturday.

Messrs. Oliver Letourneau, Ed Hardy, Jack and Don, and Stan Grover spent the week end fishing at Lac la Nonne.

Mr. Gardiner of Edmonton spent the week end at the McCarthy home.

Miss Ella Taylor, nurse at the Roy. Alex. spent Monday at her home here.

Mrs. J. Skinner and Mrs. Strange of Edmonton visited at the Worton home on Monday. Mrs. Worton returned with them and will spend a few days in Edmonton.

Mr. and Mrs. Provost and son of Edmonton spent the week end at the Allen home.

Hans Jacobson purchased a five roomed house from Maurice McGinitie last week.

LINDBROOK

Threshing is practically over here now and hence much rejoicing.

The Harvest Thanksgiving Service was held in the School here last Sunday, the Rev. Teape, late of Kitscoty, now rector of Holy Trinity Church (Anglican) Tofield, officiated, it being his first service in that capacity in Lindbrook, although he is fairly well known to many for he served here whilst a divinity student some years ago. A hearty welcome and best wishes, Mr. Teape, from all your Lindbrook friends. The School was packed, quite a large congregation being present. The Harvest decoration looked very pretty and were the work of the ladies of the district who through the generosity of Mrs. W. Glenn were served with tea and cakes in the afternoon to lighten their labors.

The sympathy of the people of the district is extended to Mrs. J. Ferguson and relatives on the sudden death of Johnston Ferguson. The news came as a shock to folks here for deceased was well known and liked by all who knew him, he was a "real fellow" and will be sadly missed by many.

Mrs. Joe Ellis left last week for her home in Vancouver after spending a holiday with her brother-in-law, Mr. Norman Ellis and family of Hastings Lake.

A Harvest Dance was given by Mr. and Mrs. A. Gill last Friday in their barn. Tofield Orchestra supplied the music and quite a large crowd was present who thoroughly enjoyed themselves, it being so jolly that many were reluctant to leave, so it must have been good.

The new addition to the School is completed and now the school is 10 feet longer. Now the need is more desks and blackboard and all will be O.K. for the dance! pardon me, I meant school.

The Social Credit Study Group of Lindbrook held a meeting at the School last week and amongst other matters, expressions of sympathy were sent to Mrs. J. Ferguson and relatives on the death of Mr. J. Ferguson who was prominently associated with the Social Credit Movement in this district being mentioned as prospective candidate for same for the legislature. A floral tribute was sent to the funeral.

Mr. Grant Phipps who is a student at the University of Alberta, visited his sister, Miss Yvonne Phipps, who is teacher here, over the week end.

Mr and Mrs. Percy Giles, Edmonton, Mr. and Mrs. R. A. Smith, Marian, Norman and Norma, Mrs. Swabey sr., and son Frank, Mrs. A. G. Smith and Miss Campbell.

At Least This Story Is True

The editor of the Wiarton (Ont.) Echo had a pleasant surprise recently. A subscriber sent in no less than $40 for the Echo received for many years. There is a movement among Ontario editors to run a fully paid up list. That is, stop the paper when a subscription expires. But, so the editor says, this $40 weakened him.

Here at the Mercury Office we cannot equal that, but during 1935, 1936 and 1937, we did receive $19.00, $15.00, and one or two ten dollar subscription accounts.

Only the other day a man walked into the Mercury office and said that he felt he should come in and pay up, sentiments which we appreciated. His account was $18.00 but we gave him a liberal discount and we hope he went away pleased.

Mr and Mrs. Abbott spent the week-end visiting at Edberg.

Mr and Mrs. A P. Moen spent the week end visiting at Wetaskiwin.

Mr and Mrs. C. R. Burchard left last week for a motor trip to Nebraska, U.S.A.

Mr and Mrs. Doc Morrison of Edmonton spent the week end visiting with Mr and Mrs. Stephens.

Miss Betty McCarthy spent Sunday at her home here, returning to her duties at the hospital Sunday evening.

Misses M Stewart, and R. Wingrove and Mr. L. McLeay, teachers at our school, spent the holiday week end at their homes in Edmonton. Miss J. McCrea, primary teacher, spent the week end at her home in Vegreville.

YOUR LAST CHANCE to get hardy fruit trees this fall. Crab apple, plum, sand cherries, raspberries. Also various ornamental trees and shrubs. Must be purchased by October 25. Write phone or see Maurice McGinitie, Tofield.

Anniversary Services Well Attended

The anniversary services held on Sunday and Monday October 16th and 17th were quite successful. The Rev. J. T. Stephens delivered practical, interesting and inspiring messages.

The attendance morning and evening was most encouraging.

On Monday more than ever attended the supper gathering and it was a supper. Everyone was well satisfied.

The workers, male and female were kept on the hop and the service was highly commented upon.

The entertainment to wind up the anniversary celebrations was good from start to finish. Miss Hart of Lakeshore and Messrs Broughton, McDonnell, A. Swift helped the program considerably and enjoyably. The music rendered in violin solo, saxophone and voice was greatly enjoyed.

The Rev. Stephens gave a lantern lecture "on the making of a community." The pictures were clear, fascinating and told a worthwhile story.

Mr. Stephen is a racy speaker and keeps his audience in good spirit and gave a great deal of information.

The large audience welcomed the idea that he might visit us again in the future

The Board of Stewards wish to thank all who by donation and service helped to make the anniversary such a success

Tom Sawyer Coming Next Tuesday

On Tuesday, October 25 Sharp's Shows will present at the Variety Theatre, oTfield, "The Adventure's of Tom Sawyer."

As good entertainment the film version of this classic by Mark Twain would be hard to beat. Like the immortal story it has everything to stir the better human emotions. Laughter and tears, yet tears with a semblance of humor. Laughter there is and plenty of it, caused by humor as clean, bright and wholesome as youth itself. There are a few who have not read this famous story by Samuel Clemens and have not chuckled over and over again at the episodes depicted therein. You really owe it to yourself to see this picture—no better evenings entertainment ever made. Show starts at 8:30, usual admission.

AMISK CREEK

Norman Patterson was taken to an Edmonton hospital last week and on Saturday he underwent an operation for appendicitis. He is getting along as well as can be expected

Several from here attended the funeral of the late Johnston Ferguson.

Ruby Berg from Edmonton spent Thanksgiving at her home here.

Threshing is now nearly finished around here, thanks to the nice weather we have had this fall

Mr and Mrs. Dahlee, Christina and Martin from the Sharo district, visited at the R. O Berg home for Thanksgiving

Mr and Mrs. J. Jacobson of Mesia, Mr. and Mrs. C. Erickson and Donald and Mr. A. Erickson and Mrs. P O. Flaaten were guests at E A Moen's home for Thanksgiving dinner.

A new kitchen will be added to the church basement, the community are doing some donation work.

Olaf Moline was home last week for a short visit.

Gladys Olson will attend the agriculture school in Vermilion this winter.

Palmer Annebo left for California a couple of weeks ago. He expects to stay most of the winter.

Mrs L. Watt will make her home in Edmonton this winter.

Glen Olson will attend a college in the city this winter.

Mr P. O Flaaten returned last week from Viking where he had been visiting for a couple of weeks with Mr. and Mrs. Garthee.

Mr and Mrs. R. O. Berg and Lloyd visited the city recently.

Mr. and Mrs. E. A. Moen and family, Mr. and Mrs. C. Erickson and son, and Mr. A. Erickson, Mr. and Mrs A. Patterson were guests at the J. Jacobson home last Sunday.

Ashjorn Moen from Bardo was visiting with Mr and Mrs. P. O. Flaaten and at the Berg home last Sunday.

Mrs. P O. Flaaten returned from Elk Point and Hairnsburg last week. She visited friends and relatives there for about two weeks.

Grandma Moen, Mr. and Mrs. A. Patterson, Mrs. R. O. Berg and Alice were visiting at the P. O. Flaaten home last Monday.

The Ladies' Aid expect to hold their Lutefisk dinner on November 11th.

LOCAL & PERSONAL

Mr. and Mrs. Bell of Edmonton visited at the home of Mr. and Mrs Norman Scott.

Miss Munro of Vancouver is visiting relatives in Tofield and district.

Mr Mehus Sr, and Mr. and Mrs. Mehus jr. and family from Edmonton visited at the Glover residence this week.

The Rev. D. K. Allan and Messrs. A. J. H. McCauley and J. E. Stinson attended the Presbytery of Wainwright on Thursday, October 13th at Irma.

Miss Iona Rule of Edmonton is visiting Mrs. Wallen for a couple of weeks.

The members of Palestine lodge and other Masons will attend the service in the United Church on Sunday, October 23rd.

Miss Eloise Wallen returned home after spending several months visiting relatives in the United States.

Miss Isabel Robinson who was home for the week end attended the A T A meeting which was held at the home of Mr. and Mrs. Olsenberg of Bardo last Friday evening.

The Young People's Union will resume activities on Wednesday evening, October 26th.

Goose is Skunk! Hunter is Hunted

When tall tales of hunting prowess are being told around winter fires, Albert O'Dell of Delburn will be telling a yarn about the "highest" hunter of them all.

Mr. O'Dell was stalking a big Canada Goose near his home recently. He saw his victim perched upon a grain stook, just out of range. He crept forward to the required distance, paused to take careful aim when his would-be victum let him have it. The goose was a skunk.

From that moment the tables were turned. The hunter became a victim with the high little would-be victim as the stalker. Mr. O'Dell's back pedalling was accelerated. The skunk did better than keep pace— he was gaining rapidly.

It could have gone on indefinitely but the hunted hunter whirled on his tormentor, blasted him with both barrles, then sped from the vicinity.

U.F.W.A. NOTES

Mrs Jacobson entertained the U. F W A. for the October meeting.

This being the 14th anniversary of the local it was fitting that our genial director, Mrs. W. D. MacNaughton be present and by a happy coincident also celebrating her birthday

It is now 14 years since Mrs. MacNaughton came to Tofield to organize our branch which started with a membership of five, with Mrs. Johnston Ferguson as president.

The October programme took the form of a general discussion by our director, dealing with the work of central office and our affiliation with it; and with the future policies of our society.

Roll call was answered by "when and where I met my husband".

The entertaining committee treated the large number present to a real birthday feast, centred by a fine birthday cake, candles and all the trimmings

The November meeting will be held at the home of Mrs. R. Rose on the second Thursday.

OLDTIMERS RING NEW CHURCH BELL

Harvest festival services held at Holy Trinity Church last Sunday were well attended. The ladies had tastefully decorated the church with grain, vegetables, flowers and fruit. Rev. Teape gave two very fine and impressive sermons in his usual eloquent and sincere manner

The Church Bell has been installed and the congregation of 44 at the Communion service included some who were present at the opening of the church in 1912 when Bishop Pinkham of Calgary presided. These old-timers rang the bell. Among these were Mrs. Tofield, Mrs. Webb, Sr., and son, Mrs. Simmons, Mrs. Sinclair, Mrs. Robinson, Mr. Frank Pruden, etc.

The addition to the church building is well under way. During the past two weeks the volunteer labor has been very willingly given. A few men have worked all the time and others part time. If the good weather continues and time permits, the building should be finished in the near future

NOTICE OF PREPARATION OF ASSESSMENT ROLL 1938

Municipal District of Cornhill No. 367

NOTICE IS HEREBY GIVEN that the assessment roll for the said Municipal District, made under the provisions of the Assessment Act, has been prepared and will for thirty days be open to inspection at the office of the Secretary-Treasurer of the Municipal District from ten o'clock in the forenoon until four o'clock in the afternoon on every day not a public holiday except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll, or to the assessment of any property or to the assessed value placed upon any property must within thirty days from the date of this notice lodge his complaint in writing with the Secretary-Treasurer of the Municipal District

Dated this Seventeenth day of October, 1938.

J. O A. LETOURNEAU,
A.B.
Secretary-Treasurer

WELL WORKER TRAPPED, DIES

CALMAR, Oct. 18 — Trapped nearly six hours at a bottom of a 65-foot well he was digging for Simon Borys, farmer in the Calmar district, Ernest Lapoteau, 30, well driller, died in the pit Tuesday forenoon and his body hauled to the surface shortly before 2:00 p.m.

The man had gone into the two-feet-wide hole about 8:00 a.m. Tuesday to inspect the result of the blasting done the previous evening. He slipped on his rope, plunging to the bottom of the well. Frantic rescue efforts followed, including rushing of three city firemen with ropes to the scene of the accident.

Before aid arrived from Edmonton, Everette Maine, 22-year employe of J. Frederickson, Calmar district farmer, volunteered to enter the pit despite warnings by drilling experts that the shaft was unsafe. Maine was lowered on the cable used by Lapoteau.

At the bottom he fastened the rope around the dead man, who was hauled to the surface. Maine was hauled up immediately after Constable Stuart of R.C.M.P. at Leduc pronounced the victim dead and said he had probably died two hours before being hauled to the surface

Soon after it was learned that the driller had decended into the well and found himself in difficulties, Joseph and T. Lambert, well-drilling experts from Beaumont were called.

M.D. Of Beaver Lake Council Meeting

Al members of Council were in attendance at a meeting held in the Municipal Office on Saturday, October 8, 1938.

Consideration of a request submitted by Mr. A. Peterson for repair of road along the South Boundary of Sec 1-50-16-W4thM., resulted in assurances being given that the matter would have the immediate attention of Council.

The death of Mr. D. Motiuk, indigent relief recipient was reported and instructions were given that the position of the M.D. with regard to responsibility [illegible] the estate for repayment of advances, be investigated.

[illegible] Landbeck's application for relief at $7.50 monthly was approved. Secretary was instructed to obtain information [illegible] to the authority responsible [illegible] assistance required by transients [illegible] additional [illegible] employ [illegible] grant. Pension increases [illegible] $20.00 [illegible] were approved for M[illegible] and Mrs. J. B. Sh[illegible].

Mr. M. H. Dahl was appointed to conduct the sale of lands under the provisions of the Tax Recovery Act, to be held November 1, 1938.

At the invitation of Council Dr. J. L. McPherson, M.L.A. spoke for a few moments briefly outlining the road work plan of the Provincial Government, stating the projects now operating appear to be giving general satisfaction. Dr. McPherson expressed some doubt as to whether the season may not be too far advanced to permit of arrangements being made to cover this M.D. and suggested that any Districts wishing to take in the plan during 1939 should communicate with the Department.

Council appeared to feel that in all probability sufficient time would not be available for adoption of the scheme for this season. The thanks of the meeting were extended to Dr. McPherson for his kindness in attending and explaining the plan.

The next meeting will be held on the 29th of October, commencing at 10 o'clock in the forenoon.

Adjournment.

Same Troubles

When Noah sailed the ocean blue,
He had his troubles same as you.
He drove ad drove and drove his ark
Until he found a place to park.
—Wall Street Journal

TESTED RECIPES

BY BETTY BARCLAY

Whole-Meal Macaroni Dish

Easy to prepare, wholesome and inexpensive.

½ lb. macaroni
1 cup milk
2 tablespoons butter
1 can tomato soup
Salt and pepper

Boil macaroni in plenty of boiling salted water till tender. Drain. Melt butter in saucepan and add the cooked macaroni. Heat well and add the milk. Cook macaroni in butter and milk until almost dry. Add tomato soup and cheese. Heat until cheese is well melted, stirring until flavor blends. Serve hot.

Chocolate Mint Rennet-Custard

1 pkg. chocolate rennet powder
1 pint milk
½ cup chocolate syrup
1/2 cup marshmallow topping
Few drops peppermint flavoring

Make rennet-custard according to directions on package. Then chill in refrigerator. When ready to serve, mix marshmallow topping, syrup and a few drops of peppermint flavoring together thoroughly. Put on top of each rennet-custard and serve at once.

Coal 'Gift Wrapped' Now Whole Package Goes in Fire

CHICAGO, Sept. 26— Dressing up the ice box to compete with the new electric refrigerators wasn't so hard, nor was it difficult to doll up the dingy stove to resemble a radio, but what could one do with lumps of black coal to make them as clean and easy to handle as oil?

The industry found its answer, and as a result, the National Association of Packaged Fuel Manufacturers met here last week to talk over problems of the new business.

Packaged fuel is usually fine screenings of coal compressed into cubes and neatly wrapped in heavy paper so that it can be handled as daintily as if it were a holiday gift done up in tissue paper wrappings. So well has the new form of the old heating material been received in the three or four years it has been on the market, that 85 plants are now turning it out in many parts of the country, Murray R. McMillen of Kalamazoo, Mich., Secretary of the Association, reported.

Of Recent Growth

Processors of packaged coal formed their organization last year, and the meeting here this week was only the second annual convention of the industry. Representatives of 21 firms attended. Among them were regular coal dealers who are processing slack and selling the wrapped produce as a side line, as well as ice dealers and even distributors of fuel oil who have entered this field.

Packaged fuel, which may be either compressed coal or petroleum coke, came on the market in response to a demand for a cleaner combustion material that could be used in regular coal furnaces, said Mr. McMillen. Oil and gas furnaces took the dust and grime out of the basement and made that once smudgy place into a modern recreation room, with steel tube chairs, ping-pong table, and all the rest. Moreover they took the shovel out of the housewife's hand and released her from a stoker's job to which she never was thoroughly reconciled.

This spurred the coal industry. Some three or four years ago a company put on the market a machine for compressing slack into cubes and holding it together with starch. This machine started the industry, said Mr. McMillen.

10 to 14 Pounds

Most concerns packaging coal now use this machine. They get the slack or petroleum coke shipped to them in its usual state, compress it, wrap it in a heavy craft paper and deliver it either to the retail dealer or direct to the consumer. The usual practice is to wrap about a half dozen fuel cubes into one package which weighs from 10 to 14 pounds.

This package, delivered and stacked by hand, can be handled without gloves by coal users. To feed the fire, a person simply places a package or two of coal in the furnace or stove. The wrapped coal costs a little more than the old-fashioned kind—about $1 a ton more—but people are willing to pay the difference, said Mr. McMillen.

In some cities it is the wealthier residents who are the chief users of package coal. In others, he said, it is those who live on weekly pay envelopes and find it hard to get enough money together to order loose coal by the ton. These people drive over to the coal dealer, stack their purchase in the rear seat of the automobile, and take it with them.

Package coal is in demand, too, for spring and autumn use, when people do not wish to make big fires and find it convenient to throw a package or two in their furnaces or fireplaces just to take the chill out of the house, Mr. McMillen said. —Christian Science Monitor.

Our Yield Per Acre

WELL, COUNTRY NEWSPAPERS DO NOT EXACTLY CALCULATE THEIR YIELD BY THE ACRE, BUT LIKE FARMERS, THEY DO HAVE GOOD AND POOR YIELDS. EACH SUBSCRIBER TO THE NEWSPAPER BUSINESS OFFICE IS LIKE AN ACRE TO A FARMER. SOMETIMES THEY YIELD GOOD, OTHER TIMES NOT SO GOOD. DRY WEATHER, POOR PRICES, HAIL AND FROST HAVE THEIR EFFECT ON OUR YIELD TOO AND OFTEN WE WAIT YEARS BEFORE OUR RETURNS COME IN.

IN A SHORT TIME WE WILL BE SENDING OUT NOTICES TO ALL SUBSCRIBERS IN ARREARS AND WE HOPE FOR A GOOD RESPONSE. WE DO NOT EXPECT TO GET ALL THE ARREARS BUT WE DO HOPE TO GET A GOOD YIELD. ALL WE ASK IS THAT SUBSCRIBERS TREAT US AS GENEROUSLY AS NATURE TREATS THEM.

THE MERCURY

Municipal District of Beaver Lake No. 486

Notice is hereby given, that under the provisions of The Tax Recovery Act, 1938, the Municipal District of Beaver Lake No. 486, will offer for sale, by public auction, at the office of the Secretary-Treasurer, in Ryley, Alberta, on Tuesday, the 1st day of November, 1938, at 2 o'clock in the afternoon, the following lands:

M-m-m-m
that FISH smell's good!

DRESSED FILLETS OF HADDOCK
1 cup of milk
½ cup of flour
1 tablespoon of mustard
2 cups of grated old Canadian cheese
2 tablespoons of butter
fresh chopped parsley
Prepare a white sauce with the butter, the flour, the mustard and the milk, add the grated cheese ... Wipe the fillets with a damp cloth, cut in individual pieces, cover each piece with the cheese sauce, sprinkle with chopped parsley, place on well buttered oven dish, and cook 20 minutes in moderate oven. Fillets of any other kind of Canadian fish may be used instead of Haddock fillets.

THE KIDDIES' EYES will sparkle when you bring in an appetizing platter of Fish. It's a dish fit for a king, with its delicious, palate-pleasing flavour . . . yet so inexpensive that you will have money left over for extra needs.

You can enjoy Canadian Fish and Shellfish all the year 'round — over 60 different kinds — fresh, frozen, smoked, dried, canned or pickled . . . as often as you wish. Many tempting recipes make it easy for you to offer delightful variety to hearty appetites.

ANY CHURCH SUPPER—

AFTER THE sweat and dust of the harvest field; after the roar and rattle of the tractor and thresher; after the rush, rush of the grain laden trucks; yes, and after the money is in circulation, comes the annual church supper. There is something particularly alluring about a church fall supper. The long tables, the steaming vegetables, the cakes and pies all have their particular appeal. But apart from all these delicacies there is a charm hard to define or describe but easy to appreciate. Chicken "run out" but beef is eaten with the same gustatory delight. Beef may "run out," but such is the charm of fall fellowship that cold ham equally delights the palate. Chairs may be hard, benches may not have backs, a diner's legs may have to wrestle with the legs of a trestle; but these are small things, for all present are smiling. The fork with the red cotton tied to the handle may not be at all like the favorite fork at home, the knife may not feel quite the same as the everyday choice; the cup may not have the customary shape—but what matters? There are the waiters, everyday acquaintances, hurrying to serve; there are well-known people coming in and going out and sitting all around. There is the atmosphere of peace and plenty, all stirred up in a mixture of hustle and bustle and a desire to please. A genial company, generosity expanding, a kindly spirit all pervading.

Thank Heaven modernity has done little to change the locale of the church supper. And again thank Heaven no one congregation, no one church, no one creed and no one race can lay claim to a monopoly of this institution. Those on the western side of life's slope can recall attendance at many church suppers in their youth. Those in the spring time of their existence, enjoy the church supper as a delight in the ever widening horizon of their experience. Those in the prime of life, mostly workers in the cause, pay homage to the experience and wisdom of age and welcome most heartily the young.

It may be that the growing season having ended and strenuous labor for the time being having ceased, human nature demands celebration. And like the peoples of old, celebration takes the form of feasting. Or perhaps it might be just a means of earning money to pay the minister. But whatever the guiding motive, long may the church fall supper as an institution last and hundreds of churches, large and small, scattered hither and yon, continue to feed old and young with inspirational and gustatory delights.

VALUE OF FIRST AID TRAINING—

(Edmonton Journal)

MANY HAVE been the cases recorded of the value of first aid training in saving life. One that occurred in Windsor recently is of particular interest, not because it was spectacular but because it brought home the worth of knowing what to do and the ability to do it promptly. A young chap gashed a leg badly on a broken bottle. His chum 17 year old Ronnie Thorne, son of a St. John Ambulance corps member and holder of a Boy Scout first aid certificate, immediately applied a tourniquet. Later examination showed an artery had been severed and the injured boy probably would have bled to death before a doctor's services could have been secured.

All boys and girls should know the essentials of first aid. All they are taught along these lines at school, in youth organizations or by other authorities is clear gain. The local brigade of the St. John Ambulance association, it was announced recently, hopes to double its membership this winter. This is one of the organizations that is doing much to make first aid readily available. Success should attend its efforts to enlarge its membership and its usefulness.

WHY NOT A WHEAT RESERVE—

(Financial News, London, Eng.)

THE GOVERNMENT of more than one agricultural country is faced with the necessity of buying up a large part of this year's unusually large wheat crop in order to prevent an excessive fall in the price. This being so, there is no reason why the governments concerned should not make virtue of necessity by declaring that the Government-owned wheat stocks will henceforth form a part of the note issue. In doing so they would obviate a technical deterioration of their monetary position which would otherwise result from the expansion of currency or credit in connection with the official wheat purchases. . . . It is true that storage costs for wheat are many times larger than those for gold, but since the Government has to acquire the wheat in any case, no additional expense is involved.

A shy little hamburger stand on the far south side advertises itself as "The Last Ground Up."—Charles Collins in Chicago Tribune.

"Most of the things that are put off until tomorrow should have been done yesterday."—Abbie Kastanek.

THE WORLD OF WHEAT

By R. G. L. Strange, Director "The Crop Testing Plan."

The whole world has had a miraculous escape from a devastating war.

Had war occurred, millions of lives would have been lost, and billions of dollars worth of property would have been destroyed. The danger came because of determination of Germany to acquire new lands.

Some people consider that the German — and one can add to this the Italian and Japanese — motives are those of unwarranted aggression, of a love for war.

A study of Hitler's books and speeches, however and of the matters underlying worldwide economy, convinces me, at least, that the real motive actuating the aggression of Germany, Italy and Japan is simply that of a desire to secure the essential foodstuffs and raw materials necessary for the wellfare of their people, and which products today are denied to them, in the quantities they need, by the high tariff policies of the democratic countries of the world.

The way to satisfy Germany and the other "have-not" countries, and so to avoid war in the future, in my humble opinion, is simple. It is to reduce existing high tariffs, and so permit the exchange of more raw materials and foodstuffs of the farmers for more of the goods and the commodities of the world's industrial workers.

Following factors have tended to raise prices:— Depreciation of the pound sterling — Australian crop starts to deteriorate unlikely to approach last year's outcome—India purchases Australian wheat — Roumanian wheat heavily infested with wheat bug—Unsatisfactory soil condition in the U. S. Southwest —Russian threshing still behind a year ago.

Following factors have tended to lower price:— Further beneficial rains in the Argentina—Russia exports in volume — Pressure of low grade French wheat—Abundant subsoil reserve in the Balkans—Belgium releases wheat held for emergency—European winter wheat sowing progresses normally — Native wheat supplies abundant in most of Europe —U.S.A. corn oats and barley estimates increased.

THE MARVELS OF SCIENCE

A tiny speck of green light moving on a screen of frosted glass shows airline dispatchers the exact direction of approaching planes, according to an announcement by Paul Goldsborough, President of Aeronautical Radio, Inc., following the recent tests of a new development for locating airplanes in flight. Even though visibility is completely masked out by fogs or blinding rain storms, the new device, which operates by radio waves, enables airport personnel to follow precisely the oncoming plane and, by return radio telephone, to guide its pilot to the field.

This major contribution to air navigation was developed by Bell Telephone Laboratories for the Western Electric and Northern Electric in Canada when used in connection with the Civil Aero beacon system, the new instrument will enable airline operators to ascertain the location of their aircraft at any time.

The system provides for indication on any of ten wave lengths which may be selected remotely. As each pilot talks, the spot of light moves instantly to its correct position on the circular screen of a cathode ray tube. Compass markings inscribed around the screen's edge enable the airport dispatcher to give the pilot his exact bearings by return radio telephone. A pick-up antenna of special design is employed and this may be situated at any remote point. Connection between the antenna and the dispatcher is made over a single telephone line.

AVOID ACCIDENTS
LEVEL CROSSINGS

With the advent of fall and early winter conditions, need of motorists exercising special care at level crossings is again emphasized by officials of the Alberta Motor Association.

Only a few days ago a news report told of five persons being killed at a level crossing accident in Ontario. Similar accidents have been reported in recent weeks in other parts of the country, each with its quota of fatalities.

In each province satisfaction is expressed over the policy of eliminating level crossings where this is possible. A recent government announcement was to the effect that a right-angle turn on the Jasper highway, east of Spruce Grove, is to be eliminated by the construction of an overpass some two miles further west, total estimated cost being $50,000.

The province is seeking to have part of this cost shared by the dominion through a grant from the grade crossing fund, administered by the transport board.

At the present season, when driving conditions are so hazardous than during the summer, it is more necessary than ever for drivers to use special care at railway crossings. Vision is not as good as in other times, making driving more difficult, while there is always the danger of skidding. Avoid accidents by deciding to "stop, look and listen," A.M.A. officials advise at this time.

SCALES OF SOUTH AIRLINE HIS WEIGHT TOO MUCH FOR

Winnipeg, Oct. 17. Fastest transport aircraft in the world, Trans-Canada Air Lines' Lockheed 14's also boast a large cargo capacity. But that capacity will be taxed to the limit if many persons like C.C. Judd, a New Guinea miner, follow the lead of the hundreds who have taken to air travel.

Stepping up to be weighed before receiving his airline ticket from Sidney, Australia, to his home camp, the huge miner smashed the scales. He weighed 294 pounds. Judd's partner, H.H. Allen, turned the indicator to 210 pounds.

SKIMLESS MILK ARRIVES AS CREAM GLOBULES SUCCUMB TO PRESSURE

ITHACA, N. Y., Oct. 8—Commercial success in making milk from which the cream cannot be skimmed was announced yesterday by Cornell University.

Neither the milkman nor "Pa" [illegible] off the top of the morning bottle first, can get the cream. It can't be done, the announcement says, even if the bottle is saved for a year.

The feat is accomplished by a process of getting the fat, which forms cream, so completely distributed through the milk that it is never again able to unite.

The process has been under development for seven years. As now com[illegible]ly through the milk and are never [illegible] is a steel chamber with pistons to drive fresh milk through small openings.

Pressures of 2,000 to 2,500 pounds force the fluid through slits thin as paper. The result is to crush the fat globules so they distribute complete- pleted, the cream spreading machine able to get together again.

Commercial applications have been held back because of the ease of adulteration. Butter, powdered milk, and other substances could be tossed in and never be detectible afterward. Now Professors H. P. Broeckner and P. F. Sharp of the College of Agriculture have perfected chemical tests for any adulteration.

The announcement says that commercial tests of the fate of skimless milk have been completed in several Canadian cities and in Buffalo, Rochester and Utica. Housewives at first objected at not being able to get their cream from the top of the bottle. But they and other objectors, the announcement states, are coming around to prefer the new product.

There were objections from milk companies which had built reputations on the depth of cream in the top of the bottle. Golden colored milks treated in this way lose a little of their color.

SERMON ON MOUNT SPIRIT IS URGED

NEW ORLEANS, Oct. 18—Postmaster General James A. Farley told the eighth National Eucharistic Congress Monday night President Roosevelt feels any present world problem would be solved if approached in the spirit of the sermon on the mount.

In a speech prepared for delivery before the Roman Catholic assemblage, Farley [illegible] with [illegible] and added: "one [illegible] Almighty [illegible] and [illegible] in the light of what is happening in the world today."

The postmaster general was guest speaker at a reception for George Cardinal Mundelein of Chicago, papal legate to the congress.

Farley said that as a catholic himself he is always aware there "is no force in the world today" that can destroy foundations established on "the bedrock of eternal truth."

Then without mentioning any foreign country by name he added: "The nation, therefore, that takes its citizens away from its religion and asks them to grow up without [illegible] standards [illegible] of [illegible] roughly a [illegible] and the other [illegible]."

FOR SALE—1911 Singer Sewing machine. Excellent condition. Cost $1[illegible]. Cash price $50.00.—Apply to J. [illegible] Griganich, Tofield.

THE WEST AND THE TARIFF

It has been suggested that a general lowering of tariffs in Canada would be of more lasting benefit to the prairie provinces than a policy of fixing a minimum price for wheat. Western farmers will agree wholeheartedly with that suggestion. The question is: Will the manufacturing centre of Canada submit to any plan which will substantially lower tariffs? For more than a generation the farmers of the prairie provinces have been battling against the high Canadian tariffs. Time after time very able men have been elected to parliament, pledged to a low tariff policy. The result of all this agitation and effort has been practically nil.

Before giving up the measure of price protection afforded by the fixing of a minimum wheat price, the farmers of Western Canada should be positive in other minds that they are going to obtain lower tariffs. The experience of thirty-five years of political effort suggests that no important party in the federal field will undertake to cut tariffs appreciably.

It is certain that a political party, seeking election on a tariff policy low enough to give tangible benefits to the agrarian west, would get very little support in the industrial sectors of the east. A perusal of the remarks when tariff matters were under discussion by members from industrial constituencies as revealed by the House of Commons debates, clearly shows the trend of their ideas as being diametrically opposed to any lowering of tariffs whatsoever.

Most farmers in the west look upon the tariff question as a political football which is brought out and kicked around immediately prior to federal elections. These farmers have been "bamboozled" so often on this question in the past that they put little faith in it for the future.

During the last session of the House of Commons, Hon. C. A. Dunning, minister of finance, said: Since the present administration came in to office, Canada has been a contracting party to two of the most comprehensive trade agreements that have been concluded since the Great War. Our agreement with the United States in 1935 and our agreement with the United Kingdom in 1937 resulted in the reduction of effective duties on a wide range of Canadian imports."

Duties were reduced, it is true, through these trade pacts on a wide range of imported articles, but the reduction was so comparitively trivial on the things the farmers of the west really need to buy that no appreciable benefit has been discernible. The western wheat growers have a wheat board and a minimum price if the tariff were cut by 50 or 75 per cent they might be willing to give up what they have gained. The question is: Will it be? And the probable answer is: "No."—Wheat Pool Bulletin.

HOW THE CHINESE BUY CANNED FRUITS

Canadian canned fruit and vegetables are well liked in Hong Kong and Canadian exporters are aware that an important feature of the Hong Kong and South China market is the value placed on an attractive brand or trade mark, or as the Chinese call it "chop." In making sales to the Chinese population, the "chop" is of the greatest value because a considerable proportion of the buying population cannot read English. They associate a particular requirement with a certain size shape or color of the container. An original purchase of a canned product will be made chiefly on the basis of price but if the product proves satisfactory, the buyer will examine the label carefully and in future purchases will always insist on the can with the same chop or label. The types of labels used by Canadian packers, states the Canadian Trade Commissioner at Hong Kong, are satisfactory for the South China market.

HEALTH

LEGENDS OF LONGEVITY

Some extraordinary misconceptions exist as to the longevity of both ancients and moderns, according to Dr. C. F. Martin, in an interesting article in the current number of "Health". Writing on "The Business of Growing Old", Dr. Martin says:

"There is in annals a long list of [illegible] whose age allegedly far exceeded [illegible] years. Let me cite but one—and a famous one at that.

"Tom Parr was born in 1483 and died at the age of 152 years. It is recorded of him that he was married at 80 and had two children, but apparently the true course of love did not run smooth. He did penance at the age of 105 and married again—a widow aged 122. Being a pathological curiosity, he was brought from his English countryside to London to meet Charles I—had a wonderful reception and for the first time in his life tasted wine—shortly after which he died!

"William Harvey, the discoverer of the circulation of the blood, performed a post mortem on Thos. Parr, but tells us that he failed to find anything wrong with his organs.

"Of this and so many other legendary cases of longevity, no one can say with assurance that the records were inaccurate. In the last 100 years when our means of registration of births and deaths have been proved we find no such extreme cases.

"As a matter of fact, only about one person in 75,000 reaches the age of 90.

"The answer to all this can best be found in the province of Quebec. Here the census of births, marriages and deaths among French Canadians is practically complete for more than 300 years. A remarkable study by Charles Tache and Abbe Tanguay of the period 1608-1876 reveals the truth.

Up to 1876 421 reputed centenarians had died in Canada. Many of these had been imigrants or Indians the date of whose birth could not be verified. Further accurate study reduced the list to 82 names of individuals, whose ages could be absolutely proved by authentic documents—and of these 80 were French Canadians— 73 were positively shown to be less than 100 years old—and only 9 have been genuine centenarians—and of these 9 only 6 lived to be over 100 years. The one remarkable instance was that of a man who lived to a 113 and who was as a matter of fact underestimated his age, which was given as 105 at the time of his death! his son aged 82 was at the funeral.

Francoise Lecompte, who passed as upwards of 100 years when she danced the minuet with the Duke of Kent, Queen Victoria's father, when he was stationed at Quebec, is proved to have been only 94 when she died in 1793."

C. Gallenger Buys Warner Farm at Clover Bar

Involving a sum reported to be in the neighborhood of $35,000, the fine farm operated by D. W. Warner, now deceased, two miles east of the city, in Clover Bar, has been purchased by Claude Gallinger, well-known Edmonton businessman who owns a 1,000 acre farm at Tofield, it was announced Wednesday.

Comprising 380 acres, of which 300 are cultivated, the Warner farm is recognized as one of the best in this district. In addition to the farm buildings, there is a fine residence built at considerable cost about 1903.

Confirming the deal, Mr. Gallinger told the Journal that he proposes to make his home on the newly acquired farm. For many years, he has made his home in this city, living at 9928, 104 st.

It is also Mr. Gallinger's intention to develop another registered Shorthorn herd on his new farm. He has 125 head of these animals on his Tofield farm and has made sales in recent years to prominent purchasers in various parts of the country, including the Alberta department of agriculture.

Details of the deal, which was negotiated directly between Mr. Gallinger and Mrs. Mary J. Warner, widow of Mr. Warner, who was a former M.P., was not disclosed.

It was learned however, that in addition to a cash payment, Mrs. Warner acquired a section of land which Mr. Gallinger owned, some two miles north of Tofield. Mrs. Warner, who has been living on the Clover Bar farm, plans to make her home in this city.—Edmonton Journal.

Boomerang

An office boy dashed into his employer's office and asked loudly if he might go to the match.

Startled, the employer looked up. "That's no way to ask permission," he said. "Let me give you a lesson in etiquette. I will go out and act your part. You sit at my desk and make believe you are the boss."

The youngster sat down and the man left the office. Presently he knocked on the door. The boy told him to come in.

The employer entered, noiselessly "I wonder, sir," he asked, meekly, "if you would be so kind as to let me have the afternoon off? I want very much to see a football match!"

The youngster looked up, grinning broadly. "Why certainly!" he exclaimed. "And here's a dollar to have some fun with!"—Tit-Bits

Friends Gathered To Bid Farewell To Mr. and Mrs. Frith of Ministik

About fifty friends and neighbours gathered at the home of Mr. and Mrs. J. Frith for a farewell party on Saturday, October 15th. During the evening a presentation was made of a handsome electric floor lamp from the Ministik community. Mr. and Mrs. Frith have farmed in the community for the last 30 years and during that time has always taken an active interest in School and Church work, in fact in all affairs pertaining to the betterment of the community. Mr. Frith is retiring from farming on account of ill health and are making their home in Edmonton. All his friends and neighbours join in wishing him health and happiness in their new home.

Threshing is all done for another year in this district.

We notice the hockey boys are getting busy, holding a dance last week, and getting organized. They must be expecting cold weather soon, but we hope not.

Congratulations to Andrew Furgurson, whose marriage to Jean McGregor of Edmonton took place on Wednesday, October 19th. They are spending their honeymoon in Vancouver.

KINGMAN

Rev. Milo Stutzman has gone to Goshen, Indiana, for a two week's stay.

Mr Martin Bjorgum, Alvin, Oval and Myrtle left for a trip to Colorado and Minnesota last Wednesday.

Mr. Forman Widmann and family have moved to the country near the Percy Sutton farm.

Mr. Shalin and three daughters have moved to town for the winter. The girls will attend high school.

Mr. Thomas Rognese is siding up his house.

Mr. J. R. Dettwiler is building a water tank for Mr. Emil Erickson.

The Baptist Church people are levelling up their church grounds which is quite an improvement.

Mrs. Alex Asp spent the week end at Daysland with her mother and sister.

Miss Della Fugleman has gone to spend a few days with her parents at [illegible].

Dodds Old-Timers Plan Retirement

DODDS, Oct. 26—Mr. and Mrs. Jacob Brenneman, farmers in this district for 25 years, plan to retire shortly. During their years here, they have built up a fine farm and the property will be operated by a son, Joseph Brenneman.

Mr. and Mrs. Brenneman will leave shortly for Albany, Ore., to spend the winter there. They plan to spend each summer in Alberta.

BARDO

Threshing wound up last week, with the Foshaug Bros., Bosen and Moen and Joe Stauffer's outfits finishing their runs.

The elevating grader started work here last week. They expect to build six miles of road before freeze-up. This will be an all winter road.

While burning brush along the road, Lloyd Whillans lost his wagon and rack when fire caught in the straw.

About sixty men and three tractors with plows fought fire during the wind storm on Tuesday. The fire started by the road where they had been burning brush and swept across A. Haukedahl's and Leif Foshaug's land. The granaries and haystacks were saved.

P. B. Anderson is seriously ill with pneumonia.

Milton Jevning and Merlin Foshaug left by bus last Saturday for Victoria. They expect to spend the winter at the Pacific coast.

Mr. and Mrs. Pat Williams of Calgary spent last week at the Ness home. Mrs. Williams was formerly Margot Ness. She has been a patient at the Calgary sanitarium for four years. Her health is much improved.

Rebecca (Toots) Eide had the misfortune to break her arm and was taken to an Edmonton hospital under Dr. Law's care. She returned home last week.

Mr. and Mrs. I. Ness, Johnny Kozak and Eddie Steen attended the Kinsmen's dance in Camrose which featured Mart Kenny's famous orchestra.

Bardo Ladies' Aid annual sale and Lutefisk dinner on Saturday, Nov. 5 at Bardo Church, starting at 12 o'clock noon.

Bardo Male Chorus practice on Monday, October 31st. All members are urged to attend.

The Young People's Societies of the Edmonton Circuit held a rally at the Bardo Church last Sunday. Rev. Hoverstein conducted the services in the morning, in the afternoon the Bardo Y.P.S. gave a program and the Edmonton Y.P.S. gave a program in the evening. A large crowd attended all meetings. Dinner and supper was served in the basement.

A new board floor has been laid in the Church basement, donated by the L.D.R. All work was done by local men.

Mr. and Mrs. J. Haukedahl of Wetaskiwin visited with the A. Haukedahl's last Sunday.

The O. Flaaten family visited at the Jenson home on Sunday.

The Teachers of the Tofield A.T.A. held a business meeting at the home of Mr and Mrs. S. Olsenberg on October 14th.

LOCAL & PERSONAL

The W. A. are holding a Thanksgiving Supper on Monday, October 31st, at the Curling Rink, from 5.30 on. Price 35c.

The Ladies of the United Church will hold their annual sale of fancy work and home-cooking on Saturday, December 3rd, in the Institute rooms from 2 to 6 p.m.

Mr. John Nahrebeski left Sunday evening on the flyer for the East.

Mr. Tom McBratney from Edmonton spent the week end at his home here.

Arthur Beirnes, who is attending varsity in Edmonton spent the week end here.

Mr. and Mrs. H. Green and baby spent the week end visiting in Edmonton.

Mr and Mrs. Jack Cowan and children of Edmonton, Edith Borden and Betty McCartney, both nurses at the General hospital in Edmonton, spent Sunday at the H. Borden home.

Mr and Mrs. Geo. McLaughlin and Enid from Wetaskiwin visited Tofield on Sunday.

Mr. and Mrs. Jobb motored to Daysland to visit with Mr. and Mrs. Gordon Jobb.

Mr Glover, Stan and Norman, spent Sunday at Bittern Lake visiting Mr. and Mrs. Geo. Glover.

Mr and Mrs. Thompson and Betty from Leduc spent Sunday here.

Mrs Verlyn Moss is visiting her parents at Hardisty.

Mr. and Mrs. J. D. Hannan of Camrose were visitors in town on Monday.

Mrs. E. Woertkerick is visiting at Vegreville for a couple of days.

Miss Edith Robinson left for Vermilion Agricultural College last Thursday. She is taking the Two Year Course-in-One. Edith had the distinction of being neither late nor absent during the whole of her Public and High School career—a period of eleven years.

Mr. and Mrs. Appleby motored to Vermilion with Clifford last Thursday. He is attending the agricultural college there.

The Bingo party staged by the Student's Union last Saturday was quite a success. There were quite a few present.

Euphemie McBratney was successful in obtaining third prize at the recent Carnival Queen contest held at Ryley. Miss Teare of Ryley was crowned queen of the carnival. Euphemie was awarded a lovely camera in appreciation of her efforts.

Farmers And The Goods They Buy

Mr. William Green, President of the American Federation of Labor, has just stated at the annual meeting of his organization that he stands today for a thirty hour week and for higher hourly rates of wages for his workers and he asks "If anyone thinks that this dream would be harmful to the country I am sure we would like to know of it."

We take leave courteously to point out to Mr. Green that we believe his proposed plan would be harmful to all farmers, to all engaged in trade and commerce, and in the end harmful to his own workers for the following reasons.

The population of the United States of about 130 million is roughly divided as follows: one third, farmers—one third industrial workers—and about one-third engaged in wholesaleing, retailing, banking, importing, exporting, the civil service and occupations other than agriculture and industry.

It is obvious, therefore, that should the one-third of industrial labour work still shorter hours and receive still higher hourly wages, that the price of goods these people manufacture must be increased for the simple reason that labour forms the greater part of the total cost of such articles.

Because these goods will be dearer, then the farmers engaged in agriculture and the rest of the one-third of the people who are neither farmers or industrial workers, will be unable to purchase as many of these goods for the reason that the incomes of the farmers and the others will not have been raised by Mr. Green's plan.

From this would spring two effects, one being that the standard of living of the farmers and of the balance of the population other than agricultural workers will certainly be lowered. The second effect will be that because the goods are higher priced and consequently that less of them could be purchased, less, of course, will be manufactured, and this in turn will throw untold additional numbers of Mr. Green's workers out of employment.

Now these additional unemployed will have to be supported, either by the balance of the members of the American Federation of Labor, or by the tax payers. In either case it means that the standard of living of the tax payers and, of course, of the members of the American Federation of Labor as a group will be lowered and most certainly will be lowered drastically for those members of the American Federation of Labor who are thrown out of employment.

The real remedy for these troublesome times would be seen as exactly opposite to that suggested by Mr. Green, i.e. that longer hours should be worked, so that goods could be produced cheaper, so that the farmers and others can buy and enjoy more of them, so that employment in Mr. Green's organization can be increased, hence the standard of living of his own workers improved.

Every word said here about the United States applies of course equally well to Canada, where the Searle Index reveals, the cost of goods—mostly industrial—that the farmers have to buy for living and production is 37 per cent higher now than it was before the war, and that the farmer receives on the other hand, for the products he has to sell, approximately 30 per cent less than he received before the war, while the hourly wages of industrial labour, as published by the Canadian Department of Labour, are 82.9 per cent higher than they were before the war.

TESTED RECIPES

SAUCES FOR THIS AND THAT

It is often said that the sauce makes the dish. This may seem an exaggerated statement, but it is true that a great sauce adds flavor and appeal to the food with which it is served and that a well-seasoned sauce seems an necessary complement to many foods. Cream sauce with its innumerable variations is undoubtedly the most generally used of all the sauces. A few practical, easily prepared variations of the sauce with their uses are suggested for the homemaker who is looking for new ways of serving simple dishes.

* * * * * *

Medium Cream Sauce
Basic Recipe

2 tablespoons butter
2 tablespoons flour
1 cup milk
Salt and pepper

Melt butter. Blend in Flour. Add milk gradually and cook, stirring constantly until mixture thickens. Season with salt and pepper. A little paprika added to the sauce gives it a richer color.

Variations of Cream Sauce

Cheese Sauce: Add ½ cup grated cheese to cream sauce. Beat well. Serve with vegetables such as cauliflower and asparagus.

Egg Sauce: Add 1 hard-cooked egg, chopped, to 1 cup cream sauce. Serve with fish.

Parsely Sauce: Add 1 tablespoon finely chopped parsely to 1 cup cream sauce. Serve with oysters or fowl.

Celery Sauce: Add ½ cup chopped cooked celery to 1 cup cream sauce. Serve with oysters or fowl.

Curry Sauce: Add ½ teaspoon curry powder to 1 cup cream sauce. Serve with eggs, lamb, rice, chipped beef, chicken.

Caper Sauce: Add ¼ cup capers to 1 cup cream sauce. Serve with fish.

Onion Sauce: Cook 1 cup sliced onion for 5 minutes. Drain and rub through a sieve. Add to 1 cup Cream sauce. Serve with pork chops, mutton or hard-cooked eggs.

Vegetable Sauce: Use ½ cup vegetable stock and ½ cup milk as liquid in making cream sauce. Add ½ cup cubed vegetables. Serve with cooked vegetables.

Mock Hollandaise Sauce: Make 1 cup cream sauce. Pour some of hot mixture over beaten egg yolk. Add to sauce. Cook 2 minutes. Remove from heat. Add 1 tablespoon butter. Serve with Vegetables or fish.

Protect Potatoes From Frost Injury

Low temperature injury to potatoes is a serious problem to farmers in practically every potato section of Canada. Losses from this type of injury may also affect dealers, transport companies, and consumers. Losses continue not only throughout the late summer, to the end of the shipping season, but also in poor stands resulting from the use of frost injured seed potatoes the next season. Frost injury is not always visible on the outside of the potatoes and may take the form of internal breakdown, which is often difficult to distinguish from symptoms associated with other disorders such as bruises, wilts, net necrosis, and stem-end browning.

According to R. H. Hurst, of the Dominion Laboratory of Plant Pathology, Charlottetown, P.E.I., potatoes dug from part of a field before a frost remained in sound condition throughout the storage season, whereas the potatoes dug from the remainder of the field after a frost were rotted severely from freezing injury by coming into contact with the frozen top soil. If frozen tubers and soil are carried into storage, injury is bound to result. It is sometimes possible to dig potatoes late in the day, after the top soil has thawed out and escape injury.

The logical control of low temperature injury necessitates protecting the potatoes from frost. Thus it is important to harvest a crop in advance of the time when such low temperatures usually occur. While no definite date can be set, experience has shown that digging operations should be completed before mid-October if the field frost hazard is to be avoided. When frost is evident or suspected, all affected tubers should be sorted out immediately after digging, and this portion of the crop should not be mixed with potatoes dug before frost sets in. Furthermore, potatoes dug after frost should not be used for seed unless thorough examination reveals the entire absence of low temperature injury. This precautionary measure is based upon field tests measure is based upon field tests which demonstrated that the use of such tubers resulted in both misses and weak plants.

The crop should be stored in rooms having a temperature ranging between 35 to 40 degrees F. By so doing, the potatoes will not turn sweet and necrosis will not develop. Potatoes transported during the cold months should be provided with protection against frost at all times. They should be carried in a heated car and loaded so as to assure the free circulation of air throughout. When it is known that potatoes have been undercooled they must not be handled until it is certain that the temperature is above the freezing point.

He Sold His House

THE MAN REALLY DIDN'T NEED IT OF COURSE. HE HAD ANOTHER ONE TO LIVE IN. BUT HE WANTED TO SELL THE EXTRA HOUSE. SO HE INSERTED A CLASSIFIED AD IN THE MERCURY AND WITHIN THREE DAYS OF THE FIRST INSERTION THE HOUSE WAS SOLD.

YOU, TOO, MIGHT HAVE SOMETHING TO SELL THAT IS SALEABLE AND WHICH SOME OTHER PERSON IS DESIRING. AND YOU TOO, WOULD PROBABLY BENEFIT FROM A CLASSIFIED AD IN THE MERCURY.

New Surgical Method of Giving Muscular Movement To Artificial Limbs Found

NEW YORK, Oct. 24— A new surgical method of giving muscular movement to artificial arms, hands and fingers was announced to the American College of Surgeons Friday.

The surgical knife creates links of living tissue which hook the muscles of a "stump" to the cords that manipulate the artificial part. These "hooks" are hollow tubes made from the living tissues remaining at the site of amputation. But they are unlike any tube nature ever made.

They are inside out, that is, their exteriors are tissues which normally lie under the skin.

These tubes are thrust like pins through and across the ends of a muscle of the "stump" of arm. Their exterior tissues take root, so the tube unites with the muscle surrounding it.

The cord which manipulates the fingers is passed through the interior of the tube, where the skin lining protects against chafing.

Dr. Henry H. Kessler of Newark, N. J., who described the operation, said it is estimated there are 33,000 persons in the United States with amputated arms. Artificial legs, he said, are easy to supply, but only a small proportion of the armless are able to make use of artificial limbs.

Dr. Kessler described 78 cases of the operation and said 44 of these otherwise one-armed persons are now employed in remunerative work such as clerk, lithographer, painter, truck driver, inspector of transatlantic lines, watchman, rack walker, bookkeeper, leather embosser, machinist, elevator operator, fur sorter, laborer, needle board repairman, commercial letterer and stereotype operator.

MULTIPLYING GOOD SEED

Two years ago the Okotoks Junior Wheat Club started operations with eighteen members and eighty bushels of registered wheat of the variety known as Red Bobs 222, supplied by the Alberta Wheat Pool.

P. Berger, leader of the Okotoks club, has figures to show that in two years members of the club produced fifty-two thousand bushels of pure seed.

This is the type of seed improvement work that some fifteen hundred boys, who are members of the seventy Junior Wheat Clubs operating in Alberta this year, have been doing to better the output of wheat from Alberta farms.

Scientific agriculturists have commented on the fact that wherever a Junior Wheat Club is operating, improvement is soon noted in the seed being sown in the district. Due, in a large measure, to the activity of these Junior Wheat Clubs, the quality of the wheat seed being sown on Alberta farms is steadily improving from year to year.

Two Years In Lung Paralysis Victim Sits Up

CHICAGO, Oct. 24— Frederick B. Snite, Jr., young infantile paralysis victim, who has lain on his back in a 900-pound iron lung for nearly two years, was sitting up Sunday in his River Forest home, able to feed himself and hold a book in his hands.

Snite, Sr., Chicago financier, disclosed his 27-year-old son, stricken in China in March, 1936, has been spending seven hours a day for the past four months in a newly-invented respirator which covers only his chest and permits him to sit up.

In contrast to the 900-pound artificial breather in which he has traveled more than 12,000 miles, the new respirator, fashioned of aluminum and a special rubber product, weighs only 9½ pounds.

The new lung is the invention of Dennis R. Scanlan, a native of St. Paul, Minn. He calls young Snite his co-inventor, asserting the machine could not have been completed successfully without Frederick's untiring aid as a "human guinea pig."

WENT TO BED WITH BOOTS ON

There has always been considerable controversy as to who built the first sleeping car. Records would seem to show that the first efforts were the adaptation of a day coach to sleeping car purposes in 1836 on the Cumberland Valley Railroad in Pennsylvania.

The first "Pullman" is said to have made its appearance in 1859. In the first make-shift sleeping cars, passengers went to bed fully clothed and reclined on rough mattresses with their own blankets or shawls over them. In referring to the inaugural trip of the first "Pullman", the conductor J. L. Barnes said "There was no crowd and the car lighted by candles, moved away in solitary grandeur, if such it might be called. I remember the first night I had to request the passengers to take their boots off before they got into their berths. They wanted to keep them on, seemed afraid to take them off".

In Canada, the Grand Trunk Railway, now part of the Canadian National System, gave early attention to the matter of sleeping cars. There was strong objection at first due to some unfavorable experiences on American lines but the matter was settled for the time by introducing benches or bunks running the whole length of the car and without any curtains or divisions. A rug and a small pillow were the only extras furnished. Today the modern all-steel sleeping cars on the Canadian National System is the last word in comfort, with air conditioning and other improvements.

Tested Recipe

By Frances Lee Barton

When young folks entertain it's more fun for them when their elders "give them the floor" and let them run the party for themselves, with a tactful hint that hilarity must be kept within bounds. Arrange a buffet supper and let them make their own fun. For such a supper, these Chocolate Butterfly Cakes are just the ticket! Festive to look at, delicious to eat—and perfectly easy to manage on a "serve yourself" occasion.

Chocolate Butterfly Cakes

6 tablespoons sifted cake flour
½ teaspoon double-acting baking powder
¼ teaspoon salt
¾ cup sifted sugar
4 egg whites, stiffly beaten
4 egg yolks, beaten until thick and lemon colored
1 teaspoon vanilla
2 squares unsweetened chocolate, melted
¾ cup cream, whipped

Sift flour once, measure, add baking powder and salt, and sift together three times. Fold sugar gradually into egg whites. Fold in egg yolks and vanilla. Fold in flour gradually. Then beat in chocolate, gently but thoroughly. Turn into greased large cup-cake pans, filling them two-thirds full. Bake in moderate oven (350 degrees F) 25 minutes, or until done. Remove cone-shaped piece from centre of each cake and fill hollows with whipped cream, sweetened and flavored with vanilla. Cut off points from removed pieces. Cut each cup in half and press halves into tops of cakes, bringing rounded edges together at base to represent wings. Or place ears, rounded side down, on tops of cakes to make dessert cakes. Makes 16 to 20 cup cakes.

Beards Fade As War Scare Hits London

LONDON, Oct. 21— Herr Hitler is having a surprising influence on the moustache and beard of the English gentleman. The manly beard was just sprouting into popularity when the Hitler crisis hit London. Bearded young men were asked by gas-mask fitters to choose either the beard or their lives. In consequence, beards were abandoned and now London barbers report the Hitler moustache is gaining in favor.

Even Dogs Lost In London's Fog

LONDON, Oct. 25— Londoners groped their way to work Tuesday in fog so thick that even dogs got lost.

Road, rail, sea and air traffic was slowed to a crawl or stopped in grimy darkness that enveloped a 40-mile circle around the capital.

Six greyhounds racing at the North London track lost their way on a far curve and kennel boys had to go out to find them.

Five persons were killed in 24 hours as a direct result of the fog. Three of them were motorcyclists and the other two a young married couple from Birmingham who fell into a canal and drowned.

ONWARD AND UPWARD

Professor William Annan quoted the story of an illiterate verger when he addressed the Edinburgh Rotary Club recently.

The verger in question acted for a vicar in the South of England, and when the vicar was succeeded by a new one, it appeared that the verger was expected to keep certain church records. When the new vicar found that his verger could neither read nor write he felt himself forced to dispense with his services.

So the ex-verger set up in the retailing business with a barrow. He was so successful with that that he opened a shop. The shop was so successful with that that he developed a chain of them and a growingly imposing bank balance.

His banker, however, became rather puzzled when he received no acknowledgement of the numerous company prospectuses, which he sent to his client to help him in the investment of his fortune. Meeting him on the street one day he asked him why he had not replied to his letters. The erstwhile verger told him he could neither read nor write.

"What would you have not been if you had been an educated man!" he exclaimed.

"I would," said the other, "have been a verger."—Edinburgh Dispatch.

West Separation Seen As Threat

MONTREAL, Oct. 25—Separatism in Saskatchewan, which he said arose from despondency caused by economic conditions, holds a serious threat to the dominion's future, reporters were told Tuesday by Hon. H. H. Stevens, Reconstructionist M.P. for Kootenay East.

Fear the movement would spread to other western provinces if not soon halted was expressed by Mr. Stevens, here on a private business trip. Should this happen, he said, the seceding provinces would come into close economic alliance with the United States.

Ford Predicts Prosperity Coming For 1939 Business

DETROIT, Oct. 25 — Henry Ford painted a bright picture of the business outlook in an interview Monday, predicting a prosperous 1939 and expressing the belief there would be no major European war.

"The people have come to their senses and realize the futility of war," was his comment on threats of armed conflict in Europe.

Business, he said, already is on the upgrade and "distinctly better times are on the way."

"People are tired of the many 'isms' that have developed in the past few years," he said. "They are getting back to work, and work spells prosperity."

75 Pupils Flee As Gas Escapes

Dr. R. H. Sandin, class lecturer, suffered temporary ill effects and 75 students in chemistry were ordered out of the class when a faulty valve in a cylinder being used for instruction allowed chlorine gas to escape in a room in the Medical building on the University of Alberta campus shortly before 4:00 p.m. Monday.

Dr. Sandin inhaled a quantity of the gas before he noted that it was escaping, and then ordered the students from the room. He followed them, obtained a gas mask, and returned to the room with a wrench and closed the faulty valve. Fifteen minutes later, when the room had been aired out, the students filed back in and instruction was resumed.

No other person inhaled the gas. Dr. Sandin's head was directly over the valve when the gas escaped.

WESTERN AUTONOMY—

THE RECENT convention of the United Farmers of Canada, Saskatchewan section, brought into the limelight a topic which has been discussed both privately and publicly for some time past. namely a separate state within the British empire comprising the western provinces of Canada. There are at least four avenues of approach to this question, one, of world wide interest; two, of empire interest; three, of Canadian federation interest; and four, of purely western Canadian interest. But while the avenues of approach to the question are clear and distinct, they do converge, one could almost say criss-cross at different points.

The accepted reason for the question being opened at all, is purely economic. To put it plainly, Western Canada is not satisfied, has good reasons for not being satisfied with the economic set-up within confederation. Largely agrarian, the population of the west are compelled to buy in a protected market and forced to sell in an open one. It is even worse than that, for of late years many of the west's former markets have been almost closed due to embargoes, quotas and such like. There is one exception, that of the six cent preference on grain to Britain, together with some other preferences, notably on bacon. The chief matter of complaint is the tariff, but there are others arising from the fact that the west is situated thousands of miles from its markets.

It is becoming increasingly clear that world trading practices of pre-war days have definitely passed. Then Great Britain a free trade country, wielded great power, diplomatically and economically. Her factories were busy, her well laden ships were everywhere and London was the financial centre of the world. The war literally smashed a relatively smooth working international commercial machine. It did more, it shifted the centre of financial gravity across the Atlantic to the United States. Great Britain, shorn of many of her markets, harassed by tremendous war debts, set out in a way, to repair some of the damage wrought. The 1926 Ottawa economic conference and similar conferences was the result. The central idea was—trade within the empire. That is was no idle move can best be understood by Canadians when they remember the bacon quotas accorded them and the disastrous results of the same upon Danish farmers. One of the problems met with at these economic conferences was that within limitations, everybody had something to sell but few wanted to buy. Dominions, anxious to build up their own industrial centres were loth to lower tariff barriers on manufactured goods but were anxious to obtain markets for their primary products. Great Britain was willing to go as far as possible as regards purchasing the Dominions' primary products, but she wanted some assurance that she would find markets for her industrial products. However, agreements were made, and though there has been some semi-official complaints that Britain is buying more than she sells, the agreements made can be said to have been worthwhile.

The life of a nation cannot be considered in the light of a few years or even a few decades—it runs on and on. Therefore basic economic policies should be made with a long time view. In theory at least, there is a splendid argument in favor of Canada being a specialized agricultural country and Great Britain a specialized industrial country with a natural exchange of commodities. But there is two thousand miles of ocean between the two countries and in addition there is an ever changing political world outlook. Working according to the above suggested plan both countries would be at extreme ends of a balanced economic stick and the jumping off by either one would spell disaster for the other. Great Britain has recognised this and has in the past few years done much to improve her domestic food production policies. It has never been considered good policy to have all the eggs in one basket.

There is no doubt that Eastern Canada has profited greatly from the West's expansion. Tariffs imposed with the objective of building up Canadian industry, have, generally speaking, resulted in simply building up Eastern Canadian industry—at, to a very large extent the expense of the West. It is this phase of Canadian life that has brought about the movement for a Western Canadian autonomy. But assuming this was brought about, would it be of permanent benefit? We doubt it. In the first place it is significant that the origin of the movement is in Saskatchewan. Of the three prairie provinces, Saskatchewan is the most specialized grain growing area. And as such have been hardest hit when disaster in the form of drought came. During this time assistance from the Dominion government and eastern Canada generally was not only very welcome but vitally necessary. It has been suggested that inasmuch as a bushel of grain is a means of bringing just so much manufactured articles to the farm home and family (which is quite true) more manufactured articles would be brought for the same amount of grain, if the Western Provinces were standing alone and the present Canadian tariff eliminated. This is quite true also. But while separation from the Dominion might prove advantageous in this respect, it could only be brought about by the forfeiting of some very real advantages. Moreover separation would push the West still further out to the end of the balanced economic stick and figuratively at least, the eggs would surely be in one basket.

But the cost of the tariff to Western Canadians MUST in some manner be partially eliminated. This may be brought about either by direct partial abolition of protection duties (the best immediate solution) or the establishment in western Canada of manufacturing establishments to compete with those of the east. The establishment of western industries would require popular support which is hard to obtain. Also to make western industry really worthwhile a larger population is necessary. In this respect it is well to remember that a better geographical distribution of white British peoples is a problem that will be tackled sooner or later. In pre-war days thousands upon thousands of people left the British Isles to make their homes in the various dominions. But of late years the tide has actually turned the other way. British statesmen recognize the wisdom of a more equally divided population over the empire and it is safe to say that some time in the future a workable immigration plan will be formulated. With a larger population and producing most of its own manufactures the West would be on a par with the east. Even then the burden of protective tariffs would not be eliminated but it would be lightened.

THE WORLD OF WHEAT

By R. C. L. Strange, Director "The Crop Testing Plan."

"I don't believe this Thatcher will stand up. In a few years the rust will get it."

"Why do you thing that?" I said to my friend John Skeptic.

"Well" he said, "Ceres was boosted to the skies to resist rust, and you will remember that after a few years it had no more rust-resistance than Marquis, so I guess Thatcher will go the same way."

"For my part, John", I said, "I think you're badly mistaken. In the first place Ceres was not bred as a rust-resistant wheat, and it never had been tested by the plant breeders against rust. It simply had been found under several mild rust epidemics, to have a little better resistance than Marquis."

"Thatcher on the other hand is an entirely different thing. It was bred by some of the ablest plant breeders in the world, specifically to resist wheat stem rust. It was tested in a most vigorous way for years in the Laboratories against all forms of rust that are known, and on the farms it was not harmed by the very severe stem rust epidemics of 1935 and of this last year."

"Plant breeders all say they will be greatly surprised if Thatcher is ever damaged by the present forms of wheat stem rust."

Following factors have tended to raise price.— Australian outlook becomes more serious owing to hot winds. Complaints of deterioration increase—Some talk of further inflation of money in U.S.A. —India buys more Australian wheat—Some frost reported in Argentina— Possibilities of broad and active demand for barley in Europe.

Following factors have tended to lower price.— European rye harvest largest since 1933— Excessive surpluses of wheat and corn and rice in the U.S.— Australia ships corn to Canada— France sells wheat to Italy on barter basis—Due to record wheat crop all grain or flour imported into Finland must contain a domestic mixture — Manchurian soybean supply above last year.

A Gambler Who Never Wins

A farmer is a gambler;
Just as the saying goes;
He wagers on the weather,
And bets on crop that grows.

When seeding in the springtime
He takes risks much the same
As raising stakes in poker,
When playing in the game.

The weather and the market
So oft reverse his plans,
Similar to sets of pairs
In his opponent's hands.

When once in many seasons
The fields a bumper graces;
As once in many card deals
Come the kings and aces.

He borrows. Raises higher!
This time he must regain
All he has lost in gambling,
And start in clear again.

But just as in the poker
His rival gets straight flush,
So down prices come skidding
To thirty cents. "BY GOSH"

He exclaims much dejected:
"Although I'm never lag
Providing bread for others,
I always hold the bag."

Again as in the card game
He bids if he's to play;
So on the land he must toil
If there he is to stay.

True: farmer is a gambler
As the adage begins—
And ends— so heaven help him—
Who plays but never wins.

Indian Knows War Best For Prices

ROCKEY MOUNTAIN HOUSE, Oct. 24—An old Indian of this district knows the conditions that make for highest prices.

Asked by a clerk in one of the stores here how he was getting along with his haying, the Indian replied that they had been working on a big flat on the Baptiste river fr nearly two months and had almost 1,000 tons of hay up. Then he asked if it were true that England was going to war.

The clerk said that he was glad to say that there would be no war and was surprised to note the Indian's disappointment. "Surely you don't want war?" he asked.

The Indian shrugged. "Twenty years ago big war in Europe and hay $30 a ton then."

Probe Alberta Gasoline Prices

Investigation of gasoline prices in this province by a royal commission appointed by the provincial government has been delayed for a month in order that the departmental officials will have full opportunity to make certain [illegible] concerning oil [illegible] operations, including marketing costs and such like.

The commission is composed of Mr. Justice McGillivray of Calgary, chairman, and Major L.R. Lipsett, O.B.E., of Ardley, Alta., an authority on marketing problems. Chief counsel for the commission is J.J. Frawley, K.C., while the chief accountant adviser to the commission is F.G. Cottle, C.A., member of the provincial gas conservation board.

Keen interest is expected to be shown when the commission resumes its sittings as it is given wide scope for investigation into the spread between wholesale and retail gasoline prices. In addition to looking into marketing in this province, the commission is also to recommend what should be the price for gasoline in this province. It is also to report on the desirability of the province taking over control of distribution for marketing purposes.

Over a period of several years, the Alberta Motor Association has expressed protests over gasoline prices in Alberta and called for a complete inquiry.

In view of gasoline price reduction ordered by the fuel commissioner in British Columbia last week, a cut of special interest is being shown in the probe called for in Alberta.

ELECTRICITY
BENEFITS EVERYONE!

WHETHER you live in town or in the country you benefit through today's wide use of electricity.

The new processes and manufacturing methods which electricity has made possible are responsible for most of the articles used in your home, your business, and on your farm.

Your radio, whether battery or batteryless, is of use only because electricity makes broadcasting possible. Your weekly movie is a child of electricity too.

You can phone for a doctor, or a pound of tea, only because of electricity. That same electricity has made it possible for your local merchants to keep their merchandizing methods up to the standard of city stores.

These are only a few of the many ways in which electricity benefits you, whether you live in an ALL-ELECTRIC HOME, or one that is still to be equipped with these time-saving and labor-saving devices.

THE GREATER THE USE OF ELECTRICITY,
THE GREATER THE JOY OF LIVING.

UNITED CHURCH NEWS

The Rev. W. J. Bell, Holden, will take over the work of Rev. D. K. Allan on Sunday, October 30. There is a general exchange among the ministers of Wainwright Presbytery. The Rev. D. K. Allan goes to Viking on that date.

Mr. Bell is a forceful and interesting speaker and a good congregation ought to greet him at Lakeshore, Ketchamoot and Tofield.

The Young People's Union got away to a good start on Wednesday evening. It was a Hallowe'en party—and nothing was missed out. The programme was full of interesting games and action. The competitive games were enthusiastically enjoyed.

The refreshments were of the Hallowe'en menu—apples, pumpkin pie, sandwiches and coffee.

The table was tastefully decorated with hallowe'en suggestions.

Monday evening was decided upon as the day of meeting and programs of interest will be arranged.

Watch the Mercury for the date of next meeting.

McKENZIE

Mr. and Mrs. Glen Bailey motored to Edmonton on Wednesday.

Ole and Crist Berild, F. Ness, Mr. McGuire and Trueman Jacobson left Tuesday of last week for a motor trip to Drumheller, Rose Bud and Red Deer and other points. Ole Berild went on from Red Deer to Rocky Mountain House to work, while the rest returned home on Friday night.

The Logan Social Credit Group held their Annual Meeting at the Community Hall on Friday. New officers were elected: President, Mr. [illegible]; Vice president, Mr. Walker; Secretary-treasurer, Mrs. Glen Bailey. The Logan group are holding a bridge party on the second of November at Community Hall.

Mrs. Verlyn Moen is visiting at Hardisty with her parents for two or three weeks.

Tofield Junior Grain Club Hold Seed Fair

The annual seed fair of the Tofield Junior Grain Club was held in the curling rink on Wednesday, October 19th. There was a good attendance of the members but parents and adults were lacking in the audience. The club would like to see a larger number of parents and those interested in improving the quality of grain grown in this district at future meetings.

Mr. E. C. Hallman of the Department of Agriculture judged the grain and stated he was very pleased to see such well prepared samples.

Mr. E. A. Moen of Ryley who is the representative of the Alberta Wheat Pool gave a short talk on the benefits of Junior Grain Club work.

The next meeting will be held on Saturday, November 19th.

The following awards were made:

WHEAT— 1st, Clifford Appleby; 2nd, John Warner; 3rd, Allan Harrison; 4th, Allan Swinton.

OATS: 1st, Paul Kallal; 2nd Joe Kallal; 3rd, John Warner; 4th, Allan Harrison.

Miner Cuts Throat At Round Hill

[illegible] to Round Hill [illegible] upon receiving a report of an alleged attempted suicide there. The man, a Russian or Ukranian miner, it is alleged cut his throat. Last reports were that he is still living.

WANTED—A Middle-aged person for light housework. Apply to Mrs. Johnston Ferguson, Phone 69, Tofield.

Annual Canvass Bible Society Now in Progress

Mesdames Swift and Robinson are making their Annual canvass in the interests of the British and Foreign Bible Society. This year we commemorate the four hundredth anniversary of the English Bible and a Thanksgiving fund has been opened which aims at a permanent increase in the Bible Society's Annual Income. This [illegible] national responsibility. The Society was founded in England 134 years ago and has made the Book [illegible] in 721 languages over the world today with other Agencies, especially the American and Scottish Bible Societies the Book now lives in over 1010 languages. In Canada the Scriptures are used in over 100 languages including Indian and Eskimo and the various languages of the New Canadian people. Possibly there is no country in the world which owes more to the Open Bible than Canada. This Book can live in your life if by reading it regularly you are led to accept more fully Him who is "the Living Word" and His life only abides in yours in proportion as you share it with others.

[illegible] have not been approached and would gladly help, a donation forwarded to Mesdames Swift and [illegible] or Mr. McCauley, would be [illegible] appreciated.

LOST— From Mrs. McConnell's pasture, one red and white steer, coming two, horns, branded 3 on right hip.—Finder please notify Geo. Cookson, phone 1817.

FOR SALE—1933 Singer Sewing Machine. Excellent condition. [illegible] Cash price $30.00.—Apply to John Gergusich, Tofield.

Happy Landing Coming Next Tuesday

In the line of phenomenal picture successes which Sharp's Shows have been presenting to Tofield, audiences comes next Tuesday Sonja Heinie and Don Ameche in "Happy Landing." Again Sonja Heinie, one of the most charming feminine personalities on the screen captures the hearts of her audiences. Together with her marvelous ability there is a musical show of superlative splendor. And amid all the gorgeousness of music and song there is a story which is both interesting and thrilling.

In addition to the feature there is a rollicking comedy and newsreel.

For some weeks past Sharp's Shows have been presenting a very excellent line of productions and it is gratifying to note that overflow audiences have been the result.

The show on Tuesday next commences at 8.30.

The lawyer asked the witness who the man was that he was seen with on the night of the crime. The witness replied: "Brothers and sisters I have none, but that man's father is my father's son." With whom was he seen?

(His own son, is the answer.)

Cornhill M.D. Held Regular Meeting

A regular meeting of Cornhill Municipal District Council was held at the District's office on Friday, October 28th. There were present, Reeve Glenn, Councillors Anderson, Holmberg, Morden, Swabey and Walker.

The minutes of the last meeting and the monthly financial statement were approved.

Two representatives from the General Hospital, Edmonton, interviewed the council regarding payment of an old hospital account of $600. This account had been cut from $1200 and payment was due last November. Due to the necessity of building an extension to the hospital the representatives said a substantial payment was imperative before December 1st. Council promised to pay $200 by December 1st if possible, if not on or before December 15th.

The purchaser of N.E. 2-50-20 interviewed council regarding closing the deal. Council explained that sales of land by them were subject to the approval of the Department of Municipal Affairs and this approval had not yet been obtained.

Disposition of the effects of the late Chas. P. Holmsten came up for consideration. They were of comparatively little value and it was decided to place them in an auction sale to be sold at some near future date.

Mr. Andrew Kozak wrote that he had been out working during threshing. This made it necessary for him to engage a girl to assist his wife who is ill. He desired the council to pay the girl's wages. Council felt that they could not do this.

Communication was read from Northwestern Utilities Ltd., offering to sell about 25 lengths of main line used gas pipe at $1.00 a length, at Holden. Council agreed to purchase these for culvert purposes and the secretary was instructed to arrange for their cartage from Holden to Tofield.

Reeve Glenn was authorized to make the necessary arrangements regarding Mr. Annebelle's journey to the United States.

Mrs. Swabey's application for old age pension was considered and council agreed to recommend full pension.

Mrs. Aurelia Stallmacher made application for Mothers' Allowance. There are four children. It was agreed that $25.00 per month be recommended.

A communication from the Bureau of Relief and Public Welfare was read. It explained that those people in the city with farm experience were being placed in vacant farm houses and requested information as to whether there were any in the municipality and the co-operation of the council if there were any. Council could not recall any vacant houses off hand.

A communication was received from the Athabasca hospital re Joe Donald's account. Council felt that if they contacted Mr. Donald he could arrange for payment on his own behalf.

The British American Oil Co., desired a 60 day option on six lots at Kingman. They would pay $10.00 per lot if purchased. The option was given.

Dr. Law gave a verbal report on a number of municipal patients.

The government municipal inspector's report was read and to conform with the inspector's recommendation a by-law re mill rate was read a first and second time. The report was adopted by council.

Note: A complete copy of the report is published in this issue of the Mercury.

A communication from Department of Agriculture was received re renewing of stock brand. It was decided to renew stock brand at a cost of $1.00.

Communication was read from Mr. Farley, Camrose, re N. W4-51-20, requesting transfer. It was decided that transfer be made to Mr. Farley subject to caveat.

Communication was read from Union Tractor Co., re claim for replacement of track rollers on catapillar tractor. The company claimed that it was unlikely that the material from which the rollers were made was defective and could not see their way clear to replace them.

Communication was read from De-

Spectacular! Stupendous! Colossal! Picture Coming

For Tuesday next, Sharp's Shows presents "The Adventures of Robin Hood" starring Errol Flynn. Hearts will thrill, bodies will quiver, minds will stand aghast at the magnificent spectacles of this production. The adventures of Robin Hood and his Merrie Men doing their deeds of daring and chivalry. Deeds that have lived throughout the years and the recording of which has thrilled millions in and before our time. Now the magic of the screen, and the glory of technicolor lets you live amid the glamorous deeds of Robin Hood, causes you to marvel at his audacity and thrill to his romantic bravery. Be sure and see this picture.

Note there are two shows, the first at 7:00 p.m., the second at 9:00 p.m. Usual admission.

Mr. Frank Mikota who has been barman at the Royal Alexandra Hotel for the past ten years, left this week for St. Paul de Metis, where he will take a similar position. Frank is well known and liked throughout town and district and has been a barman for the past forty years.

GOVERNMENT OF THE PROVINCE OF ALBERTA
Department Of Municipal Affairs
Edmonton, Alberta.
October 8, 1938.

CS

Dear Sir:

Re: Municipal Inspector's Report, M.D. of Cornhill No. 487

Attached please find the above report required by Section 14 of the Department of Municipal Affairs Act. The report should be read and discussed at your next meeting and reference made in the minutes as to its disposition. It should then be placed on a special file for future reference, and as soon as possible after the meeting you should forward us a letter of acknowledgement indicating how the report was dealt with by the Council.

We shall appreciate the co-operation of yourself and Council in disposing of the report as soon as possible,

Yours very truly,
JOS. RENSHAW.
Chief Municipal Inspector

JR

Wm. Glenn, Esq.,
Reeve, M. D. of Cornhill No. 487
R.R.2, TOFIELD, Alberta.

Inspector's Report

1st. September, 1938 M.D. Cornhill, No. 487

REEVE—Wm. Glenn.

SECRETARY-TREASURER— J. O. A. Letourneau.

BOND— Northern Assurance Co., No. M.G. 5404—$5,000.00.

AUDITORS —McCannel Brothers.

ASSESSOR —J. E. Stenson.

BANK —Bank of Montreal, Tofield

CASH —Verification of cash at date of inspection found correct in accordance with the records produced. Cash on hand at date of inspection—$257.21.

Cash records are completed to date. The N.S.F. Cheques shown December 31st, 1937, have all been redeemed.

MINUTE BOOK —Monthly statements are prepared and presented to council. Estimates are shown in detail. The mill rate, however, has been set by resolution only, while a bylaw is required as set out in Section 338 of the Municipal District Act. This bylaw should be prepared and passed without delay.

ASSESSMENT ROLL —The roll has been completed to date.

PAY SHEETS —These are not all signed by the worker and on a great many the location where the work was performed is not given.

GENERAL —No bank loans or debentures.

The records are all being well and neatly kept.

H. T. CURRAN,
Municipal Inspector

LOCAL & PERSONAL

The Annual C.W.L. Bazaar and Chicken Supper in the St. Francis Church basement on November 19. Supper at 5:30. Bingo after supper. Children 25c, Adults 35c.

Mr. and Mrs. Burchard returned last week after an enjoyable trip to the U.S.A.

Mrs. H. Kendall of Edmonton spent the week end visiting in Tofield.

Miss Betty McCarthy spent the week end at her home here. Betty is a nurse at the Royal Alexander hospital in Edmonton.

Mrs. McCauley and Margaret, Miss Marjory Stewart were visitors at the McLaughlin home in Wetaskiwin this week end.

Mrs. Malcolm and Muriel spent Tuesday in Edmonton.

Mr. and Mrs. J. E. Chevreaux and Peggy spent Sunday visiting friends at Killam.

Born—To Mr. and Mrs. L. Herndon on Sunday, October 30, twin girls.

Hallowe'en Eve at Tofield was quite quiet. It may have been the police warning, it may have been the slushy night, but as far as we can learn, Hallowe'en was quite orderly.

J. O. A. Letourneau visited Edmonton this week. He took the municipal books along for the usual preliminary annual audit.

A short council meeting was held on Monday evening last, when the business transacted was all of a purely routine nature. Mayor Swift and Councillors Lovell, Bellamy and Brace were present.

BARDO

Mr. and Mrs. R. Nordhus are holding a sale on Monday, November 7, having rented their farm to Jake King. They are going to reside in Vancouver.

Mr. and Mrs. Alvin Steen have rented the L. Noland farm at Lakeshore north of Tofield and are moving this week. Mrs. Ellen Steen will stay with Mr. and Mrs. N. Falkeid during her school term.

Bardo School held a Hallowe'en party on Friday night.

Doris Hendrickson entertained friends on her 10th birthday Thursday night.

Mrs. Heiberg has been on the sick list but is O.K. again.

Axel Kindley has bought an Essex Sedan, a 29 model.

Bardo Ladies' Aid Annual sale and Lutefisk dinner on Saturday, Nov. 5, at the Bardo Church, starting at 12 o'clock noon.

Bardo Male Chorus practice on Monday, November 7th.

Mrs. S. Johnson, Mrs. A. Haukedahl and Nora Rusland are delegates at the W.M.F. Circuit meeting at Viking. M. B. Ness represented the Congregation.

Mr. A. Moen returned to New Westminster last week after spending two months on his farm here.

Mr. and Mrs. I. Moen, Mr. and Mrs. Marvin Johnson, L. Stauffer, Gord n Hendrickson and Geo. Hendrickson attended the Professional Hockey game in the city last Saturday.

FOR SALE—Brood Sows. Also Registered Tamworth Boar. Apply A. J. Young, Tofield.

FOR SALE— Child's Saddle Pony. Quiet and dependable.—Apply to B.E. Wilson, Tofield.

UNITED CHURCH NEWS

The regular services will be held on Sunday, November 6th. At the evening service in Tofield, the Junior Choir will assist in the music.

Next Sunday, November 13th is "Remembrance Day."

A Sunday School and Young People's Rally is to be held in Holden on Monday, November 7th. The Rev. Mr. Burkholder, Sec'y of Religious Education will conduct the Rally. He is a young man, keen, alert and well equipped for this very important work. The sessions begin at 2:30 p.m. and carry on to 5:30 p.m. Basket Supper at 6 p.m.

Sunday School officers and teachers will find this gathering very helpful. There is ample room given for discussion and consideration of local and personal problems.

In the evening Young People and Adult [illegible] will feature the gathering.

Instead of [illegible] Young People's night, what [illegible] getting a party or two [illegible] this opportunity to meet and hear a live Young People's worker? It's in Holden, Monday, 7th.

The Junior C.G.I.T. was organized this week with Helen Burke, president; Mary Corbin, vice-president; Stella Siedar, secretary; Dorothy Stevenson, Treasurer. Miss Aileen Allan is the leader.

L.C.C. NEWS

The October meeting of the L.C.C. was held at the home of Mrs. W. Glenn with fourteen members and four visitors present, the visitors being Mrs. McKenzie, Mrs. Lancaster, Miss Gladys Weatherill and Miss Mary Cloister.

The roll call was answered by poems after which we were shown the wool comforter, ready to be raffled off in aid of the Community Hall. All L.C.C. members have taken tickets to sell, so come on and try your luck. The comforter will be on display, November 10, 11 and 12th in the "Red and White" window. Miss L. Morden and Mrs. Brown were appointed to visit the sick during the month of November. The meeting closed at four o'clock after which a lovely lunch was served by our hostess, Mrs. Glenn. The guests departed at five o'clock reporting a pleasant afternoon.

The next meeting will be at the home of Miss L. Morden, the roll call to be answered by Christmas suggestions. Visitors welcome.

Practicability Autonomy For Western Canada to be Thoroughly Investigated

SASKATOON, Oct. 26— Thorough inquiry into practicability of an independent western Canada as a nation within the British Empire will be made by the executive of the United Farmers of Canada, Saskatchewan section, besides pressing for a parity price for farm products.

The executive in a statement issued Monday said it would carry out the mandate covering these two points ordered by the organization's annual convention last week.

The executive asserted that farmers, having failed to get recognition for their demands, now were ready to "take definite and militant stand in defence of their homes and families."

The statement declared, "this executive regrets the evident lack of understanding by eastern political, industrial and financial leaders of the western farm problem, which itself is evident by the attitude of federal authorities towards the just and reasonable demands for changes in fiscal policy presented by western agrarians from time to time and which, if acted upon, would have prevented agricultural bankruptcy."

Commenting on the statement, President George Bickerton of Saskatoon said that, provided the practicability of setting up a western nation was agreed on by the executive, there would be no doubt British Columbia would be included in any plan to bring about the new nation.

"The prairies need British Columbia's sea and orchard products and also needs British Columbia as an outlet to world markets," he added. "On the other hand, British Columbia needs the prairie business."

MANITOBA FARMERS TO DISCUSS PLAN

BRANDON, Man. Oct. 26— Marketing problems are expected to draw considerable discussion at the three-day annual convention of the United Farmers of Manitoba opening here today.

Discussion of western Canada's position within confederation seemed certain. Secretary W. R. Wood would not indicate whether delegates will consider action of United Farmers of Canada, Saskatchewan section, who authorized their executive at Saskatoon last week to study possibilities of forming the four western provinces into an autonomous state within the British Empire.

Progress Of Alberta Oil in 1938

BY J. L. IRWIN

Statistician, Dept. of Lands and Mines, Government of the Province of Alberta

The last article on the subject of Alberta's progress in oil development was published by the Department of Lands and Mines on June 30th, 1938 at the close of the half year.

Since then many requests for additional information regarding developments have been received. Due principally to rapid and constant changes appearing almost from day to day, it has been exceedingly difficult to publish anything further which might not almost immediately become outdated. In compliance, however, with these requests a brief review of events covering the first nine months of this year is herein given.

NUMBER OF WELLS

By the end of September Alberta had a total of 123 producing oil wells. Of this number 113 were in Turner Valley and the remainder in other fields.

The number in the Valley was divided as follows:

Crude oil wells limestone	59
Crude oil recovered from shallower horizons above the limestone	4
Naphtha producers from the limestone	50
Total	113

Note: In addition to this a total number of wells were closed in.

Wells completed this year in Turner Valley total 27 and new wells now drilling in this area total 21 with the additional 14 drilling in other fields. Within the next few weeks the major portion of the drilling wells will most probably be completed.

In other Alberta fields many interesting tests are now in operation amongst which the following are mentioned: The Peace Coupe wells near the Alberta—British Columbia boundary in the Peace River country; the Home-Brazeau and Ram River wells in the Brazeau area; the Banner Well in the Highwood area, south of Turner Valley; the test at Bearberry, 35 miles west of Olds; the Altoba well on the Clearwater River, 20 miles to the south-east of the Ram River well; the test at Steveville, 70 miles north-west of Medicine Hat; two wells near Lundbreck in the Crowsnest Pass area and one east of Milk River, close to the international boundary. At Vermilion near Lloydminster a well is being drilled for gas. Fields which have already been productive of oil and which are enlarging their operations include Del Bonita in the international boundary area; Moose Dome, 30 miles west of Calgary; Taber, east of Lethbridge and Ribstone in the Lloydminster district.

OIL PRODUCTION TOTALS

In the last published article two production tables were given. One, in annual totals from 1914 to 1937, revealed a grand total for the 23 year period of 13,772,302 barrels. The other was a comparative monthly production statement for 1936 and 1937 showing monthly and yearly increases. A repetition of this table, with the addition of another giving the totals for the first 8 months of 1937 and 1938, follows:

Month	1936 Bbls.	1937 Bbls.	Increase Bbls.
January	105,171	127,977	22,806
February	96,077	140,515	44,438
March	101,857	161,832	59,975
April	94,230	172,608	78,378
May	98,720	175,907	77,187
June	97,630	191,634	94,004
July	122,771	226,000	103,229
August	124,287	271,898	147,611
September	130,210	291,154	160,944
October	120,638	326,723	206,085
November	113,794	326,677	212,883
December	124,979	394,893	269,914
Total	1,330,442	2,796,968	

Increase for 1937 over 1936—1,476,006 barrels

Month	1937 Bbls.	1938 Bbls.	Increase Bbls.
January	127,977	444,196	316,219
February	140,515	401,887	261,372
March	161,832	467,732	305,900
April	172,608	447,241	274,633
May	175,907	546,719	370,812
June	191,634	521,865	330,231
July	226,000	678,243	452,243
August	271,898	799,023	527,125
Total	1,468,461	4,306,626	

The above Alberta oil production is secured approximately as follows:

Turner Valley crude oil recovered from the limestone	88.5 per cent
Turner Valley Naphtha recovered from the limestone	10.0 per cent
Turner Valley crude oil recovered from shallow horizons above the limestone plus production from other Alberta fields	1.5 per cent
	100.0 per cent

The total for the first six months of this year is 2,829,279 barrels, an increase of 1,866,807 over the first six months of last year and of 32,462 over the total of last year's entire production. Increase for the first eight months of this year over the same period last year is 2,838,175 barrels.

With the above figures as a guide, it is reasonable to assume that Alberta's total for 1938 will exceed in British Empire production that of Brunei which in 1937 beat Alberta's total by some 1,500,000 barrels. It is safe also to predict that it will also put this province in the same oil-producing class as Burma and Bahrein Island in the Persian Gulf which last year with productions around 7,750,000 barrels vied with each other for second place in the Empire, Trinidad with over 15,500,000 barrels coming an easy first.

PETROLEUM AND NATURAL GAS CONSERVATION BOARD

As previously stated the Petroleum and Natural Gas Conservation Board was formed this year and opened its offices in July with Calgary as its headquarters and with a field office in Turner Valley.

W. F. Knode, well known Texas consulting engineer and conservation expert, highly recommended to the Alberta Government by the United States Bureau of Mines, was appointed chairman. Other members are C. W. Dingman, late Director of the Petroleum and Natural Gas Division of the Department of Lands and Mines and F. G. Cottle, late Auditor of the Board of Public Utility Commissioners.

PRORATION OF WELLS

With reference to crude oil production figures already given it was stated in the last article that a factor to be taken into consideration was that up to September 12th, 1937 such production was representative of the entire capacity of wells. From that date on with the rapid increase in production it became necessary for the marketing companies, with a localized market and refinery facilities taxed to full capacity, to institute proration of purchases.

Towards the end of April with proration varying from time to time it was decided that new tests should be made on an eleven day basis, a well to run for ten days on the proration previously established and on the eleventh day on open-flow production. The new potential by which proration was to be calculated was to be two-thirds of open flow as demonstrated on the eleventh day.

This proration varied from time to time depending on transportation facilities during a period when an additional pipe-line from the field to Calgary was under construction and on storage and market conditions. On September 2nd the Board issued its first allotment of permitted oil production. The schedule was based on a market demand of 29,000 barrels per day, as existent on this date, and distributed this amount amongst crude producers by application of a formula which included the factors of gas-oil ratio, bottom hole pressure, well spacing and measured flow through a two inch nipple. A second allotment followed on September 12th to take care of newly completed wells, but based on the same market demand. A third, made September 24th, cared for new completions and a drop in market to 22,000 barrels per day.

This reduction was due entirely to the seasonal demand of a fluctuating and localized market. Such demand, which had previously risen with the phenomenally large wheat crop in the west increasing oil requirements for the harvest, having diminished with the harvest operations drawing to a close.

CONSERVATION OF GAS

Regarding conservation of gas from naphtha-producing wells the Board issued an order, effective September 14th, curtailing production of same to 40,000,000 cubic feet daily declaring that amount sufficient to provide 20,000,000 cubic feet required by Calgary, Lethbridge and other points and 20,000,000 cubic feet needed by the industry in Turner Valley itself.

Private interests, charging such an order would enforce closing of some of the four absorption plants operating in the Valley, asked for time to consider with a view to possibly developing a re-pressuring scheme. As a result of this appeal the enforcement order was delayed until October 15th.

Estimates of gas burned as waste run as high as 150,000,000 cubic feet daily. The estimated cost of the re-pressuring plants was unofficially set at $2,000,000. The purpose of such plants would of course be to return the gas to the limestone after extraction of the naphtha content and naphtha wells could as a result produce gas in any quantities desired. By this scheme the contention is made that gas pressure of the field would be maintained and the absorption plants would continue to operate.

A NEW OBJECTIVE

Conservation as now practised by the Board fills a long felt want in its relationship to orderly development and its protection to the life of the field. The regulating and conserving of production on the basis now in force has established a new confidence in the permanence of this vitally important industry. A permanence ensured by the prospect that the deplorable wastage of gas with its resultant loss of pressure which must lead to increased exploitation and extension of markets.

Press reports have stressed consideration by the British Admiralty of the building of a pipe-line from Calgary to Vancouver for the purpose of creating a new source of oil supply for naval usage. As no approach from this particular source has as yet been made to the Alberta Government it is impossible to contribute anything further to this published information.

Whether in the future history of Alberta's oil industry pipe lines or railways are to be chosen as carriers is a question which has not yet been answered. The importance of a suitable means of transportation—either by the former or the latter at greatly reduced freight rates —is now a very real one. Serious consideration of same is of vital importance to the rapidly increasing growth of Alberta's oil production—a growth which may bring Canada to second place in the British Empire by the close of this year.

Pending a decision on this question, allowable production must of necessity be held down to a seasonal and localized market. Without a doubt the establishment of a great reserve in the present producing areas or in the area of a second major field will assist very materially and tend to speed up any action in this direction.

Organist Invented Locomotive Whistle

The locomotive whistle can claim a musical pedigree. It was invented by an English organist more than a century ago following a level crossing crash between a train and a farmer's cart on the Leicester and Swannington Railway. In its original form it was not known as a whistle but was called a "steam trumpet."

"The sawdust resulting from the sawing of a diamond is black." Just thought we'd let you know in case you were thinking of sawing any diamonds on the clean tablecloth.—Toronto Star.

THE WORLD OF WHEAT

● ● ● ● ● ● ● ● ● ●

By H. G. L. Strange, Director "The Crop Testing Plan."

It looks as though there will soon be three international conferences studying the wheat situation.

The London Wheat Committee will be holding another meeting. The United States is endeavouring to arrange a conference, and now still another meeting has been called by Manitoba.

These separate international conferences will consider what can be done with the undistributed wheat surplus of the United States, Canada and the Argentine. The probable result of these discussions will be an effort to persuade Canadian and American farmers to reduce their wheat acreages. (Argentine now states she will NOT reduce her acreage.)

Certain large European countries are holding similar conferences with a view to reducing their production of beef, veal, bacon, cheese, lard, vegetables and so forth, so that they can raise MORE wheat (for more people can be fed with wheat than with livestock products grown on the same acres.)

Why not combine all these proposed meetings, one might ask, and hold just one international conference; and there concentrate on making plans to exchange the surplus wheat of Canada and the United States, for the surplus goods and products of the European countries, which they would like to send us, and which we certainly badly need. Then our farmers, the European people and all of us would certainly be much better off.

Following factors have tended to raise price: Large areas in Australia now beyond recovery— Main Indian grain areas unusually dry— Deterioration from dryness in U.S. winter wheat belt—Threshing lags in Siberia.

Apparent cessation of Indian wheat exports—Heavy winds result in loss to Jamaican banana crop.

Following factors have tended to lower price: Confirmation of large Roumanian wheat sales to Britain—Seeding progresses satisfactorily in Italy, France and Germany—U.S. yellow winter wheat arriving in England—World's rye production 144 million larger than last year—Persia sells wheat to Germany, Italy and Turkey—Cutting starts in early sections of Australia—Belgian millers must increase native wheat content in milling.

The rudder of the great ship Queen Mary—largest ever constructed for any ship—weighs 160 tons, or equal to the tonnage of the Mayflower.

He Sold His House

THE MAN REALLY DIDN'T NEED IT OF COURSE, HE HAD ANOTHER ONE TO LIVE IN, BUT HE WANTED TO SELL THE EXTRA HOUSE. SO HE INSERTED A CLASSIFIED AD IN THE MERCURY AND WITHIN THREE DAYS OF THE FIRST INSERTION THE HOUSE WAS SOLD.

YOU, TOO, MIGHT HAVE SOMETHING TO SELL THAT IS SALEABLE AND WHICH SOME OTHER PERSON IS DESIRING. AND YOU TOO, WOULD PROBABLY BENEFIT FROM A CLASSIFIED AD IN THE MERCURY.

THE RATES ARE LOW. ONE ISSUE 50c; TWO ISSUES 75c; FOUR ISSUES $1.00. THERE IS A GENEROUS LIMIT OF THIRTY WORDS.

REMEMBRANCE DAY—

IN 1936, CANADA remembered her war dead in so inspiring a fashion at Vimy—the memorial itself, the Pilgrimage of veterans and mothers and wives, the participation of the King, the President of the French Republic, the Prime Minister—that every Canadian must feel pride in a duty so wholly and beautifully done.

Some expression of that feeling is very likely to be made by Canadians on November 11th this year, when, with the appeal of the Poppy Fund, the opportunity is given to render some measure of gratitude to those who, one might say, fell in the war but did not die.

For that, in effect, is what happened to many thousands of Canadian young men. Wounded, damaged in body and spirit, these multitudes of our fellow men have survived twenty years of pain and handicap, of distress, frustration and disappointment in the daily race of life, regardless of all the help government and municipalities can devise for them. On the base of the indescribably beautiful memorial on Vimy Ridge, there are carved in the solid stone, the names of the 11,283 Canadian soldiers whose bodies have never been found, whose names do not appear on a headstone in any of the numerous Canadian cemeteries scattered over France and Flanders. Thus no man is forgotten. The Poppy Fund, insofar as the funds it can raise permit, has attempted to see that no man of those living be forgotten. The things government cannot undertake to supply, clothing, furniture, the simple amenities of comfort in a home, are the routine provisions of the Poppy Fund. It also meets certain kinds of emergencies, medical and domestic. Its work is practically all voluntary. It tries to be, on behalf of its countless contributors on Poppy Day, the good Samaritan to the forgotten fringes of the veteran problem.

The Canadian Legion which conducts the campaign in Canada is only one unit of the British Empire Service League, which on November 11th, in its world-wide associations in the British Empire, is selling poppies to fellow Britishers in every corner of the globe. The British peoples have their various national holidays and red letter days, but in the effort you make on Poppy Day, you are sharing in a duty universally British.

AFTERMATH

"If Ye Break Faith . . . . We Shall Not Sleep!"

Over the crimsoned field where poppies blow
A grey mist hovers like a changing wraith;
And voices bring a cry from out the mist:
"We sleep not, Comrades, do ye keep the faith?"

They gave their lives to make a better world,
Safe for the old, the helpless, and the young—
Safe for that wider brotherhood of man:
What of that victory so dearly wrung?

What is this foe with whom we keep the quarrel?
What is this conflict that we must suppress?
What but the idol in the market-place—
The symbol of a nation's selfishness!

Is this remembering, that day by day
They who were with 'them' falter to our doors—
Begging their humble stint of daily bread,—
The heroes—nay, the victims of our wars!

That day by day they toil the weary roads,
While little children starve, and women sigh,—
Our granaries o'erflow with golden grain!
'What say you, Comrades? Is the Torch held high?'

Far on Olympus, how the Gods must laugh!
'The larks still sing; the morning comes anon;'
We hoard the golden grain—and fling the chaff!
'The poppies flourish—but our rest is gone!"

G. E. R. SHAW, Leduc, Alberta.

Moscow Painting Britain As Feeble

Moscow, Oct. 26— Le Journal de Moscou, which frequently voices the views of competent Soviet circles, printed a front-page appeal today to peaceful nations of the world to unite for collective action against aggressors.

Under the caption "The hour of reckoning strikes," the newspaper said Japan quickly took advantage of the four-power Munich settlement Oct. 1, to move ruthlessly into China regardless of British interests.

"And why not?" Le Journal demanded. "England is feeble, isolated and penetrated with a 'love of peace.'

"Why not once more give Prime Minister Chamberlain opportunity to rescue peace by surrendering Hong Kong and thus achieving a new triumph?

"If he does, Japan naturally will demand Singapore, too. Naturally Japan also is adopting a firmer tone toward France, possessor of Indo-China.

"And why hesitate? Has not France recognized itself powerless to defend its own interests?"

Transients Go High Hat: No More Walking

CALGARY, Oct. 26— Transients have gone high hat in Calgary—no more walking to the "diamond" in East Calgary where the freights slow up.

They ride the freights free, but are taking taxis to the freight yards from downtown Calgary.

A taxi driver told about it today. He got a call to a rooming house. Two transients were waiting.

"What's the price to take us out to the 'diamond' where the freights slow up," queried one.

"Fifty cents, before I start too," replied the driver.

"Well, what'ya waiting for," said one of the pair handing over the fare.

Other drivers from downtown taxi stands told a similar tale.

The Agricultural Crisis

The duration and extent of the so-called agricultural crisis has made it manifest that this is not a dilemma within national boundaries, stated Alonzo E. Taylor, United States wheat expert, in an address reprinted in The Northwestern Miller. Statistical analysis and political agitation make it clear that an agricultural problem permeated all countries of the white world. The perfection of transportation and communication has converted the white world into a single market with rapid registration of supplies, demands and prices. The difficulties in foreign exchanges have, in a somewhat paradoxical manner, served to intensify the efforts of varying supplies, demands and prices.

An objective description of trends in the white world at present may be condensed as follows:

1. In practically all white countries' commerce agricultural producers are placing in political programs the plank that prices for farm products are too low. What is being sought and done is price fixing, directly or indirectly.

2. In practically all white countries the non-farm workers are placing into political programs the plank that wages are too low. What is being sought and done is wage fixing, directly or indirectly.

3. Agricultural producers tend to confuse sales prices with annual income and mistake monetary income for real income. Non-farm workers tend to confuse wage rates with annual income and likewise mistake monetary income for real income.—Wheat Pool Bulletin.

TESTED RECIPES

WHY NOT CHEESE?

When cold weather comes healthy appetites automatically seem to require warm foods. Why not satisfy this natural desire by serving and eating cheese?

Cheese may, of course, be used as it is purchased, but in this form it does not provide the pleasing sense of warmth to the taste, although its high fat content makes it an excellent heat producer in the body. This valuable dairy product, however, changes from a cold to a hot food when combined with other foods such as eggs, milk and cereals, to produce a tempting cheese souffle or something similar.

The wise homemaker will depend upon savoury, appetising cheese dishes to solve the luncheon or supper problem many times during the coming months of cold weather, and will constantly use such recipes as the following which have been selected from Dominion Department of Agriculture publication 586, "Cheese for Better Meals":—

Cheese Souffle

3 tablespoons butter
4 tablespoons flour
1 cup milk
½ teaspoon salt
Yolks of 3 eggs
Whites of 3 eggs
Few grains of cayenne
¾ cup cheese, grated
Pinch of mustard

Melt butter. Blend in flour. Add seasonings and milk. Stir until sauce has thickened. Add cheese. Add beaten egg yolks and, when mixture is cold, fold in stiffly beaten egg whites. Pour into buttered baking dish or ramekins and bake in a moderately slow oven (325 to 350 degrees F.) until firm—30 to 40 minutes. Serve at once.

Cheese Roast

2 cups grated cheese
2 cups cooked kidney or navy beans
¼ cup finely diced celery
1 teaspoon minced parsley
1 egg slightly beaten
2 cups soft stale bread crumbs
2 tablespoons butter
Salt and pepper

Drain beans, mash with fork and add egg and mix thoroughly. Melt butter in saucepan. Add crumbs, mixing well and cooking until slightly browned. Add to cheese mixture until stiff enough to shape into a loaf. Roll in remaining crumbs. Bake in a moderate oven until heated through and nicely browned. Serve hot with tomato sauce. Small onion finely chopped or grated may be added if desired.

Corn and Cheese Casserole

1 cup corn
1 cup bread or cracker crumbs
1 cup grated cheese
½ teaspoon salt
2 cups scalded milk
1 tablespoon melted butter
1 teaspoon Worchestershire sauce
2 tablespoons chopped green pepper or pimento
2 eggs

Combine all ingredients except eggs and milk. Beat egg yolks and add with milk. Fold in stiffly beaten egg whites. Place in buttered baking dish and oven-poach in a moderate oven (350 degrees F) until firm—about 40 minutes.

BREAD

Being the Popular Report (1937-38) of the British and Foreign Bible Society, by the Rev. John A. Patten, M.C. M.A. its Literary Superintendent

The Popular Report of this world-wide Society, under the caption "Bread", maintains the high level of all past issues. Mr. Patten bases his report on the general principle, "Whether he knows it or not, man is hungry and that hunger can only be satisfied by heavenly food." With this truth as guiding principle this little book essays to tell the story of how the Bible Society supplies to needy multitudes of men and women of many races and languages "the Bread of Life."

The headings of the chapters give an indication of the attractive way in which the whole subject is treated "Bread for the British People;" "Distributors of the Bread;" "Bread for the Multitude;" "The Same Bread: The Story of Translation;" and "The Price of Bread." The bare outline of these headings is filled out with apposite literary quotations, including a characteristic line from Rupert Brook, "The strong crust of friendly bread." This moving account of the work of the British and Foreign Bible Society throughout the world is written with Four Hundred Years of the Open Bible in English, and all that it has meant and can mean to that race, as its great background.

The romance of the Society's progress since 1804 is never lost sight of, and like a golden thread through the report runs the fundamental idea that the Bible Society's one aim is to place in the hands of men "the Bread of Life."

Due acknowledgement is made of the British Commonwealth, and Canada and its contribution is given honourable mention. The story of the work is its appeal, and the gifted author very clearly indicates the vital need of increased resources if the Society is to maintain and extend its world-wide mission.

In this Four Hundredth Year of the Open Bible in English, the Society, though still faced with a deficit, seems confident that its appeal will find a response from all vitally interested in the Christian Missionary Enterprise, and in giving to the peoples of the world the one Book that can truthfully be described as "the Bread of Life."

Words — Words — Words

Hansard, the printed record of Parliamentary debates, which may not be changed, records at a rough estimate, something over five million words at each session of Canada's House of Commons, according to Thomas Wayling writing in the October issue of the magazine of Canadian Industries Limited. So perfect is the system of recording debates at Ottawa that a member speaking when the House closes at 11 p.m. has the printed verbatim report on his desk at 11 the next morning.

Strange as it may seem, Canada had an official report of Parliamentary debates before the Mother of Parliaments at Westminster. In 1875 a contract was awarded at $600 a week for the reporting of the Commons debates, and in 1880, twenty-nine years before the British Parliament adopted a similar plan, the Canadian Government established its own "Hansard." It was described to the British Committee by Lord Lee of Farnham as the best in the world.

Chemical Coincidence

Although "Cellophane" is thirty years old this month, it was only last year that J. E. Brandenberger, the inventor of the process for making it, saw his original goal achieved. Spilling some wine on the table cloth of a Paris restaurant started the Swiss chemist searching for some form of protection that would make tablecloths and other textile products stain-proof. His experiments, which resulted in the discovery of a method for making cellulose film, solved many problems, but not the one of rendering textiles stain-proof. The inventor's dream of a world of stain-proof tablecloths and dresses was made possible last year, however, with the discovery in England of a finishing agent that renders fabrics durably stain-proof and water-repellent.

The Value of Rain

A single inch of rain in July on the United States corn belt is worth about $400,000,000 to the farmers.

LINDBROOK

The Ladies of the Anglican W.A., Lindbrook branch, gave a whist drive in the School here on Friday night, October 21st (Trafalgar Day, by the way, rather a coincidence that it should be an English Church affair on that particular day.) A decent sized crowd turned out despite one or two other attractions occurring on the same date. Court whist was the order of the evening and one table of bridge. The winners were as follows: Bridge, Ladies 1st, Mrs. Barden Consolation, "Madame" W. Glenn, the Reeve in person; Gent's 1st, Mr W. Forman, Consolation, Mr. H. McGinitie Whist, Ladies 1st, Mrs. A. Gill, Consolation, Mrs. Baptist, Gents 1st, Mr. L. Gill, Consolation, Mr. E. W. Hooper After the presentation of prizes, a dainty lunch was served and everyone enjoyed the evening immensely and we hope the financial end was as satisfactory as the entertainment.

On Friday, 28th of October, three of the elder girl pupils in the Lindbrook School put on a costume party The three girls being Miss Pansy Bracegirdle, Miss Joyce Bailey, and Miss Elizabeth Peck All the children turned out in costumes, some of which were really "wows" and the teacher as well, entered into the spirit of the affair and turned out in costume too. The sponsors gave prizes to those wearing the best disguises. After the judging, games were played and also the business of ducking for apples, in fact from all accounts the party was well organized and supervised entirely by the sponsors and everything went off well

A Pie Social and Dance was given at the School here last Friday evening in aid of the children's Christmas tree and concert. The dance was organized by the ladies of the L.C.C. who gave pies, cakes, sandwiches and coffee, etc., and in fact took charge of that end of it. Mrs. W. C. Lancaster donated a fine turkey to be drawn for on tickets sold for same, Mr. R. Scott being the lucky winner The Lindbrook orchestra supplied the music, Mr. Jack Bailey being Master of Ceremonies. Mr. Chas Morden auctioned the pies, and believe me! he's missed his vocation, some of the pies were really expensive after he had blarneyed over them a bit, maybe its the Irish in him, but those pies sure went high. There was a big jolly crowd present and everyone had a good time and we hear that the receipts weren't so bad either.

The ladies of the L.C.C. are raffling a lovely wool comforter in aid of the building fund for the Community Hall. We hear that this comforter is a real work of art and a "lovely thing." beeeautiful! etc., etc., and whoever gets it will have something worth having, so roll up and buy your tickets from any of the ladies of the L.C.C.

A nasty accident took place about half a mile west of Lindbrook last week when two cars met head on, luckily no one was hurt, but the cars were wrecks.

Congratulations to Mr. and Mrs. Leslie Herndon on the birth of twins last week

It begins to look as if old man Winter has caught up to us at last, but we can't kick, the weather has been ideal till now and "all is safely gathered in, so let the winter storms begin."

It is unfortunate that the storm came on Hallowe'en, it upset the calculations of some of the juniors and it also deprived some of the adults from attending the Harvest Supper in the Curling Rink, Tofield, given by the W.A. of the Anglican Church there.

COUNCIL MEETING

(Continued from front page)

partment of Relief and Public Welfare re account of John Sauer. This account was quite small and council agreed to pay it

The Provincial Treasurers Department wrote as to the account with the Department regarding Mothers' Allowance. The account is now $1402.00 of which amount a considerable portion is in arrears

The Department also requested inspection re Mothers' Allowance recipients to be made semi-annually. Inspection had already been made and amounts recommended to stand as they were

Letter was received from Mr. Cahill giving list of clothing needed. He also requires a pair of glasses, It was decided to ask the Bureau of Relief to supply the clothing.

A letter from Clement and Whittaker re N.E. 30-51-20, was tabled for future reference.

A report of the tax collector was made showing arrears paid, mileage covered and commission. There was in the neighborhood of $200 paid and the mileage and commissions amounted to 20 25 per cent of collections

Councillor Anderson reported re [illegible] which could be used as a [illegible] for the Village of Kingman. He said that he had [illegible] number of different [illegible] but was unable to procure a [illegible] for that purpose. It was decided [illegible] the government and explain the situation.

A long list of accounts were passed for payment The list will be published next week

It was decided to renew membership in the Alberta Division Rural Municipal District's Association at a cost of $20. Delegates to the convention to be held at Calgary are Councillor Walker and the secretary. Alternate delegate, Councillor Anderson. Convention dates, November 30th—December 1st.

The meeting then adjourned to meet at the call of the reeve.

Notice To Creditors And Claimants

IN THE ESTATE OF PETER GATES, Late of Tofield, Alberta, Farmer, Deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above named Peter Gates, who died on the 12th day of May, 1938, are required to file with the undersigned by the 3rd day of December, 1938, a full statement duly verified of their claims and of any securities held by them, and that after that date the Executor willl distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to his knowledge

DATED at Tofield, Alberta, this 21st day of October, 1938.

A. J. H. McCAULEY,
Executor, Tofield, Alberta.

AMISK CREEK

The Ladies' Aid held their monthly meeting at Mrs. C. Erickson's home Tuesday of last week. Rev. Hoverstein was present and read the Scripture and gave a short talk. Mrs. C. Erickson and Mrs. I. C. Olson were elected delegates for the W.M.F. convention held in Viking, Monday, the 31st of October. It was decided that the Lutefisk and Chicken Dinner and Sale of Fancy work will be held on Armistice Day, November 11. Serving will start at 12 o'clock noon. Everybody welcome.

Mr. and Mrs. E. A. Moen, Edna and Marvin left last Sunday for a week's visit with their son and daughter-in-law who are residing in Hazeldean. They also intend to visit with friends at Lee-Park and Elk Point.

Being Lillian Patterson's birthday on October 31st, the young people of this neighborhood surprised her with a handkerchief shower on Sunday evening. Quite a number were present and a good time was spent visiting and playing games. A delicious lunch was served at midnight and all report having spent a very enjoyable evening.

Several from here attended the McIntyre Sale held last week.

Mr. and Mrs. H. Hillerud and Bella returned last week from a several day's visit at Hazeldean and Lee Park.

Mr. J. Anmdo attended the Sons of Norway twenty-fifth Anniversary held in Edmonton last Saturday.

Mrs. D. Derdock and children visited at the P. O. Flaaten home Thursday evening of last week.

Mr. and Mrs. C. Erickson, Mr. and Mrs. I. C. Olson were city visitors last week

Glen Hillerud has left for Vermilion where he is to attend Agricultural School this winter.

Mr. and Mrs. O. Herschberger and family were visitors from High River at the J. Brenneman Sale.

Mr. A. Erickson celebrated his 80th birthday last Friday, October 28th.

Grading Canadian Dressed Poultry

Under the new regulations respecting the grading and marketing of dressed poultry in Canada issued by Order in Council 14th September, 1938, the kinds, sub-kinds, and grades of the Canadian Dressed Poultry Standards are as follows:

Chickens—squab broilers, broilers, fryers, roasters poulards, capons, stags.

Fowl—hens, roosters.

Turkeys—young hens, young toms, old hens, old toms.

Ducks—ducklings, ducks

Geese—goslings, geese.

Pigeons—squab pigeons

Guineas—guinea chickens, guinea fowl.

The kinds of poultry outlined in the Canadian Dressed Poultry Standards include both sexes and no distinction is made between the breeds. According to the definitions of the kinds and sub-kinds, chickens, ducklings, goslings, young turkeys and guinea chickens are young birds with soft flexible cartilage at the posterior end of the breastbone or keel. They are birds that are prepared for market and killed at or before maturity, and before they are used for breeding purposes.

Squab broilers are young chickens weighing not more than 19 pounds to the dozen: broilers, young chickens weighing not more than 20 pounds to the dozen, and fryers are chickens weighing 20 to 32 pounds to the dozen. Roasters are chickens weighing from 43 pounds or more to the dozen. Capons are unsexed male chickens, and poulards unsexed female chickens. Stags are male chickens showing hard spurs and general characteristics approaching the stage of maturity.

Fowl, ducks, geese, old turkeys and guinea fowl are birds that have no soft flexible cartilage at the end of the breastbone or keel. They are birds that have come to maturity or have been used for breeding purposes.

Pigeons are old birds that have flown and developed hard muscle and squab pigeons are young pigeons that have never flown.

In grading dressed poultry according to these regulations, the following characteristics must be considered: conditions, conformation flesh, fat, plucking, tears, breaks in the skin, and discolouration. To qualify for any grade under the Canadian Dressed Poultry Standards, poultry must have all plumage feathers plucked from the body, wings, backs and neck to within one inch of the head, vents flushed, feet and mouth cleaned.

The grades under Canadian Dressed Poultry Standards are: grade Special Milkfed, grade A Milkfed; Grade B Milkfed; grade Special, grade A, grade B, grade C.

Vegreville Constituency Unity Association

Vegreville, Nov. 1— Establishment of the Vegreville Constituency Unity Association in support of the proposals for united political action at the next Provincial General Election as advocated by the Unity Council of Alberta got under way at a meeting of residents of this Constituency, many of them farmers, held here last week. The meetings included representation from Vegreville, Ranfurly, Lavoy, Beaver Lake and Forty-Nine Mile Creek.

Unanimous endorsation was given a resolution to create a Constituency Unity Association and F. P. Austin, Ranfurly, was elected as temporary chairman of the new body. Mr. Austin has acted as a member of the Provincial Unity Council of Alberta under the chairmanship of John I. McFarland for this district. Temporary executive was named consisting of T. Russel, Major F. J. W. Fane, B.C. Gilpin with C. Clifton as Secretary.

Series of meetings for the purpose of explaining the Unity Movement throughout the Constituency was planned for the near future and a drive for membership in the new Association will be inaugurated at once.

A general Constituency organization meeting will be called by the Association shortly, at which time officers and a representative of the Unity Council will be elected and plans laid for a Unity Nominating convention.

WANTED—A Middle-aged person for light house-work Apply to Mrs. Johnston Ferguson, Phone 60, Tofield.

LOST— From Mrs. McConnel's pasture, one red and white steer, coming two, horns, branded 2 on right hip.—Finder please notify Geo. Cookson, phone 1017.

Why A Railway Engine Puffs

The puff-puff of a locomotive is familiar to all but few people seem to know just what causes the noise, according to operating officials of the Canadian National Railways. It is explained that a puff is the noise made by exhaust steam is let out of the smoke-stack after the steam has pushed the piston along the length of the cylinder. One puff comes at the end of the forward stroke and another at the end of the backward stroke, four puffs to every revolution of the driving wheels.

Pushing the piston back forces out the steam that pushed the piston forward and as this used steam is still under some pressure, the operation of ejecting it through the smoke-stack is accompanied by noise, hence the puff. Engines puff louder when starting because a great deal of steam is admitted to the piston to gain maximum power. As the engine gathers speed "brute" power is not needed and less steam is admitted per piston stroke. The puff-puff then becomes a steady purr.

Fuel For a Toot

The Union Pacific railroad has figured out that it takes .2037 of a pound of coal to toot the steam whistle one second. Since six seconds is the average toot, 1.22 pounds of coal is required.

Stockings By The Million

Nearly three million dozen pairs of silk stockings are produced in Canada annually, representing some twelve million dollars to Canadian manufacturers, says Janet Hamilton in an interesting story on the hosiery industry which appears in the October issue of the magazine of Canadian Industries Limited.

Nowhere else but in Japan can silk be produced so well or so cheaply, and ninety per cent. of her raw silk crop is shipped to America every year: half of it for the hosiery industry alone A pound of silk threads of almost infinitesimal fineness, or about 280,000 yards, are required to make two dozen pairs. Silk stockings are knitted flat and then sewn down the seam, unless they are of the seamless variety, when they are knit on a round needle.

Poultry Not Disturbed By Huge Aircraft

Lethbridge, Nov. 1 — Poultrymen don't lose sleep if it so happens their farms are located directly under an airline route. But if a glider school holds sway nearby they take time out for worry.

Andrew Dykes, Lethbridge poultryman, told Kiwanis Club members that poultry suffer far more from the hawk-like gliders that move about silently than they do from the high-powered airliners which ride furiously overhead. He asserted the effects of the quiet aircraft upon hens are not noticeable at once as the quality of the eggs is lowered. When one of the huge Lockheeds of Trans-Canada Air Lines roars along its schedule, the hens gaze upward but do not suffer greatly.

McKENZIE

Mr. and Mrs. Glen Bailey were visitors to Lamont on Tuesday to visit Mr. Baileys father who is sick at the hospital there. He expects to be able to come home again in the near future.

Mrs. Eaglesham and Jean and Jacobsons were visitors to Bardo on Saturday for the Lutefisk dinner and bazaar. There sure was an abundance of food and a large crowd.

Mrs. Eaglesham is visiting with friends at Ryley for a few days.

Mrs. Margarette Weatherill has been on the sick list for a time. We hope she will soon be better.

Mrs. Verlyn Moss and several women from Saskatoon were entertained at Mrs. Goeglein's on Tuesday afternoon to bridge.

Mr. and Mrs. Joe Niemets left for Rochester with Dr. Law on Sunday morning Mrs. Niemets went there for medical treatment. We hope she gets along aright.

On account of the bad roads there was not a very large turnout at the bridge party held [illegible] at [illegible] on the 2[illegible] [illegible] Honors went to Mrs. W. [illegible] and Glenn Bailey and [illegible] Mrs. Walker and Mathew Eagleson.

Mr. and Mrs. Booth returned home on Monday evening after visiting the McKintyre home at Carstairs over the week end

The Logan Social Credit Group will hold their next meeting at the Goeglein home on November 22nd instead of the last Tuesday [illegible]

Mr. and Mrs. Logstead and three daughters were in Edmonton from Thursday evening to Sunday. While there they attended the supper and bazaar at the Danish Lutheran church.

At a social gathering on October 29th Mr. and Mrs. L. Noland were presented with a lovely chair and electric lamp. They have been residents of this district for some long time and left on November 1st to take up residence in Edmonton.

Mr. and Mrs. Maurice McGinitie left last week for Oregon where they will make their home. Mr. and Mrs. McGinitie have been residents of Ketkamoot for quite a number of years.

KINGMAN

The Ladies' Aid will hold their annual sale on Saturday evening, starting at 8:00 o'clock. Lunch will be sold toward the end of the sale

Rev Hoverstein held services in the Lutheran Church last Sunday. He also held baptismal services for Mr. and Mrs. Ole Soma's baby daughter, named Irene Selma The sponsors were Mr. and Mrs. Myira Soma.

The new blacksmith who bought the Skalina property is busy already doing all kinds of work. He expects to enlarge the shop soon.

Mr. and Mrs. Dan Lauber and Richard visited at the home of Mr. J. R. Dettwiler last Monday.

Quite a few people from Kingman attended the Lutefisk dinner at Bardo last Saturday.

Mr. Art Lynn spent last week end at Wetaskiwin.

Mr. Pat Fuglum is back in town again after working thru the threshing season at Hughenden

[illegible] leaves for the [illegible] after being [illegible] for about a month.

[illegible] will hold services at the Lutheran Church on [illegible] 20th at 11 o'clock.

S.C. Convention To Be Held Here

A S. C. assembly meeting of Zone No. 7 was held in the Town [illegible] afternoon November 5th, 1938 The groups in the zone were well represented.

Election of officers for the coming year took place and the same staff was re-elected. Plans for the coming convention were made and delegates from each group were appointed.

[illegible] constituency convention will be held in Tofield this year on Friday, November 25th, 1938.

There will be an afternoon session commencing at 12 o'clock noon, and an evening session at 8:00 p.m. at which Hon E. C. Manning and Mr. Orvis Kennedy, M.P., will be the principal speakers assisted by other prominent members, including Dr. McPherson, M.L.A. Mr. Marshall, M.P. and William Hayhurst, M.P.

LOCAL & PERSONAL

Mesdames Robinson, Bailey and Dwernan Board of W.T. Quarterly Meeting which was held at Christ Church, Friday 28th. They were accompanied by Rev. T.W.Teape The adress given by Rev. G.P. Gower at the Corporate Communion Service was very inspiring. Among the various speakers throughout the day was Miss Lister one of our own missionaries now on furlough.

Jack Smith, formerly of Tofield, now of Edmonton spent the week-end visiting friends here.

Mrs. Stanley Jack (nee Helen Schultz) spent a few days at the Numelgud home.

Miss Irene Pruis of Edmonton spent the week end with Miss Lois Thompson.

Miss Pat Burnett spent Saturday in Edmonton.

A. Machtmes and A. Calvert visited Strome on Sunday. Mac visited home folk there.

The harvest supper held at the curling Rink on Halloween Night was well attended The Anglican ladies and Vestry wish to thank all who [illegible] in any way to make the evening successful, and we especially thank the people for their patronage.

A meeting of the Wainwright Deanery was held at Viking on November 3rd. Tofield Parish was represented by Rev. Teape, accompanied by Mrs. Lancaster and McCarthy.

Born.—To Mr. and Mrs. Alex Dragon of Ryley, on Thursday, November 3rd, at the Gray nursing home, a son

Mr. Fred Martin of Duchess, is visiting friends here at Tofield and in the Tofield district for a short time on important business. Fred is being married today (Thursday) the happy lady being a daughter of Mr. and Mrs. Joe Voegtlein. More about this next week. Fred's other important business is straightening out people's radio troubles and in due course for a limited time he can be located at The Tofield Service Station.

THE ADVENTURES OF MARCO POLO COMING TUESDAY

Following in the wake of an exceptionally fine run of pictures, Sharp's Shows presents here next Tuesday "The Adventures of Marco Polo." Around the world, from romantic Venice to the mystery and wonder of golden China. The most classic travels of all time. Adventure, among the marts of trade, with beautiful women, in gambling dens, fighting and loving all go to make a picture of absorbing interest from start to finish. KEEP FAITH!

Away 'neath Flanders Fields they lie
And [illegible]
[illegible] far and wide [illegible] world
Their loved ones yearn and weep

They died; and yet their spirit [illegible]
Reminding us to cease
All warfare, and keep faith with them,
They died at war, for Peace.

All praise to those [illegible]
All shame to those who dare
Break faith with them, with Flanders Fields,
Those crosses white and bare.

Oh! on this day unite in prayer,
And may the Prince of Peace
Grant what you ask in their dear name,
That carnage, war, shall cease

Sisters, daughters, widows, mother[illegible]
You fatherless [illegible]
Keep faith [illegible]
ing
Keep faith [illegible]

The Story of Hansard--How Parliamentary Debates are Recorded

(From C.I.L. Oval)

Words—words—words. Thousands of them, millions of them, pouring in spate on Parliament Hill. Cabinet ministers, senators, back benchers, talking, discussing, questioning, arguing.

Down in the centre aisle a shorthand reporter's pen races across the ruled pages, a flip and another page, line after line, page after page. There's an international crisis to be recorded, there's a debate about unemployment, there's a spot of oratory aroused by the firing of the postmaster at Ticklepenny Creek. Great words, little words, sentence, paragraph and page, they go down in the record of the doings of the Canadian House of Commons. Over in the Senate other reporters are taking down the measured tones and rounded periods of the elder statesmen.

Lucky the reporter who records the clear resonant voice of a thoughtful orator; unlucky the man who has to follow the rambling ill-enunciated remarks of a careless talker. The average speed is about 150 words per minute, but with the return of the Hon. R.J. Manion to Parliament, the reporters must speed up to and pass, 200.

Hansard is the printed record of Parliamentary debates which may not be changed. A man speaks and a Hansard records how. The Hansard reporters take out poor English, the wrong word, they punctuate and paragraph, and many a new member has been surprised to find what a good speaker he really is—when he reads Hansard.

Strange as it may appear, Canada had an official report of Parliamentary debates before the mother of Parliaments at Westminster. Originally it was a crime in England to report Parliament, then in 1768-74 sat the "unreported parliament." About this time a monthly pamphlet was furtively published and a bitter debate waged on the reporting of speeches.

Meanwhile, Luke Hansard, a Norwich printer, had arrived in London. He became a compositor in the employ of John Hughes, a printer to the House of Commons, worked up to a partnership, and finally bought the firm.

In 1803 William Cobbett published the first serious attempt at verbatim reports of Parliamentary speeches. Hansard did his printing and when Cobbett ran into difficulties Hansard started publication of Hansard's Parliamentary Debates. He employed his own reporters, struggling to make ends meet until the Government in 1878 contributed a grant of 3,000 pounds sterling towards the work. In 1888 the company went bankrupt and a new company, the Hansard Publishing Union Limited, was formed. It was not until 1909 that the British Parliament took over the reporting and publishing of its own debates although as far back as 1887 T.P. O'Connor had pleaded verbatim reporting.

In Canada there were no official records of the debates of the Parliaments of Upper and Lower Canada, but in 1865 the published "Confederation Debates" recorded the proceedings at Quebec, in the previous year, of the interprovincial conference, and proved the value of verbatim reports.

Then as now the Senate did not get the same amount of attention in the public prints as did and do the Commons, so in the late sixties the Senate arranged with John [illegible] to prepare a separate report, which was, however, no verbatim. In 1876 a contract for official reporting was awarded to George and Andrew Holland, who carried on the work until 1916. In 1917 the Senate took over its own reporting.

In Confederation year Alexander Mackenzie and Joseph Howe brought up the question of reporting debates in the Commons, but the report of a special committee was voted down. Up to 1870 the only records were press clippings, pasted up, and known as "scrapbook Hansards". In 1870 James Cotton of the Ottawa Times issued a compilation taken from press reports, and Parliament purchased a number of copies. They were known as the "Cotton Debates" of 1870, 1871 and 1872. There was also Thompson's "Mirror of Parliament" published from day to day. If the page was filled before the copy was completed, Thompson stopped at the bottom right hand corner of the page—even in the middle of a sentence and finish the printing of it the next day.

In 1875 a contract was awarded at $100 a week for the reporting of the Commons debates, and in 1880, twenty nine years before the British Parliament adopted a similar plan, the Canadian Commons established its own "Hansard". It was described to the British committee by Lord Lee of Fareham as the best in the world.

Today Canada's Hansard records over five million words every session. So perfect is the system that a member speaking when the House closes at 11 p.m. has the printed verbatim report on his desk at 11 o'clock the next morning.

A Hansard reporter "takes" for ten minutes, then has fifty minutes to dictate his "take" to a typist. The bell rings and he goes on for another ten minutes. As his "take" is typed out it goes to the Hansard editor, and is there put into final and perfect form. The member may see the typed copy and change wording and perhaps phrases, but he must not change the sense or the content. Sometimes, but very seldom, a member rises in the House, claims he has been misreported and asks for a correction to be made. What he says is recorded, but it does not necessarily mean that the Hansard is changed.

Hansard reporters must be men of wide knowledge, because the member may speak on any subject under the sun. As a member has the right to speak in French there must also be a French as well as English reporter "on the floor". To complicate matters, a staff of translators is kept busy translating all English speeches into French and all French into English, for Hansard has two complete editions.

The Hansard editor must combine the culture and knowledge of a university professor, a business executive, a man-about-town and just an everyday citizen. He must be tactful with the member who claims he didn't say this, that or the other thing (it may embarrass him in his riding), but if the reporter has recorded it the report may not be changed, since other members may have heard him say the same thing. A member may make a correction on the floor of the House, but he cannot change Hansard.

The final edited copy goes over to the Government Printing Bureau where it becomes the business of the King's Printer. Each full days debates are stitched together, and are sent back to the Commons for distribution. The Senate system is parallel, the Senate having its own staff of reporters, and its own issue of Hansard in both languages.

During the session, as each day's report comes back from the King's Printer, the Hansard editorial staff prepare the index. These indices are a marvel of detail and accuracy and may have as many as 30,000 references. For instance, the Prime Minister mentions Anticosti Island in the Budget debate. It is indexed under budget, under Mr. King's name, under Anticosti, and so forth.

At the end of the session, when Hansard has been thoroughly revised and indexed, the permanent edition is prepared. It is reprinted on large sixteen page sheets (eight pages on each side), these then pass through a folding machine and become "signatures" sixteen page pamphlets. These signatures are gathered, collated and sewn together and the books are then "smashed", "smashing" being the bindery term for squeezing the back of the sewn signatures, made bulky by stitching, in a special press, to force out the air and flatten the threads so that thickness of both front and back of the book will be equal.

After "smashing" the volume is trimmed on three sides, and after being glued-up, has its back rounded in the rounding and backing machine, preparatory to being covered and cased. Two pieces of stout millboard form the covers, and over this is glued a specially cut piece of "PX" Book Cloth, a pyroxylin-coated book-cloth material made for the bookbinding trade by the "Fabrikoid" Division of Canadian Industries Limited. This cloth is tough, yet pliable, and will stand an unusual amount of wear and tear. Because of its water resistant qualities it will not stain easily and will resist the possible attacks from the "bookworms" of the insect world.

The books are then cased in and finally put in a book press, where they remain under pressure until dry, and from which they emerge to travel across the seven seas to libraries all over the world. Every Member of Parliament is entitled to a set, and few works are so frequently referred to. The Parliamentary Librarian keeps a dozen sets on hand dating back to 1880, and has other sets in reserve.

The books have to stand frequent handling and much abuse. A little page boy dashes into the library—a debate is on and a member who is about to speak wants to find out what so-and-so said last year. The Library clerk pulls down the volume; the boy rushes off, possibly he drops it in the corridor. The member opens it, turns over its pages, finds what he wants, and slaps another book on top to mark the place. All this is not easy on the binding, but it stands up. From 1875 to 1880 the printing of the Hansard was done by a firm of local printers while the binding was undertaken by another company, but in 1880 the work of printing and binding government publications was taken over by the present Government Printing Bureau and the King's Printer and his men have been binding Hansard ever since, and they demand a binding material that will stand abuse and the wear and tear of time.

No sooner has the Government Printing Bureau completed one set of Hansard and turned out 3,000 sets in English and French than another session is upon them and work gets on again. There may be one, two, three, four, five, or even six volumes to a session, but no matter the quantity or the quality of verbiage Hansard must record it and the King's Printer must print it in time and on time.

Only twice has Hansard put in any comment of its own in its report; once when a man on the roof of the old Parliament Building dropped a pail of [illegible] through the glass and nearly followed himself, and again when the buildings were destroyed by fire in 1917 and the reporting of the debates was carried on up to the moment the session broke up in the smoke of the burning building. Hansard wrote "Fire", and ducked with the rest.

Love's Labor Lost

"May I have another cake?"
"Another cake what?"
"Another cake, please"
"Please what?"
"Please, Mother."
"Please Mother what?"
"Please, Mother dear."
"No. You've had two already!"

He Sold His House

THE MAN REALLY DIDN'T NEED IT OF COURSE. HE HAD ANOTHER ONE TO LIVE IN. BUT HE WANTED TO SELL THE EXTRA HOUSE. SO HE INSERTED A CLASSIFIED AD IN THE MERCURY AND WITHIN THREE DAYS OF THE FIRST INSERTION THE HOUSE WAS SOLD.

YOU, TOO, MIGHT HAVE SOMETHING TO SELL THAT IS SALEABLE AND WHICH SOME OTHER PERSON IS DESIRING. AND YOU TOO, WOULD PROBABLY BENEFIT FROM A CLASSIFIED AD IN THE MERCURY.

THE RATES ARE LOW. ONE ISSUE 50c; TWO ISSUES 75c; FOUR ISSUES $1.00. THERE IS A GENEROUS LIMIT OF THIRTY WORDS.

THE MERCURY

THE WORLD OF WHEAT

By R. C. L. Strange, Director "The Crop Testing Plan."

"What d'you think of this wheat?" asked an Elevator Agent.

"That's a lovely-looking sample" I said. "Plump, of a fine deep red color. Why that's almost show wheat."

"Sure it is," said the Agent, "and its also a good joke on you."

"Why?" I asked.

"Well that comes from a field that you classed as no good last summer. You said it was Little Club wheat, and that the quality was terrible. Now you say it's fine."

"Can you get me about a pound of wheat of another variety from the same farm?" I asked.

"Sure I can," said the Agent. "I can get you some Thatcher, but what will that prove?"

"Let's wait and see," I said.

The pound of Thatcher arrived. This, with a pound of Little Club was made into loaves of bread by the Dominion Cereal Laboratory.

The loaf made from Thatcher wheat is tall and light, of a nice creamy colour and has an appetizing appearance. The loaf made from Little Club is about half as tall only, soddener and heavy looking, the crumb looks unappetizing and it is as yellow as a dandelion.

"Well" said the Agent, "It looks as though the wheat varieties are just like people. You can't tell their quality or worth by the looks of them!"

Following factors have tended to raise price—Better Political situation aids European wheat trade—Winter wheat seeding backward in Roumania. Rains still lacking in Argentina. Australian Russian wheat export surplus believed small—Northwestern India continues dry, seeding conditions unfavorable—estimate of last Argentine corn crop reduced to 174 millions.

Following factors have tended to lower price—Large arrivals of wheat in Europe—Roumania and U.S.A. continue pressing subsidized wheat for export. World has largest rye crop in recent years—Rains relieve dryness in Balkans—Large exports of carobs (beans) from Cyprus to Egypt—Argentine corn being pressed on Liverpool market.

Live Alone and Like It

"I heard about a man who lived on onions alone."

"Anyone who lives on onions should."

Proposed Marketing Conference

Premier John Bracken of Manitoba made a proposal last week that an international conference be held in Winnipeg to consider farm marketing problems. He pointed out that the wheat price was now around 60c a bushel, being around 10c below the average for the depression years, and the outlook was so serious that something had to be done. He suggested that the United States and European nations be invited to participate in the proposed conference.

Mr. Bracken's proposal has not met with an enthusiastic response. The financial Post, which represents financial interests in Ontario, says that wheat marketing has become very much a national program. Especially since the dominion treasury is likely to incur a loss of $50 million on its program this year. The Financial Post says it is very much to the interests of Western Canada to keep it a national matter. The western premier who tries to take it out of the national field and bring it into that of provincial government will not be doing a good service to his own constituency. The Post observes.

The Post then goes on to say that Canada's difficulties in marketing wheat and other agricultural products which are exported arise very largely from the political tension in Europe. Next it says our wheat problem is very largely due to an enormous and uneconomic expansion of wheat acreage in the United States which has taken place since the previous wheat crisis, which reached its culmination in 1932, and which can only be dealt with by the United States and they are now attempting to do so.

Premier Bracken believes that the continuation of the federal government's guarantee of wheat prices for western farmers until such time as trade becomes freer is absolutely necessary. He acknowledged, however that Eastern Canada is much opposed to a minimum price. —Wheat Pool Bulletin.

Initial Cost

Auto Salesman (desperately): "But madam, if you take this car we will put your initials on it free."

Mrs. Saver: "But my husband says it's not the initial cost that counts, but the upkeep."—Long Beach Sun.

INFORMATIVE WRITING—

THERE ARE at least two kinds of editorials (perhaps many kinds). First those that are written with the sole idea of forming public opinion. In this kind the beliefs and facts concerning the subject are so arranged as to make prominent just what the writer wishes to make prominent: and are set down in such a way as to create certain opinions in the minds of the readers. This kind of writing runs all the way from rank propaganda containing half truths to propaganda expounding the highest known motives of human endeavor. These writings are generally easy to read, and require little mental effort to think out a solution to the subject treated, because the writer has already done so. The second kind of writing is more informative. The object of the writer is neither to praise or condemn but rather to inform. As far as possible all the facts are set down, both favorable and unfavorable to a subject and the reader is left to form his own judgement. There may be, there frequently is, an editorial expression of opinion, but this opinion is not dogmatic and is chiefly expressed so that the writing may have weight and finish.

This paper prefers the second kind, believing that understanding is better than persuasion; and knowledge better than prejudice. Therefore we strongly favor editorials of an informative nature.

When, after much consideration by the Municipal District of Cornhill Council and also by ourselves, the Council agreed to subscribe to the Mercury for a trial period of six months for all its resident ratepayers, we hoped that as time passed we would be able to render a worthwhile service to the ratepayers. There is no immediate financial advantage to us; perhaps over a period of years advantages may come, but the future is a closed book. But we had hoped most of all to circulate reliable information regarding council doings, believing that more knowledge would create better understanding and good will. Consequently with this thought in mind we will try and explain the process of Municipal auditing.

Within every Municipal District office there is a large amount of clerical work to be done, much more than is commonly believed. This work entails the keeping of quite a number of separate accounts, many of which interlock, and all of which must balance with each other to the last cent. Every municipality is under the rule of the Provincial Government, a Municipal District's Act being the guide, but in addition to this it can be said every rural municipality is under the eye of the Provincial Government as exemplifed in the Department of Municipal Affairs. The Department, having first prescribed a way in which records must be kept, go a step further and rule that individuals and companies auditing the books shall have certain definite qualifications. Under this ruling chartered accountants are employed. Chartered accountants are expert accountants, that is, before a person earns his or her degree of C.A., much study, a university course and a number of very stiff examinations must be gone through. Chartered accountants doing municipal work are also to a certain extent under the eye of the Department of Municipal Affairs, because if they did careless or unsatisfactory work their prestige as professional men would suffer, and probably loss of business would result.

The close of the calendar year is a rush period for chartered accountants and to avoid delay during January, a preliminary audit is made in the fall, when there is ample time for the work. Most firms of chartered accountants doing municipal auditing include quite a few municipalities among their clients, and practice makes them quite adept at noticing any departure from the rules as regards bookkeeping laid down by the Department of Municipal Affairs. The final audit is done in January and the financial statement must be prepared on forms supplied by the Department. This enables the clerks in the Department's offices at Edmonton to quickly notice anything unusual in the statement. It is compulsory to publish an extract from this statement, but for several years past most municipalities, including Cornhill, has published the entire statement. It is a mass of figures and to get a true ununderstanding of it, one has to give it quite a little time. The statement is read at the Annual Ratepayers meeting held in February.

In addition to the actual audit the Department of Municipal Affairs maintain an inspection system. Trained municipal inspectors go from office to office and make inspections of the records, cash, etc. These inspectors drop in unannounced and a secretary has no way of knowing what particular day one will call at his office.

So it can be seen that Municipal District offices are subject to a close check, both on the part of the auditors and the Department of Municipal Affairs.

However, it should be noted that the auditors do not have any say as to how money should be raised or spent. Their work is to rigidly check items, record them, and put them in readable form.

Steps are Costly

To start a freight locomotive and bring it to running speed, a half ton of coal is required.

Beaver Lake M.D. Council Meeting

Regular meeting of Council of the M.D. of Beaver Lake No. 486 was held in the municipal office, Ryley, on October 29th, commencing at ten o'clock in the forenoon, all members being present.

Several relief cases were dealt with that of W.S. Hamilton was approved at Dominion schedule for the month of November; Anton Shulsky was continued at $25.00 and a application was refused Max Heinig. Clothing grant was approved for C. Lindbeck at $15.00.

Mothers Allowance for Mrs. K. Shorchid was approved at $25.00 monthly.

Administration of the estate of D. Motish, deceased, was referred to the Public Administrator.

Secretary was instructed to make every effort to effect collection of of remaining seed grain advances, pointing out the penalty for not observing the provisions of the Act, as to marketing of grain.

Reserve bids were fixed against all lands to be offered at the Tax Sale to be held Nov. 1.

The Village of Holden was given the statutory notice to remove rubbish from roads adjacent to nuisance grounds.

The next meeting will be held December 19th at ten o'clock in the forenoon.

Adjournment.

The Story of Phil and His Little Girl

Every so often we run across an Editorial which in newspaper parlance "goes the rounds". Below we reproduce such an article and we believe our readers, especially the mothers will get a kick, if not a lesson out of this story.

"Dear Driver: Today my daughter, who is seven years old, started to school. She had on black shoes and wore blue gloves. Her cockerspaniel whose name is Scoot sat on the front porch and whined his canine belief in the folly of education as she waved 'good-by' and started off to the halls of learning.

"Tonight we talked about school. She told me about the girl who sits in front of her—the girl with the yellow curls—and the boy across the aisle who makes funny faces. She told me about her teacher who has eyes in the back of her head—and about the trees in the school yard—and about the big girl who doesn't believe in Santa Claus.

"We talked about a lot of things—tremendously vital unimportant things—and then we studied spelling, reading and arithmetic—and then to bed. She's back there now—back in the nursery—sound asleep—with 'Princess Elizabeth' (that's a doll) cuddled in her right arm. You guys wouldn't hurt her, would you? You see I'm her daddy. When her doll is broken or her finger is cut—or her head gets bumped, I can fix that—but when she starts to school—when she walks across the street—then she's in your hands.

"She's a nice kid—she can run like a deer and darts about like a chipmunk. She likes to ride horses and swim and hike with me on Sunday afternoons. But I can't be with her all the time—I have to work to pay for her clothes and her education. So please help me to look out for her. Please drive carefully—please drive slowly past the schools and intersections—and please remember that children run from behind parked cars.

"Please don't run over my little girl.

"PHIL."

You have now read the first half of this story. Read the second half about the same girl ten years later.

"Dear Pedestrian: Today my daughter who is seventeen years old, is out with my car. What she is wearing I do not know, but it is not much, and it is designed to catch the attention of one or more boys slightly older than she and who may be in the car with her.

"Before she took the car out we talked of several things, but not about where she was going, with whom, or what they would be doing. She is reticent about such matters, and also she seems to pay scant attention to several suggestions of mine about the care of the car, or to her mother's admonition to be careful.

"My daughter is a nice kid, and not addicted to worry. If I have taken precautions to have the car in good mechanical conditions, properly lubricated, the tires safe, and the gas tank filled, she will have no trouble, barring accidents. She knows enough about the car to start it, steer it, and stop it, and has heard that there are men who make a business of fixing automobiles when the things go wrong. She probably thinks such persons inhabit filling stations, but she will be set right when she inquires.

"But she knows that when she steps on a certain knob with her right foot, the car will whizz along at 60 to 80 miles per hour, and she believes that the knob is placed there to make it do so. That is the only way she knows how to drive it, and that is as fast as it will go.

"So, please, Mr. Pedestrian, do not let my little girl run over you. You will know her by her happy look, her blonde hair and red hat. She may be smoking a cigarette and the boy beside her may be hugging her, so that she may not give you her attention if you are in her line of driving. You had better wait till she gets by, or dodge.

"If you get in her way and she runs over you, you may cause her to lose control of the car, she may go through the windshield and scar her pretty face, or she may get tangled up in the steering wheel and need to go to the hospital. Even though she escapes and you don't, she will come home and cry.

"So please, Mr. Pedestrian, do not get run over by my little girl.

"PHIL."

COAST TO COAST MAIL SCHEDULE NEXT T.C.A. STEP

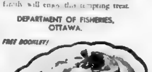
Toronto, Ont. Nov. 7- Intimation that within 90 or 100 days, Trans-Canada Air Lines will be flying on a mail schedule from Montreal and Toronto to Winnipeg, Vancouver and intermediate points, was made by Philip G. Johnson, Vice-President in charge of Trans-Canada Air Lines. Mr. Johnson made his announcement in outlining the various steps taken in the organization of air lines. "In March, 1938, systematic scheduled service was commenced between Vancouver and Winnipeg," he said," and on April 1st, this daylight service was changed to night operation. On September 1st daylight scheduled flights were extended from Winnipeg to Toronto and Montreal. Within 90, or 100 days, we shall have night operation. This means that planes will leave Montreal at 9.00 p.m., Toronto at 10.30, and mail can be delivered at Vancouver at noon the next day".

First: "You should have seen the fish I caught last week. It was so big, it pulled me into the river."

Second: "Got a good wetting, I suppose?"

First: "Oh, no; thank goodness, I landed right on top of the fish.—Wall Street Journal.

..and YOU can make these tasty FISH dishes!



• The hardy Fishermen of Canada market over 60 different kinds of food Fish and Shellfish either fresh, frozen, smoked, dried, canned or pickled . . . each affording a grand opportunity for thrifty dishes that have style, zest and delicious flavour.

So nourishing, too, for Canadian Fish and Shellfish give plenty of proteins, minerals and precious vitamins. In fact, they have everything folks enjoy and need in a lunch or supper dish.

You can make arrangements with your dealer to supply different kinds of delicious fish several times a week, and the family will enjoy this tempting treat.

"Gentlemen! Be Treated"

By Betty Barclay

Did the men-folks relish your fresh [illegible] this summer? Undoubtedly, for the Lima is now one of [illegible] most popular vegetables! But don't forget that there is no out-of-season period for Lima beans. Ready cooked dried Limas may be procured in cans—just heat and serve. From [illegible] "Gentlemen! Be Treated" dishes as the following may be made.

••••••••

Lima and Ham Loaf

[illegible]

1 teaspoon minced onion
1 tablespoon melted butter
[illegible]

[illegible] place in a buttered pan in a moderate oven (350 degrees F) and bake [illegible] minutes, basting occasionally with the melted butter. Serve with brown gravy.

••••••••

Creamed Limas and Asparagus Tips

2 cups cooked, dried Limas

[illegible] boiler. When cooked, add Limas, asparagus tips and cheese. Cook until [illegible]

PIONEER EDITOR PASSES TO REWARD

[illegible] Joseph George Willard who for over thirty years has been [illegible]

[illegible] west after the arrival of the Barr Colonists in Lloydminster, he arrived [illegible] with a printing plant which he [illegible]

[illegible] but on Thursday last he was taken [illegible]

FISH STRETCHES THE BUDGET

Our Canadian fish is the finest in the world. It is healthful, nourishing, and contains plenty of those valuable [illegible] that help [illegible]

[illegible] to watch the daily fluctuations [illegible] well known Canadian names [illegible] in Canada.

[illegible] cold days, appetizing, flavorful, [illegible]

Browned Chicken Haddie Lyonnaise

[illegible] Chicken Haddie
[illegible] potatoes
2 [illegible] minced onions
1 [illegible] prepared mustard or Worcestershire sauce
[illegible] butter
1 hard cooked egg, chopped
1 cup milk
[illegible] salt
2 tablespoons butter

Heat the potatoes in the butter. [illegible] Add to the potatoes. Flake the fish and [illegible] to one side of frying pan, [illegible] the rest of the butter, cover the [illegible] until well browned. Fold [illegible] and serve very hot.

Serve with a relish of pickled beets or stewed tomatoes.

HIGHWAYS JUMP FARM VALUATIONS

[illegible] improved highways [illegible] to a farm has been strikingly [illegible] by a survey made [illegible] the United States [illegible] the Alberta Motor Association.

This study indicated that farmers [illegible] that improved highways not only bring them direct and immediate benefits as operators of a business but that by intangibly increasing farm property values, roads provide greater and more lasting benefits.

Effect of the U.S. survey was that farmers on graveled roads figured their property was worth 80 per cent more than those farms were on dirt roads. Those on hard surfaced-roads [illegible] their property was worth [illegible] per cent more than land on dirt roads.

Of course, in regard to hard surfaced roads, nearness to markets and electrification also are factors in fixing valuations for purposes of comparison.

Results of the U.S. survey bear out the contentions of A.M.A. officials that the farmer starts to benefit largely through the building of hard-surfaced roads. Not only does the farmer's property increase in value but also he is enabled to take advantage of the opportunity of serving a valuable cash market, which is created by tourist trade.

Only way in Alberta to "cash in" on the full of this trade is to build hard-surfaced roads, giving bigger business and larger profits to the farmers.

FORMER TOFIELD STUDENT IS AWARDED HIGH SCHOLASTIC HONOR

David Carey, son of Mr. and Mrs. Carey now of Viking formerly of Tofield had the honor of being awarded the Governor General's Bronze Medal. This medal is given by Lord Tweedsmuir to the student making the highest number of marks in any one grade of highschool within the Divisional School District area. David Carey is in the Holden School District area and excelled in grade [illegible] work.

Many Cornhill Ratepayers Attend Special Meeting

A special meeting of the ratepayers of the Municipal District of Cornhill was held at the Variety Theatre on Tuesday afternoon. The meeting was called for the purpose of discussing the 1938 assessment. There was a good attendance of ratepayers the number present being close to 100.

Mr. T. B. Murray was appointed chairman and in a few short introductory remarks said this was an unexpected honor but he would do the best he could. He said the purpose of the meeting was well understood, namely the discussion of the new assessment, and asked for some suggestions.

Mr. H. Lee thought the assessment was unfair and while the assessor, Mr. Stinson, was no doubt a conscientious man, he, Mr. Lee, felt that he was too inexperienced as regards land values. He cited an illustration of the assessing of two different quarter sections.

There was considerable discussion as to whether the assessment as a whole had been raised or lowered and it was believed at first that it had been raised.

Mr. W. Abernethy said there was no justification for raising the rate of assessment to-day. Several present said their assessment was raised but only one said his assessment was lowered.

Reeve Glenn said the Council had nothing to do with the assessor except to engage and pay him. Previous to the assessment a meeting of assessors of different municipalities was held and basis of land values was set. The assessment was compulsory and was by order of the government as laid down in the M. D. Act.

Mr. J. Morton quoted a section in Beaver Lake Municipality that had been raised $500.00. The section was now assessed at nearly $8,000.00.

Up to this point, the assessor, Mr. Stinson was not present, but repeated requests for his attendance resulted in his appearance.

Mr. Stinson then gave a brief outline of the assessment procedure. Each quarter section was listed on a separate sheet on which there was a plan of a quarter section divided into 40 acre plots. This was so that the topography of the land could be shown. On the reverse side of the sheet were notations regarding character of land, also places for roads, location of schools etc. If a school was on the land 12 per cent was added and this was dropped accordingly as the distance from a school was increased. On land that was 3½ miles or more from a school no percentage was charged. He said that prior to the assessment a meeting of assessors was held at Camrose where a basis of values was set. Good farm land for assessment purposes was set. Good farm land for assessment purposes was set at $30.00 per acre. He cited that good hay and might have a value of $10.00 per acre. The new assessment is about $15,000 lower than the 1932 assessment, but the 1932 assessment was subsequently reduced 12½ per

(Continued on back page)

WEDDING

WELL KNOWN COUPLE WED VOEGTLIN - MARTIN

On Thursday, November 10th at twelve o'clock noon, Mary, eldest daughter of Mr. and Mrs. Joseph Voegtlin was united in holy matrimony to Mr. Fred Martin, son of Mr. and Mrs. S. H. Martin of Duchess, Alberta. The happy event which was held in Salem Mennonite Church, was attended by a large group of interested relatives and friends.

The bride wore a beautiful dress of soft white sheer and was attended by Ruth Voegtlin, her sister and Lavanda Yoder, her cousin as bridesmaids. Miss Ruth Voegtlin wore nile green silk flat crepe and Miss Lavanda Yoder wore pink tafetta. The bridesmaids carried beautiful bouquets of gladiolia.

The groom was supported by his brother, John Martin, and Paul Voegtlin brother of the bride, as best men.

The wedding ceremony was performed by Rev. C. J. Ramer of Duchess, Alberta.

A wedding dinner was served at the home of the bride's parents to 90 guests at 1:00 p.m. and at 7:00 p.m. lunch was served to 80 young people. The bridal couple at these functions were seated behind two hanging baskets filled with a profusion of beautiful flowers. The table was graced by a wedding cake beautifully decorated by Miss Esther Bricker from Calgary. The cake was surrounded by a garland of white roses and ferns.

The newly weds left for Edmonton the same evening, returning Saturday.

For a short time they will stay at the home of the bride's parents after which they will reside at Duchess, Alberta, where the bridegroom operates a garage.

Double Program Next Tuesday

Next Tuesday Sharps Shows will present a double program consisting of two full length features. One a real comedy feature Edward J. Robinson in "Slight Case of Murder". A riot of laughs all through. You will like this one. Two, a real western thriller "South of Arizona," with Chas. Starrett and a special cast including the "Sons of Pioneers."

Those who like westerns, and there are few who do not will be delighted with this picture.

Note that owing to the length of the program the show will start at 8.00 p.m. sharp

BARDO

A fair crowd attended the Ladies Aid sale and dinner on Nov. 5th. Mrs. Lillian Vague held the lucky number on the quilt, about $120.00 was realized.

Mr. and Mrs. Nordlum left last Saturday for the coast by car, having bought a Lafayette Coupe a 1937 model.

Mrs. Alma Fosbaug returned home last Saturday from an Edmonton hospital where she underwent an appendix operation.

Mrs. O. Hisberg is in an Edmonton hospital taking treatments.

Tom Rorem, Geo. Hendrickson and Hans Hillerud left last week for the Edson country for their annual Moose hunt.

Rev. Huverstein conducted services and Confirmation on the 6th. Those Confirmed were Jackie Lebecmo, Gordon Hendrickson, Clifford Andersen and Olaf Haugen. The next service is on Sunday Nov. 27th.

Geo. Hendrickson, I. Breckan and R. Eide were in the City and heard the Russian Cossack Male Chorus.

Mrs. Joe Stauffer and Mrs. I. Ness attended a Ladies tea party at Kingman last Wednesday afternoon.

Quite a number from here attended the Ladies Aid sale at Amisk Creek and Kingman on the 11th and 12th.

Readers of the Camrose Canadian leave your subscription with Doris Regness of Kingman or Morris Simorovitch of Round Hill, who are Candidates in the Camrose Canadian Campaign.

Social Credit Convention

The Annual Convention for the Provincial Constituency of Vegreville will be held at Tofield on Friday November 25, 1938, commencing at 12 o'clock noon.

The evening Session will commence at 8 p.m. at which Hon. E.C. Manning and Mr. Orvis Kennedy M.P. will be the principal speakers, assisted by other prominent members including Dr. McPherson, M.L.A. Mr. Marshall M.P. and William Hayhurst, M.P.

Among the items which will come up before Convention will be

(1) Registration of Delegates at 12 o'clock noon.
(2) Reports of the Provincial Convention at Calgary by Mr. A. English.
(3) Reports of Zone Presidents, or a short talk by them if they think it best.
(4) Report from secretary.
(5) Report from Treasurer.
(6) Any group may submit any item or business which they feel should be taken up and discussed at the Convention.
(7) Such further and other matters as will be submitted to the Convention, and will be made known when the program is presented on Convention day.

Fish, Soups and Desert

DON'T OVERLOOK FISH!

Miss Hazel J. Freeman, Dominion Government Cookery expert says: "The clear cold waters of our northern lakes and rivers, the salty tang of our two great oceans make Canadian fish exceptionally fine in flavor."

"The secret in cooking fish," says Miss Freeman, "lies in having the heat, whether electric, gas, kerosene or coal stove, hot enough to bake them quickly, and above all not too long. Of course, the timing is up to the cook, and it is this very timing that marks the difference between having fish that is cooked to perfection, or stewed until it has lost its heart and soul and that indescribable something that makes the family welcome fish with gusto. So keep an eye on the fish, when the flesh is firm and tender when the connective tissue holding the fibres together is gelatinous, that's the time to stop. Fish should be cooked until the albuminous substance is "set" and no more. This is the protein constituent of the fish and when it takes on a cream colour, the albumen is set and the fish is done. Each flake may be pulled apart in loose folds, full of its own [illegible] juices. For fillets one [illegible] in thickness, it takes ten minutes in a hot oven [illegible] whether the fish weighs one pound or five."

SOUPS AND CHOWDERS

By Betty Barclay

It's time for soups and chowders again. Make a whole meal out of them if you wish, by including meat and some nourishing vegetable like dried Lima beans. Soups and chowders are mighty fine dishes that should appear in many homes far more often than they do. If you really wish to present a good soup or chowder to your family, try one of the following.

Lima and Cabbage Soup

1 cup dried Limas
2 quarts cold water
1 end of pork shoulder
1 teaspoon chopped parsley
1 pound beef stew cut in small pieces
1 beef bone
1 quart cabbage sliced
1 onion, sliced
½ teaspoon carrot, diced
1 teaspoon salt
¼ teaspoon pepper

Cover Limas with cold water, bring slowly to boiling point, drain and cover with cold water. Put in large kettle, add cold water, meat and bones, cabbage, onion, carrot, parsley and seasonings. Bring to boiling point and simmer 3 hours. Remove meat and bone from soup, then remove fat. Reheat.

Lima Chowder

2 cups cooked, dried Limas
2 cups diced potatoes
2 ounces fat-salt pork
1 small onion, sliced
1 cup boiling water
4 tablespoons butter
4 tablespoons flour
3 cups hot milk
1 teaspoon salt
¼ teaspoon pepper

Cut salt pork into dice. Place in a saucepan and cook 5 minutes; add onion and cook until [illegible] running [illegible]. Then add potatoes and boiling water. Cook until potatoes are tender, then add Limas. Melt butter, add flour, stir until smooth, then add hot milk, cook, stirring constantly, until slightly thickened, then add Lima mixture and seasonings.

THIS MONTH'S STAR RECIPE

Apricot Blossoms

1 rennet tablet
1 tablespoon cold water
1 pint milk
2 tablespoons sugar
1 teaspoon vanilla
4 or 5 canned apricot halves

Make rennet-custard according to directions in package; chill in refrigerator. Just before serving top each dish of rennet-custard with one of the canned apricot halves with the rounded side up.

Here is my second "STAR" recipe. It will appeal particularly to those readers who have children—although this tasty dish will delight the adults as well.

I call it "Apricot Blossoms" and children simply love it. No boiling, no baking, no expensive ingredients—but here is a luscious, wholesome dish that is certainly entitled to this month's star. I submit it for your approval.

DIET PROMOTES SUCCESS

By Betty Barclay

So much is being written these days about the opportunities for men and women who have reached the 40-year milestone, and how outstanding some persons beyond that age have been in business and professions, that my curiosity was aroused when at a tea party yesterday I was introduced to a well known publisher who has become indentified with that subject.

"It is really astonishing what a large percentage of the important accomplishments in business and the arts are being done these days by men and women over 40," he said in answer to my question. "At one time, the age of 40 was considered to mark the beginning of declining years. Now the contrary is true. Carefully planned meals have played a large part in the improvement," he added with a smile.

"Do American housewives show much interest in the subject?" I asked, and upon being told that it was now one of the most popular topics, I said I would appreciate some anecdotes for my readers. Whereupon this famous publisher talked with great enthusiasm on his favorite theme.

"Take the story of Mrs. Harriet Packard of the town of Kent, Ohio. She took a course in writing at 50. She felt she could write. She had a wealth of material in the experiences women of her age have had. She learned to type her articles. She has since written newspaper and magazine articles, a book of verse, a book of reminiscences, and lately a novel.

"The famous Alice Foote MacDougall of New York City became a remarkable success twice after 40. She built up a chain of coffee shops into a $2,000,000 business in six large restaurants. At 63 she retired. About two years later the restaurants failed. She lost everything, started again at 65, worked hard for six years, and now she is back on top again.

"Want a man's experience? My friend, Artur Cremin, Director of the New York Schools of Music, has told me that many musicians reach the height of their creative ability after 40. About one-fifth of the students of the New York Schools of Music are over 40. Walter Damrosch was 41 when he organized the New York Symphony into a permanent orchestra. At more than 60 he found a new career in radio, and at 74 he wrote his opera, 'The Man Without a Country'."

He told me about several other remarkable success stories that began after 40. Knowing my interest in food, he assured me that most of these active people were careful about their diets, getting plenty of vitamins and reenforcing the supply with some vitamin-rich food like fresh yeast. I asked him how important he considered the diet, and he replied that judging from his records, these people realized that well balanced meals and very little dissipation were the foundation for their successful physical and mental activities.

* * *

THE WORLD OF WHEAT

By H. G. L. Strange, Director "The Crop Testing Plan."

Twenty years ago the blessings of peace descended on a war-weary world.

The peace had been won by the soldiers of the allied armies who for four and a half years had endured the most acute hardships and suffering. The allied soldier won back the land the enemy had conquered, made him sue for peace, disarmed him and then occupied his territory, and afterwards, by their good behaviour and by fair and kindly treatment the British soldiers won the high regard, the respect and esteem of the enemy people.

Now the world is re-arming on a scale greater than ever. The people of some countries have been required to give up butter for more guns, and soon we may all be asked to give up butter and even bread for more armaments, and shortly the sons of the old soldiers will no doubt be called upon to fight the very same war all over again.

Pondering over all this, the war veterans at an Armistice Day Reunion, in Winnipeg, thought that the dictators of the world should be required to give an accounting of what they have done with the Victory and the peace that was handed to them for safe-keeping by the allied soldiers twenty years ago.

Following factors have tended to raise price:- U.S. Department of Agriculture predicts reduction in U.S. seeded wheat acreage; India continues to buy Australian wheat; Light frosts reported in Argentina; Rain needed in Russia; Considerable drop in Australian shipments; Rains delay milling of rice in Demerara, British Guiana; India experiences poor monsoon (rainy season).

Following factors have tended to lower price:- Roumania raises wheat subsidy; Steamer charterings in excess of export business results in unsold cargoes; France closes colonies to foreign wheat imports; Argentina wheat cutting begins; Rains relieve U.S. drought situation; Private Argentine wheat estimate of 307 million; Change in official exchange rate of Argentine peso.

LOBSTERS FOUND IN LOCOMOTIVE TENDER

Moncton, N.B., Nov. 14:- While lobster, fresh boiled and in the form of salad, is a regular feature of menus in Canadian National dining cars, a new variation came to light the other day when workmen were inspecting the tender of a locomotive in the railway shops here for general overhaul. One of the workmen, on looking into the water compartment of the tender after the water had been drained off, discovered three of the crustaceans crawling on the bottom. One measured four inches in length. How the lobsters got there is a mystery. The locomotive had been in service between South Devon and Newcastle prior to shopping. The lobsters were removed from the tender and placed in a pail of water where they became an object of much curiosity.

RAILROADERS FIND LOST NECK PIECE FEED MISLAID FISH

Montreal, Nov. 14:- There is nothing monotonous about the life of a railroader. In addition to routine duties such little jobs as tracing lost furs and feeding mislaid fish fall to their lot. Two such instances recently came to light in Canadian National Railways reports from trainmen here.

While traveling between Montreal and St. Hyacinthe a young lady forgot her fur neckpiece on the train and did not miss it till two hours after leaving the train. She reported her loss to the station agent at St. Hyacinthe. An hour later she was advised that her fur was located at Charny and the next morning at ten o'clock she had it in her possession again. It had been found by one of the train employees who had turned it over to the lost and found department of the Railway.

It sometimes happens that articles lost on trains are not claimed for several days. Recently a large glass jar of water containing gold fish was left on the seat of a coach, and the owner did not claim it until fifteen days later.

FIX "DEADLINES" FOR CHRISTMAS MAIL

Winter hasn't shown its teeth in Edmonton yet, and it is only mid-November. But Christmas is coming and the mail bags will be getting fat; so please put your mail in the mail-box right away.

The writer will admit that does not rhyme as well as the original. But it expresses the views of postal officials, who know even augmented staffs soon will be hard pressed by mountains of Christmas mail. So don't just shop early—mail early too. That's their plea.

Dates by which mail for various parts of the world should leave here inorder to arrive at destinations by Christmas were outlined Tuesday by the postal department. And the latest safe date for the old country is little more than two weeks distant.

Here are the dates listed for convenience of readers:

Mail for Central European points, Nov. 28; United Kingdom, Dec. 5; Maritimes and Eastern U.S., Dec. 15; Quebec, Ontario and western U.S., Dec. 17; Manitoba, Saskatchewan and B.C., Dec. 19; Alberta, Dec. 20; Edmonton, Dec. 21.

Last steamer chance for mail to reach the old country will be the Duchess of York, which leaves St. John on Dec. 9 and Halifax on Dec. 10. Edmontonians should allow at least three days for their parcels and letters to reach the eastern ports, postal officials said.

"Apathy, not viciousness or weakness, is the greatest menace to the British Commonwealth of Nations today."—Sir Harry Lindsay.

He Sold His House

THE MAN REALLY DIDN'T NEED IT OF COURSE, HE HAD ANOTHER ONE TO LIVE IN, BUT HE WANTED TO SELL THE EXTRA HOUSE. SO HE INSERTED A CLASSIFIED AD IN THE MERCURY AND WITHIN THREE DAYS OF THE FIRST INSERTION THE HOUSE WAS SOLD.

YOU, TOO, MIGHT HAVE SOMETHING TO SELL THAT IS SALEABLE AND WHICH SOME OTHER PERSON IS DESIRING, AND YOU TOO, WOULD PROBABLY BENEFIT FROM A CLASSIFIED AD IN THE MERCURY.

THE RATES ARE LOW. ONE ISSUE 50c; TWO ISSUES 75c; FOUR ISSUES $1.00. THERE IS A GENEROUS LIMIT OF THIRTY WORDS.

COAL—

EDITOR'S NOTE:—The following extracts are taken from a booklet published by The National Coal Committee. To those interested in the economy of Alberta they are very interesting and contain information, which to some extent throws a new light on western economic problems.

"IN CONSIDERING the relationship existing between the various Provinces of the Dominion, and between the Individual Provinces and the Dominion as a whole, two outstanding facts emerge.

The first of these is the inability of the Western Provinces and of the individual citizens of these provinces, to meet their obligations, under the present economic set-up. The second outstanding fact is the terrific strain which has been imposed on the finances of the entire Dominion during the past ten years (most of them years of depression) by sending out of the country, sums aggregating over $500,000,000 to pay for coal imported from the United States of America, all of which might have been obtained from Canadian sources, with the consequent retention of this enormous wealth within the Dominion.

In dealing with the first of these problems, it is well known that, save for coal resources, Western Canada has been dependent almost entirely on agriculture for her existence.

The history of the western provinces is the history of about the past forty years. In the case of the province of Alberta, the total population was less than 75,000 people, as recently as 1901. In the early part of the present century, large amounts of capital came into these Western Provinces for agricultural development. For practical purposes their existence and development depended on the export of wheat. This wheat usually passed through Eastern Canada and provided employment there during its transportation to the world markets, where it had to be sold. No market for any of it was provided by Eastern Canada.

The amount of money received for the wheat crop, year by year, did not necessarily bear any relationship to the cost of production in Western Canada, but was controlled solely by world prices. Such prices were greatly affected by the fact that in the case of almost every other wheat exporting country the wheat belts lay in close proximity to the sea ports. In the Scandinavian and in fact in all European countries; in Australia and in New Zealand, railway transportation was over short distances. In the Argentine the railway haul averaged little more than 200 miles. From Western Canada, on the other hand, the railway haul to the head of the lakes, was around 1,200 miles . . .

During all these forty years, the Eastern Provinces were becoming more and more highly industrialized and owing to the voting power resulting from the numbers of their people, they were able to insure from the Dominion Parliament, full protection for their manufacturing industries, quite irrespective of any result that this policy might have on the life and well-being of the West.

During this period the Western farmer had to purchase all his equipment and supplies from the East, at highly protected prices, while Eastern Canada bought practically nothing of what the Western farmer could produce. . . . .

It should have been clear that the West could not continue indefinitely to pay the East around $150,000,000 per annum for their manufactured goods produced under a high tariff wall, unless they could sell something of approximately equivalent value. For several years the crash that was inevitable, was staved off by Governmental, Municipal and individual borrowings, but the make-shift system of borrowing each year to meet existing obligations and to pay interest, could not go on indefinitely. In the end the crash was bound to come, quite irrespective of what type of Government existed at any time in any of the Western Provinces.

. . . .

It has been stated by the Hon. Norman McLeod Rogers, in his case for Nova Scotia, presented in 1931, that existing tariffs have secured for the province of Ontario a net gain of over $51,000,000 per year or over $15.00 yearly for every individual in Ontario, while the Province of Alberta had a net annual loss, by reason of these tariffs, of close on $20,000,000 or over $26.00 per year for every inhabitant in the province. The adjoining Province of Saskatchewan had an annual net loss, owing to existing tariffs, of over $25,000,000 or over $28.00 per year for every inhabitant in that Province. . . .

The only Western product which could have been used during all these years to redress the unfavorable trade balance against the West, was coal. Throughout Canada there are coal supplies estimated at twelve-hundred-million-thousands of tons and estimated by Professor Stephen Leacock as sufficient to supply the Dominion for thirty-six thousand years. These are truly staggering figures, and many millions of tons more than those which have given Britain the prosperity she has enjoyed during the past hundred years.

Had the Provinces of Ontario and Quebec during the past thirty years, taken a broad view of what was necessary for the prosperity of Canada as a whole, and had those Provinces adapted them-

(Continued on back page)

DOMINION LOANS LARGE SUM FOR HOUSING

The Department of Finance released today a summary of a report on the operations of Dominion housing legislation which had been prepared at the request of the Honourable Charles A. Dunning, Minister of Finance, upon his return to Ottawa. While Mr. Dunning has not yet resumed his official duties he was most anxious to learn the extent to which the Government sponsored housing program was contributing to the expansion of productive employment and the restoration of more normal business conditions.

Up to October 31, 1938 the total volume of loans approved under the National Housing Act and its predecessor, the Dominion Housing Act, was $24,695,268. These loans provided housing accomodation for 6,272 Canadian families. Up to the same date Home Improvement loans reported to the Department of Finance aggregated $22,319,546 in amount, and numbered no less than 55,820 enabling approximately that many Canadian families to modernize, extend or repair their existing dwellings. Adding these amounts together we find the total loans exceeding $47,000,000 have been granted for home building and home repair purposes under these two Dominion measures during the last two or three years. It is estimated that these loans have made possible an expenditure on actual building construction (excluding land) of over $53,000,000. This does not of course take into account the substantial volume of repair and modernization work and also of new house construction which were stimulated by the Dominion legislation but which were financed in other ways.

It is usually estimated that at least 80 per cent of the cost of house building construction and modernization is spent, either directly or indirectly, on wages of labour, skilled or unskilled. Applying this percentage to the aggregate figures given here it is estimated that the loans made possible by Dominion legislation have accounted for payments of wages to Canadian labour of over $42,000,000. The extent, therefore, to which the legislation has contributed to the stimulation of employment and and elimination of unemployment is obvious.

Editor's Note.—The above figures are exclusive of the amount loaned Albertans. In a detailed tabulation, for some reason or other Alberta figures were not given.

A COLD CLIMATE WATER SYSTEM

(Experimental Farms Note)

Water on tap in stable and corral is a great boon. When the horse barn was built on the premises of the Dominion Experimental Sub-Station at Beaverlodge, Alberta, in 1934 a cement walled root cellar was provided across the north end, states W. D. Albright, the Superintendent. Though largely above the natural ground level it has, with the aid of good interior insulation and exterior banking, kept potatoes without frost injury throughout four winters.

In this root cellar there was constructed a rectangular concrete water reservoir 6x8 feet, inside dimensions, and 13 feet high, running up about five feet into the loft, where it is jacketed with shavings and is usually kept covered with straw during cold weather. The tank walls are 12 in. thick at the bottom, battered exteriorly to six inches at the top, and stand completely clear of the cellar wall. Floor and walls were constructed all in one day and were made with a 4½ to 1 mix, the gravel being clean and well proportioned as to sand and pebbles. The tank was washed with cement on the inside and has never leaked save very slightly just at first in a few places where the "form" wires passed through the wall. These few slight leaks were quickly stopped with wooden splinters driven into the openings from the outside.

The tank is filled with a wind-driven pump having a three-way underground delivery. The water pipe is laid in a wooden box which is 6½ feet deep where it is outdoors but rises to three feet beneath the root cellar floor.

The water delivers into the tank horizontally about a foot from the bottom and the 2-inch draw-off pipe is also a foot from the floor, giving a twelve-inch depth for accumulation of the fine mineral sediment always present in the water as pumped. The sediment built up only about half an inch the first year. The water comes through the taps clear as crystal.

Unions make it possible to disconnect the pipes at the reservoir without loosening the horizontal lengths embedded in the wall. Valves control the backflow in case of emergency. The draw-off pipe is carried in the same wooden box that conveys the pipe running from pump to tank and this box also affords drainage for the occasional over-flow of the tank for the drip from the pet-cock at the pump, and for the drip from the two hydrants (one in the stable and one in the corral). The drain leads to a sand layer down the slope from the corral hydrant. At two [illegible] the wooden box containing the pipe is covered by an inverted wooden trough, giving a double air space between earth and pipe. No packing was used lest it become damp and thus lose its insulating value.

As an extra precaution the ground over the pipe line is covered each year with a broad band of horse manure. The pump is set in a 6½ foot cemented well pit stuffed with a four foot depth of shavings. The pump pipe is drained in cold weather by a petcock operated by a lever at the top. In winter the lever is wired so as to ensure the petcock being always left open.

Since the system was installed there have been no winters in which extreme cold weather coincided with lack of snow cover but there have been prolonged cold snaps in each of two winters, viz., 1934-35, and 1935-36. There was also a decided cold snap in January of 1937.

There has never been a hydrant stiff to turn and rarely has it been necessary to pump a stroke by hand although five households and from fifteen to fifty head of horses and cattle or their equivalent are supplied from the tank.

GUARANTEES DOMESTIC BACON PRICE

A new arrangement has been made in the United Kingdom between producers of bacon type hogs and bacon factories whereby the price is tied solely to feeding costs. The standard price is $15 per hundred pounds when feed prices are $1.82 per hundred pounds. Higher or lower prices for hogs will depend on increases or decreases in the cost of feed.

Farmers will offer their pigs to the Pigs Marketing Board which in turn will make contracts on behalf of the farmers with the Bacon Marketing Board. An interesting feature of the plan is that when bacon factories are obliged to pay farmers more than $16 per hundred pounds the government will reimburse the curer by a subsidy.

The objective of the scheme, which comes into effect December 1st, is to assure regular supplies of bacon pigs at prices satisfactory to producers but not so high as to discourage consumption.

UNITED GRAIN GROWERS' STAND FOR WHEAT BOARD

[illegible] strong declaration in favour of continuance of the Canadian Wheat Board and protection of farmer against disastrously low prices, was made by the Board of Directors and the delegates attending the Company's annual meeting in Calgary at the beginning of the month. The Board, however, in the annual report pointed out the need for western unity to overcome difficulties in the way of securing continuance. Contributing to such difficulties, it was suggested, would be any attempt to exploit the Wheat Board. The report stated:

"Only through continued national recognition of the importance of the wheat growing industry, and of the disabilities suffered by the West will it be possible to have the Wheat Board continued. There will also be required united action in the West and generous recognition of the extent to which help has been afforded this year. Any attempts to make partisan, commercial or political capital out of the Board, any tendency on the part of a person, a party or an institution to claim credit for its existence, imperil the future operations and the very existence of the Board."

"Your Company for such reasons has refrained, not only from attempts to claim credit for the part it played in connection with the Board but also from seeking any publicity for its various efforts. Several times in different localities in the West it has appeared that the commercial interests of the Company were suffering on this account. Your Board, however, felt that shareholders would prefer even to risk some small loss of business on this account than have the Company engage in a scramble for credit which would make it more difficult to secure a united national opinion in the future in favour of a Wheat Board."

A plow which was leaned against a tree on the Leffingwell farm, near Exira, Iowa, more than 50 years ago remains there today, firmly embedded in the tree's trunk.

Preparations have been going forward for this event for some time and there will be plenty of fun and amusement for everyone who can develop a holiday mood.

There will be plenty of games and [illegible] and in addition there will be a free draw each night for valuable prizes.

Commencing at midnight on Thursday a free dance will wind up the carnival.

Mr. Gladue Sr. Passes Away

Mr. J. Gladue Sr. passed away at an Edmonton hospital last week. The late Mr. Gladue was well known throughout the district being a general [illegible] of the western school. He had [illegible] a more [illegible] which we hope to give next week. Mr. Gladue was [illegible] of his passing.

COAL—

(Continued from page three)

selves to using Canadian coal, much might have been done to redress the adverse trade balance, but Eastern Canada blindly continued to import millions of tons of American coal, for the sake of immediate savings in expense, regardless of the fact that this was bound to make other Provinces, sooner or later, unable to pay for the goods they manufactured. . . . .

The second outstanding fact which emerged from a study of the problem from the National standpoint, is the enormous annual drain on Canadian resources necessary to pay for importations of American coal. In the Coal Statistics for Canada, published by the Dominion Bureau of Statistics, it is stated that about $450,000,000 were sent out of Canada during the last ten years for imported coal, practically all of which was sent to the United States of America. This was the figure paid to the mine owners for coal, and when the railway freights are added, the money sent out of the country during from the American mines to the Canadian border these ten years, would far exceed $500,000,000, or a sum of over $50,000,000 each year.

Consider for one moment what this sum, if it had been kept at home, would have meant to Canada, and the effect it would have had on the balance of trade as between Canada and the outside world. Consider also the effect, during these past ten years of the creation within Canada of this $50,000,000 of new wealth each year, and its contribution to the well-being of the country, and to the problem of unemployment, which has been so acute during most of the period.

If one assumes that $5.00 per day would represent an average day's wage, then this $50,000,000 annually sent out of Canada would represent approximately 10,000,000 days work each year, or enough to give employment to well over 40,000 unemployed men for about eight months each year.

Direct prosperity would certainly accrue to the Eastern manufacturers and workers who would receive substantial orders, not now forthcoming, as a result of the enormously increased buying power of the workers and operators in the coal producing areas of Canada, and of the railways and railway workers, who would benefit by its transportation.

Disbursements under the various relief acts between 1930 and March, 1936, by the Dominion, total approximately $200,000,000. During the same period loans had to be made to the Western Provinces aggregating almost $100,000,000. These figures work out at approximately $50,000,000 per year, for the past six years, or about the same figure as is sent out of the country annually to pay for American coal. If this money had been kept in Canada, it would have gone far to solve the entire relief problem of the Dominion."

ALBERTA
BEERS

The Brewing Industry of Alberta justly stands in high repute. It is a heavy purchaser of barley—a sure cash crop for the farmer. It contributes heavily to civic, provincial and Federal treasuries. It maintains large regular and secondary payrolls, and manufactures the finest beers that can be made.

YOUNG PEOPLE'S CONVENTION

A two day convention of Young People was held at Irma on November 5 and 6, 1938. Representatives from Viking, Wainwright, Irma and Bruce were present.

The afternoon session was opened by Rev. Longmire of Irma. Mr. O. P. Larson then gave an adress of welcome. Rev. Armstrong of Wainwright then lead us in prayer.

Miss Knudson of Irma read the minutes of the last Young People's Conference which was held at Viking on October the 15th, 1937.

A nominating committee was appointed. Two members were chosen to represent each local union.

Two selections of music were rendered by the Wainwright Union.

At 6.30 a banquet was served in the basement of Irma United Church which was greatly enjoyed by all present.

Miss Banks gave a report of the Whitby conference which she attended, followed by a sing-song. An interesting address was then given by Rev. Burkholder on Young People's Organizations.

The following Sunday morning a Young Peoples Class was conducted by Rev. Burkholder. Open discussion on views of Christianity was then given.

Sunday afternoon at 2 o'clock discussion of the problems of the youth of to-day took place led by Rev. Burkholder.

Installation of officers then took place. The following were elected:- Past President - Mr. O. P. Larson Irma. President - Mr. O. P. Larson Irma. Sec-Treas - Mrs. O. P. Larson, Irma. Leadership Training - Altha Knudson, Irma. Christian Fellowship - Marjorie Barker, Viking. Publication and Recreation - Miss Frances Fitzmaurice, Viking. Christian Missions - Marjorie Stewart, Tofield. Christian Culture - Marrion Longmire Irma. Christian Citizenship - Carol Tory, Wainwright. Vice President - Viola Vail, Wainwright. Boys and Girls Work - Altha Knudson, Irma. Hon. President - Rev. E. Longmire, Irma.

Musical selections were then given by Viking.

On Sunday evening a Public Meeting open to the Congregation and Young People as a whole. Inspirational address by Rev. Burkholder. Special music was supplied by a choir of Irma Young People.

ROSS CREEK

Mr. Gordon Milne returned to his home at Ross Creek last week, after spending the summer months at Banff, operating a launch.

Mr. Palmer Starmoen and Mr. Ernie Kaufman left on Monday for Wildwood, Alberta, where they intend to work in a camp for the winter.

Mrs. J. Shertel returned home last week from Rimbey, where she has been visiting her daughter Mae. Mae came back with her and plans to spend a few days visiting friends before reurning to Rimbey where she has a beauty parlor.

We are sorry to hear of Miss Lena Karrant being quite ill in the Lamont Hospital. We all wish her a speedy recovery.

Mr. and Mrs. E.M. Sagmoen were Sunday visitors at the home of Mr. and Mrs. Arville Hopf.

Mr. and Mrs. J. Shertel, Miss Mae Shertel, and Mr. Ed Thor were city visitors on Tuesday.

Miss Mary Proch was taken to an Edmonton hospital recently where she will undergo an operation for appendicitis.

We see the McLachlan boys are busy flooding the skating rink at the store.

Mrs. Bolton and Mrs. Garton of Los Angeles, California, spent a few days visiting Miss Ada Ackley at the M. Kurpten home.

LOCAL & PERSONAL

Miss Ethel Craig, formerly of Tofield visited here on Friday last.

John Swift who is attending university at Edmonton spent the week end at home.

Mr. and Mrs. R. Whyte of Wetaskiwin visited home folk on Friday last.

Mr. and Mrs. Cap Lee and Delmar who have been in Eastern Canada for some time arrived home at Tofield the latter end of last week. They travelled by automobile.

Miss Lorett Ross spent last Thursday in Edmonton.

Mrs. Thos. Beatie of Edmonton is visiting at the home of Mrs. Emery and Mrs. J. W. Chapman. Mrs. Beattie, who will be remembered in Tofield as Miss Luella Latimer, and her husband are leaving Canada shortly to take up their residence in New Zealand.

J. Fletcher of Irma, Masonic District Deputy Grand Master paid an official visit to the local lodge on Wednesday evening, November 16th.

Peter Wotsch of Hilliard has purchased a vacant lot on Third Avenue west, and is presently erecting a blacksmith shop on same.

H. W. Lovell attended armistice day celebrations in Calgary, and was unfortunate to lose a Military Medal which he was awarded while on active service during the Great War.

J. W. Chapman attended armistice celebrations at the Cenotaph in Edmonton.

WHIFF OF "SNUFF" TREATS ULCERS

Oklahoma City, Nov 15.—A whiff of medical snuff was reported Tuesday as the newest and most successful treatment of stomach ulcers, one of the commonest complaints of fast-living civilized man.

The snuff treatment, announced to the Southern Medical association by Dr. M. Hill Metz and Dr. Robert Lackey of Baylor university, Dallas, has been found effective in 55 out of 60 cases on which it was tried.

A finely ground powder made from the rear half of the pituitary glands of animals in the special snuff used, they said. It is inhaled into the nose.

VALUES IN SEED
There are several different qualities of seed, all at different prices, and the buyer receives good value for any price that he pays. The best value of all, however, is for the highest quality Registered and Certified seed, sealed in the sack. Considering the superior quality, it is surprising how little extra it costs.
For particulars on all the grades of seed, see the nearest Searle Agent.

BARDO

Mr. and Mrs. Pete Bjornson who have lived in Ryley the past year have moved to our district, onto the R. Nordhus farm.

Anton Larson sold his herd of cattle, thirty-five head, to an Edmonton buyer last week.

G. Noland is building himself a barn. Pete and B. Bjornson are doing the job.

Mrs. O. Heiberg returned home from the hospital last week. Esther Gabrielson is assisting her with the housework.

Mr. and Mrs. Geo. Hendrickson entertained the Y.P.S. social last Friday night.

Mr. P. B. Anderson is recovering from his recent illness.

Ed. Bannerman spent last week in the City.

Marvin Johnson is in Edmonton taking a six weeks course in Diesel engineering.

Merlin Fosheng and Milton Jevning returned home from the Pacific Coast last Friday, after a six weeks holiday there.

Words have been received by relatives that Rev. Palmer Anderson missionary to China has arrived safely there and is staying with friends.

Eddie Steen has bought an Essex sedan, a 1929 model.

Ant eggs are an important article of food in Africa.

TOFIELD BRED STEER GAINS FIRST HONORS AT TORONTO

Toronto, Nov. 19.—University of Alberta, for the third time in three years, won the grand champion steer award at the Royal Winter Fair Friday night when its Killearn Lord Rothes, a magnificent Shorthorn, took the $50.00 title award and $100 donated by the Canadian Shorthorn association.

The university at Edmonton also showed the reserve grand champion, Caerleon 17, a Hereford. Owners of the other three steers in the final judging were Howard Fraleigh, Forest, Ontario, Bert Crawford, Oro Station, Ont., and Beath Farms, Oshawa, Ontario.

Winning of the fair's premier cattle award, marking Killearn Lord Rothes as the most marketable steer in the show, crowned a long string of successes for the University of Alberta.

Grand champion was bred by Claude Gallinger of Tofield and Edmonton while the reserve grand champion was bred by Crawford Frost of Nanton. Both entries were fed and exhibited by the University.

WINTER SPORT SOON!

With the tang of frost in the air, winter sport assumes an increasing importance. Already we notice the skating rink men busy with their task and this looks like skating soon. The curlers are active too and curling and skating will soon be an activity at night and a topic of conversation in the morning.

AMISK CREEK

Several from here attended the Lutefisk dinner held in Bardo November 5th.

M. Knudson conducted the service in our church November 13th.

The Ladies' Aid annual Lutefisk dinner and sale of fancy work on Armistice day was a success. Over $161.00 was taken in for dinner and the articles sold. Mr. A. Bigland held the lucky number for the crocheted bedspread and Marvin Ward won the cushion. On behalf of the Ladies' Aid we take the opportunity to send hearty thanks to all those who so willingly helped to make the event a success.

Miss Kay McRobertson, Ruth Nyberg, Ruby and Lilly Berg and Harold Lee, all of Edmonton were all guests at the R. O. Berg home on Armistice Day.

Lloyd Olaf Sand from Armistice have made his home for the winter with his aunt and uncle, Mr. and Mrs. P. O. Flaaten.

Agnes Aasebo from Camrose spent Armistice day at her home here. Miss Mabel Hladik accompanied her.

Arnold Berg spent several days in the city last week.

Mrs. P. O. Flaaten and Lloyd O. Sand were visitors at J. Worthy's home in Ryley on Tuesday of last week.

Mr. and Mrs. R. O. Berg visited at the P. O. Moline and C. Olson homes last Friday.

Rev. Haverstein conducted service in the church last Sunday.

The young people held their annual meeting last Sunday evening. Rev. Haverstein was present and gave an inspiring talk. A short program was given and then election of officers took place. Lloyd Berg was elected president; Myrtle Moen, vice-president and Lillian Patterson re-elected secretary-treasurer.

Mr. E. A. Moen left on Monday for Calgary where he is a delegate to the Wheat Pool Convention.

Mrs. P. O. Flaaten attended the funeral of the late Mrs. M. Lund, held at Viking on Thursday last.

C.C.F. CONVENTION TO BE HELD AT VEGREVILLE

A C.C.F. convention from the provincial riding of Vegreville will be held at Vegreville on Wednesday, November 30th. Delegates will attend from every polling subdivision and the purpose of the convention will be to set up a permanent C.C.F. executive and council for the constituency. A temporary executive was set up at a conference held earlier this year. Members of this provisional executive are:

President:—Mr. George Abernethy, Tofield.

Vice-President:—Mr. Dave Valentine, Lavoy.

Secretary-Treasurer:—Mr. L. Peterson, Holden.

A public meeting will be held in Vegreville on the same evening, at which the principle speaker will be Mr. Wm. Irvine, provincial president of the C.C.F.

REGISTERED LETTERS GOING TO ALL APPELLANTS

All those who registered an appeal against the 1938 assessment prior to or on November 16th, 1938, will be receiving a registered letter advising them that Court of Revision is to be held in Tofield under date of December 16th, 1938 commencing at 9:00 a.m. The registered letters will be mailed on November 29th, 1938.

LOCAL & PERSONAL

Mrs. Swift's father and mother, who have been visiting at the Swift home for some time, left for the east this week. They expect to return in a short time and will spend the winter here.

Miss A. Swift, nurse at the Royal Alexandra hospital, spent Saturday at home.

Mr. and Mrs. Mel Woods motored to Gadsby, for a few days, where they visited Mrs. Woods' home folk.

Mrs. S. Bethel, sr., and Mrs. W. E. Seale spent the week end in the city.

Mrs. R. Spangler and children are visiting Mrs. Spangler's sister, Mrs. Bud Hannan, at Tofield.

Mr. and Mrs. Jacobs and Ida spent Sunday visiting Mr. and Mrs. McLaughlin at Wetaskiwin.

Mrs. Flatager of Edmonton is visiting at the home of Mr. and Mrs. Preston.

A number of Tofield people attended the Old Timer's banquet and dance held at the MacDonald Hotel, Edmonton.

Mrs. Bertha Seale spent a few days with Mrs. Georgieis. this week.

Miss Margaret McCauley resumed duty as nurse at the Royal Alexandra Hospital.

Two sisters of Mr. W. Bailey from British Columbia are visiting at the Bailey home.

Watch for Mr. Bob.

UNITED CHURCH NEWS

The services for Sunday November 27th will be:

Lakeshore — — — — — — 11:00 a.m.
Ketchamoot — — — — — 2:30 p.m.
Tofield — — — — — — — 7:30 p.m.
Sunday School, Tofield— 11:00 a.m.

The Young People held a skating party on Monday evening November 21st. It was cold but with the aid of a fire and an excess of energy they kept themselves warm. The party returned to the church hall at 10:00 p.m. where hot doughnuts and coffee were very much enjoyed.

The next meeting will be held in the church hall at the close of the regular worship service on Sunday evening November 27th at 8:45 p.m. This is the beginning of the bi-monthly gatherings on Sunday evening.

The ladies are making preparations for their sale of work, etc.

Watch for Mr. Bob.

OBITUARY

The death occurred at Edmonton on November 10th of Mr. Jeremy Gladue, well known old timer of this district. Mr. Gladue was born at Lac St. Anne, October 20th, 1859, being 79 years of age at the time of his passing. A real Albertan, he had never been outside of the province. Of a cheery nature, there were few people who did not know him. He came to Beaver Lake district in 1887 and has been here ever since.

As a young man he served as a scout in the Riel rebellion of 1885, acting as a mail carrier. He spent his life farming, his homestead being in close proximity to Tofield.

He leaves one sister, Mrs. Lee of Lac St. Anne, three nephews, Jerome, Jeremy and Pat and four nieces, all married.

The funeral was held at Hastings Lake Church, Father Scheltumer officiating. Quite a number from Tofield were present. The pall bearers were: Walter Bellamy, Frank Pruden, Mr. Gravelle and W. Bailey.

If all of an oyster's progeny lived and multiplied through six generations, the pile of shells would be six times the size of the earth.

C.W.L. CHURCH SUPPER WELL ATTENDED

The annual C.W.L. church supper which was held in the church basement on Saturday last was well attended. The ladies had prepared a bounteous supper which drew forth many compliments. After supper Bingo was played to the enjoyment of quite a number.

Those winning in the annual draw were 1, Mr. Longstaff, cutwork set; 2, A. Flinke, Tofield, bed throw; 3, Harold Snell, Tablecloth; 4, Mr. Longstaff; leather hand bag; 5, Mrs. Forman, berry set.

Good cheer is no hindrance to good life.—Aristippus.

KIPLING'S CAPTAIN COURAGEOUS FOR NEXT TUESDAY

Sharp's Shows present at the Variety Theatre next Tuesday an epic in story and an epic in filmdom. Captain Courageous taken from Kipling's famous work, literally smacks of the sea and thrillingly brave deeds by seamen. The picture took two years to make and those seeing it will remember it for many years to come. Stars include Freddie Bartholomew, Spencer Tracey, Lionel Barrymore, and Melvyn Douglas. There are over 2000 in the cast which goes to make the greatest sea picture filmed.

It is a mighty successor to "Mutiny on The Bounty."

Show starts at 8:30 p.m. Usual admission.

Will Try To Find New Uses For Wheat

Winnipeg, Nov. 22—(Special Correspondence) "Line Elevator companies operating in Western Canada will co-operate in seeking new industrial uses for farm products", C. E. Hayles, President of the North-West Grain Dealers' Association said today. "L. W. Brockington, K.C., and Ceil Lamont have been selected to represent the Association at a conference which opened its sessions at Toronto Monday under the auspices of the Canadian Chamber of Commerce. Objects of the conference are set forth as being 'to survey the possibilities of Canadian industry using an increased volume of agricultural products and the selecting of a Canada-wide committee to [illegible] efforts to that end.'

"The [illegible] companies [illegible] that of expanding and locating new and profitable markets for Canada's wheat [illegible] than restricting production [illegible] quotas on sales. Representatives of the trade during initial sessions of the Turgeon Grain Inquiry Commission early in 1937 urged the Dominion Government to give practical assistance in determining the possibilities of finding, through chemical research, new and profitable industrial uses for wheat, other than as human foodstuff. It was felt that by expanding uses for wheat higher prices would be made available for the producer. The findings of this survey will be laid before the Toronto conference by the Line Elevators' representatives" said the President of the Association.

"In conformity with its policy of seeking profitable markets for Canadian wheat the North-West Grain Dealers' Association has also assured Premier John Bracken that it will do all in its power to assist in the deliberations of the International Wheat Conference to be held in Winnipeg early in December. The Association is hopeful that the representative gathering of agricultural economists from Canada and other countries who will meet in Winnipeg in December will be successful in formulating a programme which will be of benefit to Western wheat farmers. We also hope for a greater degree of understanding in urban centres, and particularly in Eastern Canada concerning problems facing Western grain growers"

Scientists are finding new industrial uses for great quantities of soya beans, corn and other farm commodities. Some 20,000,000 bushels of corn are now utilized industrially in the United States annually. Canada should make it her business to find new industrial uses for wheat. It is with wheat that our representatives will chiefly concern themselves at the Toronto conference".

Barring such a calamity as the outbreak of war amongst the Great European powers, statisticians estimate that Canada will be faced with a wheat carryover at the end of the current crop year—July 31st, 1939,—of [illegible] bushels. The [illegible] Canada and other parts of the world in 1939, under normal world conditions, would add to the wheat surplus problem and would probably result in a demoralized price situation", continued Mr. Hayles.

"Government experimental farms, universities and country elevator companies of Canada have endeavored to assist the Canadian farmer in producing the highest quality wheat in the world.

"Since the Great War, various experiments aimed to return the farmer a greater price for his grain, have been tried. Despite everything that has been done, the world price is today substantially below the cost of production, and has been during the greater part of the time since 1930. In order to assist the farmer, the Government of Canada authorized the Canadian Wheat Board to set a minimum price for this year's crop. Our Association has consistently advocated adequate assistance to the farmer in the event of world prices falling below production costs and with the Government's decision our Association is in hearty and cordial agreement.

"It is evident that in spite of all that has been done by governments, technical agriculturalists, universities and others, a solution to the wheat problem has not yet been found."

"The information contained in the survey made by the Line Elevator Companies leads us to the belief that steps should be taken to establish laboratories for the exclusive research into the possibilities of the industrial utilization of Canadian wheat and wheat products. The United States Government has appropriated $4,000,000 annually for the establishment and maintenance of four regional laboratories which will be staffed by 400 scientists and devoted to research in, to the industrial utilization of farm products. Of this amount $250,000 will be devoted annually to wheat research work.

"During the visit of our representative to the Ford Motor Company in Detroit, and as a result of Mr. Lamont's conversations with Mr. William J. Cameron, Mr. Henry Ford directed his research laboratories to devote attention to the industrial use of wheat products. These departments will commence research work immediately with particular reference to the possibilities of the industrial uses for wheat proteins. A wide range of successful research has been conducted into industrial uses of Soya bean products in the Ford laboratories.

"The United States Department of Agriculture and the Ford Research Departments have assured our representative that they would be prepared to co-operate with any similar organization set up in Canada for research into the possibility of industrial utilization of wheat. Free interchange of information relating on projects to be undertaken in the various laboratories and the results of experiments would be available."

Continuing, the spokesman for the Association said: "The Line Elevator Companies are in hearty accord with the sentiment expressed in the annual report of the United Grain Growers which said in part:

"Only through continued national realization of the importance of the disabilities suffered by the West will it be possible to have the Wheat Board continued. There will also be required united action in the West, and generous recognition of the extent to which help has been afforded this year. Any attempts to make personal, commercial or political capital out of the Board, and tendency on the part of a person, a party or an institution to claim credit for its existence, imperil the future operations and the very existence of the Board."

"Our Association feels that the problems which today face the grain growers of the West are so complex and the need for solution so great, if the whole financial structure of the West is to be maintained, every individual and every commercial, Government and service organization should join in the search for a solution. The whole economy of Western Canada has been built on a foundation of wheat. Everything within the power of the country and its people must be aimed toward finding markets for our wheat at a level of prices profitable to the farmer."

Trade Follows Conquest

TRADE FOLLOWING CONQUEST HAS BEEN WRITTEN INTO HISTORY MANY TIMES. BUT REALLY, IN THIS DISTRICT AT LEAST THERE NEED BE NO MILITARY CONQUEST TO FOSTER TRADE.

QUITE OFTEN A SMALL CLASSIFIED ADVERTISEMENT WILL START IN MOTION FORCES WHICH RESULT IN BUSINESS BEING DONE. NOTHING IS TOO SMALL FOR A CLASSIFIED AD TO ATTEND TO. A HORSE, A COW, A PIECE OF MACHINERY, FURNITURE, OR ANYTHING AT ALL. YOU MAY HAVE IT, SOMEBODY MAY BE NEEDING IT WHO DOES NOT POSSESS IT. WHAT IS SIMPLER OR MORE ECONOMICAL THAN BRINGING BUYER AND SELLER TOGETHER THROUGH THE MEDIUM OF A CLASSIFIED AD.

THIS HAS BEEN DONE MANY TIMES BEFORE —IT CAN BE AND WILL BE DONE, MANY TIMES AGAIN

THE MERCURY

WOLVES KILL 200 SOCKEYE AT ONE SPOT

"Wolf, wolf," is no hymn of joy to British Columbia salmon.

The trouble is that in these less travelled parts of British Columbia which wolves frequent there is no one to cry warning to the fish as they lie in shallow water close to the shore of stream or lake while on their spawning migration. Very often a salmon senses danger too late—and then it dies on shore a moment later and Mr. Wolf moves off, licking his chops as he savours the swift bite he took.

Only one bite from one fish, too. And always from the same part of the salmon. The one bite comes from the back of the salmon's head where the brain and oil cavity is placed. That morsel cut out with his sharp teeth, the wolf drops the rest of the fish with indifference.

No accurate estimate can be made of the toll which wolves take of spawning salmon but this is what was found not long ago by one of the inspectors on the staff of the Dominion Department of Fisheries when he was examining the spawning beds on Banks Island in the Lowe Inlet area: At Gale Lake something like 200 dead sockeye and at Bonilla Lake an even larger number, with all of them showing the tell-tale mark of the killer—the wolf's one bite from the back of the head. At Bonilla Lake, by the way, the inspector and a companion actually came upon a wolf just as it was making a kill. Its salmon killing days ended right then and there, for a reason which perhaps may be guessed.

Conserving the sockeye runs and other salmon runs in British Columbia is one of the most important jobs, of course, which the Fisheries Department people have to do. The Pacific salmon fishery means so much to the coast province directly, and so much to all Canada indirectly, that nothing which feasibly can be done to maintain the stocks of fish may properly be left undone. The strain put upon the stock by man's fishing can be controlled but to prevent too many young salmon from being gobbled up by some kinds of birds and enemy fish and to check the depredations of wolves and bears —oh, yes, the bears are fond of salmon—present problems of a different order.

T.C.A. PLANE RUSHES SERUM OVER PRAIRIES

Lethbridge, Alta, November 21.—When Mrs. Dick Toomer of Magrath, Alta., was brought to Lethbridge recently suffering from Pneumonia, her physician, Dr. D. B. Fowler, found that her case required a special serum. There was none available in Lethbridge. At 10 o'clock at night a long distance telephone call was put through to a wholesale house in Winnipeg. By 11:30 the precious serum was on board a Trans-Canada plane. By four o'clock the next morning, it was in the hands of Dr. Fowler. Through the agency of the T. C. A. and the Canadian National Express, Mrs. Toomer's life was saved.

"The new air service will prove a real boon to medical service," said Dr. Fowler. In this case it was a life-saver.

"FINGERPRINTING" CATTLE

Regina, Sask.—"Noseprinting" of cattle in a manner similar to the fingerprinting of human beings, is now suggested by Royal Canadian Mounted Police here as a means of protecting farmers' herds from theft.

It is claimed by the R. C. M. P. that all noseprints of cattle differ. A printed record of a cow's nose would enable police to identify a stolen animal, and would deter cattle thieves.

None can be taken of horse noses, it is said, because of the long hair that grows on the animal's nose.

One of the greatest problems facing police is the identification of stolen cattle. If noseprints were taken this difficulty would largely be solved.

LINDEN DEFEATS TRELLE TO WIN TITLE IN WHEAT

Toronto, Nov 15.—Nosing out Herman Trelle, of Wembley, Alta., four times world's wheat champion, Nels Linden, Wetaskiwin, won the spring wheat championship, major grain award of the Toronto Royal Winter fair, Tuesday.

Albertans made a clean sweep of the first three prizes, Trelle capturing second place and W. Brown, of Vauxhall, third. Last year the spring wheat championship at the big Toronto fair was won by Fred Pawsey, Wembley.

Mr. Linden's championship award is symbolic of Canadian supremacy.

After winning the first three places, Albertans went on to win more honors, H. P. Wright, master farmer of Airdie, taking six place, J. Brindely, Lethbridge, eight, and John C. Foy, Clandonald, 10th.

The Toronto fair opened Tuesday with the largest list of entries in history. Judging of Cattle, horses, swine, dairy products, fruit, vegetables, flowers and seeds got under way. Among early awards was a senior grand championship for Belgian stallions foaled before Jan. 1, 1935, to Paragon King, a roan exhibited by H. E. Alexander, Saskatoon.

Alberta judging teams again won honors, Tuesday.

In the grain judging class, the Alberta team, composed of Clifford Tebb and Dick Clayton, of Airdie, won second place, losing out to Manitoba by only one point. Tebb had the highest individual score in this class.

Alberta was second place in the beef judging class, the team being composed of Gordon Towers and Howard Henderson of Red Deer. Towers had the highest individual score.

For swine judging, the Liberty club's team from Conjouring Creek was awarded fourth place. Members of this team were Francis Blondheim and Lloyd Cook.

In the dairy cattle judging section, the Alberta team, composed of Elaine Hamilton and Jean Webb, of Lethbridge, stood fifth.

FEEDING DRY GRASS ON AN ENGLISH FARM

Grass when cut at a height of four or five ins. yields a rich protein feed high in protein, a source of vitamin A, which imparts to milk, butter and cheese the creamy colour, quality and flavour typical of the products of spring pastures. Dried grass is therefore particularly valuable for winter feeding and, being high in protein, can replace other concentrates. There is now a British grass dryers association which has adopted two commercial grades, one containing from 15 to 17 per cent of protein, the other of 17 per cent and over.

In Cheshire, famous for its cheese, B. Leslie Emslie Canadian chemist-agronomist, visited Dairy House Farm, near Crewe, where artificially dried grass is the sole concentrate fed to livestock, and the prime, well-finished condition of the animals testify to the success of the venture undertaken by Colonel W. R. Peel who is not unknown in Canada. The farm of 170 acres carries from 60 to 70 milch cows producing milk which commands a premium for high butter fat, 30 to 35 heifers and calves, besides pigs, poultry and a few horses. The climate is humid and moderate, essential to the success of the system which depends on at least three cuttings of grass, or a total of over 5,000 lbs. of green weight per acre during the season.

The grass is cut by a one-horse mower on which is mounted a small motor for driving the knife-bar, a labour saver appreciated by the horse. The cut grass is trucked to the shed housing a Billingham dryer and baler. In the oven of the dryer, fired with coke, a temperature of 170 degrees C. is maintained. There are four large sliding trays, two entering alternately on each side of the oven, holding the green and partially dried grass. After one turn in the oven the grass is forked to the adjoining tray and given the final toast, while the other tray receives fresh grass. The process, operated by two men, is continuous during the day only, and the rate of dried grass production is about 340 lbs per hour. Calves, when two weeks old, are given access to dried grass which soon becomes their sole and ample source of sustenance. Young cows were seen in prime condition and highly productive, which had never received concentrates other than dried grass. The latter is supplemented with ordinary hay and also with molasses silage made from surplus grass.

Even in this fertile part of Cheshire, where farms command a rental of $10.00 per acre, fertilizers are applied liberally, and in the production of grass for drying they are essential for rapid growth of herbage high in protein and minerals. At Dairy House Farm heavy applications of phosphate combined with potash are made in the fall, supplemented by nitrogen, as required, in spring. As Colonel Peel remarked, the saving in concentrates represents several times the amount of the fertilizers bill.

WORLD WHEAT

(New York Times)

The Agricultural Department's estimate that the world wheat crop this year will reach the old-time record of 4,265 million bushels (excluding China and Russia) shows that the problem of wheat is by no means confined to the United States. On the basis of probable consumption, output is likely to exceed the worlds needs by more than 500 million bushels. Stocks left over on July 1st, 1939, when the present season ends, are accordingly expected to rise to 1,164 million bushels, or then only 28 millions less than the record surplus in mid-1933, near the bottom of the depression.

The fact that the world's unsaleable wheat stocks are fast rising toward new high records at the same time that stocks in this country are threatening again to become burdensome shows how far the wheat problem is from solution. The world's wheat troubles date from the war, when North America, Argentina and Australia greatly expanded their wheat lands in order to make up for the decreased output of war-ravaged Europe. Land put into wheat is less readily taken out. The overseas countries continued to produce wheat on wartime scale even after Europe had rebuilt its own agriculture. The great surpluses and fire-sale prices of the early Nineteen Thirties were the inevitable consequence.

That situation improved after 1933 was due only in small part to world recovery. In large measures it was fortuitous—the "fortunate" chance of droughts and short crops, especially in the United States and Canada. Now that the drought cycle seems past, the world's wheat lands are again producing "normal" yields —with the results now being seen.

There is not a country that has not resorted to subsidies, tariffs, and what not, in the effort to shield its wheat growers from the relentless pressure of the surpluses. But such measures offer no real answer. Attempts to cope with problems by joint international action are not likely to be be much more successful in the future than in the past. Wheat promises to be a world as well as a domestic problem for a good while to come.

AGRICULTURE HOLDS KEY

R. J. Deachman, M.P.

Ten years 1928-38. Why the difference between these two periods? Relatively small unemployment in 1928—much now. I must as far as possible avoid figures. They give a chance for lazy people to exclaim: "I never can understand figures—and besides I have heard that figures lie, and I abhor lies!" There will be few figures in this story. It will be as simple as two poached eggs on toast, or another cup of tea.

Roughly, half the people of Canada live on farms, or are directly dependent on those who do.

In 1928 you could exchange any farm product, wheat, chickens, eggs, milk, a steer or any other thing grown or produced on a farm for a sufficient volume of the things the farmer needs, to maintain a decent standard of living on the farm.

Now watch this sentence. The price of the things the farmer sold fell so low that he was compelled to limit his purchases to the absolute essentials of life. So the sales of the manufacturer, the wholesaler, the merchant fell off and there was unemployment. There was unemployment because the farmer could not buy. Isn't that simple? There is not a figure in it except a date. I marvel at the simplicity of the statement—hand me the accolade! And yet I do not know how to solve the problem of unemployment without in some way restoring farm purchasing power. Do you? Are you interested? If you are not then stop right here—you have read too far if you think that you are not interested in unemployment. But you are paying for it nevertheless!

"Of all the arts, poetry seems best able to reflect the countenance of any age."—Arthur Guiterman.

A LITTLE HUMOR

A Scotish farmer had agreed to deliver 20 hens to the local poulterer. When the birds arrived, however, the shopkeeper found that there were only 19 in the case.

Just before the shop closed for the night, the farmer came hurrying into the poulterer's office, bringing the twentieth hen.

"Mon" said the poulterer, "but you're late with this one."

"Ay," agreed the other, "but she didna' lay until this afternoon." —Answers.

CONGRATULATIONS—

WITH THE Royal Winter Fair in progress at Toronto, Albertan's are interested in the awards coming to their province. And still further, local districts are interested in any awards that may come to their district.

The announcement on Saturday that the University of Alberta had won Grand Championship honors with its Killearn Lord Rothes, a magnificent steer, was gratifying to Alberta as a whole, the University in particular and also to the Tofield district. The grand champion steer was bred at the Mine Farm, Tofield, by C. Gallinger, being sold to the University of Alberta farm some months ago.

PERSECUTIONS—

THE RECENT outbreak against Jews in Germany has brought to an acute stage a vital question that has been a tragic one for quite a long time. German philosophy, always antagonistic toward the Jewish race, reacted to the killing of a German diplomat in Paris by a young Jew, by going beyond all sense and reason. In addition to all kinds of persecution, Jewry in Germany have had placed upon them the enormous fine of one billion marks, though methods of collecting this money has yet to be evolved. The treatment of Jews by German thought and action has created indignation in all countries where free speech is still a treasured possession. It is reported that Great Britain and the United States are working in unison to endeavor to find a solution to the problem. A solution that would call for the removal of Jews from Germany to lands suitable for colonization, yet vacant enough to take care of a large influx of people. Territory in Southern California has been mentioned as a suitable haven and territory in Africa is also under consideration. One of the chief obstacles to such a plan is the prohibition by Germany on Jews taking money and valuables out of the country. Thus departing Jews must leave, what to many of them is their native land, as penniless refugees.

It is difficult for people living in Canada and the United States to understand the intense hatred on the part of official Germany toward Jews. Here, in the cities at least, are encountered a number of Jews. But such is the nature of New World comradeship that they are approached, accepted and dealt with on pretty much the same terms as other people. Jews in turn, in the New World, are less exclusive than their racial brothers in the Old World. Jews in the Old World are what may be termed a race apart. This is noticeable in London, England, and so we are told by people born and raised in Central Europe, there they are still more so. One meets Jews, does business with them, often satisfactory business, but one never really understands them. Between Jew and Gentile there is a crevice which never seem to be quite properly bridged. Jews as a class are natural born traders with a strong leaning towards finance, and again as a class they are singularly successful. Not that there are no poor Jews—there are plenty of them. But the Jewish merchant, business or professional man seem to have a knack or gift for acquiring money. Their approach to the public is different from many other peoples. The average Anglo-Saxon will place a price on his product on a take-it or leave-it basis. The Jewish merchant on the other hand seems to possess a feverish desire to bargain. In fact one rarely pays "full" price at a Jewish establishment, it is always a "bargain." Jews rarely engage in agriculture, prefering to trade in farm products after they are produced. Neither are they strong on manufacturing. In large European cities where Jews are quite numerous, their social life is pretty much confined among themselves. They have their own churches of course, their own societies and clubs. They even demand and buy Kosher meat. This is beef from animals killed a certain way, somewhat different from the routine method of killing stock.

But even though there may be a lack of true understanding between the Jews and peoples of other races, there is no excuse for the persecution practised upon them in recent times. It might even be found, were the whole story told, that the Jews themselves are not blameless. Be that as it may, the German government is all powerful in Germany and can exercise tyranny or benevolence, whichever it pleases. To act in a tyranical manner toward a minority group is sowing the seeds of its own destruction. To act wisely, justly and mercifully is to earn the respect and the help of the really civilized peoples of the world.

Shrewd Finance

Mrs. Nuwed said to her husband: "Darling, will you lend me twenty dollars, and only give me ten of them? Then you'll owe me ten and I'll owe you ten, and we'll be straight.—Quebec Chronicle-Telegraph.

Famous Statements

"I will not permit 30 men to travel 400 miles merely to agitate a bag of wind," said President White of Cornell University, in 1873, when the University of Michigan challenged Cornell University to a football game to be played at Cleveland, with 30 men on a side.—The Commentator.

TRUCK DRIVER SETS UP RECORD; HITS SIXTIETH CAR OF FREIGHT TRAIN

Montreal, November 21:- Automobiles frequently strike locomotives at grade crossings, sometimes they hit behind the locomotive, occasionally the impact is with a car in the train but a truck driver in Edson, Alberta, has established some sort of record by colliding with the sixthieth car of a freight train on the Canadian National Railways as it was proceeding over the highway crossing West of Edson. Taking 42 feet as the average length for a freight car and allowing for space between cars, the sixtieth car in that particular train was approximately 2,600 feet distant from the locomotive hauling the train.

Inspection of the file recording crossing accidents maintained by the Canadian National Railways and covering a period of one month, show that automobiles arriving at crossings too late to "beat the engine" are frequent causes of such reports. The first from the sheaf comes from Cainsville, Ont., where a sedan struck the pilot of a locomotive, while the second records that just east of Wainwright, Alberta, the driver drove his automobile against the side of a locomotive with fatal results to himself.

Next is reported an incident from Napanee, Ont., where a car was driven into the side of a locomotive and a fourth accident of similar character occured at Kuroki, Saskatchewan, when a coupe was badly smashed hitting the locomotive's side.

Coburg, Ont., was the scene of an accident when a freight train traveling slowly over a street crossing was struck at its 22nd car by the driver of a coach who stated he was "unable to see the train because of foggy weather".

The driver who struck the sixieth car of a freight train clearly established a record, but these and other performances in striking locomotives or cars are not relished by railway-drivers and add considerably to the hazards of railway operation.

SPECIAL RATES FOR WINTER TRAVELLERS

Winnipeg, Nov. 21:- Catering to winter travellers of the prairie West and as far east as Armstrong and Port Arthur, who are planning holiday or business trips to the Pacific Coast, eastern Canada or the central cities of the United States, Canadian National Railways have announced special rates with extended time limits. Passage to Vancouver and Victoria already is available at the reduced rates and will continue on sale until Febuary 28 with the return limit set at April 30. Low fares are also available now to points in Washingto, Oregon and California.

A three-month limit has been arranged for those in the Prairies who plan on eastern visit, the tickets being procurable from December 1 to January 5. Exceptional opportunity to journey to the United States central section is offered prairie dwellers between the same dates and over the same three-month period.

DUCK TIES UP WIRE SYSTEM

Thamesville, Conn., Nov. 21.—A wild duck tied up telephone communication over Central Vermont Railway's dispatcher's line here recently for 12 hours. The game bird flew into the wires, its beak going over one wire and under another creating a short circuit. The duck hung suspended by its neck from eight o'clock in the evening till eight o'clock the next morning when freed by a lineman who was looking for the short". And here is one for Ripley. When released, the duck fell to the ground but before Lineman W. J. Baldwin could climb down the pole to claim a duck dinner, the fowl recovered sufficently to fly into tall swamp grass nearby.

A LOSS TO CANADA

While the United States is a high tariff country and its policies rather averse to importation of Canadian products, at the same time that country has no scruples whatever the importing of brainy Canadian peoples. The latest acquisition by Uncle Sam is Dr. W. F. Geddes, chemist in charge of the grain research laboratory of the Board of Grain Commissioners the Canada since 1923. Dr. Geddes is leaving to take the position of professor of the division of agricultural bio-chemistry at the University of Minnesota.

Dr. Geddes is Ontario-born and received his education at the Ontario Agricultural College, Guelph and the University of Toronto. He also took a post graduate course at the University of Minnesota. In his position with the board of grain commissions Dr. Geddes rendered a real service to the wheat producers of Western Canada.

POLITICAL WHEAT CRISIS

In view of the decision of the federal government to fix a minimum wheat price this year, and also of the governments of other countries taking active steps to assist their wheat producers, the following paragraph, written in October, 1936 by Andrew Cairns, Secretary of the Wheat Advisory Committee with headquarters in London, England, may well be re-written.

"In many countries wheat and politics are now almost synonymous terms. Wheat has been subjected to far more political doctoring than any other agricultural commodity. Wheat is the principal cash crop of a large group of farmers. In many countries this group is politically very powerful. With the return of low wheat prices we will not have long to wait to see this force exerted to the full. There is a price below which the governments of overseas and European exporting countries dare not let wheat fall. In most countries we have political wheat prices. In few, if any, are wheat prices now determined by the free inter-play of world supply and demand factors. We might as well frankly face up to the fact that in the case of wheat, price does not perform the role assigned to it by the classical economists. It simply does not act as a regulator of supply and effective demand. An increase in wheat prices generally produces an increase in wheat acreage, but a decrease in wheat prices does not bring about a decrease in wheat acreage. It generally produces an increase in direct or indirect government assistance to wheat growers."

$50,000 IN LOSS AFTER PRICE WAR

Windsor, Ont., Nov. 15.—Windsor's bread price war was ended Monday as Windsor bakers estimated their loss at $50,000 for the month long price war. Bread prices are nine and ten cents a loaf, with the larger bakeries charging the extra cent for the sliced loaf. Prices dropped to five and six cents during the "war" for a special product, but most customers continued to pay the high prices for what the bakers said was a superior product.

"It is the distinctive mark of genius that it lights its own fire.—Hall.

WESTMINSTER REPORTED CONSIDERING BOLD PLAN PROPOSED BY AMERICAN

London, Nov. 15—British Government gave urgent consideration to a bold scheme under which the U.S. and the British Empire would find homes for thousands of German Jews seeking refuge from violence and restrictive laws in Germany.

The U.S. ambassador to Britain, Joseph Kennedy, working day and night on the problem since the latest wave of anti-Jewish violence began, was believed to be the author of the plan.

It was understood on the highest authority Prime Minister Chamberlain and Foreign Secretary Halifax, after a long session with the ambassador, had agreed to co-operate in the plan to move thousands of Jews.

Mr. Kennedy spent last week-end with Malcolm MacDonald, secretary for the dominions and colonies, who is immediately concerned with the problem in Palestine and the general refuge situation.

Monday Mr. Kennedy also saw Sir Horace Wilson, the close advisor who accompanied Mr. Chamberlain on his historic visits to Germany to confer with Hitler.

In government circles it was said the U.S. ambassador was influencing the British government toward taking the lead in dealing with the plight of the Jews.

The "Kennedy plan" it was understood, aims at moving Jews by tens of thousands into the British empire and into North and South America.

Every major nation will be asked to take as many German Jews as possible in an effort to move most of the Jews out of Germany.

A conference may be called to discuss the problem in the light of the Nazis' recent anti-Jewish measures.

In order to take care of many urgent cases, some Jews may be moved at once into British colonies and the U.S. Support of France and the Netherlands has been sought.

Mr. Chamberlain, it was understood, now is seeking support of the dominions for the plan.

Teaches Farley To "Draw Long Bow"

Keen appre[illegible] wonderful playground Canada possesses in the Canadian Rockies was expressed by Jim Farley postmaster-general of the United States and organizer of the Democratic Party, who spent a pleasant few days with his daughters Ann and Betty at the Banff Springs Hotel. While at the mile-high playground, they took part in the various activities usually enjoyed by the international colony there and thoroughly explored the surrounding country by motor. Mr Farley, who is noted for the fact that he can call people by their first names years after a single meeting, will have a hard time forgetting Jacob Two Young Man, chief of the Stoney Indian tribe, snapped showing him how to handle a bow and arrow in the accepted Indian style. Interested in the spectacle of their daddy taking orders from anyone less than President Roosevelt himself are Ann, left, and Betty.

CANADIAN NATIONAL

THE WORLD OF WHEAT

By R. C. L. Strange, Director "The Crop Testing Plan."

"Agriculture in the first place, is not only an art but an important and noble art. It is, as well, a science, which teaches what crops are to be planted in each kind of soil, and what operations are to be carried on, in order that the land may regularly produce the largest crops. Equipped with this knowledge the farmer should aim at two goals, profit and pleasure: the object of the first is material return, and of the second, enjoyment."

This remarkable piece of wisdom, setting out in memorable words the very heart and soul of agriculture, was written by one of the greatest agriculturalists the world has known—Marcus Terrentius Varro—Senator of Rome, about 50 B.C., just over 2000 years ago, in his book entitled "On Agriculture."

The pleasure and enjoyment of farming, of which Varro writes, is no doubt that exalted feeling which comes to those who in their work are striving to excel, who are aiming to achieve the highest possible skill in their craft, and who experience such a love and pride in their work that they become veritably inspired with a desire to attain perfection itself.

Fortunate indeed the farmer who has received sufficient material return, and who can experience also the enjoyment of which Varro speaks.

Following factors have tended to raise prices: Very small wheat surplus remaining in Australia; Russia faced with acute feed shortage; winter wheat sowing backward in Germany, Mexico buying U S wheat; More frost reported in Argentina; Crop prospects in Australia continue to deteriorate. Delays in harvesting root crops in Germany.

Following factors have tended to lower price. British Government purchases large quantity of Roumanian wheat. Rice harvest makes good progress in Texas; Increase in South African corn crop. Beneficial showers in Argentina; Italian seeding completed, conditions excellent: U S A winter wheat crop improving after recent rains; Large surpluses of meats, cheese, butter and fruits in U S A.

TOFIELD LOCAL C.C.F. MEET

The November 21st meeting of the Tofield Local C.C.F. Club was held in the home of the president Mr. A. J. Harrison, a good number were present.

After the usual formalities a letter to Mr Harrison from the secretary of the Unity League, with regard to meeting the local club, was read. It was moved and carried that: "we do not believe that it is advisable for the local to identify itself with the Unity League." And Mr. Harrison was asked to advise the secretary accordingly.

Committees were chosen to see that delegates were chosen from the Pools of Amisk Creek and Ketchamoot to attend the C.C.F. convention in Vegreville on the 30th of November.

Mr. A. J. Harrison, Mr. J. Jacobson and Mr. A. P. Moen were chosen a committee to outline a study program for the winter months.

Mr J. Heuston of Holden then gave the Local a short talk stating that he had been a socialist for over 15 years, that he had never believed in the Unity Party but that he believed that it "might be necessary to unite (with other parties) to protect our civil rights and liberties. The Liberals as well as the Unity will protect our civil rights," he further stated. He then gave a short talk on the problems of the trade unionists as compared with the farmers, which was followed by an interesting discussion.

The lunch and social hour continued into the next day.

U.F.W.A. NOVEMBER MEETING

One of our new members, Mrs. R. Ross, entertained quite a well attended meeting for November.

The roll call topic, "First Aid Hints" was responded to enthusiastically by each person present.

The monthly bulletin, "Shall Canada Rearm?" was read by the Secretary and discussed by the meeting.

Book review was taken by Mrs. C. Erickson and was based on William Strange's recent book "Canada,—the Pacific and War."

The usual "Benevolent Fund" collection was devoted to the purchase of Tuberculosis Xmas Seals and the amount realized forwarded to the Kinsmen's Club of Edmonton.

This being the annual meeting, a new executive was elected to carry on for 1939, with Mrs. C. Erickson as president, and Mrs. A. Bigland as secretary.

The next meeting will be held at the home of Mrs. S. Johnson in town on December 15th.

VALUES IN SEED

There are several different qualities of seed, all at different prices, and the buyer receives good value for any price that he pays. The best value of all, however, is for the highest quality Registered and Certified seed, sealed in the sack. Considering the superior quality, it is surprising how little extra it costs.

For particulars on all the grades of seed, see the nearest Searle Agent.

SEARLE GRAIN COMPANY LTD.

CARNIVAL IN FULL SWING

As we go to press the carnival sponsored by the Tofield Curling Club is winding up in a blaze of glory. On Wednesday there was a good attendance and the various stalls were well patronized. The people were having a good time and seemed to be enjoying immensely the numerous games of chance and skill provided for their pleasure.

The event was closed with a dance at which a large number of people were present. It was a jolly crowd and marked a successful conclusion to Tofield's first Fall carnival.

Watch for Mr. Bob.

Social Credit Convention Well Attended

Contributed

The Social Credit Convention for Vegreville Constituency was held in Tofield, on Friday, Nov. 25th 1938 with afternoon and evening sessions. Eight Zones were represented with 22 delegates.

The afternoon session was opened by Mrs. J. L. McPherson with all singing O! Canada.

The welcoming address was given by Mr. T. R. Murray, Vice-President, and answered by Mrs. C. D. Tait.

Minutes of the last Convention were read by Mr. W. M. Crockett, Vegreville, followed by Report Credential Committee.

Letters of Sympathy to be sent to Mrs. Johnston Ferguson, Tofield and Mrs. Geeshon of Kingman, also a wire to Mr. Skalen who is ill in hospital.

The motion was passed that one dollar be collected from each group for Constituency expenses and mention was made of Ketchamoot Group being transferred to Zone No. 7.

Mr. English of Lavoy, gave a report on the convention held at Calgary.

During the intermission Mrs. McPherson read a poem entitled "Friendship" and Mrs. Chevraux of Tofield sang a song entitled "My Friends", accompanied on the piano, by Miss Cleo Wilson. This was dedicated to the memory of Mr. Ferguson and Mr. Geeshon, and was greatly enjoyed by all. Mrs. Chevraux has a charming voice and received an encore.

After this Mr. T. R. Murray took the chair and conducted the meeting in his usual capable manner. Resolutions were submitted and discussed, one dealing with the best interests of the Primary Producer was especially dealt with.

The following Zone Presidents gave a short talk: Mr. F. Zeleger of Lavoy, Mr. M. C. Assletine of Vegreville, Mr. Gibson of Kingman, Mr. W. D. Bruce of Bruce, Mr. Tait of Ranfurly.

Mrs. McPherson suggested Group study along economic lines and proposed that a letter of congratulation from this Convention be sent to Mrs Wood of Stoney Plain who won first prize in Canada for the best essay of "Money" given by the Garden Vale Publishing Co. Prov. Quebec. It is notable that Albertans know their economics.

Mrs. McPherson was elected President again which was heartily endorsed by the convention. Mr. T.R. Murray as Vice-President and Mrs. Olson of Vegreville, Secretary. Mr. M. C. Assletine, Treasurer.

Delegates were appointed for the Divisional Convention as follows, Messrs English, Cole, Bruce, Graham, Combes, (withdrew), Gabblehoes, T. R. Murray.

Mr. Wm Hayhurst M.P. and Mr. Marshall M.P. were present at this session, but owing to lengthy discussion and the afternoon fast closing in we were unable to hear them until evening. Afternoon session then adjourned.

The evening session opened about 8:30 and the Variety Theatre was filled. Mrs. McPherson occupied the chair and the meeting opened with "O! Canada," followed by the theme song, Miss Cleo Wilson whose musical ability leaves nothing to be desired, at the piano.

Mrs McPherson paid a warm tribute to the memory of Mr Johnston Ferguson whose passing in October of this year, was so deeply regretted by all.

Mrs. Chevraux sang again most delightfully, receiving an enthusiastic encore.

Speakers for the evening were Dr. J. L. McPherson, M.L.A., Mr. Wm. Hayhurst, M.P., Mr. Marshall, M.P., Dr. Cross, Minister of Health, Hon. Mr. Tanner, Minister of Lands and Mines.

Each speaker gave a splendid address dealing with government work along their several lines.

The addresses were entirely free of any criticism, scathing remarks or vindictiveness towards any person or parties, and were particularly instructive and educational.

The convention was a decided success and the members of Zone 7 wish to extend thanks to all who helped to make it so.

Evening session closed with the National Anthem and everyone went home feeling better and happier towards their fellow creatures.

At least one willow tree has its dates mixed. This is winter not spring, but so fine has been the weather that pussey willows are appearing long before they are due. Mrs. McHeffey brought a sprig to the Mercury with the buds fully out.

TOFIELD RIFLE TEAM SCORES WELL

Montreal, Nov. 28:— Results of the Provincial matches of the Dominion Marksmen .22 Sporting Rifle Competition, with over a thousand marksmen competing, were announced today from the headquarters of Marksmen organization here.

In the Alberta sector three teams shot perfect scores to tie for first place until Dominion Marksmen officials made use of the rarely used X-ring inside the bullseye to decide the championship. The Provincial title went to the Claresholm East team, whose possible (1500 x 1500) contained the most shots inside the X-ring. The second position went to the Calgary Rifle Club, while the "K" Division of the R.C.M.P., Edmonton, defending Provincial champions, took third place.

Members of the Claresholm East team, which will compete with eight other Provincial winners and a team from the North West Territories in the Dominion title matches next month, are as follows: S. Johnson, J.W. Burbank, J.L. Strang, R. Berg and O.A. Anderson, J. Slettede and A.O. Lundgard.

A prelude to the Dominion matches that will be shot next month, the Provincial matches attracted the largest field of shooters of any Canadian rifle tournament with the view of interesting young sportsmen in organized shooting rather than in the haphazard potting of tin cans and other makeshift targets, expressed themselves well pleased with the results.

Like the Provincial matches, the Dominion match will be shot on twenty yard targets, the best five scores made by the seven-man teams to count toward the final total.

Members and scores of the Tofield Rifle Club, Team No. 1, are as follows: Messrs. Burke, 299; Clarke, 298; Herndon, 298; Dunn, 300; Taylor, 296; Lerbekmo, 299; McBratney, 274. Total 1494 out of a possible of 1500.

LINDBROOK

The sympathy of the people of this district is extended to Mr Elmer Anderson and family on the death of their eldest son, Lawrence, at the age of 16 on November 24th at the University hospital, Edmonton. The funeral took place on Sunday, Nov. 27th at the Lutheran Church, Ryley, Rev. Mr. Hoverstein officiating. Pall bearers were all youths of the same age as deceased. Interment took place in the family plot. The church was packed, in fact many could not get in, and there were many floral tributes. Many here well remember Lawrence who went to school here, when his father was section foreman here, and all are very sad to hear of his death.

Miss Gladys Lisslemore of Wainwright is here on a visit to her relatives, Mr. and Mrs. Bracegirdle and family of Lindbrook.

The news items from this district this week will read like a sick report we are sorry to say, but it cannot be helped, guard we never so closely.

Mrs. Geo Weslake has been in hospital lately, but is home for a few days now, but expects to have to go back to hospital soon; we hope to hear soon that she is home for good with her health restored.

Miss Lily Morden has also been up to the city of late for medical treatment.

We hear that Mr Reub Hammersley had an X-ray picture taken of his knee that has been troubling him of late and that he too, will have to go into "dock" for awhile.

Then the usual inoculation of the children took place in the school here this week. The inoculations were performed by Dr. Carmichael of Bawlf (in the absence of Dr. Law who is away at Rochester U S A) assisted by Nurse Baptist of Tofield. We hear that the kiddies are real "stoics" now, probably used to it by this time.

Gospel services conducted by Messrs. Hunt and Morgan have been held in the school the last two Sundays and twice in the week, evening services all and the same were very well attended. Notices re future dates for services will be posted in the Lindbrook store.

Anglican Church service was held in the afternoon last Sunday week, and quite a large congregation turned out. The Rev. T. W. Teape conducted the service.

Miss Dessa Simmons of Forestburg and Edmonton spent the week end here visiting her friend, Miss Yvonne Phipps, teacher here.

ROUTINE WORK AT TOWN COUNCIL MEETING

A regular meeting of the Town Council was held on Monday evening November 28th, at which the mayor and all councillors were present, with the exception of Dr. Law who is absent in the east. All business was of a purely routine nature.

Will The World Buy More Canadian Wheat?

([illegible] Grain Co.)

For some time past in these columns we have been drawing attention to a new and serious problem the [illegible] farmers and all of us who are [illegible] in the wheat industry of Western Canada. It [illegible] that [illegible] time since Canada began [illegible] wheat [illegible] years ago [illegible] to take [illegible] of the attention [illegible] our farmers [illegible] and that there seem [illegible] under present [illegible] conditions that the situation [illegible] will become [illegible] better in the near future.

The results of our studies have compelled [illegible]—and we have [illegible] previously that there [illegible] the situation [illegible] Prairie [illegible]. The solution would be the [illegible] of existing high tariffs throughout the world, the [illegible] quotas and the removal of foreign exchange controls, [illegible] that [illegible] trade between the [illegible] of the world might be [illegible] at least to [illegible] a few years ago.

We have [illegible] farmers that [illegible] were the [illegible] after the war [illegible] heights [illegible] be the first countries [illegible] about the tariff reductions.

Some [illegible] however tell us that the effort to [illegible] tariffs would not be worth while [illegible] the reason, they claim, that the European countries, such as Italy, Germany and also Asiatic Japan are committed to a policy of "Self-Sufficiency" or "Nationalism" and so would not purchase any more of our wheat or other raw materials even though the democratic [illegible] were to lower their own tariffs, and so be willing to admit foreign goods.

A careful [illegible] however, of the [illegible] steps taken in recent years by Italy, Germany and Japan and a perusal of official literature [illegible] these countries [illegible] convinces us that those that [illegible] that European countries have adopted their present [illegible] policies [illegible] by choice [illegible]. The records show in fact that it was not until the democratic countries themselves raised their tariffs after the war, that the European countries reluctantly followed, and in turn began to restrict their imports of wheat and other commodities, and naturally, having no gold, they [illegible].

As proof of this we [illegible] two extracts, one from an official document issued by the Fascist government, and one from a similar [illegible] issued by the German government.

The Italian View

From the official [illegible] published by the Fascist Government, Italy, on Oct. 28th [illegible]:

"A prohibitive tariff policy was adopted by the United States; England first depreciated her currency and then closed her markets. The Ottawa agreements introduced differential tariffs throughout the British Empire. Currency dumping was practised on a vast scale by Japan and other countries. [illegible] with tariffs, France [illegible] quotas and prohibitions, [illegible] the European [illegible] and exchange regulations [illegible] finally demoralized [illegible] markets and [illegible] trade.

For five long years [illegible] 1934 Italy held out [illegible] and exchange [illegible]. The Italian government [illegible] efforts made by the League of Nations and [illegible] international [illegible] in favor [illegible] a policy which had [illegible]. The doctrine [illegible] Nations [illegible] self-sufficiency [illegible] settlements of [illegible] goods and services [illegible] then the possession [illegible] national resources [illegible] of life or death for a nation."

The German View

From the new official handbook published in Germany [illegible] "The Nazi Primer" (Page 26):

"Germany would in its present strained condition gladly and willingly buy from abroad the raw materials which we lack, if a sufficient possibility were given for doing so. Foreign countries [illegible] payment in foreign currency. The only way that we [illegible] foreign money is by exporting German goods. In a senseless manner the countries with raw materials shut out German imports, isolate themselves in their great economic enclave. Our exports have shrunk, therefore, in exactly the ratio that the revival of our country has increased our need for raw materials. For that reason the German economy in industry and handicrafts finds itself in very serious difficulties. If, therefore, German industry is to put all German workers back again and to raise the production of goods to the point of doing away with German poverty, extraordinary measures are necessary in order to obtain sufficient supplies of raw materials."

Who Is To Blame?

It will be seen from these extracts [illegible] the European countries themselves [illegible] the [illegible] of "Nationalism" and "Self-Sufficiency" just [illegible] therefore, [illegible] that given the opportunity [illegible] would [illegible] the democratic [illegible] of raw materials [illegible] foodstuffs [illegible] they need if [illegible] the chance [illegible] is made [illegible] more Canadian [illegible] foreign exchange [illegible] for our [illegible]. This [illegible] obtain [illegible] more of [illegible] they [illegible].

The [illegible] are [illegible] trade [illegible] materials [illegible] and [illegible] of their [illegible] essential raw materials [illegible] by war—if necessary.

We firmly believe, therefore, that the true primary cause of the decline in the demand for Canadian wheat and other raw materials, of the excessive and feverish expansion of armaments now going on in nearly all countries, of the threats of war, and of the invasion of the small [illegible], the excessive tariffs [illegible] restrictions on trade set up after the war, not by European countries [illegible] many suppose, but by the democratic countries [illegible]. These higher tariffs and [illegible] in the democratic countries started with the Smoot-Hawley tariff in the United States in 1930, which raised the entire United States tariff structure [illegible] shortly afterwards France, Canada, Australia, the Argentine, Great Britain and other [illegible] followed the same plan.

The Only Remedy

It seems, therefore, that the true and probably the only policy that will lead to a substantial increase in the [illegible] European and other [illegible] Canadian wheat and other raw materials, and to decrease in the fears of those nations [illegible] war will be the reversal by [illegible] of the [illegible] "Nationalistic" policy. This would [illegible] of the tariffs [illegible] of other restrictions [illegible] hamper and [illegible] international trade, consequently restricting the healthy exchanges taking place of foodstuffs and raw materials of the primary producers of democratic countries for the goods and commodities of the people of other parts of the world.

CAMROSE ORGANIZE UNITY LEAGUE

Camrose, Nov. 28:— The newest [illegible] the rapidly developing provincial movement for united political [illegible] at the next general election was created here last week when over [illegible] met in the Bailey theatre [illegible] of the [illegible] and [illegible]. Those attending [illegible] from many parts of the province [illegible] riding, and were representative of both the farming and business life [illegible], as well as the various [illegible] of political thought [illegible].

The Camrose Constituency Unity Association turned over to the executive [illegible] the responsibility of [illegible] a member to represent the association in the Unity Council of Alberta. It was decided to establish [illegible] preliminary organization in every polling subdivision of the riding by the election of an association committee, consisting of one woman, [illegible] and one direct representative [illegible] youth in each [illegible]. Eight [illegible] a president, vice president and secretary-treasurer were elected to carry forward the work of organization.

THE FROST

He went to the windows of those who slept,
And over each pane, like a fairy, crept;
Wherever he breathed, wherever he stepped,
By the light of the moon were seen
Most beautiful things; there were flowers and trees;
There were bevies of birds, and swarms of bees;
There were cities, with temples and towers; and these
All pictured in silver sheen!

—Hannah Flagg Gould

LONELY BACHELOR SEEKS WIFE AT ENQUIRY OFFICE

Montreal Que Nov. 27: A new use of the information bureau at the Canadian National Railways station here was attempted recently when an elderly gentleman, approaching the attractive young lady attendant, asked where he could find a wife. The attendant thinking he was fooling reminded him that it was not April 1. However, the would-be groom assured her he was in earnest, explaining that he had a nice home in the suburbs and was lonesome without a mate. He wanted a wife, whether she was English or French, rich or poor made no difference. He then asked her if she would be interested in his offer. Realizing that he was serious, she politely explained that the duty of finding companions for lonesome hearts was not one for the information bureau of a railway station. Not being interested herself, she suggested that he advertise in the local newspapers.

EUROPEAN MISS FALLS FOR ORANGES

Winnipeg. Nov. 27:- Travelling alone holds no fear for eight-year-old Magda Novosel . If she can buy oranges.

In her home country of Jugo-slavia fruit is a delicacy but Magda on her way to Flin Flon, Manitoba, [illegible] on apples and oranges [illegible] from the time she boarded the Canadian National at Montreal. With half a dozen of each packed in her small suitcase, she spurned milk and sandwiches during a brief stopover in Winnipeg.

The pert little European traveller has lived most of her life with her grandmother in the district of Jastrebarsko and cannot remember having seen her parents she will join in the northern mining city. She came to Canada on the Cunard liner Ausonia.

"Progress is hitting our town."
"How's that?"
"At church the other Sunday, somebody dropped a zipper in the collection plate."

CENTRAL B.C. OFFERS OPPORTUNITY FOR SETTLEMENT

A section of British Columbia where drought is unknown, where agricultural land taxes are low, where wood and coal are abundant for fuel, where game is abundant and wild berries plentiful, where the climate is "not more severe than on the Canadian Prairies" in winter and never excessively hot in summer is the paradise for farmers described in a special Northern and Central British Columbia issue of "The Northern Argonaut" of Stewart, B.C.

That the ease with which crops are grown and many of the requirements of life are met in the region between Prince George and Terrace on the Grand Trunk line of the Canadian National Railway is an actuality is perhaps evidenced by the fact that Sir Henry Page-Croft and Councillor Dalgleish of Newcastle, England, promoters of a great Empire settlement scheme for Canada, now being discussed in the British Parliament, have chosen this region as the most suitable one in which to settle 10,000 British families, as the beginning of a wider [illegible] plan from Britain [illegible] Canada.

[illegible] Argonaut [illegible] however, that [illegible] without market [illegible] at present, as it is a considerable distance from Vancouver and, owing partly to lack of grazing facilities, packing plants, etc. it is not even dominating its own domestic market for products.

For subsistence farming, however, and for such side-line endeavors as fur-farming, seed-growing, honey-producing, etc., the fertile valleys of the Upper Fraser, Bulkley and Skeena rivers are depicted as possessing great attractions for people in whom the pioneering instinct is strong and the wish to make assured living from year to year exceeds the hope or expectation of making any large annual cash income.

The edition analyzes various communities, contains much data on the resources of the country, is copiously illustrated and presents the current [illegible] of the country against an interestingly-written historical background. The special number is sold by the Northern Argonaut at 25c a copy either from its office at Stewart B.C. or its Vancouver office [illegible] West Pender Street.

FALL PRECIPITATION REPORT

(Outlook For Next Year's Crop.)

Judging by the fall moisture that has [illegible] the chances for a good crop on the Prairies are better for the next season than they have been for any year since 1933. The precipitation [illegible] occurred during the recent months of August, September and October for the three Prairie Provinces, [illegible] weighted for wheat acreage, was 100 per cent of normal as compared with 90 per cent for the same period last year.

The percentages of normal of the [illegible] for the Prairie Provinces [illegible], are as follows: Alberta [illegible] per cent, Saskatchewan 118 per cent; and Manitoba 66 per cent.

Experience has shown that the precipitation which occurs during the months of August, September and October, that is after harvest and before freeze-up, plays an important part in [illegible] moisture reserves available for the succeeding crop, for the reason that this moisture constitutes the main subsoil reserve enabling the crop to tide over periods of less than average rainfall that [illegible] during the growing season.

[illegible] that if average [illegible] during the coming season [illegible] an average yield [illegible] 16½ bushels [illegible] produced [illegible] bearing in mind however, the possibility of reduced yields on account of grasshoppers and other kinds of damage that may happen to the crop after the rainfall has made the yield per acre. Damage from rust, however, it would seem, will no longer be a factor in reducing yields.

SERVE FISH CAKES FOR BREAKFAST

Days are getting crisper, the whole family needs more pep and energy to tackle the day's schoolwork, business or homemaking tasks. And the way to get that energy is by a big platter of fishballs for breakfast. They're easy to make if you cook extra potatoes for dinner and have the fish freshing at the same time, and make the cakes right after dinner before the potatoes have a chance to get cold. Put them in the refrigerator or in a cool place, cover with a sheet of wax paper, and they'll be all ready to fry crisp and hot for breakfast in the morning.

Here's the way to make them:—

Canadian Fish Cakes

1 cup cod fish, flaked and freshened if salt cod is used
1 egg, beaten
1-2 teaspoon onion juice (optional)
1 1-2 cups mashed potatoes
1 tablespoon butter, melted
Pepper to taste

Simmer codfish until it flakes easily. Mix with mashed potatoes, add beaten egg, melted butter, onion juice (extracted by grating onion), and pepper. Beat until light and fluffy. Form into cakes, dip in beaten egg, in finely sifted, dry bread crumbs. When ready to use, saute in bacon fat, drain on unglazed paper, and serve.

This is a traditional favourite at the Chateau Laurier in Ottawa, where many M.P.'s stay during the Session. They are served with a poached egg on top and Canadian bacon. Or you can use thick tomato soup as a sauce, or serve with bacon plain.

For a family breakfast, make your fish cakes generous in size, but for Sunday mornings, when breakfast takes on a special significance, make them tiny and serve with little sausages, or follow with wheat cakes and maple syrup.

Passenger: "Fish-Hook? That's an odd name for a station. Why do you call it that?"

Porter: "Well it's the end of the line."

Ford Motor Company of Canada, Limited, Announces

TWO NEW FORDS *for* 1939

DE LUXE FORD V-8 FORDOR SEDAN

DE LUXE FORD V-8: Provides all the basic Ford features with extra luxury and style. Remarkable amount of extra equipment included in the price. Hydraulic brakes. 85-hp. V-8 engine. Sets a new high for low-priced cars — in appearance and performance.

FORD V-8 TUDOR SEDAN

FORD V-8: Now five inches longer from bumper to bumper. Roomier bodies—more luggage space. New styling. Hydraulic brakes. Scientific soundproofing. Triple-cushioned comfort. 85-hp. V-8 engine.

and the NEW MERCURY 8 *for* 1939

THE MERCURY V-8 TOWN-SEDAN

MERCURY 8: An entirely new car. Fits into the Ford line between the De Luxe Ford and the Lincoln-Zephyr. Distinctive styling. 116-inch wheelbase. Unusually wide bodies. Remarkably quiet. Hydraulic brakes. New 95-hp. V-8 engine.

The new cars in the Ford Quality Group for 1939 give you a broad choice. Whichever you choose, whatever you pay, you'll get top value for your money. That is true of the lowest priced car or the highest. All have one important thing in common—inherent quality.

There are three reasons for this quality. They are brilliant engineering design, quality materials and precision workmanship—a combination that you will acknowledge when you have seen and driven any one of the fine cars in the Ford Quality Group for 1939.

Things are happening in the automotive world this year! And nowhere is the advance more marked than in this Ford Quality Group. See your nearest Ford dealer before you buy any car at any price.

A MARKETING ACT FOR ALBERTA—

THERE IS quite a lot of interest now being shown in the question of marketing legislation for Alberta. It is suggested, it is even being urged, that Alberta pass legislation identical with that of British Columbia, the objective being the passing of legislation that is court proof. It is claimed that it took fifteen years for British Columbia to perfect a legalized marketing system and any experimenting or introduction of new ideas, when and if Alberta considered similar legislation, would surely result in delay, if not confusion. It should be understood that the provinces have the sole right to legislate regarding internal marketing of products, and the Dominion has the sole right to legislate as regards Dominion marketing problems. But neither one or the other may trespass as regards marketing legislation, into the field of the other. In British Columbia the legality of the marketing legislation has been found sound and it would be a simple thing for Alberta to copy the B.C. laws and save itself much grief.

In British Columbia there are Boards set up for different products. For instance a Poultry Board, Fruit Board, Vegetable Board, Milk Board, etc. These Boards have the authority to regulate the marketing of their particular product. The objective is uniformity of marketing, maintenance of quality, and keeping a fair price. How well the regulations work and how well they please the people is a matter of personal opinion. Some British Columbians believe the regulations are good others would prefer to market their products just as they pleased. But leaving personal opinion out of it, the ultimate objective of marketing legislation in British Columbia is to make conditions better for ALL growers and raisers of agricultural products within that province. That is the objective—to which may be added, a more uniform price system for the consumer. For when products are sold wholesale under regulation, there is less likelihood of a wide price range in the retail field.

British Columbia is particularly adapted to legislation of this kind. In general, the farms are small. The products quite varied, including fruits, vegetables, poultry products, dairy products, honey, etc. With the exception of certain areas and on a small scale, grain does not enter very much into the picture. Therefore it is easy to see that regulated marketing of the above named products would be a good thing (despite some certain inconveniences) for the producer.

The Alberta agricultural set-up is entirely different from that of British Columbia. Products that to British Columbians are their main source of revenue, are to Albertans, in the majority of cases, sidelines. Fruits, vegetables, poultry and poultry products, even dairying loom up small beside the grain growing industry. And how much a marketing act could improve the grain growing industry is problematical.

However, there are some products the marketing of which could perhaps be regulated with profit to the producers. Hogs, poultry and dairy products would serve as excellent tests as to whether Albertan's responded to regulated marketing. Great Britain can use our bacon and poultry, and while just now the butter surplus is quite large, this condition generally rights itself with time. If regulated marketing brings about improved quality and a better price, we are on the right track.

The response on the part of the public to marketing legislation is quite important. In order to benefit all producers, a certain amount of individual liberty will have to be taken away. If this is generally acceptable, all well and good. But if among the producers there is any large number who do not like it, and they try to sidestep the regulations by means usually employed in such circumstances, it will cost a lot for inspectors, special police, etc., to see that the regulations are enforced.

So far we have seen nothing that would serve as a guide as to the actual course market regulation of farm products would take. If farm organizations, as they are now being urged to do, enlist the support of their provincial member of parliament as regards the passing of a marketing act, they should first of all find out to what extent government regulation will go. This should be quite easy because it is suggested that the British Columbia Act be copied. While there is no desperate hurry, now that interest has been aroused, authoritative information should be sought and in due time acted upon.

And Tame Ones Also At Present Prices

For a crop of wild rice, a Manitoba Indian received $240, which is more profitable than any crop of wild oats.—Edmonton Journal.

Too Fresh

Service Station Man: "Where's your radiator cap?"

Motorist: "On the front end of my car, but don't call be Cap."—Harper's Harp.

Aha!

"Why have words roots?"
"To make the language grow, of course."

VEGREVILLE OBSERVER BELIEVES MRS. THORSLEY O.K.

(Contributed)

The election of trustees for the Divisional Boards will be looming up in the near future and candidates are already bestirring themselves to woo the voters.

The Observer understands that Mrs. Mabel E. Thorsley of Dodds, is looked upon as a likely candidate in Sub-Division No. 5, Holden School Division No. 17.

While matters of this kind are usually left severely alone by the Observer, it will do no harm for us to say that we believe Mrs. Thorsley would make a remarkably good choice.

She is an ex-teacher, having taught in various schools from time to time and has also been secretary of the Solberg school district for 15 years. Her warm interest in community affairs in her district is well known for she has been active in the church and social work and also in the Women's Institute and gave valuable assistance in organizing the Dodds Mutual Telephone Co.

The interests of the rural schools, the rural school boards and the taxpayers are a primary consideration and to the welfare of these Mrs. Thorsley would no doubt give every attention. Her experience in practical teaching, school board work and her wide general knowledge of the Sub-Division mentioned should be invaluable to the Divisional Board. The ratepayers will most probably give thought to these matters when elections roll round.

BANTER FROM THE BRIDGE

By Captain J. G. Bisset, in the Christian Science Monitor

Many good yarns are told of the old-time captains of the early trans-Atlantic steam packets. They were rough old sea-dogs of the sailing ship school, and as their steamers were fitted with yards and sails, they looked upon engines as new-fangled, evil-smelling contraptions that were doomed to failure. Nothing pleased them better than suffer a complete breakdown in mid-Atlantic so that they could clap on canvas and sail the ship triumphantly into port, thus asserting the superiority of sail over steam.

As engines improved in reliability, sails were gradually cut down to a minimum, leaving only a couple of "fore and afters" for steading the ship in beam seas, and even these finally disappeared about forty years ago. The only sails to be found in steamers today are those compulsory carried in lifeboats.

The story is told of a captain and chief engineer who were always at loggerheads about the importance of their positions. The captain swore he could do the chief's job with one hand tied behind his back, and the chief retorted that he could do the captain's job—standing on his head. So one night they agreed to swap jobs from the eight to twelve watch. After about three hours the captain bellowed up the speaking tube to the bridge. "You'd better come down here Mac. The engines have stopped and I can't get them started again." To which the chief replied, "Don't worry. We've been ashore on a mud bank for the last two hours."

There is the story of Captain "Foggy" Martin. On one occasion after being forty-eight hours on the bridge in a pea-souper, he was more than usually ill tempered. It was 8 a.m. and although the visibility was nil, there was a bright patch of blue sky overhead. The sprightly second officer, coming up to take over the watch after a good seven hours' sleep, said, "Good morning, Sir. Nice and clear up there." And the captain giving him a dark look, replied, "Yes, you blithering idiot. But we are not going that way."

During the South African war a famous Atlantic liner was converted into a troopship and dispatched to Cape Town with a crowd of units including a detachment of nurses. Nearing the equator, preparations were made for the usual "crossing the line" ceremonies. Captain Flynn, a shock-headed Irishman, was in command and he was known to be an inveterate joker. One day a nurse stopped him and said, "Captain Flynn when we cross the line do you think I'll be able to see it?"

"Sure" said Flynn, with a twinkle in his eye. "We'll be crossing at noon tomorrow, and if ye come on the bridge I'll show it to ye."

Next day, the nurse with several companions arrived on the bridge at the appointed time. "Now," said Flynn, taking the telescope from its rack and balancing it across of the bridge rail, "If you look through this in the direction of the horizon, you'll see the line." While the nurse was awkwardly focusing the glass, Flynn, with a wink at the bystanders plucked a hair from his head and held it horizontally across the end of the telescope. "D'ye see?" he cried.

"Oh, yes," replied the nurse excitedly, "and bless me if there isn't a camel walking along it."

If a passenger ever asked him at the beginning of a voyage, what the weather was going to be like, he invariably replied "Fine weather on the way [illegible], [illegible]."

In conclusion I must tell the story of the jovial captain who, one Christmas Day, dressed up as Santa Claus and presented toys to the children from the Christmas tree. The next day, when entering a congested West Indian port, the ship had the misfortune to run aground. A few hours later all preparations had been made ready for getting her off.

On the after deck, surrounded by a mass of bow-taunt wires and cables, deafened by the rattle and clatter of capstans and winches; half-blinded by smoke from the snorting tugs, with the tropic sun beating down on his bald head, stood the anxious captain, directing operations. At the critical moment, when the ship was [illegible] signs of moving, a little old lady clutching a tiny camera, picked her way daintily to the captain's side and said "Captain dear, [illegible] be kind enough to dress [illegible] again so I may take your photograph?"

Before the astonished captain could open his mouth two hefty sailors [illegible] the lady and carried her to a place of safety, so his replies remain unrecorded.

SHORTER VISITING HOURS SUGGESTED FOR HOSPITALS

Calgary, Nov. 29.—Hospital managers in convention here today were told if they curtail visiting hours their patients will get better faster and hospital efficiency will improve.

Dr. A. F. Anderson, medical superintendent, Royal Alexandra hospital, and Dr. R. T. Washburn, medical superintendent University Hospital, both of Edmonton recounted their observation to the meeting of the Alberta Municipals Association. Edmonton hospitals have reduced visiting hours.

Pastors and church workers who patted children on the head, were cited as possible infection spreaders. Another source of trouble it was said, was rooted in the envy of patients who had few visitors for those who had many.

TWO MONDAYS PROCLAIMED LEGAL HOLIDAYS

Ottawa, Nov 29.—The two Mondays immediately following Christmas and New Year's Day, December 26 and Jan. 2 next, will be legal holidays in all the provinces of Canada according to statute.

BANK OF MONTREAL

Established 1817

A presentation, in easily understandable form, of the Bank's

CANADIAN NATIONAL

THE WORLD OF WHEAT

By H. G. L. Strange, Director "The Crop Testing Plan."

The Trade Treaties just signed by Great Britain, United States and Canada constitute a new policy of great importance to Canadian farmers.

The goods farmers buy will be slightly lowered in price. Cattlemen will have the oportunity of exporting annually about three million dollars' worth more of stock, and there will be a slightly increased export, too, of certain agricultural products other than wheat.

The six cent preference; that beneficial protection enjoyed by Canadian wheat, has been eliminated, but our farmers have cheerfully given this up, for now wheat growers can approach the Government, figuratively with clean economic hands, and say "You have made a splendid start in lowering tariffs; carry on with the good work. Lower the tariffs now against the goods of European countries so that foreign people can can sell more of their goods and commodities to Canada, and so be enabled to purchase more of our wheat."

I am forced myself to the conclusion that lower tariffs form the only practical means by which Prairie farmers can sell that quantity of wheat which they must, I believe, produce each year in order to maintain their very economic existence.

Lower tariffs, too, would certainly promote the cause of world peace, and so would decrease the necessity for costly re-arming for war.

Following factors have tended to raise price: Indian crops need rain; consequent possibility of acreage reduction and considerable imports. Russian winter wheat unfavorable owing to ice formation and dry soil. Colder European weather expected to increase wheat consumption; India again buys Australian wheat. Argentine corn quality only mediocre; Decrease in banana shipments from Jamaica.

Following factors have tended to lower price: India discontinues negotiations for Danubian wheat because of low quality; Persistent decline in value of British Pound Sterling; Six cent U.K. wheat preference repealed; Holland again raises import duties on cereals; Increase in 1938 world rye crop; Increase in wheat and barley production in Iraq.

"100 TEMPTING FISH RECIPIES"

The Department of Fisheries, Ottawa, has just released a most helpful and interesting booklet "100 Tempting Fish Recipes". The recipes are planned specifically for Canadian fish, and are tested by well known home economists. Interesting chapters on the food value, vitamin content, and the way to buy fish are also included. Most popular recipes in this book for every day use will be Canadian fish balls and Creamed Canadian Finnan Haddie. The recipe title is Hugger-in-Buff. You may learn how to make it by writing the Department of Fisheries, Ottawa, for your free copy of this booklet.

AN ENGLISH POLL OF RADIO OPINION

Critics of American radio who point with envy to the system in Great Britain where the British Broadcasting Corporation controls all [illegible] ested in the results of a Poll Taken by the Philco Radio & Television Corporation of Great Britian.

The Philco Poll was taken in order to determine the British listeners' favorite station. It covered [illegible] radio dealers and their customers in all parts of Britain as well as the general public with an approximate number reached of more than 500,000.

The results of this poll show that the British are far from satisfied with their own type of broadcasting. The station which placed first, drawing 6.6 per cent of votes as favored station, was Luxembourg, which is not in Britain or affiliated with the B.B.C. but is located on the Continent across the English Chanel and broadcasts sponsored programs American style. Second, was Athlone, in the Irish Free State and also a broadcaster of commercially sponsored programs.

Britain's premier station Droitwich scored only third, with other continental commercial stations grabbing the greatest majority of the places among the first ten on the popularity poll.

The poll seems to indicate that the British radio public prefers entertainment to education. It is interesting to note that Luxembourg, the most popular station, is difficult to tune in clearly for British radios and yet it achieved its tremendous vote in spite of this because it did offfer entertainment and showmanship.—Printer's Ink Monthly.

LOWER LIBRARY FEES

In an attempt to popularize the library of books in the Women's Institute Rooms, and to encourage more people to participate in the library privileges, it has been decided to set a nominal fee of twenty-five cents per year for those who wish to borrow books. Mrs. D. G. McCarthy is in charge of the library and either Mrs. McCarthy or some other lady will be in attendance each Saturday afternoon to issue books. There are many good books in the library and it is a pity that more people do not take advantage of it. It is open to country and town people alike.

—ELECTION CARD—

Dear Friends and Electors of sub-division No. 5 of the Holden School Division No. 17—

For the information of my many friends and supporters, I would like to say that the school districts voting in January 1939 are:—Anderson, Grand Forks, Solberg, Standard, Shaw, Amisk Creek, Lakeshore, Ingram, Lindbrook, Westlake, Bathgate, Unity, McKenzie, Ketchamoot, Spilsted and Woodlawn.

I would esteem it a favor if any supporters of mine living in any one of these districts, would recommend me to any of their friends in any of the other districts in sub-division No. 5, as in that way no elector will be overlooked and all electors will have a chance to cast their ballot.

I am known to many of you personally, so must let my reputation and character speak for themselves. I am an ex-teacher and have been secretary-treasurer of Solberg school for fifteen years. I have also worked on various women's (local, district and provincial) organizations; also on the executive of Ryley School Fair and Dodds Mutual Telephone Co., all of which varied experience, I think, tends to help me fill such a position as divisional trustee.

As a farmer's wife, mother, teacher and trustee, I have had practical experience of the problems, financial and otherwise, facing education in a rural school.

If I am elected, I will do my best to eliminate, at least, some of these difficulties and will work in the interests of the rural school, the local school board, the taxpayer and the child. I will endeavor to see that when the mill rate is increased, the school gets at least, increased services.

I will see that the local boards in sub-division 5 are consulted and co-operated with, so that as long as the larger unit is in force we, in sub-division No. 5, will all all work together harmoniously for the benefit of the child and his or her education.

I thank you for your co-operation and support.

Yours truly,
MABEL E. THORSLEY,
R.R. No. 3, Tofield, Alberta.

November 22nd, 1938.

INTERESTING MARKETING MEETING HELD

On Tuesday under the auspices of the Tofield U. F. A. a meeting was held at the Institute rooms at which the guest speaker was Mr. Brunsden. The purpose of the meeting was to dicuss possible marketing legislation. Mr. T. R. Murray occupied the chair and suitably introduced Mr. Brunsden.

Mr. Brunsden gave an excellent address dealing with co-operative marketing in Canada for quite a number of years. At the outset he said that the chief problem of the farmers was not political but economic. If we could solve the problem of equitable marketing we would make some progress. Some people believe the debt problem to be important but the debt problem is caused because the farm income is not large enough. Endeavors have been made during the past 30 years to bring about a better system of marketing, but during the past ten years much ground had been lost.

Mr. Brunsden then traced the cooperative maketing efforts over a period of years and showed a masterly knowledge of his subject.

As matters stand at present the producer has no bargaining power as regards selling. And many men felt the time had arrived to make representation to the government so that marketing legislation would be passed, which if favorably accepted would place bargaining power in the hands of the producer.

At the close of the address a general discussion took place which clarified some details concerning the address.

Mr. Brunsden was accorded a vote of thanks.

It was also decided to have a meeting of the U. F. A. in the near future and send a delegate to the forthcoming convention. The meeting will be called by the President, Mr. T. R. Murray.

STUDENTS' UNIONS CONCERT QUITE GOOD

The students' Unions concert held at the Variety Theatre, Friday and Saturday of last week was well attended and enjoyed by those who attended.

While the entire concert was of a high order the high light of the evening was the chorus by the girls of grades 7 to 12, under the leadership of Mr. Broughton. Another singing number, a quintet by five girls, was also exceptionally good. The tumbling acts by boys, tap dancing, numbers by the school orchestra, two comedy sketches, recitations and solos all went to make an exceptionally pleasant evening. The teaching staff and students are to be congratulated on heir fine preformance. J.W. Chapman occupied the chair.

STILL ANOTHER BUSINESS CHANGE

As we go to press we learn of still another business change. It is reported that Mr. J. Kallal of Holden have purchased the garage and building from Mr. Mike McCusker. Details of the deal are not at the moment available. Mr. McCusker has resided here for quite a number of years. We will give you further particulars next week.

BARDO

The Bardo Landies Aid held their annual meeting at the home of Mrs. Geo. Hendrickson on Thursday Nov. 24th. Officers elected for the coming year were: President, Mrs. Clarence Anderson; Secretary, Mrs. Arnold Steen and Treasurer, Mrs. A. Haukedahl. The Ladies' Aid donated Sixty dollars to different charities.

Tom Rorem, Geo. Hendrickson and H. Hillerud returned from their Moose-hunt last week, without any game. Due to fine weather and lack of snow which made poor hunting.

Rev. Hoverstein is holding his farewell services here on Christmas day at 11 a.m.

Martin Knutson conducted services here last Sunday, and the Y.P.S. held their meeting in the evening.

The Sunday school and choir are busy practising for their Christmas Concert.

Bardo and Grand Forks schools are busy preparing for their school Concerts, no dates have been set.

Ivan Foshaug has bought an Essex Sedan a 28 model.

Gilbert Foshaug is working at the Gabrielson home near Holden.

Mr. and Mrs. A. Kindley entertained the Young People at a skating party last Saturday night. Lunch was served after skating.

Buddy Steen is taking a correspondence course in Diesel engineering with the National Schools at Los Angeles.

Edna Steen is in the City spending a few days.

Bennie Anderson attended the C. C. F. convention at Mundare last week.

SCHOOL BOY BURNED AT RYLEY REHEARSAL

RYLEY, Dec. 7.—Arol Solberg, 12 was painfully burned Tuesday when the suit he was wearing caught fire as he passed by a gas radiant. The teacher, E. R. Stauffer, received burns about the hands when he tried to beat out the flames that enveloped the child. The boy was one of a group of children in a home here practising for the school Christmas concert.

We regret to announce that the burns received by the young Solberg lad proved fatal.

LIBERAL CONVENTION HELD AT MUNDARE

The Vegreville Liberal Assn. held their constituency convention at Mundare on Friday last at which deegates from various polling divisions were present. Delegates from Tofield included Messrs. J. Rogers, Henry Haber, John Law and A. J. H. McCauley.

The candidate chosen to contest the next provincial election was Dr. Archer of Lamont. Dr. Archer is well known throughout the constituency and should be a very popular candidate.

LOCAL & PERSONAL

Helen McCauley, Gwen Firth visited at home for the week end.

Ben Hobson spent the week-end at the Munroe home.

Muriel Malcolm spent the week-end in Edmonton.

Lois Thompson spent Saturday in Edmonton.

Rev Mr Teape's sister visited here over the week-end.

Wes Taylor is working in Edmonton for a few days.

Mr and Mrs. Abbott spent Sunday in Edberg visiting Mr. and Mrs. Brady.

Jessie Munroe spent a few days in Edmonton last week.

Messrs. Dr. Law and A. A. Beirnes returned from a trip to the United States this week. Dr. Law spent most of the time at Rochester, Min., and Mr. Beirnes took the opportunity of visiting his brother at Lincoln, Nebraska. They travelled mostly by auto and report a very pleasant trip.

Holy Trinity W A are holding their Annual Bazaar in the Institute Rooms on Saturday, December 10th. Tea from 3:30 onwards.

Born.—To Mr. and Mrs. Russell Ferguson, at Lamont hospital, on Friday, December 2nd, a son.

Born.—To Mr. and Mrs. Charles Nashman, of Kingman, on Sunday, November 27th, a daughter.

TWO OLD TIME FAMILIES TO LEAVE

A business change of interest which will bring about the departure from Tofield, for Grand Prairie of old timer families from this district took place this week.

T. Schultz sold his pool room business and building to E. Kallal of Tofield, Mr. Kallal taking over the business on Tuesday. Mr. Schultz has purchased a pool room, rooming house and barber shop at Grand Prairie and left on Thursday to take over his new holdings. Mr. Oliver Letourneau is connected with Mr. Schultz in this business and left with him but will return in a short time to attend Court of Revision which is dated for the 16th and council meeting which is dated for the 17th.

With the departure from Tofield of Mr. and Mrs. Schultz the district loses two real old-timers. Mr. Schultz came to the district in 1901 and Mrs. Schultz in 1903. In 1904 Mr. Schultz homesteaded on what is now the Bigland farm.

Both Mr. and Mrs. O. Letourneau have resided here for many years, Mr. Letourneau since 1892. Mrs. Letourneau since 1905.

In addition to the above mentioned business change Walter Shultz will take over a pool room at Sexsmith.

Next time a lawyer says how hard he works, he should be reminded of Clarance Darrow, the American criminal lawyer who died recently.

Asked to what he owed his success, he answered: "Hard work." His first job was on a farm. After two days he threw in his hand. "I swore I'd never do another day of hard work in my life," he said, "and I never have."

THE PLAY
"MR. BOB"
A LAUGH PROVOKING COMEDY WILL BE STAGED IN THE
Variety Theatre
Friday & Saturday Dec. 16-17
The following is the cast:
Miss Stewart; Miss McCrea; Mrs. Patterson; Miss Pyle; Mr. McLeay; Mr. Schultz; Mr. W. B. Worton.

New Ford Cars Now On Display

Acclaimed from coast to coast as the finest Ford cars in the history of Ford Motor Company of Canada, Limited, the 1939 Ford V-8 and De-Luxe Ford V-8 are now on display.

Introduced in the Ford-Lincoln line is the Mercury 8, newest car in motordom and centre of interest at the motor shows. The Mercury is a big car distinguished by modern streamlined styling. Its design bears a certain family resemblance to the Lincoln-Zephyr, acknowledged style-leader in the industry.

Ford, Mercury and Lincoln-Zephyr cars are all equipped with hydraulic brakes. All offer refinements in design and many mechanical advances and improvements.

The DeLuxe Ford V-8, with wholly new streamlines, has a distinctive appearance of its own. At the same time, both it and the Ford V-8 share a family likeness with the Lincoln-Zephyr and the new Mercury 8.

The DeLuxe has a deep hood with long lines unbroken by louvres, low radiator grille in bright metal, and wide spaced head lamps set into the fenders. It is powered by an 85 horsepower V-8 engine of even more rugged construction than the 5,000,000 already in use.

Hydraulic brakes are precision built to meet strict Ford standards of safety. Pedal action is exceptionally easy, and the brake shoes work in 12-inch drums with a total of 162 square inches of braking lining for quick stopping and long life.

A feature of the bodies of both the Ford V-8 and DeLuxe Ford V-8 cars is their silence, achieved as a result of exhaustive road and laboratory research into the cause and correction of car noises. By minor changes in design and by use of newly-developed insulating materials, engine and road noises are effectively kept out of the car. Interiors are comfortable, convenient and smartly upholstered and equipped.

The Ford V-8 for 1939 has a full grille and unobstrusive louvres at the rear of the hood sides. Headlamps are recessed into the fenders. Decorative touches include a radiator grille ornament which incorporates a compact hood latch and handle.

Both the new Fords have the modern gauges, glove compartment, grille for radio speaker installation, cigar lighter, ash tray, choke, throttle and other controls well grouped on newly-designed instrument panels. Both have headlight beam control operated at the touch of a toe and a beam indicator on the panel. Both have a new instrument that shows at a glance the condition of the battery. The parking brake lever, which actuates the brake shoes in the rear wheels by means of steel cables, is under the instrument panel to the left. Drivers seats are adjustable in all body types. DeLuxe cars are equipped with two sun visors, the Ford V-8 with one. Both have dual windshield wipers with a single controls and twin electric air horns.

Both in size and price range the Mercury takes its place between the DeLuxe Ford V-8 and LincolnZephyr V-12. It is a big car and a powerful one, powered by a V-type 95 horsepower engine. The wheelbase is 116 inches and the overall length just over 16 feet. Brakes are hydraulic.

All four body types available on the Mercury 8 chassis are extra wide, and seat three persons comfortably in front and rear seats. The body types are a town-sedan, a sedan, a sedan-coupe, and a sport convertible.

Wide visibility for drivers and passengers result from low belt and cowl lines. The running boards are narrow and the space gained is utilized inside the body which is widest at seat level. The interior spaciousness and the unusual luggage capacity were achieved without excessive body overhang, as the result of able designing.

The body interiors are quiet as well as roomy. With the windows closed passengers can converse without raising their voices even at high road speeds. Months of tests on the road and in the laboratory preceded this effective sound insulation.

The exterior beauty of the car is matched by the distinction of the interior styling. The tilted instrument panel, the steering column support and the two-spoke steering wheel are typical of the car's originality of design. The tilt of the panel permits the instruments to be read easily. The curve of the steering wheel rim is repeated in the long arc of the 100-mile speedometer dial, directly in front of the driver. Around it are grouped the gauges, including a new battery condition indicator.

In the choice of appointments and in interior tailoring, several new ideas are carried out. The cushions are in panelled and piping treatment and the upholstery in the three closed cars is either broadcloth or Bedford cord, in taupe-color. The seat backs and seat cushions in the sport convertible are genuine hand-buffed leather. Cushions are exceptionally deep and comfortable. In all body types, the front seat is adjustable.

Cold Turkey Deserves Conserve

By Frances Lee Barton

When the remains of the once noble turkey appear on the dinner table the day after Christmas, it's just as well to have a cullinary surprise up your sleeve. For while cold turkey is very good,indeed, its appearance will be not unexpected! So instead of a dish of cranberry sauce flanking the turkey, why not introduce cranberries in the form of a conserve? This conserve is so easy to make, by the modern short boil method and bottled fruit pectin. You'll get about 12 glass from only a few pounds of fruit — enough conserve to last you right into the New Year.

Cranberry Conserve

7 1-2 cups (3 1-2 lbs.) prepared fruit; 3½ cups (2 lbs. 6 oz.) sugar; ½ bottle fruit pectin; 1 cup chopped seeded rasins.

To prepare fruit add 4 cups water to about 2 pounds fully ripe cranberries. Bring to a boil, cover and simmer 10 minutes. Sieve pulp for jam if desired. Add 1 cup chopped seeded rasins.

Measure sugar and prepare fruit into large kettle, filling up last cup with water if necessary. Mix well and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard one minute. Remove from fire and stir in fruit pectin. Skim; pour quickly. Paraffin hot jam at once. Makes about 12 glasses (6 fluid ounces each).

The Essential Factors In The Production Of Winter Eggs in South-Western Saskatchewan

(Experimental Farm News)

The important points in building up a flock of winter layers are: (1) good breeding, (2) thorough culling (3) proper housing and (4) balanced feeding, states R. M. Blakely, Dominion Experimental Station, Swift Current, Saskatchewan.

Culling should commence at hatching time and should be rigidly carried out throughout the summer. Only well matured, vigorous birds which show some signs of developing into good layers should be placed in winter quarters.

Housing

Sufficient lighting, freedom from draughts and proper ventilation to ensure a dry atmosphere are the essentials of good housing. The window area should be large enough to admit the greatest amount of light during the short-day period. A good arrangement is to have a row of windows the full length of the house. Two-thirds of these can have cotton on the outside and all have sashes, hinged at the top, on the inside. All sashes should be raised and hooked to the ceiling as often as possible to admit fresh air and sunshine. Only during very severe weather should all sashes be closed during the day. A straw loft above a false ceiling aids in removing excess moisture which is given off by the respiration of the birds. The false ceiling may be of slatted board, page wire or an old steel gate. The gathering of frost on the walls and ceiling is an indication that the house is too damp.

Drinking pan tands and mash hoppers should be raised above the floor level and dropping boards provided so that the birds can have full use of all floor space.

Feeding for Winter Eggs

Home grown grains will form the basis for any farm poultry ration. More than one kind should be provided so that there is variety and a choice. Tests have definitely shown that where the grains are fed approximately 50 per cent as a scratch and 50 per cent as a mixture of ground grains higher production will result. Dry mash hoppers can easily be made from good boxes.

The Dry Mash

Wheat, oats and barley, in approximately equal quantities by measure, will form the main basis of the dry mash. Recent tests at the Dominion Experimental Station, Swift Current, Sask., would indicate that up to one-third of the wheat can be replaced by rye, in the dry mash, with no ill effects. This is important where rye the drought years. It is a well understood fact that an egg is an almost may be more plentiful than wheat in perfectly balanced food containing the proper proportions of minerals, proteins, etc. It follows then that if the body mechanism of the hen is to produce any number of eggs, the diet of the hen must contain the proper balance of ingreients necessary to build the eggs. For this reason it is necessary to provide some supplements to the grain ration in the form of meat scraps, green feed and oyster shell. When this isn't done, the birds tend to become too fat from the unbalanced grain ration. Beef scraps can be purchased commercially but table scraps, skinned rabbits and the odds and ends from butchering can be made to take their place especially if milk is available. Young sweet clover and alfalfa hay, if soaked in warm water, are excellent sources of green feed. Legume leaves swept from the loft floor are ideal for this purpose.

Dry mash, water or milk and grit should be available at all times. Scratch grain is usually fed early in the morning and again in late afternoon. The hot mash at mid-day may consist of the table scraps and cooked small vegetables mixed to a crumbly consistency with dry mash from the hopper. From four to six tablespoons of cod liver oil per hundred birds can be mixed with this wet mash. This aids in keeping the birds in good health. More complete rations and additional information can be secured from your nearest Agricultural College or Experimental Station.

I Want My Son To Be A Farmer

(From O. E. Baker of the U.S. Dept of Agriculture)

I have a son now six years old, and I hope when he grows up that he will decide to be a farmer. We also have three daughters, and we hope that when they grow up they will marry farmers. It is not because I think farmers & farm women in the future are going to become rich and have an easy life, although I look for some improvement the next ten or twenty years.

I want our boy to be a farmer and live in what is called an hereditary home, to which his sisters can return in times of depression, should they marry city men, because:

1. The farmer has more and better food to eat than most city people, and in times of depression he is more certain of a livelihood — if he has not mortaged the farm.

2. The farmer has better health than city men and lives longer - about five years longer, according to a recent study of a Life Insurance company.

3. The farmer accumulates more property—becomes a wealthier man than the average city person. This may not be true in the South. It is true in the North because of the millions of city people have almost no property at all—except an automobile. Wealth in the city is probably four or five times more concentrated than in the rural territory.

4. The farmer is more likely to enjoy his work than most city people. Most city work is monotonous—tending a machine in a factory, operating a typewriter, standing behind a counter in a retail store hour after hour.

The farmer is more likely to rear a family and do his part to promote the welfare of the nation and the race. The family is becoming smaller and weaker in the cities. Only two-thirds enough children are now being born in our cities to maintain their population permanently.

The conditions of living and the philosophy of life in the cities tend towards extinction. The rural philosophy of life with its recognition of the family as the fundamental economic as well as social institution, tends towards survival. The urban philosophy is ephemeral; the rural philosophy of life is eternal—derived from experience of the race down through the ages. A civilization to be permanent must be based primarily on agriculture, or on some other culture in which the family is the economic unit.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "The Crop Testing Plan."

"I guess I won't buy any Thatcher, Renown or Apex just yet," said a farmer friend the other day."I'll wait and get some of these new varieties 975 and 1097. I hear they will be better."

Many farmers in rust areas are thinking this way.

The Government has announced that two new rust-resistant varieties — No. 975 and No. 1097 — which have been produced by the Rust Research Laboratory, Winnipeg, are now being tested in Great Britain for milling and baking quality.

No doubt if either or both of these should prove superior to the existing rust-resistant sorts then they will be named, licensed for use, and distributed to farmers.

There is, however, I understand, but a relatively small quantity of seed available, so there could not possibly be more than a very few bushels to be given to each farmer.

Under these circumstances I advised my friend to secure as early as possible sufficient of the rust-resistand varieties that are now available, that is either Thatcher, Renown or Apex, and to apply to the Department of Agriculture at Ottawa for a small quantity of the new varieties; then to sow the new variety, either 975 or 1097, next spring on a small piece of nice clean summerfallow.

Following factors have tended to raise price:- Rains still badly needed; China purchasing American wheat; Floating corn stocks only half the amount of year ago; Insufficient moisture with prospects below average in Poland; Switzerland buys Canadian wheat; Frosts damage Argentine grapes; Subnormal German apple harvest.

Following factors have tended to lower price:- Argentine crop prospects still highly satisfactory; Germany said to have one of the greatest grain harvests in history; Winter wheat acreage increased or maintained in the Balkans; British buyers indifferent to American wheat; Large arrivals of Balkan corn at shipping points.

Bank Of Montreal Reports Progress With Business

Annual Statement Reflects Expansion of Industrial and Commercial Activities — Increase in Earnings Absorbed by Higher Taxation — Assets of $874,255,828 at High Mark Since 1929 — Current Loans Increase $22,942,637 and Deposits $45,357,839 — Quickly Available Resources 77.90 per cent of All Liabilities to the Public

Continued progress is revealed by the 121st annual statement of the Bank of Montreal for the period ending October 31, now being distributed to shareholders. In addition to growth in current loans, deposits show a substantial increase; the cash position of the Bank is stronger; the liquid position is well maintained and the total assets of $874,255,828 are at the highest point since 1929. Profits show some contraction but would have been above the level of previous year had it not been for the greater amount required in Dominion and Provincial Government taxes.

Deposits, at a total of $763,156,945, are higher by $45,357,839. There is some reduction in the notes of the Bank in circulation, in keeping with the curtailment in the bank circulations following upon the greater precentage of Bank of Canada notes now being used through the country. In addition to the expansion of current loans to business and industry, including loans to provincial and municipal governments and school districts by $22,942,637 to a total of $227,703,449, the Bank's cash resources of $132,540,092 show an increase of $17,929,772, and there is a further growth of $3,354,995 in holdings of the government bonds and other debentures, such investments, the greater portion of which consists of gilt edged securities which mature at early dates, now totaling $440,736,820.

Strong Liquid Position

Call loans outside of Canada at $21,493,005 are higher by $1, 614,061, and call loans in Canada at $5, 374,-080 lower by $1,482,720. Other items among the Banks investments include $159,051 in industrial and other stocks, and this small amount is $126,583 less than a year ago. Figures representing letters of credit and other banking operations are comparatively little changed. Of the total assets of $874,255,828, the quickly available resources total $620,335,119, which is equal to 77.90 per cent of all liabilities to the public.

The year's net earnings, after making appropriations to the contingent reserve fund — out of which fund full provision for bad and doubtful debts has been made — and after deducting Dominion and Provincial Government taxes, were well maintained. While the profits of $3,398,390 are $9,937 less than for the preceding year, the government taxes referred to increased by $260,660. The profits were equivalent to 4.46 per cent on the capital, rest and undivided profits, which compares with 4.47 per cent for the preceding year. The usual dividends were paid and, after appropriating $500,-000 — an increase of $100,000 — for bank premises, a surplus of $18,790 was carried forward, to increase the balance of profit and loss to $1,183,254.

Ducks Unlimited Reinforces Campaign

Year after year, the provincial governments of the West have sponsored campaigns to bring crows, magpies and other pests under control for the benefit of the farmers; and for the protection of useful game and song birds. Sportsmen, through their Fish and Game Associations, have cooperated energetically. School children have been most effective in collecting and destroying eggs. Despite persistant campaigns to control these black marauders, however, crows and magpies increase their numbers —and extend the range of their criminal activities.

This year, the campaign in each western province was reinforced by Ducks Unlimited (Canada). The purpose of Ducks Unlimited is to restore our wild duck population. Crows and magpies take heavy toll of ducks, particularly through the nesting season when untold thousands of ducklings and eggs fall prey to the voracious appetites of these deadly predators. Our wild duck population can be restored only if crows and magpies are brought under effective control. Therefore, Ducks Unlimited (Canada) contributed $3,100.00 to the amounts invested by provincial governments and Game Protective Leagues in Predator control campaigns.

The joint campaign has been fairly successful. Activities stimulated by the Ducks Unlimited contribution accounted for some 47,000 crows and magpies; and over 8,000 eggs. Every killer so disposed of, meant a great number of useful and enjoyable birds left alive. It is estimated, for instance, that the campaign saved 1,-500,000 ducks.

Sixteen Fish and Game Associations, 112 individual hunters, and pupils of 31 schools shared in the Ducks Unlimited awards. Additional hundreds earned substantial bounties provided by provincial governments and Game Leagues; or will participate in prize money still to be distributed.

In Alberta, Ducks Unlimited placed $1,300.00 in the hands of three trustees—Leonard E. Wise, Edmonton, president of the Alberta Fish and Game Association; Wm. Fisher, Calgary, representative of the Alberta Association on the Western Wildlife Council; and Geo. Spargo, Edmonton, Director of Fisheries.

Under the able leadership of this energetic committee, 12 Alberta Fish and Game Associations took an active part in the campaign; and accounted for 27,000 of the 47,000 crows and magpies reported.

Heavy Traffic

A car puffed laboriously along the muddy country road. Finally the driver became discouraged when the boughs of overhanging trees threatened to stop his car. He saw a rustic and said to him, "You don't have many cars along this way do you?"

The man took plenty of time before he replied, "Certainly we do. What about it?"

"How many have come past lately?" the driver asked.

"Well," replied the rustic, "there was one last year, and two the year before—and now you're here."—Washington Star.

MARKETING LEGISLATION—

THE ADDRESS at Tofield on Tuesday by Mr. Brunsden was deserving of a larger audience. He is an entertaining speaker and knew his subject. While most of his address was of a retrospective nature, tracing the course of co-operative marketing movements for some years past, he also had something to say regarding the present. He felt that the co-operative marketing movement should go forward slowly but surely, that guidance could be taken from past mistakes and that hogs would be the best thing to start with.

The object of Marketing Legislation is better prices for the producer. To attempt to attain this end, roughly, the following is proposed.

(1)—That the Alberta legislature pass a marketing act similar to the Marketing Act of British Columbia. This Act would call for the establishment of separate areas. Within these areas a plebiscite would be taken to find out if the people wanted this kind of marketing.

(2)—If seventy per cent of those voting were in favor of the scheme, a Board would be formed which would deal with the buyers with the object of obtaining the best possible price. All shippers of the product covered by the Board within that area would be compelled to sell according to regulations laid down by the Board.

Paradoxically both the strength and the weakness of the scheme lay in the democratic aspect of it. It would be foolish to try and compell shippers to abide by Board rulings without a majority ballot. Yet if one area voted for it and an adjoining area voted against it, the area deciding against the plan would weaken the hands of the board concerned with the area that approved. Size of areas would of course exert some influence as regards this.

We feel the scheme has merit and properly managed could prove profitable to not only the seller but the buyer also. The Board for any given product would have to be composed of very able and experienced men. And if they were able and experienced men they would know that all marketing problems do not lay with the producer. So they would take note of the buyers' problems at the same time seeing to it that the sellers' interests were not sacrificed to the profit of the buyer.

It will likely be some time before any real tangible results come of the present movement. But it would be wise for farmers to acquaint themselves regarding the plan and if they approve of it, express themselves accordingly. By this means they are most likely to hasten legislative action.

THE FUNNY PAPERS—

THE PRESENT generation is living in strenuous times. Old time records go to show that earlier generations had their problems also. But what with the unemployment problem, war problem, tariff problem, racial persecution problem, wheat problem and numerous others, present day newspaper reading is inclined to be gloomy. A sort of continual groping for light, which, while known to be in existence, never fully appears.

One ray of light (and here we can make a pun) which is taken lightly, is the continuous appearance of the "funnies". Designed and published chiefly for children, we would venture to say, few adults pass up this section of their favorite paper. Who does not know Jiggs, Maggie, Popeye, Wimpy, Olive Oyl, The Willets, Mutt and Jeff, Major and Martha Hoople, Chief Wahoo, Tillie the Toiler and Mac, Katzanjammer Kids, and numerous others. We are reminded of this actual happening that occurred in a small town some years ago. One man asked another; "Have you seen the Journal lately?" The other man thinking that the inquirer wanted some information on the important news of that day, replied, "Yes, why do you ask?" The other replied "Oh, I just wondered how Mr. and Mrs. were getting along." While this incident is true enough, it does go to extremes. But the fact remains that the antics of the characters of the funnies afford not only amusement to children, but serve as a gloom chaser for adults.

So well do we get to know these characters that we almost look upon them as creatures of flesh and blood. And more than that out of the different characters appearing daily and weekly, different people chose different favorites. Our first choice goes to Martha Hoople, but we can readily understand that others might prefer Popeye or Andrew Gump while again Jiggs, Maggie, The Captain and one of the other characters may have their particular boosters.

Wholesome, yet rich comedy is not easy to produce. Vulgar comedy and comedy with a sting is not so difficult. So it is gratifying to note that the better known comics are quite clean and often quite clever. Occasionally one reads of the originator of one of these comic strips passing on as in the case of the originator of Popeye, a few weeks ago. But the characters the original artist created live on and on, subject to the whims of fashion and the changes of time. And who can tell but that the originator of a really good comic strip leaves as much happiness bestowed on humanity as some of the generals, admirals and statesmen whose names adorn the hall of fame.

May Urge Lower Gasoline Prices

This week the royal commission appointed by the Alberta government to investigate conservation and marketing problems and to recommend what should be the retail price of gasoline and fuel oil in this province, resumes its sittings in Calgary.

Sessions of this committee are regarded as of primary importance to all motor vehicle operators whose problems include those of fuel prices and consumption.

When it is noted that British Columbia is taking vigorous steps to reduce the price of gasoline, there is been interest in the investigation being made in Alberta.

Public confidence has been expressed in the personnel of the royal commision, headed by Mr. Justice McGillivray, with Major L. R. Lipsett as his colleague on the the two-member board.

Preliminary investigations have been made and it is anticipated that some of the most important evidence for the inquiry will be submitted this week.

The Alberta Motor Association, which has made strong representations as to the need of lower gasoline prices in this province, probably will make a submission to the commission.

Serve Canadian Finnan Haddie For Breakfast

With a good breakfast, the family steps out into the brisk wintry air with a smile and "Isn't this a grand day!" feeling. This Canadian Finnan Haddie is an ideal breakfast because it's nourishing, delicious and easy to prepare. And it's really a great help to a busy mother on the days when the family straggle down to breakfast and the children have to be bundled into snow suits and mittens, because it keeps at the right serving temperature in the oven. (What mother hasn't had to stop and sew a chewed thumb in a mitten, or help the youngest into galoshes! That's the time when a breakfast that "waits" without spoiling really counts!)

Here's the recipe. Try it to-morrow and serve it often!

Canadian Finnan Haddie In Milk

1 Canadian Finnan Haddie (about 2 lbs.)
1 cup water
1 cup milk (warmed)
2 tablespoons butter

Cover the fish with water and simmer until thoroughly heated. Drain and add one cup warm milk and two tablespoons of butter. Place in the oven to keep warm, but do not leave long enough for milk to curdle. (The fish is simmered in water because the smoked fish would curdle in milk at a high temperature.) Serve with a garnish of Canadian bacon curls. Serves 6.

With fruit, and hot cereal and a beverage, this Canadian Finnan Haddie is an ideal breakfast. Serve it with a vegetable and lyonnaise potatoes for a quick lunch and get added renown from your most important critics — your family!

Wheat Shipped From The Pas

The Pas., Man., Dec. 5.—Believed to be the first carload of wheat loaded locally, a freight car of the Canadian National Railways has been shipped to Churchill by Oscar Wirsig who farms along the Carrot River. The wheat is being stored at the nothern Manitoba port preparatory to shipment overseas in 1939. Flax grown by Mr. Wirsig on the same land has gone East and no flax was consigned north this year.

Mr. Wirsig has a previous claim to fame in that he grew what is believed to be the largest pumpkin in Manitoba this year. It measured more than two yards in circumference.

New Air Mail Stickers Tempt Souvenir Hunters

Winnipeg, Man. Dec. 5.- With the inauguration of the air mail on the Trans-Canada Air Lines, the Post Office Department began putting stickers on the Winnipeg letter boxes. The object was to make citizens air-conscious. They took to the idea so readily that they began taking the stickers for souvenirs.

The devices are circular, five inches in diameter, and show a white plane on a blue background. Nice souvenirs, but soon the public will be used to them, the Post Office hopes. When they are dry, they can't be removed.

United States Gets Turnips From Canada

With the approach of cold weather comes an increase in the consumption of turnips in the United States. A mild winter is reflected in a decrease in imports while a cold winter finds greater quanities entering principally from Canada, according to the Agricultural Department of the Canadian National Railways. Prince Edward Island and Ontario are the chief sources of supply while New York, Boston and Chicago are the principal markets. There is a very limited domestic production of turnips.

45 BADLY HURT AS PIT TRAIN CAREENS DOWN 10,000-FOOT SLOPE

SIDNEY MINES, N.S., Dec. 6.—Full extent of an underground tragedy that struck Princess colliery Tuesday began to unfold in a crowed hospital ward, where injuries proved fatal to five more miners, bringing to 1[illegible] the tentative toll of death.

Because of the crowed quarters and the large number of injured fatally when a mine train broke loose from its steel towline and hurtled to destruction down a 10,000-foot incline.

But 11 bodies brought up on improvised stretchers and more than two-score injured were carried to the open by rescue workers, who found bodies of injured men strewn with wreckage for more than a mile along the narrow railway shaft. Five of the injured died in hospital and were carried off to the morgue to await definite identification.

Just what happened no one could say definitely. But survivors, carried or dragged from the shaft, said the steel cable towline snapped about 1,000 feet from the last car. There was not even a split second hesitation as the cars, known to the miners as a "rake," shot downward. The train gained terrifying momentum as the jolting cars hurtled down the ten per cent grade. There was a horrible suspence. Then the crash.

Unaware of Tragedy

In the shaft house, the operator knew the cable had been released of its burden. But he was unaware of what lay at the bottom of the black pit. It was not until the hurriedly mobilized rescue squads were lowered down the slope that the extend of the tragedy was discovered. More than 200 men were believed to have been riding on the "rake" at the time. But none could tell in any detail exactly what happened. Some said the leading car jolted itself off the track and formed a wedge on which the others piled up in the narrow passage, only 11 feet in diameter. Others believed the train swaying wildly, jumped the track and smashed against an abutment causing the train of cars to snap like a cracked whip.

All 26 cars were piled up in one tangled mass, a mile and a quarter down," according to George Dywer, one of the first rescue workers to clamber down the slope.

"All the way I passed bodies," he said after returning to the surface. "They were strung out the whole mile and a quarter down. Some, maybe three or four, were still in the wreckage."

"It was Awful"

Cadell Nickolson, one of the survivors, could only repeat: "It was awful. Awful." He said: "There wasn't any jolt when the rope broke. We just burst into a terrific speed, maybe 60 miles an hour. I guessed what had happened and jumped off. Men were jumping off all around me. I saw some get killed and others hurt. There were lots killed, I think. It was awful."

Others told similar stories and first estimates of the dead reached as high as 30. But company officials said they believed 14 completed the death list.

Doctors and nurses were summoned from all neighboring towns, most of them other mining centres long acquainted with such disasters. They were lined front of the big crowd which kept growing as the news spread deeper into the neighboring districts, and administered aid as rapidly as the injured were handed out on improvised strechers.

Scores of women, standing on tiptoe ot see over the crowd, watched the shafthead for the appearance of each survivor. But hardly a word was spoken. There would be a slight shuffle as a woman, generally accompanied by her children, would make her way of the front to greet a man who had escaped death by a chance of luck. Then there would be a brief embrace, a tear or two and the survivor and his family would disappear into the throng.

THE AMAZING "DR. CLITTERHOUSE" FOR TUESDAY

On Tuesday next in a long list of outstanding shows Sharp's Shows presents, "The Amazing Dr. Clitterhouse". If you like surprises, if you like thrills, if you like breathtaking incidents, if you like virile drama topped off with soul stirring romance—you will like this picture. By day he cures the rich, by night he robs them. As scientist, gangster, lover, Dr. Clitterhouse is a never to be forgotten character. His escapes will fill you with wonder.

There will also be the usual modern comedy feature and also the popular up-to-date newsreel.

Show starts at 8:30 p.m. Usual admission.

Sunday, December 11th
Lakeshore, 11:00 a.m.
Ketchamoot, 2:30 p.m.
Tofield, 7:30 p.m.
Sunday school, 11:00 a.m.

The Young People's executive, W. B. Worton, Pres.; Mrs. C. Patterson, vice-president; Mrs. Joy McDonald, Treasurer; Miss Mary Burnett, Secretary; has drawn up a very interesting series for the Sunday evening gatherings. Last Sunday, after the evening services the first meeting was held. Everyone, was enthusiastic about the idea of the Sunday evening venture and freely discussed how to make them bright, interesting and profitable. There will be sing songs, live missionary items, short addresses by some of the citizens on live topics.

The next meeting is to be held after the evening service on Sunday the 18th inst. Mr. J. W. Chapman will be the guest speaker.

On Sunday evening December 18th, the senior choir will render Christmas music. As members of the choir expect to be away for Christmas holidays, the choir has kindly consented to do this.

On Sunday, December 25th, Christmas Sunday, the Junior Choir is preparing suitable bright and Christmas music for the evening service.

We should be thinking of the large work of the Church as we think of giving. Remember the Missionary Maintenance Fund and thus help the Church "Win the World for Christ."

HOLY TRINITY, TOFIELD

L.C.C. NEWS

The November meeting of the L.C.C. was held at the home of Miss Morden with eighteen members and six visitors present. The visitors were, Mrs. Geneski, Miss Lisslmore, Mrs. Lancaster, Mrs. Forman, Mrs. Chevraux and Mrs. McKenzie.

The roll call was answered by the drawing of the names for the Xmas tree, for members and husbands only, to be held instead of the regular meeting on Wednesday December 28th.

The returns from the tickets, sold on the wool comforter to be raffled in aid of the community hall, was handed in to the treasurer. The L.C.C. are holding a dance in the Lindbrook school on Wednesday December 14th and during the evening the draw for the comforter will be made. The proceeds from the dance will go towards the hall.

The meeting adjourned at four o'clock after which a lovely lunch was served by our hostess, Miss Morden. All departed at five o'clock reporting a pleasant afternoon.

The January meeting will be held at Mrs. Scott's, assisted by Mrs. Evans. The roll call to be answered by "When and Where I met friend husband."

Visitors welcome.

LOCAL & PERSONAL

Blake Clutterham who has been working at Edmonton is now assisting at the Post Office.

Alvin Schultz who is attending the Agricultural school at Vermilion was home for the week end.

Miss Ella Taylor who is a nurse at the Royal Alexandra Hospital, Edmonton, was home for the week end.

Wes Taylor who is working on construction work at Edmonton was home for the week end.

Miss Loretta Ross spent the week end in the city.

Mary Burnett spent two days in Edmonton this week.

A. J. Machtmes visited home folks at Strome on Sunday.

Nurse Baptist is away on holidays. Mrs. Preston is relieving her at Dr. Law's office.

Court of Revision will be held at the Municipal hall on Friday of this week, followed by a regular council meeting on Saturday.

The Tofield Skating rink, under the management of Swinton Brothers opened on Wednesday. The ice was good but due to the weather, a little soft. Colder weather is needed before the rink can function steadily.

Geo. B. Brace was a city visitor Thursday of this week.

We are going to have Mr. Mike McCusker with us for a while yet. Last week he sold his garage to Joe Kallal of Holden. But we understand Mr. McCusker will move to other property in Tofield and continue to reside here in a retired capacity.

Tom Wallington has put in his annual Yuletide decorative work. He has placed Xmas trees around town and is now busy serving private parties with trees for home decoration.

For some time now the streets have been very icy and pedestrians and horses have quite a time navigating around town. The other morning one horse of a team fell down at the intersection near Taylor's, but regained its feet by the aid of the teamster.

John Snell is home after working in Edmonton on the C.N.R. B.B. outfit.

The T. Schultz family left Tofield for Grande Prairie on Thursday last. Mr. and Mrs. T. Schultz will reside at Grande Prairie and Walter at Sexsmith. They will both operate pool rooms.

Quite a number of families in town have had members suffering from flu and kindred ailments. The Ed. Kallal family, Mrs. Schmaltz and a number of others. They are all in varying stages of convalescence.

A ladies curling club meeting was held this week when plans for this season's curling activities were discussed, Six rinks are expected to play during the season.

NOTICE:—Ladies kindly make your Christmas appointments early to avoid disappointment.— Esther's Beauty Shoppe.

AMISK CREEK

Our deepest sympathy is extended to Mr. and Mrs. N. Solberg and family and also to Mr. and Mrs. E. Anderson and family in their recent sad bereavement.

The ladies' Aid held their annual meeting on November 22nd at Mrs. I. C. Olson's home. Mr. Knudson was present and he read the scripture. The secretary read the report which showed all the departments in good standing and some money was set aside to be sent to different points for Christmas charity. The annual election was held with Mrs. P. O. Flaaten as president; Mrs. I. C. Olson was re-elected Vice-President, and Mrs. C. Erickson re-elected Secretary-Treasurer. Mrs. J. Berild and daughter Gladys who were leaving for Sweden soon were presented with a small token from the Ladies' Aid and many good wishes for a safe journey. "God be With You 'Til We Meet Again" was then sang. No December meeting will be held. The January meeting will be held at Mrs. P. O. Flaaten's home.

Mr. and Mrs. R. O. Berg spent a week with their two daughters in Edmonton recently.

The Misses Magda and Hennie Annebo and Arthur motored to Camrose one day to visit with their sister Agnes. Agnes is cashier at the Red and White Store at Camrose.

Mrs. P. O. Flaaten took the bus to Viking and visited with her sister, Mrs. U. Garthee, who is a patient at the Viking hospital. She returned Monday morning.

The young people met at E. A. Moen's home one evening last week to arrange about program for the Christmas tree Concert.

Arthur Annebo visited the city the first part of last week.

Mr. and Mrs. R. O. Berg and Alice motored to Viking last Sunday to visit with Mrs. Berg's sister who is at the hospital quite ill.

Arthur Patterson and Frankie Bruha left by car Sunday morning for a two month visit to the coast.

The members of the telephone line here met recently at A. Patterson's home to complete the business for the year.

Seigurd Hanson is assisting with the work at the H. Brenneman farm.

Llyd and Arnold Berg and Mr. E. A. Moen motored to the city Tuesday morning.

As Christmas is now drawing near we take the opportunity to wish you all, Editor and staff, and all the readers of the Tofield Mercury, A MERRY CHRISTMAS AND A HAPPY NEW YEAR.

U.F.W.A. NOTES

The December meeting of the U.F.W.A. was held at the home of Mrs. S. Johnson with an attendance of 15 ladies, Mrs. I. C. Olson presiding. The main business was the appointing of delegates to the provincial convention at Calgary in January. Mrs. C. Erickson and Mrs. I. Cookson were elected to attend, with substitutes to act if these ladies were unable to make the trip.

The next meeting will be held on the 2nd Thursday in January, at the home of Mrs. Carlisle. When the new executive will take over the reins of office.

A cordial invitation is extended to all rural women to attend.

MYSTERY LIGHT NEAR CAMROSE NOT EXPLAINED

Camrose Dec. 10.- Reports of the recent appearance of a mysterious light in a cemetary at Esterhazy, Sask., has revived talk in this area of the mysterious light which "haunted" the Dinant district, seven miles north of here in 1920.

People now residing in Esterhazy, formerly of the Dinant district, report, in letters to friends here, that the light seen at Esterhazy is similar in behavior and size to the one seen in the Dinant district 18 years ago.

A satisfactory explanation of the nature and origin of a mysterious light at Dinant has never been accepted by farmers in the neighborhood. Oldtimers vouch for the genuineness and elusiveness of the light. They claim it was the size and shape of a football and appeared to originate near Bethlehem Church, a short distance north of Dinant proper.

It did not drift with the wind, but floated erratically, sometimes resting on fences and fence posts, or in trees. Many explanations were offered such as gas from a slough or a strange bird with phosphorescent qualities or the ghost of a murdered man.

O. Skogman of Dinant district, recalled an incident while driving home with a team and wagon. The strange ball of light seemed to balance on the wagon pole and frightened his team so badly that they pulled away from him and left him to walk home.

This is only one of the many residents who vouch for the reality of this strange light, which they claim appeared in 1920. No solution is offered for its disappearance.

Try To Exclude Orientals

VICTORIA, Dec. 12—B.C. legislature Friday went on record as opposed to Oriental immigration into B.C.

Dividing on a Liberal amendment to a Conservative motion which urged exclusion of Orientals through the dominion, the house adopted, 28-14, the amendment which put the legis. ture "on record as opposed to immigration of any Chinese or Japanese into British Columbia and commends the action of the provincial government in making representations to the Ottawa government to this end."

TOM UPHILL GETS SUR, PRISE OF HIS LIFE

VICTORIA, Dec. 10—Tom Uphill veteran Labor member for Fernie in the British Columbia legislature, was so surprised when the house approved his motion supporting hospital sweepstakes Friday he didn't realize what had happened.

Mr. Uphill called for a division on the motion after Mr. Speaker Norman Whittaker reversed an earlier decision and declared: "The ayes have it."

The motion put the legislature on record as favoring sweepstakes conducted either by the dominion or any provincial government with 25 per cent of the gross proceeds going to the benefit of hospitals.

The speaker at first said he thought the "noes" had it but reversed his ruling when a member on the government side disputed it.

3,000-MILE HITCH-HIKER QUEBEC-TO-COAST IS LOOKING FOR EMPLOYMENT

Vancouver, Dec. 10.—Roger Boisvert of Drummondville, Que., is looking for a job today after completing a 3,000-mile trip by foot and automobile from his home town to the Pacific coast.

The 18-year-old French-Canadian says he couldn't speak a word of English when he left Drummondville July 12 with his brother, Roland, who is twenty.

Now he can carry on a conversation in English—with only occasional references to the dictionary he carries for emergencies.

Roger and Roland walked all the way from Drummondville to Winnipeg, but by that time Roland had decided to return home, Roger continued alone.

By the time he had reached Regina he had decided walking was "a little too strenuous" and from there to Vancouver he accepted rides from motorists. The youth financed his trip by selling souvenier postcards and by working for a month on a farm near Lethbridge, Alta.

When he arrived here last night, Roger said he was impressed by the hospitality of western Canadians. He was never refused lodging and had no trouble obtaining "lifts", he said.

"If I don't get a job on a ship or in a logging camp, I'm going to write home for money and go back to Drummondville."

VANCOUVER PLANS TO BECOME GREAT OIL PORT, DEPENDING UPON ALBERTA

Vancouver, Dec. 10.—A survey of the Vancouver Board of Trade's Mining Bureau today visualized Vancouver as a great oil port, shipping products of Alberta oil fields as the port now handles the prairie grain.

The survey said Vancouver is the natural export outlet for Alberta oil, and claimed the western route should be favored over the "Less economic route eastward."

The survey was prepared by a special committee of the bureau. It said that regardless of whether Alberta oil moved to the coast by rail, way tank car or pipeline, it is logical to expect the bulk of the oil will move west ultimately.

"Whereas the pipeline or rail route to Vancouver must compete with low-cost water transportation, the all-pipe line-and-water, or railway-and-water route from Alberta to Ontario must compete with a 62-cents-per-barrel rate on the pipeline from the mid-continent field to Sarnia, Ont., and a presumably lower rate from the Illinios field to Sarnia," the survey said.

The committee did not recommend any specific schedule of rail rates on oil from Alberta to Vancouver, although it urged railroads should retain the traffic if at all possible.

HAYSTACK NEEDLE QUICKLY LOCATED

LOS ANGLES, Dec 10. — Joy reigned supreme in the household of Herman Pickman yesterday.

When a telephone man came around with the new directory, Jane Pickman gave him the old one. When Mamma Pickman heard about it she almost fainted. She had concealed $15 in bills in the old one.

She went to the old warehouse where the old directories were being stored. There were 10,000 of them, but Mamma Pickman started right in.

After searching only 123 books she found the $15.

Trade Follows Conquest

TRADE FOLLOWING CONQUEST HAS BEEN WRITTEN INTO HISTORY MANY TIMES. BUT REALLY, IN THIS DISTRICT AT LEAST THERE NEED BE NO MILITARY CONQUEST TO FOSTER TRADE.

QUITE OFTEN A SMALL CLASSIFIED ADVERTISEMENT WILL START IN MOTION FORCES WHICH RESULT IN BUSINESS BEING DONE. NOTHING IS TOO SMALL FOR A CLASSIFIED AD TO ATTEND TO. A HORSE, A COW, A PIECE OF MACHINERY, FURNITURE, OR ANYTHING AT ALL. YOU MAY HAVE IT, SOMEBODY MAY BE NEEDING IT WHO DOES NOT POSSESS IT. WHAT IS SIMPLER OR MORE ECONOMICAL THAN BRINGING BUYER AND SELLER TOGETHER THROUGH THE MEDIUM OF A CLASSIFIED AD.

THIS HAS BEEN DONE MANY TIMES BEFORE —IT CAN BE AND WILL BE DONE, MANY TIMES AGAIN.

THE MERCURY

Out To Old Aunt Mary's

Wasn't it pleasant, O brother mine,
Of youth—when the Saturday's chores
In those old days of lost sunshine
were through
And the "Sunday's wood" in the kitchen, too,
And we went visiting, "me and you",
Out to Old Aunt Mary's!

It all comes back so clear today!
Though I am bald and you are gray—
Out by the barn-lot, and down the lane,
We patter along in the dust again,
As light as the tips of the drops of the rain,
Out to Old Aunt Mary's!

We cross the pasture, and through the wood
Where the gray old snag of the poplar stood,
Where the hammering "red-heads" hopped away,
And the buzzard "raised" in the "clearing" sky
And lolled and circled, as we went by
Out to Old Aunt Mary's

And O my brother, so far away,
This is to tell you she waits to-day,
To welcome us:—Aunt Mary fell
Asleep this morning, whispering,
"Tell the boys to come!" And all is well
Out to Old Aunt Mary's.

—James Whitcomb Riley.

The Old Osprey Tree
(BY HELEN WELLS)

Over yonder near the town
A gnarled old spruce has fallen down
For years the Ospreys built their nest
On the top-most twigs where they could rest
And there be safe from foes below—
At the point where the echo meets the Bow.

It always was their home to them
And a welcome shade for fishermen
And folks who rowed to Rainy Bay
Saw the bent, old tree on a summer's day.
Now the forest king is lying low—
Just where the Echo greets the Bow.

Some of us who knew it well
Have bidden it a sad farewell,
We can but say "Brave Tree, well done!"
As it rests there in the wind and sun.
And the 'rayed nest lies where the waters flow
At the point where the Echo meets the Bow

We often rambled around the bend
But how we miss our ancient friend!
'Tis silent there on the grassy shore
Where the busy birds return no more,
And the sunset casts a sombre glow
Where the lonely Echo greets the Bow.

ENGAGEMENT RING BELONGS TO MAN UNTIL MARRIAGE

Chicago, Dec. 10.—A Chicago jury took a puzzler off Dan Cupid's hands yesterday.

The jury ruled, in superior court, that an engagement ring belongs to the man until marriage.

Henry P, Urbanus sued the Burns family for return of a diamond ring he had given to his fiancee in 1921. The fiancee, Loretta Burns, died in 1935, two weeks before the scheduled wedding.

Urbanus, since married to another, argued the ring was his property and not a part of Miss Burns estate, as her family alleged. The jury agreed with him, and awarded him $750, appraised value of the circlet.

31-46 YEARS' LIFE SEEN FOR OIL FIELD

CALGARY, Dec. 12 — Using a production basis of 15,000 barrels daily, Dr. B. B. Boatright of Houston, Texas, estimated the life of Turner Valley oil field at 31 to 46 years appearing before the McGillivray royal commission into the oil industry here Monday.

Members of a firm of petroleum and natural gas engineers, Dr. Boatright submitted figures estimating the reserves of naphtha, gasoline from "wet gas" and crude oil in the field, 45 miles southwest of Calgary, between 171,000,000 and 256,000,000 barrels.

Dr. Boatright was the first witness to be called as the commission composed of Mr. Justice McGillivray and Major L. R. Lipsett of Ardley, Alta., resumed its inquiry into price structure, production costs and to other phases of the industry. He was called by J. J. Frawley, K.C., Edmonton, counsel for the commission.

Estimate Reserves

Dr. Boatright estimated the gas area of the field as it is known at present at 10,000 acres. The oil area he estimated at another 10,000 acres with another area of 5,000 acres of potential oil area.

Economic Acts And Their Consequences

The wool growers of Australia recently noted that Italy and Germany were purchasing much less Australian wool than they used to do, and so the Australian Commissioner was sent to these countries to inquire into the reason of it all. In due course this commissioner reurned to Australia, called a meeting and asked the assembled wool men to examine the suit of clothes he was wearing. They decided it was fair quality. "It is made from German wood pulp" he informed them. He stated further in Italy suits equally as good were being made from Lanotol, which is an artificial wool made from skimmed milk.

"How shocking" said the assembled wool men. "Why are the Germans and Italians so inconsiderate of our wool growers' welfare that they are willing to use these poor substitutes?" "I inquired into that too", said the Commissioner, and they told me they had been driven unwillingly to the use of these poorer quality home-produced substitutes because Australia had raised her tariffs against German and Italian goods; for these high tariffs, the Commissioner explained, had naturally brought about a decline in the quanity of German and italian goods that could be sold to Australia, so a decline in the amount of Australian pounds these foreign countries could secure, and finally, therefore, with less Australian pounds at their disposal, Germany and Italy could accordingly buy less Australian wool.

The only remark one can make about this most excellent and true story—which compares vividly with examples related to us by the great economist Adam Smith—is that economic chickens in the long run certainly come home to roost. —(Searle Grain Company, Ltd.)

CANADIAN FISH PROVERBS

1. Canadian fish gets its superb flavor because our waters—both fresh and salt—are always pure and cold.

2. Canadian fish is an excellent source of Vitamin A — which promotes growth and enables the body resist disease.

3. Canadian fish furnish Vitamin D—vital to proper bone formation in children, and helps to prevent rickets.

4. Canadian fish supply calcium and phosphorus, which are required for building sound bones and teeth.

5. Canadian fish are available all the year round — fresh, frozen, canned, or otherwise processed.

6. Combine Canadian fish with bacon and help the farmer.

7. Combine Canadian fish with milk, and get two essential food elements in one dish.

8. Eat Canadian fish once a day for the nutritive value and energy it furnishes — particularly when the wind blows cold.

WORLD PARLEY MAY BE HELD ON GRAIN SALES

London, Dec. 10—A world conference to consider plans for increasing wheat prices by co-operative action may follow a meeting here Jan. 10 of the international wheat advisory committee.

Canada is one of the 21 nations represented on the committee which will meet to consider what recommendations it should make to individual governments to cope with the present wheat crisis.

It has been stated it is almost a certainty the committee will recommend full dress world conference of leading importing and exporting nations, the first since 1933. It would consider definite proposals to raise wheat prices by such method as export quotas, fixed minimum prices, and acreage control, or a combination of them all.

International action would be predicated on the theory that present low prices reflect a chonic maladjustment of world wheat trade which can be corrected only by artificial means.

"THE LARGER HEART"—
(Raymond Crawford in Canadian National Railways Magazine)

Once more we approach that season which, for a day at least, differs from every other part of the year.

And then, they say, no spirit can walk abroad,
The nights are wholesome, then no planet strikes.
Nor fairy takes, nor witch hath power to charm,.
So hallowed and so gracious is the time.

So Shakespeare,, in one of his greatest dramas. It was a quaint fancy, coming from a far off time, that on one happy night these enemies of man were restrained, and left him free from fear; but behind the legends and the superstitions is a solid truth which would amply repay consideration. We do not believe in sprites or fairies, good or bad, nor in spectres with malign intent; but we cannot escape the patent fact that there are forces operating which are inimical to human well being, forces which are incompatible with the Christmas spirit, nor can we escape the fact equally evident that there IS a Christmas spirit, which, if it were universal, would go a long way towards the rectification of most of the evils that infest the world and society.

In cynical mood we may discount the genuineness of this spirit, we may call the congratulations superficial if not hypocritical, and our gifts a kind of exchange, a quid pro quo. But our felicitations are not all hollow nor are our gifts all prudential. Even the Scrooges soften in this genial atmosphere and on Christmas day we seem to experience a self satisfaction. That satisfaction arises from the fact that then at least we are normal and therefore human. Sentiments are evoked, and memories recalled of other days, and the solid and it may be simpler life in the home that takes on an added interest the farther it recedes into the region of the past.

At Christmas too those who are more fortunate remember that there are other human beings in the world who have primal needs, and a spirit of fraternity enters into our tumultous life. In the pre-Christmas days we are goaded on, now by ambition, insensate, cruel and unscrupulous as it is manifesting itself in some of the nations of the world, now more restrained in the more ordered flow of social life; but we see the same old ape and tiger, active though restrained. In the post-Christmas days and after a short truce we will, to use the words of Kipling in another connection, "get into the game again with a double deck to play", and we will give our applause (and secret envy) to the man who emerges from the melee with the fullest hands. After all, it takes but a few things to change the face of the world and to work miracles in common life.

Of recent years there has developed a spirit of commercialization with a continuous reminder during the pre-Christmas season that there remain but "so many days for shopping." Poor old Santa Claus has been multiplied to such an extent that even the juvenile mind is confused and may indeed wonder how the kindly old gentleman can so frequently duplicate himself. But commercialism greatly aided as it is by intensive advertising has not yet disturbed the fundamental fact that Christmas is a great home festival and truly a season of giving rather than receiving. Perhaps, this thought is more fully realized in the older lands but even in the newer there is becoming apparent a greater appreciation of the fact that this is a season of peace, a season the family is reunited, a season for looking on the better side of things and finding the better part of those individuals with whom we make everyday contacts. It is well that there should be such a time of truce and fraternizing, a time in which to recall the real purpose of Christmas.

Once upon a time a great English poet heard in imagination the possible message of the Christmas bells. He thinks of the things he would have these bells ring out, and the things he would have them ring in, and among the latter are "the larger heart, the kindlier the hand". It is all very simple but this single prescription would bring new health and happiness to a tempestuous world. THE LARGER HEART, THE KINDLIER HAND.

MAIL EARLY

There is now only a comparitively few days left before Christmas for mailing. The work of Post Office Officials increase tremendously as Christmas draws nigh. The sending of Christmas presents by mail to friends at a distance is an excellent custom and no doubt causes pleasure to the sender and delight to the recipient. But in those last few days before Christmas when post office staffs are working at top speed for long hours, we wonder how much pleasure it gives them to have an avalanche of parcels and other mail matter hit them. They want to give service—they do give service, but they do desire the public to mail Christmas matter as early as possible.

The hired girl had been sent down to the brook to fetch a pail of water, but stood gazing at the flowing stream, apparently lost in thought.

"What's she waiting for?" asked her mistress, who was watching.

"Dunno," wearily replied her husband. "Perhaps she hasn't seen a pailful she likes yet."—Wall St. Journal.

Grey Owl Leaves Estate To Family

PRINCE ALBERT, Dec. 6.—Net estate of $14,502 left by Archie McNeil, widely known as the author and wild life lover, Grey Owl, will be divided between his wife, Yvonne, who is known as Silver Moon, and Grey Owl's daughter, Shirely Dawn.

Probate of the will was granted the Toronto General Trusts corporation, Saskatoon, by Judge Doak in surrogate court Monday.

Grey Owl bequeathed an indefinite amount to Anahareo, whom he described as "my one-time companion," to be allowed her according to her need, illness or distress as long as she lives apart from any man.

H. J. Fraser, solicitor for the executor, said he will make application to the King's bench court for an interpretation of the will.

"In memory of the affection, fidelity, confidence and inspiration given me by these fellow creatures of the wild" Grey Owl requestted the Canadian government to allow Jelly Roll, Rawhide and all the other beavers that were his care and attention in Prince Albert national park be allowed to live out their natural lives in peace in their present habitat and under no circumstances to be sold or parted.

Original manuscript found in his possession, relics, souvenirs, equipment regalia and his weapons, he bequeathed to "the people of Canada" asking that these be placed in the museum at Prince Albert national park.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "The Crop Testing Plan."

A dream after O. Henry's story "THE GUILTY PARTY".

The other night I fell into a disturbed sleep after reading the sad news from Europe, I had a vision that the affairs of this world were being tried by the Great Ultimate Court. In the prisioner's box stood certain all-powerful Dictators. "They ar charged" said the official prosecutor, "with having invaded other people's lands, with having threatened to bomb cities, and having brought destruction, death and suffering upon thousands."

"It was not altogether their fault" said the defending counsel as he made explanations to the Court. "Bring before us then" said the Great Court, "the other parties who are equally guilty. Those statesmen who raised tariffs and imposed restrictions against commerce, which made it impossible for these Dictators to obtain foodstuffs and other products their people needed."

"But if it please the Court", said the angel defending absent ones, "These statesmen who raised tariffs did not fully realize then what the disastrous consequences would be". "Then all the more guilty are they" said the Great Court, "for those who have power over others should ever attempt to foresee the ultimate consequences of their acts."

"I am glad it was only a dream" I said to myself, as I awakened with a shiver.

Following factors have tended to raise price, Continued demand for wheat in India; Moisture deficient over large areas in U. S. A. winter wheat belt; Active European demand for Argentine corn; India buys Canadian wheat; Insects damage Argentine crops; Sharp reduction in U.S.A. winter wheat acreage; Chile limits shipment of winter melons.

Following factors have tended to lower price: Commercial estimates of Argentine wheat crop 280 to 300 million. Yields in Cordoba and Santa Fe about average; Belgian millers instructed to grind 40 per cent native wheat; Britain agrees to purchase large quanities of U. S. subsidized wheat; Germany makes barter agreement for wheat and corn with Roumania.

J. Percy Page President Edmonton Unity Association

Edmonton, Dec. 10: J. Percy Page, internationally known coach of the Grads Basketball Team, was elected President of the Edmonton Constituency Unity Association at a meeting of that body held here December 5.

Members of the Association, which is affiliated with the Unity Council of Alberta, also elected a directorate of 36 citizens, including four vice-presidents: Mrs. E. C. Pardee, Mrs. W. D. Ferris, Henry J. Roche and Colin D. Mac Kenzie.

It is expected a meeting will be held early in the new year to elect six members to the Unity Council.

Camrose, Dec. 10: John D. Johnstone, a farmer of the Ferintosh district, was elected to represent those favoring united political action in this constituency on the Unity Council of Alberta at a meeting here December 7.

The new council member has had a wide experience in Farmer Co-Operative, Municipal and School matters.

Betty Barclay's Food Facts

The Lima Bean

Before preparing these paragraphs I opened "Telling Fortunes With Foods" and found the dried Lima bean listed as having 41.65 degrees of alkalinity per 100 grams—almost twice as high as tis nearest competitor.

Picking up he United States Department of Agriculture's famous Bulletin No. 28, I found this same food listed as having a average fuel value per pound of 1,625 calories—an extremely high rating.

These statements may be technical, but should prove interesting to those seeking inexpensive nourishing foods with a decided alkaline reaction as balancers for the necessary acid-reaction foods that form such a large portion of our diet. Cooked dried Limas are available anywhere in cans and with cold weather coming, such foods should be stocked heavily.

Don't be content with a plain dish of Lima beans occasionally. This food lends itself to soups, salads and main course dishes of various kinds. Here are two exceptionally good recipies as samples:

Limas with Sausages

1 cup cooked dried Limas
½ pound sausage
1 medium sized onion
1 cup tomatoes
½ teaspoon chili
½ teaspoon salt

Fry onions and sausage until well done. Add other ingredients and simmer for 30 minutes.

Lima Timbales

2 cups cooked, dried Limas
2 tablespoons butter
2 tablespoons chopped onion
1½ tablespoons flour
½ cup milk
1 egg slightly beaten
½ cup chopped walnuts
¼ teaspoon pepper
½ teaspoon salt

Rub Limas through a coarse seive. Melt butter add chopped onion and cook until yellow. Add flour, stir constantly until creamy Add pureed Limas, egg, salt, and pepper. Pack in buttered timbale molds or custard cups and place in a pan of hot water. Bake in a moderate oven (360 degrees F.) for about 20 minutes. Turn out and serve with tomato sauce.

Christmas Seals Help

This is the time of the year when most likely you are included in the number of people who have received a letter, containing a number of Christmas Seals and an appeal in the name of charity that has a very special claim on your sympathy.

It is an appeal for the unceasing work done towards the prevention and treatment of tuberculosis, with which the Edmonton Kinsmen club has especially associated itself in northern Alberta for the past number of years.

The sponsors of this appeal can make truthful and still wonderful and inspiring claims for the beneficiencies accomplished by the sale (at your own price, for it is left to you) of these little illuminated stickers, which you can put on all your Chrismas letters and parcels, to remind your friends as you remind yourself, that this also bespeaks the good will of Christmastide.

Thousands of dollars have been collected in this manner across Canada, and have been devoted to this useful cause, by which the thing which was once a great white plague of our civilization has been increasingly brought under the subjection of a hopeful crusade.

Can't Scare It Off!

"Lighthouse no good for flog," said the Chinese newcomer. "Lighthouse he shine, whistle he blow, flog bell he ring—and flog he come just the same. No good!"—Pearson's.

Reprimand

"Hey, waiter!" shouted the impatient diner.

"Sorry, Sir, we don't serve it," was the waiters reply. — Manchester Evening News.

Mose: "Do you think you kin support mah daughter?"

Rastus: "Ah shuah do."

"Ever see her eat?"

"Ah shuah has."

"Evah see her eat when no one was lookin'?"—Edinburgh Dispatch.

She: "That's a lovely hat, dear, let's go buy it."

He: "Certainly, dear, right by it."

Christmas Seals purchases last year provided services to 100,000 Canadians — one in every hundred of our population. And this is a little reminder to you, that you should give what you can.

Headquarters of the Christmas Seal Sale are located at Heintzman Hall 10139 Jasper Avenue, Edmonton.

1939 FORD CARS AND NEW MERCURY 8

PICTURED above are the two Ford V-8 cars and the new Mercury 8 announced by Ford Motor Company of Canada, Limited, for 1939. Top, Ford V-8 Fordor Sedan; centre, DeLuxe Ford V-8 Fordor Sedan; bottom, Mercury 8 Town Sedan. All three cars are individually styled. All have hydraulic brakes. The Ford V-8 is available in three models. It has a full grille and unobtrusive louvres at the rear of the hoodsides. Interiors are roomy and well-appointed. The Deluxe Ford V-8 has wholly new streamlines, a deep hood unbroken by louvres, a low radiator grille in bright metal and wide spaced headlamps. Both Ford cars are powered with the improved 85 horsepower engine. The Mercury 8 is entirely new to the Ford-Lincoln line and fills a place between the deluxe Ford and the Lincoln-Zephyr. It is a big car with a 116-inch wheelbase. Its V-8 engine develops 95 horsepower. The front end design with low radiator grille reflects Lincoln-Zephyr styling. There is a choice of four body types.

Make bad roads good roads WITH GOODYEAR LUG TIRES

These big, husky Goodyears are designed to keep trucks, buses, tractors and graders on the move. They provide maximum traction forward and backward in deep mud or snow. Ride quietly and smoothly on hard and improved roads.

Ahem!

The members of the committee had a knotty problem before them, the solution of which seemed feasible to all except the only lady member.

With a little exasperation came the question, "Madam, can you please explain why some women are made so beautiful, and yet so dumb?

Quickly came the reply: "Sir, we were made beautiful so you would love us, but dumb so we would love you!"

UNITED CHURCH TO PRESENT PLAY

A two act comedy together with other vocal and instrumental entertainment at the Variety Theatre on Friday and Saturday of this week. "Mr. Bobb" is a two act comedy that when presented by a local well known cast, will cause much laughter as well as holding interest until the last line. Other items include solos, by favorite local artists as well as orchestra numbers by a local orchestra.

The programme promises to be an excellent one and is sponsored by the Ladies Aid of the United Church.

DAIRY PRODUCT MARKET BOARD IS NOW URGED

Establishment of an expert marketing board to regulate butter and other dairy products will be sought by the Alberta Provincial Cattle Breeders' Association, it was decided at the annual meeting to press the federal government to start legislation creating such a board.

Advantages to the producers would occur from orderly market, it was stated, as it would be possible to maintain a more even price level in the home market.

The association will also seek the establishing of marketing board legislation similar to that in operation in British Columbia, and requested in a resolution that Hon. D. B. Mullen, provincial minister of agriculture, take the initiative in calling a meeting of the ministers of agriculture and producers of the three prairie provinces to discuss uniform legislation in this connection.

On the motion of J. Russell Love, Edmonton, the association will make representation to Ottawa seeking protection for the dairy industry against importation of vegetable oil products, it being claimed that such products are rapidly displacing butter in Canadian kitchens for cooking purposes.

Appreciation of the federal government's efforts to increase the markets for Canadian dairy products was expressed in another resolution, which also asked that this service be extended.

A COLD WEATHER DISH

Macaroni with Beef Brisket

Macaroni is the hostess' best friend in every season of the year for its economical bounty. Everyone seems to like it. Try your luck with macaroni and beef brisket casserole.

1 lb. macaroni
3 stalks celery
2 small onions
1 small can tomatoes
1½ lbs. brisket of beef
2 carrots
1 clove garlic
Salt and pepper

Cover meat with cold water, and add chopped celery, carrots, onions and garlic. Boil meat until tender. Drain off and keep broth. Chop meat and vegetables. Cook macaroni in boiling salted water until tender. Drain. Place a layer of cooked mac. around in bottom of baking dish, add a layer of chopped meat and vegetables, and then a thin layer of tomatoes. Sprinkle with salt and pepper. Repeat finishing with macaroni. Season broth with pepper and salt and pour over mixture in baking dish. Bake in moderate oven (375 degrees) for one hour. Serve hot.

Note: Spaghetti, egg noodles, vermicelli or other forms of macaroni products may be substituted for the macaroni in this recipe.

****

Coconut Pineapple Macaroons

½ cup sweetened condensed milk
2 cups shredded coconut
1 cup crushed pineapple
Few grains of sault

Blend together sweetened condensed milk, shredded coconut, crushed pineapple and salt. Drop by spoonfuls on well buttered baking sheet one inch apart. Bake in moderate oven (350 degrees) 10 minutes or until a delicate brown. Remove from pan at once. Makes about 30.

Helpful

One evening, tired after a difficult day, the American statesman handed the menu back to the Negro waiter and said: "Just bring me a good meal." He put a generous tip on his plate.

A good meal, a very good meal, was served. This happened several times.

When he was waited upon for the last time by the Negro, the statesman trebled the tip as a good-by gesture. Just before he was ready to leave the table, his now devoted waiter leaned over his chair confidentially.

"Thank you, sah," he said; "an' if you done got any othah frien's what can't read, you jes' send 'em to me sah."—Tit-Bits.

****

What does your husband like for his breakfast?"

"Oh, anything I haven't got in the house."

SHORTHORN MEN PLAN TO CURTAIL SOCIETY EXPENSE

Expenses of the Canadian Shorthorn Breeders' association were too high and should be curtailed as soon as possible to keep the association on a sound business basis, was the general opinion of members of the Alberta Shorthorn Breeders' association, who gathered in Lacombe for their annual meeting.

A resolution expressing "necessity for retrenchment without curtailing necessary services" was passed and will be forwarded to the Dominion body.

Officers for the association were elected as follows: President, C. Gallanger ,of Tofield; vice-president, E. Boak, Acme; secretary-treasurer, W. D. MacDonald, Grainger. J. W. Durno, of Calgary, was appointed as fieldman.

Free Candies For The Kiddies

On Tuesday next Sharp's Shows will present "White Banners". This is a picture with family appeal and one that has won aclaim wherever shown. This immortal story will show you the true secret of happiness — show you how to turn your white flags of defeat into white banners of victory. There is a galaxy of stars including Claude Rains, Jackie Cooper, Fay Bainter, Bonita Granville and many others.

In addition there will be shown "Out Where the Stars Begin", "Mail and Female", "News of the Day". This is going to be a real Christmas program and to make it even more so there will be FREE CANDIES GIVEN AWAY FOR THE KIDDIES. Come yourself and bring the whole family. Show starts at 8:30. Usual admission.

COLINTON FARMER LOSES PURSE, $600

Loss of $600 in a black leather billfold as he was walking from the Bank of Commerce at Jasper and 101 st. to the McLeod bldg. on 100 st., via Jasper ave., was reported to police Wednesday afternoon by H. E. Cook, 55-year old Colinton farmer.

Cook said he had cashed a $500 seed cheque at the bank and had put the ten $50 bills in his wallet with $100 already there. He placed the wallet in his back pocket and missed it when he stepped out of the elevator in the McLeod bldg. The $100 consisted of $10, $5, $2, and $1 bills.

There was a possibility the money had been stolen by a pickpocket, Mr. Cook said, but he did not remember anyone jostling him.

REQUIRE CATTLE HAVE TAIL LIGHT

WALLACEBURG, Ont., Dec. 12— Instructions have been issued to police by Deputy Reeve Shirley, chairman of the town council's police committee, that all cattle being driven through the town at night must wear a red tail light.
